2C_Hospitals_and_Misc_Security

This is a link to the Wiki at Scan Mass.

If anybody knows the PL for the Capitol Police on 453.500 please
post it.

Also 151.325R and 460.450 come back to the West Greenwich RI area
Envionmental Police?

Feel Free to add to the Wiki

I spend most of my weekends in RI, so all of these F-s have been
confirmed either by me personally or by FCC License Application
notes.

Thanks

I've been been monitoring Capitol Police on 453.500, but my 396 is not picking up a PL for some reason. PL search is working ok on everything else. I'm going to program it into my 2055 in my car and see if I have any luck.

Don

Don't see any posting on this list regarding active Army National Guard
Radio Nets

Grove's "Military Frequency Directory" 2nd edition indicates that the
following frequencies
might be in use in the state:

139.0125
139.0375
139.0625
139.0875
139.1125
139.1375
139.1625
139.1875
139.2125
139.2375
139.2625
139.2875
139.3125
139.375
139.3625
139.3875
141.25
143.325

You can find the location of the various armories/units at:
http://www.riguard.com/modules.php?name=Content&pa=showpage&pid=43

Additionally an ARNG Helicopter unit is located at Quonset State Airport
(North Kingstown) that
may operate on the following frequencies: 38.95 & 252.4 (callsign:
Ladon Ops

So please put the above frequencies or at least search 139-140 bands, and
see if you can hear
any activity on these frequencies. The best chance for monitoring activty
would be when the units
are performing their weekend training.

Please post your results to this list.. Thanks!!!

Ken

From: Scott Halligan
Topic: 11 Message: 14

Trunker's not going to work on that system, it's 9600 baud. I've tried to use UniTrunker from here, but I'm just too far away under normal band conditions, and Mother Nature hasn't been overly cooperative as of late for openings to the west and southwest of my location. It's also my understanding that the Portsmouth site is not online yet, which doesn't help my reception any. Eric C. was able to capture some data from the system, as I recall. As I recall he may have posted it at my site.

15. Rhode Island Capitol Police

Yahoo group: Scan-RI
Date: 2006-05-02 04:36:35 UTC
From: robkb1fjr
Topic: 15 Message: 15

The Rhode Island Capitol Police look like the RI State Police, however they do not have the Campaign hats, they have regular looking Police Officer Hats. The uniforms are almost the same as the RI State Police except that they do not wear a brown leather belt. They are armed and provide security and law enforcement to all state buildings (Except State Colleges which have their own Police and State Hospitals which have no Security Force), courts and the State Capitol Building on a 24 Hour Basis. The RI Sheriff handles Prisoner Transportation, Court Officer Operations, Court Room Security and Civil Process (Paper Serving). The RI DOC runs the Prisons and Jails in RI.

During the big protest march on Monday May 1st in Providence. I took a vantage point inside Borders Book Store. I had the scanner on close call and set in priority mode on 453.500, pl search. Maybe I missed something but I didn't hear a peep on 453.500, which is supposed to be the Capitol Police, Close Calls netting nothing new but a bunch of Remote Broadcast TXrs from nearby news vans. I did however learn that their is a Cab Company on the 152/157MHz area that uses encryption. Amtrak Police (161.295)Providence Police and RI State Police all were in this area as was Allied-Barton (AKA Providence Place Mall Security) keeping an eye on this whole march. I did see a Capitol Police Officer though, from far away it didn't look like he had a radio. Since these Capitol Police officers are scattered through out the state at various locations and with the proliferation of NEXTEL, maybe the RI Capitol Police are using NEXTEL now? I have been interested in finding the RI Capitol Police Frequency ever since someone drove a car up on the State House Steps.

18. Civilian Aviation Monitoring Frequencies/Other Information Sources

Yahoo group: Scan-RI
Date: 2006-05-12 00:47:36 UTC
From: Ken
Topic: 18 Message: 18

Aviation monitoring can be interesting at times. Especially monitoring the UNICOM, MULICOM, Flight Test, Flight Instruction, and informal air/air frequencies in the 121/122/123.XXX frequency range. There also can be some interesting air/ground comms in in 128-129, 131-133, 136-138 mhz ranges.

A fairly good listing of these frequencies can be found at:
http://www.monitoringtimes.com/html/mtcivair.html

Additionally for various airports tower, ground, and other frequencies here's some other sites:

http://www.fltplan.com/ (airport info or find nearby airports) -- I like this website because it has a fairly up to date listing of Fixed Base Operators -- eg the folks who fuel/park, etc those business jets as well as various small aircraft. It also gives you info on official FAA approaches & airport diagrams of many of the airports.

http://www.airnav.com/airports/ -- another way to get listings of airport frequencies next to you. Generally the FBO's won't be listed in this site, but using both of these sites will give you a good idea of the FAA Air Traffic Control Freqs, as well as general aero support freqs

http://svartifoss2.fcc.gov/reports/index.cfm -- FCC Official frequency website -- You can do a search by frequency ranges state, state/county, radius, etc, which can provide some interesting results. Pay special attention to the address on the licenses especially those licensed to ARINC and/or AKA Aviation Spectrum Resources. This company provides turnkey licensing & radio communications equipment to the airlines as well as other aviation users.

http://www.arinc.com/products/voice_data_comm/air_ground_radio_svc/jeppesen_charts/vhf_radio_networks.pdf
-- This is ARINC's air/ground, ground/air specialized voice VHF radio/telephone patch system. In our area 129.4 is used, the chart will show you nationwide freqs.

Some other very good sources that can provide you with additional information to aid you in "on scene" monitoring, as well as monitoring while fixed, mobile, or portable.

http://tfr.faa.gov/tfr2/list.html - FAA OFFICIAL SITE -- Temporary Flight Restrictions -- this is a real time listing of areas that have flight restriction implemented due to Space Flights, Airshow/Sports, Security, Hazards, HI Disasters, VIP, Special, Search & Rescue.

http://www.faa.gov/ntap/ FAA OFFICIAL NOTICE TO AIRMAN --
this will you notice of any changes to naviagation aids as well as scheduled

upcoming events that will impact aviation & sometimes give supplemental frequency information.

http://www.naco.faa.gov/index.asp?xml=naco/online/d_tpp FAA OFFICIAL DIGITAL CHARTS -- this will give you graphic information charts on approaches, departures, as well many airport diagrams that will greatly aid you on any "on scene" activities Usually frequencies are listed in the chart also.

http://skyvector.com/ -- This will give you an on line view of Visual Flight Rules Aviation Charts for your area, so that you can get an idea where planes are flying and also includes frequencies of those airports tower/unicom.

www.flightaware.com -- Input your local airport and this will show you aircraft inbound/outbound, registration # (owner), type of aircraft, etc. If you register (free) you get 45 days history for the airport. You can also follow a specific aircraft where ever it goes. Some aircraft are blocked out. Their is a visual map that keeps track of the aircraft you are interested in in near real time.

http://registry.faa.gov/aircraftinquiry/defimg.asp -- FAA OFFICIAL Site -- If you see a tail# on an aircraft at your local airport you can input it into this data base and it will give you the owner & owner/address.

http://www.uspa.org/dz/index.htm -- Parachute Jumping Areas -- not a complete list but gives you an idea as to where you can watch & monitor via radio sky diving activities. There's a link to the various training centers at the specific airport.

Also remember that whenever law enforcement, fish/game, military, tv news media aircraft/helos are flying around they will just about always be in radio communications with the respective area Air Traffic Control facility, depending upon their altitude. This can also be quite interesting.

I think all scanners sold today pretty much cover the 118-136 mhz aviation band, and I would encourage each of you involved in typical fire/police/ems, etc. radio monitoring to give aviation monitoring a try. If you are upgrading your scanner, probably one of your older ones could be dedicated to aviation monitoring Again it can prove to be very interesting/exciting at times.

PLEAES post your aviation monitoring adventures to the list.

Ken

Hello folks:

Another very good site for airport information & airport frequency information is: http://worldaerodata.com/US/
What I especially like about this site is that it lists non public FAA designated landing areas such as heliports & even hot air ballon launching areas. Check it out!!!!

COAST GUARD, RHODE ISLAND TO ENTER INTO
FORMAL PARTNERSHIP AGREEMENT
TO SAFEGUARD STATE WATERWAYS

Boston, MA. – Rear Adm. David Pekoske, Commander, First Coast Guard District and Rhode Island Governor Donald L. Carcieri will formalize an important maritime security partnership at a signing ceremony to be held at the Rhode Island State House, State Room, at 2 p.m. Friday.

The partnership, known as a Memorandum of Agreement, allows Coast Guard law enforcement crews and Rhode Island law enforcement officers to better work together to ensure the safety and security of Rhode Island’s waters and waterfront facilities, including those in the Port of Providence. Under the terms of the agreement, Rhode Island law enforcement officers, working with the Coast Guard, will have the authority to stop and board vessels and take enforcement action against persons violating Federal safety and security zones created by the Coast Guard.

The Memorandum of Agreement will enhance a long-standing, strong relationship between the Coast Guard and the State of Rhode Island, and will allow for more effective use of enforcement resources in Rhode Island. The Memorandum of Agreement incorporates recent changes to Federal laws specifically targeted at strengthening the ability for state

enforcement officers to assist the Coast Guard.

“As Governor, protecting the safety and security of the people of Rhode Island is my top priority,” Governor Carcieri said. “By providing Rhode Island's law enforcement officers with the authority they need to enforce the Coast Guard security zone in Rhode Island waters, this agreement will help us accomplish that critical goal. By strengthening the relationship between our state and local police departments and the U.S. Coast Guard, we have enhanced our ability to protect Rhode Island and to safeguard our citizens.”

“We are reaching across traditional agency boundaries to make our Nation’s maritime domain safer,” said Rear Adm. David Pekoske, Commander, First Coast Guard District. “As lead agency for Maritime Homeland Security, close cooperation with our law enforcement partners at the federal, state and local level are critical to ensuring the security of the American people. This agreement further strengthens the close ties we have with Rhode Island’s law enforcement community,” he said.

21. Central Falls, RI Fire new frequency

Yahoo group: Scan-RI
Date: 2006-06-08 14:00:22 UTC
From: Ken LaBelle
Topic: 21 Message: 21

Hello group,
Central Falls RI is no longer operating on the old
Pawtucket Frequency [154.445]. They are now on their UHF channels as
follows.

472.4125R Dispatch D565
453.8875R FG 1 [Testing not in use]
458.9125S FG 2 [Testing not in use]

Thanks, Ken

25. AIRSHOW ALERT - Westfield International Airshow!

Yahoo group: Scan-RI
Date: 2006-06-17 15:27:11 UTC
From: Ken
Topic: 25 Message: 25

OVERALL INFORMATION:
2006 Westfield International Airshow (and base open house)
Location: Barnes Air National Guard Base/Municipal Airport, Westfield, MA
Show Dates: 6/24 & 6/25/06 (with preshow arrival activities 6/23/06).
Website information on directions/parking, performers/static
displays/security requirements, etc:
http://2006westfieldairshow.org/

POTENTIAL FREQUENCIES TO MONITOR:
AIR TRAFFIC CONTROL:
Barnes Ground Control: 121.7/289.4 (simucast)
Barnes Tower: 118.9/251.1 (simucast)
ATIS (continuous airport info): 127.1
Bradley Approach/Departure Control: 125.35/325.8
Burlington Flight Service Station: 113.0(T), 122.1(R)

OTHER AVIATION SUPPORT:
Fixed Base Operators (FBO's):
*Five Star Jet Center: 130.625 (licensed to Aeronautical Radio Inc)
(this is the building right to new terminal building)
*General Dynamics: 131.725 (corporate type jets) (licensed to Aeronautical
Radio Inc).
(this is on the other side of the field & caters to business jets)
*Air Flyte: 122.95
(this is next to the control tower/admin building)

MILITARY AERO COMMAND POSTS (most AM mode):
104 FW Command Post "Hawk Ops" 138.25 (Maintenance)/143.825, 303.0
(inbound aireraft will
use 303.0)
Army National Guard Aviation Support Activity (Helos) "Minuteman Ops":
46.75 (NFM). 123.05, 356.3

AIRSHOW PERFORMERS (all AM mode unless indicated otherwise):
US Navy Blue Angels (Thanks to Dan from PA for his efforts):
346.5(#18) Solos
237.8 (#8) Solos
275.35 (#9)
284.25 (#16) Solos & Diamons "Air Show Box Area"
305.50 (#10): Fat Albert (C130) take off
255.20 (#17)
Maintenance Support (NFM): 139.8125, 142.6125

T6 Demos: 283.7 possibly
F15 Demo: 384.85

"Monitoring Times" magazine March 2006 edition has a large listing of potential
airshow frequencies used by a number of performers

Civilian Aerobatic Performers: 123.15, 123.475. 123.45 (probably 1 or 2 others)
Potential A10's air/air: 139.9, 141.675, 41.45 (NFM), 36.35 (NFM), 36.825 (NFM) 41.95 (NFM) 34.55 (NFM), 38.65 (NFM)
Air Show Control: Will probably be either the tower or ground control freqs (VHF & UHF)

AIRSHOW SUPPORT NETS (NFM mode, possibly some P25):
Security: 148.45 & 150.325
Show Control: 148.475 (possible)
Other Military Support nets: search the band 148-150.8, 138-144, & 406-420 mhz.

Refer to Grove's "Military Frequency Directory" 2nd edition for additional base support & air/air frequencies

LOCAL PUBLIC SAFETY SUPPORT (all NFM mode, no P25 in use):

Law Enforcement:
On Scene: 800 mhz ITAC repeater & simplex: 866.0125/.5125, 867.0125/.5125, 868.0125
Westfield PD: 859.9375, 858.2375
Holyoke PD: 159.21R, 158.955R
Southampton PD: 460.3625R
W.Springfield PD: 867.7875R
Mass State PD:
Troop B Trunking System: 852.2625, 857/858/859/860.7875
MSP car/car: 868.95, 868.9625, 868.975, 868.9875
MSP Low Band: 42.46, 42.50, possibly also 42.44, 42.34, 42.50, 42.54
MSP Troop E (Mass Turnpke): 159.225R, 159.03R, 42.42 (Station E3 Westfield), MSP Trunk Talk Group
Area Law Enforcement Coordination Nets: 155.475/460.225/858.7375, 460.475 secondary encrypted

Fire:
Westfield FD: 154.43R, 153.83
Holyoke FD: 159.645R
W. Springfield FD: 866.475
Area Fire Coordination Nets: 154.28/453.4125, 154.37

Emergency Medical: 159.4125, 155.34, 155.205, 463.075, & other common UHF med freqs for ambulance/hospital comms

Barnes MAP Airport Authority: 153.920

Refer to Scanner Master's "Southern New England Communications Guide", 10th edition & "Police Call Frequency Directory" 2005 for additional frequencies.

ADDITIONAL COMMENTS:

PRESHOW ARRIVAL ACTIVITIES (8/26/05):
Many radio hobbyists will be parked near the civilian airport administration building/tower on 6/23/06 starting around 0900 hrs and remaining throughout the day. Generally we will be monitoring FRS Channel 14 / CTCSS 38 (secondary Channel 5, CTCSS 15) (I'll be using the callsign "NIGHHAWK 001"), but
anyone new to this "on scene" monitoring adventure shouldn't have any problem finding the group. Generally static aircraft will start to arrive around 0900 hrs and there will be periods thoughout the day when civilian performers as well as the Blue Angels practice:
NOTE: DUE TO CONSTRUCTION OF THE NEW AIRPORT TERMINAL/ADM BUILDING PARK IS VERY LIMITED (approximately 100 parking spaces), & somewhat limits viewing
so parking your vehicle & brings some lawnchairs to set up in the gated/fenced observation area outside
the admin/terminal building may be the best alternative.

Additional very detailed information on Barnes MAP can be found at: http://www.barnesairport.com/ There is a snack bar ('Flight Deck Restaurant." on site that is open on Friday as well as restroom facilities.

SHOW DAYS (6/24 & 6/25/06):
I'd strongly suggest arrivall as early as possible (e.g. right at 0800 hrs open time so that you get a parking space next to the show area). Also expect VERY long delays in leaving the area after the show. In 2003 it took almost 4 FOUR HOURS to clear all of the parking areas. So pack a supper!!! RELAX!!! Also on the day of the show I would expect that at least one of the "wagon guys" will be in attendance somewhere on the show line. From past experience. hobbyists generally use "the wagon guys" set up as the meeting point to say
hello. FRS communications on 14/38 would be a secondary method of finding hobbyists in attendance.

I hope that many of you will have the opportunity to attend both "pre show arrival" as well as this superb airshow/base open house. Hopefully I'll get to meet many of you (from the various milcom related as well as general scanner lists) this year!!!

Ken

26. Another Airshow Alert -- Rhode Island Airshow

Yahoo group: Scan-RI
Date: 2006-06-17 17:28:18 UTC
From: Ken
Topic: 26 Message: 26

Well for those of you that can't make the Westfield show, there's also a show & military base open house at Quonset State Airport, RI featuring the Thunderbirds (6/24 & 6/25/06). (Unfortuantely, both shows -- one with the TBirds & the other with the Blue Angels ended up being scheduled for the same weekend, and it might be a bit challenging for most folks to attend both shows, BUT ....) Hopefully many of you in Rhode Island & Southeastern MA will make it to this show!!!

Rhode Island Airshow information can be found at:
http://www.riguard.com/modules.php?name=Content&pa=showpage&pid=52

As stated before "Monitoring Times" magazine March 2006 edition has a complete list of airshow frequencies that might be used.

Potential Thunderbirds demo teams freqs may be:
AM Mode:
140.40
141.85
143.85
235.20
235.25
322.95
142.575 (NFM)

Mike Goulian & other civilian aero performers: 123.15
Sean Tucker: 122.95
Other potential civilian: 122.75, 122.775, 123.475
(courtesy "Monitoring Times" magazine)

Combined Arms demo: 303.0 & 383.3

As far Aero frequencies at the airport
Checkout: http://www.airnav.com/airport/KOQU
military UHF Tower add: 252.9

Regarding support frequencies check out Grove's Military Frequency Directory 2nd edition
also (posted in 2005 by Rob to the RI list):
141.80R Security
148.50 Base Medical
149.475 Fire Crash Net
Also
Basically searching the 138-144, 148-150.8 mhz area might find some new frequencies in use

My previously monitoring notes (2003/2004 time frame) also shows the following potential frequencies:

ON BASE RADIO SYSTEMS SUPPORT:
Security (& air show common): 141.8 Repeater/143.80 & 139.625
Fire/Crash: 149.475
Base Ops/Show Control: 148.225
Utilties Support & Comfort: 149.175
Airport Admin: 153.92 (155.04)
Medical/EMS: (probably the DMAT team on UHF 407 to 420 (search))
Misc others (potential): 139.75, 139.975, 141.625, 148.125, 148.45, 148.50, 148.55, 149.25, 149.725, 163.4625, 163.4875, 407.475, 413.125
Coast Guard Bay Security Support: 156.8, 157.15, 162.325 (other potential 157.075, 157.125, 157.05, 157.10, 157.175, 162.125, 162.25, 163.05, 163.175, 164.55)

Additionally Bill provided the following details to the former RI SCAN list in 2004:
National Guard uses the following
138.4000 S Ch.01 Maintenance
139.7500 S Ch.02 Age
139.3750 S Ch.03 Supply
141.6250 S Ch.04 Fuel
148.1250 S Ch.05 Aerial Port Sq.
148.2250 S Ch.06 Base Ops / Ramp Control
148.5000 S Ch.07 Medical
148.5500 S Ch.08 Commanders Net
149.1750 S Ch.09 Civil Engineers
149.2500 S Ch.10 Security Police
149.2750 S Ch.11 Motor Pool
149.4750 S Ch.12 Fire/Crash
141.8000 S 151.4 Hz Ch.13 with 143.800 as the input
this is listed as "SPS Repeater" might be Security Police S....

Civilian Local/State Public Safety:
State PD: 151.505, 155.61, 154.925, 154.905, 155.445, 155.19
On Scene Parking/Traffic Control: 155.475
N. Kingstown PD: 155.58R
Fire Dept: 154.235 Repeater
Emergency Medical: 155.22, 463.075 (MED4), 463.000 (MED1), 463.10 (MED5), 463.15 (MED 7).

I especially like the Rhode Island show because the parking area has no obstructions & the airshow narrator is broadcasted on in normal FM radio frequency, so if you get tired on the flight line you can go back to your vehicle and relax & still see (much of) & hear the narration of the show.

I think that both the "wagon guys" are going to be at the Westfield MA show this year, so for the Rhode Island show there won't be a common rallying point, so I'd suggest using FRS radios, with the typical channel 14/PL 38 configuration (467.7125 mhz/ ctcss 250.3 hz)

If you are going to be attending this show please let me know. I might try to do both shows this year!!!

Ken

27. RI Air Show Update

Yahoo group: Scan-RI
Date: 2006-06-18 23:54:01 UTC
From: Ken
Topic: 27 Message: 27

Appears that as early as Monday afternoon you will be seeing some aero practicing per
NOTAMS posted at the FAA site:

Airspace Definition:
TFR Center: 7.6 nautical miles from PROVIDENCE VORTAC(PVD) on the 188 radial (Latitude: 41?35'55"N, Longitude: 71?24'39"W)
Radius: 5 nautical miles
Altitude: From the surface up to and including 15100 feet MSL
Effective Date(s):
June 19, 2006 at 17:45 UTC (June 19, 2006 at 13:45 EDT) - June 19, 2006 at 19:00 UTC (June 19, 2006 at 15:00 EDT)
June 22, 2006 at 18:00 UTC (June 22, 2006 at 14:00 EDT) - June 22, 2006 at 19:30 UTC (June 22, 2006 at 15:30 EDT)
June 23, 2006 at 13:30 UTC (June 23, 2006 at 9:30 EDT) - June 23, 2006 at 20:45 UTC (June 23, 2006 at 16:45 EDT)
June 24, 2006 at 13:30 UTC (June 24, 2006 at 9:30 EDT) - June 24, 2006 at 20:45 UTC (June 24, 2006 at 16:45 EDT)
June 25, 2006 at 13:30 UTC (June 25, 2006 at 9:30 EDT) - June 25, 2006 at 20:45 UTC (June 25, 2006 at 16:45 EDT)

Again show information can be found at:
http://www.riguard.com/modules.php?name=Content&pa=showpage&pid=52

28. "The Wagon" Guys Status

Yahoo group: Scan-RI
Date: 2006-06-19 21:52:41 UTC
From: Ken
Topic: 28 Message: 28

Well here's some information that should be beneficial to those attending either air show/open house.

Dan (from PA) will be the Wagon Guy attending & setup on the show line at the Westfield International Airshow, Westfield MA this upcoming weekend.

Brian (from CT) will be the Wagon Guy attending & setup on the show line at the Rhode Island National Guard Airshow, Quonset State Airport, North Kingstown RI this upcoming weekend.

Again depending upon what show (or both shows if you body can stand the environmental punishment! :)) this would be an excellent assembly point for military radio communications hobbyists to at least meet at & also get a look at the impressive scanner radios /antennas / dc power setup (mounted on a wagon) that both Dan & Brian have engineered, implemented, & refined over the many years they attend these shows.

Also please note for those of you not on the military related lists, that the USN Blue Angels will also be performing at end of of September 2006 on Natucket Island for 1 day (not the usual two days).

Ken

30. RI Turnpike & Bridge Authority (Pell Bridge, Newport)

Yahoo group: Scan-RI
Date: 2006-06-23 01:11:33 UTC
From: cmpsa
Topic: 30 Message: 30

Hello:

I have a frequency of 153.020 PL 107.2 for them. Just recently when I listened to them when in RI, I heard them on a repeater system; not direct/simplex.

Anyone happen to know where their rptr might be located and what the input might be? Their FCC license on-line shows no rptr and only that one frequency of 153.020.

Thanks for any help.

31. Off The Shelf Low Power Portable Units VHF/UHF Potential Frequencies

Yahoo group: Scan-RI
Date: 2006-07-01 22:55:15 UTC
From: Ken
Topic: 31 Message: 31

Check out the following Motorola "Off the Shelf" portable units, relatively inexpensive
http://www.motorola.com/governmentandenterprise/contentdir/en_US/Files/ProductInformation/xtn_series_userguide.pdf

See page 37 VHF 27 channels
See page 38 UHF 56 channels

With the summer season in full swing these radios could show up anywhere, campgrounds, fairs, parades, amusement attractions, golf courses, etc...

Wonder how many of them are actually FCC licensed for operation?

Those with "close call" / "signal stalkers" capabilities may find the freqs in use that way IF close enough to the low powered units. Otherwise program a bank in your portable scanner with the information.

If you monitor any activity on these freqs please post your results to your respective state list!!!

Thanks

Ken

33. New England Ambulance

Yahoo group: Scan-RI
Date: 2006-07-12 12:16:03 UTC
From: Rob KB1FJR
Topic: 33 Message: 33

Anyone have the frequency and or LTR channel? I got a hit at the airshow (In North Kingstown, RI) 2 years ago on a UHF Frequency that came back to an LTR in RI (I forgot which one since I lost my notes), I saw the EMT keying the mic in the ambulance. New England Ambulance service also uses MDTS with GPS, in NE Ambulance Chair car the other day I saw what looked to be an Antennex style GPS/Cell Combination antenna and only and MDT inside the chair car

New England Ambulance since Feb of 2006 operates what is equal to a ground based version of life flight called Life Guard EMS with conjunction of RI Hospital (The only Level 1 Trauma Center in the State of RI).

I read in the local newspaper that Middletown RI will be switching to the 800 system within the next few weeks. Can anyone confirm this? Also what are the frequencies for this system? Are they using part of the RIPTA 800 system? I also have from a reliable source that the Newport Fire Depart has recieved a shipment of 800 Mzh Walkie Talkies.

Subject: [Scan-RI] Middletown RI New 800 frequencies

I read in the local newspaper that Middletown RI will be switching to the 800 system within the next few weeks. Can anyone confirm this? Also what are the frequencies for this system? Are they using part of the RIPTA 800 system? I also have from a reliable source that the Newport Fire Depart has recieved a shipment of 800 Mzh Walkie Talkies.

http://www.scancapecod.us/wiki/index.php/Rhode_Island_Digital_System

Plug that link into your browser, you'll see the frequencies and the talkgroups that are active on the system.

I was tuned into the trunked system last night and heard talkgroups:
1001 - Narr. PD
1050 - Westerly PD
1100 - Jamestown PD

My test case was only about an hour in duration so I didn't get a change to hear any other talkgroups but if you're south of Providence or have an external antenna in or north of Providence you should be alright.

Reception was a bit spotty in Pawtucket and got progressively better as I traveled south on I-95. Reception became perfect south of downtown Providence on a handheld Pro-96.

40. Lincoln RI Fire/Rescue on repeater and new FG

Yahoo group: Scan-RI
Date: 2006-08-01 16:32:09 UTC
From: Ken LaBelle
Topic: 40 Message: 40

Hi group,
The town of Lincoln, RI is now on a repeater system. We still operate on 154.16 71.9 as rx and 151.265 71.9 tx. We also have a simplex fireground for now until the mobile x-band equipment comes in. This FG is 155.595 71.9. Once the equipment comes in we will be able to talk from our VHF portables out to the neighboring depts of CFFD, Cumberland, and Pawtucket on UHF.

From: Ken
Topic: 41 Message: 41

Hello Hobbyists....

Here's a good little monitoring/searching project to work on for the next month/few months or so & report back to the list or privately to me if that's what you are more comfortable doing:

Try to determine if CAP is still operating in your area on the following frequencies:
143.75 Simplex (when authorized) (primarily a repeater input)
143.90 Simplex (when authorized) (primarily a repeater input)
148.125 Repeater & Simplex (143.75 Input) (CTCSS tone will be 100.0 hz and another specific for each repeater)
148.1375 Simplex Ground Operations
148.15 Repeater & Simplex (143.90 Input) (CTCSS as above)
149.5375 Simplex Air/Air, Air Ground
149.895 Digital Packet (with 75 miles of Canada, a different frequency will be used)

Aero Aircaft will ID normally as CAPFLIGHT XXXX, XXX
121.6, 121.775, Practice ELT Beacons (alternates 121.6, 121.65, 121.70, 121.75, 121.8, 121.85, 121.9)
122.9 Multi Comm (normally during practice exercises)
123.1 Actual Search Air Rescue Ops

Are any of the units in your area operating on the Intersquad Radio System (they would be using ICOM model IC 4008M's portables (1/2 watts) CAP made a large purchase of these radios, it has an antenna that folds down and looks like an frs radio, the ICOM site might still have a picture of it, it also has 38 selectable CTCSS, but my understanding is that generally the CTCSS option is not used)
396.8750-Channel 1
397.1250-Channel 2
397.1750-Channel 3
397.3750-Channel 4
397.4250-Channel 5
397.4750-Channel 6
397.5500-Channel 7
397.9500-Channel 8
398.0500-Channel 9
399.4250-Channel 10
399.4750-Channel 11
399.7250-Channel 12
399.9250-Channel 13
399.9750-Channel 14

Also CAP can operate FRS radios if it is not related to direct emergency support mission.

Determine if any of your local units have received & operating new radio equipment, this would include the following:
Tait Mobiles
EF Johnson Mobiles
EF Johnson Portables

Now comes the real monitoring challenge & fun!!!

Due to the military's rebanding of the high band VHF range (138-144, 148-150.8 mhz), to comply with new narrow band standards (12.5khz), to include digital P25, Civil Air Patrol will be upgrading equipment and all indications are will be changing to different frequencies within this band because CAP members have been instructed that the new frequencies will be considered FOR OFFICIAL USE ONLY, and won't be released to the general public which includes scanner hobbyists (we are as about unofficial as one can get!!!! :) ;) .... My understanding is that CAP will retain 2 nationwide repeater standard frequency pairs, and may gain more additional simplex frequencies than they presently have designated for their use within the VHF high band frequency ranges stated above. It's unclear as to whether CAP will be operating any radios in the P25 digital mode, but that is possible. Some indications are that radio reprogramming will take place in mid to late 2006. So there's a potential for new frequencies being in operation on one of the 12.5 khz splits (and that's what you should set your search for) e.g. 138.0125-143.9875, 148.0125-150.7875 (150.79 is used by local government/ems) at this time. Additionally, in areas where CAP has agreements to use other systems with VHF high band radios (138 to 174 mhz) than these may also be programmed into the radios. Apparently CAP operational plans will no longer have the frequencies listed but will have channel names (e.g. CAP Simplex 1, Air/Ground, etc.), Repeater names (geographic area), or frequency designators (e.g. AA, CA, which is in the CAP restricted comm reg), otherwise the plan will be restricted to Communications personnel. Of course it's unclear in actual practice how this will be implemented. My guess is that if the entire wing (state) or region (New England + Mid Atlantic states) is using the same radio channel/frequency setup than in practice they are just going to say go to channel 3, etc.... The user won't know the actual frequency BUT only the use per the plan, which is similiar to general public safety operations!!!

Remember IF you don't search, you won't find!!!

Ken

43. Additional Information Re: Civil Air Patrol Radio Comms Status Monitoring Research Project

Yahoo group: Scan-RI
Date: 2006-08-06 16:12:28 UTC
From: Ken
Topic: 43 Message: 43

Hello Bill & the groups

Thanks for your insight.

In order to assist hobbyist withn this "challenging" research project, here's some additional "deep" research information:

See: http://www.kenji-d.com/scanning/html/cap.htm
This is a current example of how the Tait Model T-2020 (special model for CAP) radio is programmed for CAP use. Notice that the repeater channels (to include ctcss) have a common name to them assigned nationwide and not by a specific wing or region & there's certain channel positions in the radio that wing's can utilize. I'd assume that if there's an agreement with another federal or state agency, than perhaps those specific frequencies would be programmed into those 'open' channels.

See: http://www.efjohnson.com/newsdetail.asp?id=157 -- This indicates that CAP purchase EF Johnson model 5300 mobile radios ($999,772) which include power supplies for base stations.

http://www.efjohnson.com/PDF/EFJohnson-ProductCatalog_04_06.pdf Is a product brochure for that radio. It indicates up to 512 channels can be programmed into the radio. 10 or 50 watt power output selection.

http://www.icomamerica.com/land_mobile/iaNews/iaNews12_04.pdf CAP use of Intersquadron Radio ISR UHF Radio (14 channels in 380-399 mhz band NFM mode as previously posted), ICOM model 4008M. Apparently since 2002 they purchased over 2,000 radios and intend to purchase 20,000 more to meet mission critical & mission essential needs. I'm going to assume that CAP intends on using these radio at their various mission bases during actual & practice missions, so hobbyist might have to drive out to the local mission base & scan those frequencies "on scene" -- (since 1/2 watt portables probably have a range of about 1/2 to 3/4 mile) of course as long as you remain on public property there shouldn't be any problem with you watching & scanning!!! It's also possible that CAP will use these with some in the field search teams, BUT may have to use some sort of interface with the VHF radio system. So I'm predicting that CAP will eventually purchase & deploy cross band switching devices (380-399 to 138-148 mhz radio equipment) that will be deployable with these teams in the future. In the interim I'm guessing that there will be some VHF portables deployed with teams to act as a relay from a high point in a specific geographic search area, especially if there's weather conditions that prevent CAP aircraft from flying.

http://capital.vtwg.cap.gov/communications.html -- Gives you an idea as to the total # of CAP radios nationwide (towards the bottom of the page). Note

the VHF repeaters (fixed, portable & airborne), VHF mobiles, & portables available.

http://wawg.cap.gov/members/training/Aircrew%20Training/aid/HBM.html Civil Air Patrol "High Bird" procedures -- Communications relays by aircraft to ground crews. Interesting information.
Also http://skylinesoaring.org/FRR-NEWS/200402.pdf

http://www.iowacap.org/forms/pdf/8f.pdf -- Some insight into CAP communications systems organization that will be used during actual & practice SAR missions

My further understanding through "inferred" (rather than conclusive) research is that Civil Air Patrol's current VHF repeater outputs (148.125, 148.15) apparently will be changed, HOWEVER, due to the very significant expense that CAP incurred for buying new "narrow band" radio equipment, there it's highly probable that only 'minor' shifts in the frequency output frequencies so that new antennas, mutiplexers, amplifyers, filters, etc. will/would not have to be purchased.

Also add to my initial list 122.75 for air/air communications among CAP aircraft.

Information contained in this message is for individual hobbyists use and not for commercial publication or for any websites or data bases that allege to own the data submitted to them. Remember as hobbyist we are as about as "unofficial" as you can get!!! So don't do anything that will get you in trouble!!!!

Remember again that if you don't search you won't find the new frequencies in use by Civil Air Patrol!!! Project's such as this really add to the "fun" of the radio scanning hobby.

Please if you can confirm activity on the present frequencies or find new frequency activity report it to the appropriate list OR if you are more comfortable give me a private email.

44. Army National Guard Parachute Competition

Yahoo group: Scan-RI
Date: 2006-08-06 20:03:37 UTC
From: Ken
Topic: 44 Message: 44

Here's a chance to possibly scope some new Army National Guard Frequencies:

Rhode Island National Guard to host 24th Annual "Leapfest" International Parachute Competition

Major General Robert Bray, the Adjutant General of Rhode Island announced today that the 24th annual Leapfest International Military Parachute Competition will take place on Saturday, August 12, 2006 at the Peckham Farm. The entrance to the drop zone is located off of Route 110, behind the West Kingston Elementary School.
The competition begins at 8:00 AM and will last until 3:00 PM. Admission is free. A rain date has been set for Sunday, August 13, 2006. Over 250 paratroopers representing the forces of the United States and 4 foreign countries, including Canada, El Salvador, United Kingdom, and Germany, will participate in this year's competition.
Pilots from the Rhode Island, Connecticut, and Pennsylvania Army National Guard will fly four-member teams in CH-47 Chinook and UH-60 Blackhawk helicopters to an altitude of 1,500 feet where each jumper will exit the aircraft and descend toward the drop zone. Each jumper will attempt to land as close to a large orange "X" in the middle of the drop zone. Judges, located on the ground, will time each jumper from the moment they land until they make contact with the orange "X". Each team will make three jumps and will be scored on an accumulated team and individual time. The team with the lowest accumulated time will be declared the winner.

Ken

45. CAP More Information/Discussion Re: Civil Air Patrol Radio Comms Status Monitoring Research Project

Yahoo group: Scan-RI
Date: 2006-08-06 23:55:49 UTC
From: Ken
Topic: 45 Message: 45

Well Hobbyists -- here's some additional "deep research" information on Civil Air Patrol communications.

Some additional current frequencies:
149.925 Data (Packet, digi repeaters) -- Used primarily next to the Canada border

Other frequencies that CAP monitors & may be able to communicate on:
121.5 Civilian Aircraft Emergency
156.80 Maritime Emergency
243.0 Military Aircraft Emergency
406.025 New ERIBP Emergency Beacon (this also transmits the ID of the beacon (e.g. aircraft type, boat name/type, individual name) to the satellite.
Other VHF practice beacon freqs as previously mentioned (121.6, 121.775)

See this site for more information:
http://www.navcen.uscg.gov/marcomms/gmdss/epirb.htm
http://searchandrescue.gsfc.nasa.gov/beacons/index.htm#EPIRBS
http://www.acc.af.mil/afrcc/usnationalpersonallocatorbeaconprogram.asp
See this on how CAP searches for the beacons:
http://level2.cap.gov/documents/u_081503135122.pdf
Hear what an ELT beacon sound like:
http://www.grc.nasa.gov/WWW/MAEL/ag/elt.wav

CAP NFM FM NETS (138-150.8 mhz)
So as far as VHF- FM/NFM frequencies it appears that currently CAP is authorized to use 8 frequencies (6 of which are for voice communications). So an assumption could be made that at least that many will be made available for them to use with the rebanding. I think that overall if you look at the number of frequencies in that band with the new splits (12.5 khz) there's approximately 700 frequencies available. So this greatly expands the number of frequencies available. Perhaps CAP will gain more frequencies than they presently have in this band.

CIVILIAN AVIATION FREQS (108 to 137 mhz)
Regarding aviation related frequencies (AM mode), basically CAP operates on all the applicable Air Traffic Control frequencies (and that might be your tip off to a mission going on), and generally 122.9 & 123.10 is primarily used (but don't discount 122.75 or 123.45). HOWEVER, again it is possible that other discrete frequencies could be used for air/air or air/ground as necessary since the AM transmitters in the aircraft would cover the entire aero band range.

OTHER NFM NETS (CAP might have separate radio equipment for this):
Well CAP also has assisted DEA in certain mission, so it is possible that

CAP aircraft might be operating on federal UHF DEA frequencies (which most hobbyists have reported to be encrypted). Also potentially CAP could show up on federal forestry, state emergency management, other research & rescue nets (e.g. 155.16), fire coordination, etc. So even in your general monitoring of agencies you might here CAP units that will be using an unit number sequence for that specific radio net rather than a CAP aero or tactical callsigns.

Potential CAP Callsigns (used on CAP frequencies)
CAPFLIGHT XXX, XXX CAP aircraft (note: "RESCUE" can be added to the end of callsign if urgent clearance needed)
Aircraft Registration Numbers e.g. N99508 (may be used in lieu of CAPFLIGHT callsign in certain circumstances)
(See FAA site: http://registry.faa.gov/aircraftinquiry/name_inquiry.asp an inquire "Civil Air Patrol" (801 entries!!!). Might be easier to just go down to the airport where CAP aircraft normally are & copy down the registration numbers).
CAPSTONE -- Northeast Region Headquarters
ABENAKI -- New Hampshire Wing
CHARTER OAK -- Conneticut Wing
DOWN EAST -- Maine Wing
NARRAGANSETT -- Rhode Island Wing
PATRIOT - Massachusetts Wing
VERMONT CAP -- Vermont Wing
WHITE PEAK -- New York Wing

Note: It's my understanding that tactical callsigns will also change in the future, because the USAF has a specific character length and also limitation on number of digits in the tactical callsign (I believe 2 digits max), so unless CAP gets a waiver there's going to be basically only 99 callsigns available per tactical word.

So once again folks, remember we are a VERY unofficial group seeking to uncover information through on the air searching & finding frequencies in use by the Civil Air Patrol that isn't available to the general public in records maintained by the FAA or FCC !!! This is only a hobby to get enjoyment from!!! Stay within the legal bounds of radio scanning, respect private property, BUT of course report what you hear!!! either to the list or privately as your prefer!!!

Ken

46. Addendeum Fw: Potential Frequencies Re: [Scan-RI] Army National Guard Parachute Competition

Yahoo group: Scan-RI
Date: 2006-08-06 21:30:48 UTC
From: Ken

It appears as though Woonsocket Police has changed squelch tones on their Vhf frequency (156.330) from CTCSS 146.2 to DCS 627. I am not sure what the actual assigned usage of WPD's UHF frequency (482.8375 CTCSS (127.3)) is, as I have seen several different descriptions in different areas, but every time I have listened to it, it was simulcasting the Vhf frequency (or vice versa). At this time the UHF frequency appears to remain unchanged.

From: Ken
Topic: 50 Message: 50

Haven't seen many reports either posted to the appropriate group or by private email about what frequencies are currently active in the New England states. Remember frequencies are Repeater/Simplex: 148.125, 148.15. Simplex: 148.1375, 149.5375, & repeater input (may be used simplex when authorized): 143.75, 143.90.

Check out my blog "Adventures in Radio Scannerland" for a potential method of successfully finding CAP's new frequencies authorizations.

Spread the word:

Radios For Sale or Trade:

1) Patriot RTX150 VHF Handheld w/Charger, in good working condition.

2) Kenwood TK200 VHF Handheld W/Charger, has not been tested.

3) Kenwood TK701S VHF Mobile W/ Mic and Cigar plug attachment. Tested, works.

4) Kenwood TK240D VHF Handheld W/Speaker Mic, No battary or charger. Tested, works.

Will accept cash or items in trade... looking for VHF antennas in the 2M, or Police range.

Thanks,

Miles

52. Coded messages over mil air freqs

From: Scott D. Caron
Topic: 52 Message: 52

I was monitoring about 2330 hrs on Thursday night when 311.000 became active with a male voice speaking what seemed to be single letter groups for about 10 minutes then signed off with "this is ..." That's when I lost him. Nothing heard after that.

Anyone any thoughts? Monitoring from Northern R.I.

I also live in Northern RI and I have been hearing similar transmitions. I do monitor Mil Air,
but never hear a thing, that's why I found it very unusual. How much activity do you usualy hear on Mil UHF in our area? And what frequencies do you find to be the most active?

These are most likely Emergency Action Messages
That are being transmitted by E6 Aircraft & are for Stategic Nuclear Assets
e.g. submarines, bombers, & fixed ground missle sites overall assigned to US
Strategic Command.

Additional information can be found at:
http://www.monitoringtimes.com/html/body_eam.html What is an EAM msg?
http://www.stratcom.mil/ US Strategic Command
http://www.stratcom.mil/fact_sheets/fact_acp.html E6B aircraft information.

BTW VERY NICE monitoring catch. We don't get much of this on UHF aero in
this area. Of course the HF SSB can also be heard.

For example the same callsign was heard in the Seattle Tacoma Washington
area on 8776.0 USB

From: k45827
Topic: 56 Message: 56

Recently while visiting the "Big E" Rhode Island state building, had an opportunity to speak with a RI state PD official. At this point it looks like they are staying with the VHF highband system throughout the state. They are replacing some of the older portable radios (referred to by the officer as a large brick) with some smaller radios. Additionally the added mobile data terminals (service provided by Verizon) to the cruiser fleet, so they don't have to call dispatch to run many of the checks. Apparently there are plans to upgrade the radio system but there's limited dollars in the budget.

From: Bill
Topic: 60 Message: 60
Attachments: 2 described; binary payloads are missing from this source WARC

http://www.acc.af.mil/library/factsheets/factsheet.asp?id=3723

U.S. Air Force Fact Sheet
UPDATE ON NATIONAL 121.5/243 EMERGENCY BEACON ALERT PHASE OUT

SATELLITE PROCESSING OF 121.5/243 MHz EMERGENCY BEACONS TO BE TERMINATED ON FEB. 1, 2009

The International Cospas-Sarsat Program, a program that uses a satellite constellation to relay distress alerts to search and rescue authorities, announced at its 25th Council Session that it plans to terminate satellite processing of distress signals from 121.5/243 MHz emergency beacons on Feb. 1, 2009. Mariners, aviators, and individuals using emergency beacons will need to switch to those operating at 406 MHz if they want to be detected by satellites. The termination of 121.5/243 MHz processing is planned far enough into the future to allow users adequate time for the transition to the 406 MHz beacon. The Cospas-Sarsat Program has approved a plan for the phasing out of 121.5/243 MHz satellite alerting services that address practical aspects of the phaseout. This decision is a follow-on to Cospas-Sarsat's announcement last year that it would no longer carry 121.5/243 MHz search and rescue instruments starting in 2006 for Russian satellites and 2009 for the U.S. satellites, operated by the Commerce Department's National Oceanic and Atmospheric Administration.

The Cospas-Sarsat Program made the decision to terminate 121.5/243 MHz satellite alerting services, in part, in response to guidance from the International Maritime Organization and the International Civil Aviation Organization. These two agencies of the United Nations are responsible for regulating the safety on international transits of ships and aircraft, respectively, and handling international standards and plans for maritime and aviation search and rescue. More than 180 nations are members of IMO and ICAO. Another major factor in the decision to stop satellite processing of 121.5/243 MHz signals is due to problems in this frequency band which inundate search and rescue authorities with false alerts, adversely impacting the effectiveness of lifesaving services. Although the 406 MHz beacons cost more, they provide search and rescue agencies with more reliable and complete information to do their job more efficiently and effectively. NOAA, along with the U.S. Coast Guard, U.S. Air Force and the National Aeronautics and Space Administration, is responsible for implementing the Cospas-Sarsat Program at the national level in the United States. The implication of this Cospas-Sarsat decision is that users of beacons that send distress alerts on 121.5 /243 MHz should eventually begin using beacons operating on 406 MHz if the alerts are to be detected and relayed via satellites. Meanwhile, anyone planning to buy a new distress beacon may wish to take the Cospas-Sarsat decision into account. The three types of beacons in use are: emergency locator transmitters (ELTs), used on airplanes; emergency position-indicating radio beacons (EPIRBs), used on boats; and personal locator beacons (PLBs) used by land-based persons such as hikers.

The U.S. National Search and Rescue Committee in coordination with US SARSAT partnership the has begun working on the National 121.5/243 Phase Out Implementation Plan. The National 121.5/243 MHz Satellite Alerting Phase-Out Working Group has been chartered to complete the

following:

1. Develop a comprehensive national strategy, including a working plan and schedule, for implementing the phase-out of 121.5/243 MHz satellite alerting by 01 February, 2009;

2. Address and prioritize the technical aspects and impacts associated with phase-out, including beacon issues, satellite issues, and ground segment issues;

3. Address and prioritize the regulatory aspects and impacts associated with phase-out, including what legislative options are available for eliminating 121.5/243 MHz beacons

and mandating the use of 406 MHz beacons;

4. Address and prioritize the educational aspects and impacts associated with phase-out, including the use of appropriate media to publicize this effort, and;

5. Develop guidelines on the proper disposal of old beacons to prevent an unwanted increase in false alerts.

Please continue to check this and our partners web sites for updates on the National Phase out Program

61. Civil Air Patrol Monitoring Efforts/Results?

Yahoo group: Scan-RI
Date: 2006-10-01 17:53:46 UTC
From: Ken
Topic: 61 Message: 61

Hello Hobbyists:

Haven't seen any postings on what anyone's been monitoring Civil Air Patrol wise.
Please note that Civil Air Patrol aircraft operate on the typical VHF Air Traffic Control Frequencies & can be monitored using the Callsign CAPFLIGHT XXXX the first two digits indicate the wing

Until probably mid 2007 CAP will continue to operate on the following frequencies:
148.125 Repeater & Simplex
148.15 Repeater & Simplex
148.1375 Simplex Ground Operations
149.5375 Simplex Air to Ground & air/air tactical
Also VHF aero Freqs:
122.9 Multicom (usually practice exercises)
123.1 Mulitcom (actual search & rescue missions)

Within Rhode Island the CAP static callsign is Narragansett
Some publically available statics regarding CAP owned assets in RI
CAP Aircraft: 3
HF Radios Fixed: 3
HF Radio Mobiles: 0
HF Radio Transportable: 4
VHF Fixed Repeaters: 3
VHF Portable Repeaters: 1
VHF Airborne Repeaters: 0
VHF Radios Fixed: 0
VHF Radios Mobile: 21
VHF Radios Portable: 0
Communications Vehicles: 1
See: https://ntc.cap.af.mil/ops/hls/resources.cfm for additional information. Just input the state.

Please post the callsigns (both CAPFLIGHT) & tactical state you are monitoring to the list.
Thanks

Ken

62. New Military Land Mobile Radio Band Local Activity?

Yahoo group: Scan-RI
Date: 2006-10-01 21:19:17 UTC
From: Ken
Topic: 62 Message: 62

For those of you that have the equipment (frequency range & mode change) the Department of Defense in it's quest for UHF LMR conventional/trunking spectrum space found that there was limitations in the US Government 400-420 mhz band as well as the 162-174 mhz band. So what they did was to designate many of the frequencies in the 380 to 398 mhz band as LMR frequencies. The frequencies can either use NFM or Digital (APCO P25 standard) and can be simplex, simplex low power (such as the Inter Squad Radios), conventional repeaters, or trunking radio systems (NFM or Digital).

"Monitoring Times" magazine's August 2006 Milcom Column indicates that Trunked repeater inputs will be in the 380-390 freq range. The February edition also found that an ANG Base (Portland OR) had changed over to analog NFM in this band.

Many US Navy Ships are converting to the so called M/A Comm "Hydra" trunking radio systems, so for those of you next to the ocean (ship ports) that have USN ships visiting, you might find activity.

It's possible that other Air National Guard, Army National Guard, & Other miliary reserves installations/facilities might change over to this new band. Especially if they are currently operating in the 162-174 mhz range.

So on occassion try searching the 380-399.9 mhz band in 12.5 khz steps... If you find any activity please post it to this list OR give me a private email....

Remember if you don't SEARCH you won't find!!!!

Ken

63. Another Significant Monitoring Challenge -ISR Ops!!!

Yahoo group: Scan-RI
Date: 2006-10-01 20:42:02 UTC
From: Ken
Topic: 63 Message: 63

Another interesting monitoring challenge would be the new US government low powered FRS type service commonly referred to as "Intra Squad Radios -- ISR " that operate on the military UHF band.

These are ICOM modified FRS radios (model IC4008A) -- sole source provider of equipment. See: http://www.icomamerica.com/press/index2000.asp#marines for the original press release and a picture of the portable 1/2 watt, 14 channel unit. The antenna on these units folds down which might make .

The Military UHF Radio Frequencies these operate on in FM mode are:
396.8750 ISR Channel 01
397.1250 ISR Channel 02
397.1750 ISR Channel 03
397.3750 ISR Channel 04
397.4250 ISR Channel 05
397.4750 ISR Channel 06
397.5500 ISR Channel 07
397.9500 ISR Channel 08
398.0500 ISR Channel 09
399.4250 ISR Channel 10
399.4750 ISR Channel 11
399.7250 ISR Channel 12
399.9250 ISR Channel 13
399.9750 ISR Channel 14

The radios originally were purchased by the US Marine Corps, BUT other military services including the Army National Guard also purchased these Radios. Additionally Civil Air Patrol has purchased a large quantity of these radios

(see: page 2 of
http://www.icomamerica.com/land_mobile/iaNews/iaNews12_04.pdf)

It's unclear whether other non military federal agencies are users of these radios or whether they opted to just use FRS radios.

This is a significant challenge to radio monitoring hobbyists because you need the right scanner equipment (e.g. able to cover that frequency range above & also change mode to FM/NFM), as well as the low power (1/2 watt) & non gain portable antennas limit the transmission range to well under 1 mile in most instances.

I've never monitored any activity on these frequencies (even at military base open houses/airshows). HOWEVER if you have the equipment capability, please consider adding these frequencies to your scanner & keep monitoring them.

IF you hear any activity please post it to the list OR give me a private email..

Thanks

Ken

64. RI State Parks (Lincoln Woods SP)

Yahoo group: Scan-RI
Date: 2006-10-06 16:59:23 UTC
From: cmpsa
Topic: 64 Message: 64

Good Afternoon All:

I recently attended a big function at Lincoln Woods State park (a RI State Park off Rt 146) and the park staff was using VHF portables for operations (parking & security, etc). I didn't have my scanner with me but the scanner guide shows 151.175 as state parks.

Anyone know what PL or DPL tone is? Does it vary from park to park or common statewide (like in MA is PL 71.9).

Thanks in advance!

SAFETY FIRST! COAST GUARD HOSTS FISHING VESSEL SAFETY WORKSHOP

NEWPORT, R.I. – In an effort to increase safety and training in the commercial fishing fleet, the Coast Guard will host a free fishing vessel safety workshop, open to the public, at the Newport State Pier, at the end of Long Wharf behind the Marriott Hotel Tuesday, 9 a.m.

The workshop will be given by one of the Coast Guard's commercial fishing vessel safety inspectors and there will be representatives from Cutter Tiger Shark and Station Castle Hill in attendance to provide training and give demonstrations of their rescue equipment. Training that will be provided includes:

1.. The use of emergency flares including actually igniting flares as a demonstration.
2.. A demonstration on how to deploy a life raft.
3.. A hands on exercise on how to start and use a dewatering pump.
4.. How to inspect, maintain and use cold water survival suits.
5.. A demonstration on how to activate an Emergency Position Indicating Radio Beacon (EPIRB) in the event a vessel is in distress.
The winter weather significantly increases the risks associated with being out on the water and is typically the busiest season for New England fishermen. Training and education regarding safety equipment is a critical part of knowing how to handle an emergency when at sea.

Earlier this month, Cutter Tiger Shark assisted fishing vessel "Josephine" who was taking on water off the coast of Gloucester, Massachusetts. A Coast Guard falcon jet from Air Station Cape Cod parachuted a pump to the vessel just minutes before Cutter Tiger Shark and boats from Station Gloucester arrived to assist Josephine. As a result of previous training they had received, the crew of Josephine responded to the emergency in a "text book" manner and the vessel was safety escorted back into the Gloucester harbor.

Pictures and video of the Coast Guard assisting the fishing vessel Josephine are available upon request. In addition, there will be a number of photo opportunities at the safety workshop.

###
The U.S. Coast Guard is a military, maritime, multi-mission service within the Department of Homeland Security dedicated to protecting the safety and security of America.

67. Civil Air Patrol Radio Systems Update

Yahoo group: Scan-RI
Date: 2006-11-04 12:53:58 UTC
From: Ken
Topic: 67 Message: 67

Well the "cat's out of the bag" so to speak with one website publically posting the new Civil Air Patrol VHF frequencies.

See: http://www.n2nov.net/phpbb/viewtopic.php?t=169 (Also the November 2007 issue "Monitoring Times Magazine"

Based upon research from publically assessible documents, it appears that all of the radio CAP bought from EF Johnson (mobiles, mobile/base combos, portables) can operate digitally using the APCO P25 digital standard (which scanners can decode). It also appears that all of the new repeaters are digital capable. Additionally the new EF Johnson radios have built in encryption capabilities, that initally CAP won't be using. The radios have the capability to be set for mixed receive (analog & P25).

What's going to be interesting is how often will CAP use P25 digital for transmission versus analog NFM. I think aspect will be how many P25 radios are being used on an exercise or actual mission. IF there's still individual CAP members owned radios operating on NFM, than I'd assume they are going to use NFM on all radios rather than P25.

Apparently CAP headquarters is urging units to test the P25 versus NFM mode when they receive the equipment and report back to headquarters (NTIC) what they find. Personally I think that they are going to find out that NFM works better for them overall than P25 BUT digital is going to be used for a "quasi" encryption tool.

Remember that CAP will continue to primarily use it's current frequencies (e.g. 148.15, 148.125, 149.5375, 148.1375) probably until the summer of 2007. The complete conversion to the new frequencies must be accomplished by 10/1/2007.

Also remember that CAP will be using those new 380 mhz Intersquad Radio Frequencies for short range communications.

A complete list of current CAP frequencies include ISR can be found at:
http://westernmass-milcom.blogspot.com/2006/07/civil-air-patrol-frequenices-usage.html
Additionally remember that CAP aircraft will identify on aero air trafffic control frequencies as
CAPFLIGHT XXX, XXXX (3 or 4 digits)

Once again I'd like to encourage hobbyists to monitor for CAP traffic, not only on the current VHF frequencies, but also the new frequencies. Additionally, if you have the capability to monitor NFM in the 380 mhz, try those ISR freqs. Furthermore, monitoring your local VHF Air Traffic Control frequencies may also provide information on CAP activities.

Please post your findings to the appropriate state list (sub list) that this message is addressed to.

Questions public or private are always encouraged.

Subject: [iScanMarine] 2182 Interference

2182 KHz International Calling and Distress frequency has had interference since 1800 EST 21NOV06.

FCC investigated last night and narrowed the source to possibly be on the island of Nantucket, MA.

FCC investigation continues tonight and has asked the USCG for assistance in isolating the cause of the interference, which sounds like a walking or trotting horse.

Canadian Coast Guard has also alerted the FCC and the interference is affecting their operations as well.

Topic: 69 Message: 69

http://www.boston.com/news/local/rhode_island/articles/2006/11/24/ri_police_radio_codes_to_be_gradually_abandoned?mode=PF

R.I. police radio codes to be gradually abandoned
November 24, 2006

PROVIDENCE, R.I. --It's a "10-three" -- or stop transmitting -- for the radio codes that Rhode Island police officers have used for years, a jargon made famous by movies and TV.

An expanding statewide radio network and new federal requirements mean that Rhode Island police officers will gradually be forced to use plain English, instead of numbers, when speaking on the radio.

Under the old system, numbers were used to signal different messages, a method sometimes known as 10-codes. For example, 10-four means message received, a police code that became part of American slang. But critics say the numbers can be difficult to understand during an emergency and the meanings can vary from one police department to the next.

For example, a car crash is called a "Signal 8" in Narragansett and a "Signal 50" in Westerly.

"Everyone has a cheat sheet for the codes," Narragansett Police Chief David Smith said. "When we begin to talk on the same system and back each other up, it's apparent that we all recognize we have to get rid of most of the codes."

The U.S. Homeland Security department hasn't abolished the 10-codes, but it's forcing emergency agencies that receive preparedness grants to use common language on the radio during a regional crisis. Rhode Island authorities are using those federal grants to expand a statewide radio system, and it should be largely complete in 18 months.

The statewide radio system is already operating in parts of southern Rhode Island, said Robert Warren, executive director of the Rhode Island Emergency Management Agency. He expects more police departments will set aside their codes as they are connected to the new system.

"Eventually, we would expect everyone to switch over to plain English," he said.

70. Police radio system still up in the air

Attachments: 1 described; binary payloads are missing from this source WARC

Police radio system still up in the air

Federal authorities want law enforcers to drop code-speak for plain English, but in Rhode Island most agencies still can't talk to each other.

01:00 AM EST on Friday, November 24, 2006

By Amanda Milkovits
Journal staff writer

When Narragansett Police Capt. F. Dean Hoxsie radios that he's "305-23-15," he's speaking a language that's soon to be extinct. The police 10-codes, used by departments for about as long as there've been police radios, are on their way out by federal demand.

To translate, Hoxsie's telling the dispatcher that he's coming into the station and out of service. "For someone listening to that, it's what?' " Hoxsie said. "But for us, it's second nature."

But the Department of Homeland Security says it's time for everyone in public safety to learn a new language: plain English.

The new "plain speech" requirement comes from the National Incident Management System, which was approved by Homeland Security as a standardized tool for responders from all types of agencies to use in managing a large-scale disaster.

One of the standards requires all of the responders to stop using their radio codes and speak plainly over the air. The reason is, well, plain. In order to manage a crisis with multiple agencies, the commanders have to make sure they're all speaking the same language and can understand each other.

While most jurisdictions are using the 10-codes over the radio, most of them have their own interpretations of what those codes mean. Even within the same police department, some little-used codes will give officers pause as they try to figure out what it means. "Everyone has a cheat sheet for codes," said Narragansett Police Chief J. David Smith.

The police in Narragansett call a car crash a "Signal 8," but the police in Westerly call it a "Signal 50." Those different codes aren't a problem until the different police departments respond to the same major crisis, and they don't know what the other is talking about on the air.

While Homeland Security Secretary Michael Chertoff announced last year that he wouldn't require abolishing the 10-codes in everyday police communications, the police must use common language when they respond to incidents with multi-jurisdictions and agencies. The federal government has tied emergency preparedness funds to the requirement; as of Oct. 1, the money is contingent on responders using plain speech when they go to incidents that involve other agencies.

Other states are toning down the cop talk for plain English. Virginia was one of the first. Although the state made some exceptions for codes to protect officers' safety, such as when a responder is in immediate danger or needs backup, when the responder is taking someone into custody, or when the dispatcher or responder is conveying sensitive or confidential information. After all, there are other listeners out in scanner-land besides the police, whether it's the curious neighbor down the street, the media, or criminals trying to monitor where the police are.

But Rhode Island has been slow to adapt, for one main reason: What good is using plain English when Rhode Island's first-responders still can't talk to each other over the radio?

The state has been working for several years on developing a statewide interoperable radio system, which will eventually give police, fire and emergency responders in every corner of the state the ability to communicate with each other. Right now, most of the police and fire departments are on systems that use different radio frequencies that are incompatible with other departments. Some departments lose their signals once rescuers leave the community, and sometimes when they go into buildings. First responders have to resort to using Nextel phones or calling in to dispatchers to relay messages for them.

The success of a pilot program for interoperable 800 MHz radio communications in Washington County is now spreading across the state. Radio towers are still going up across the state; the latest effort is expanding coverage in the north, west, and the southeast corners of Rhode Island. But as Homeland Security funds have dwindled, communities are scrambling for grants or trying to budget for their own portable and mobile radios to fit the interoperable system.

By early next year, Chief Smith whose department has led the interoperable radio system project hopes to have 13 radio tower sites operating throughout Rhode Island, which will provide enough coverage for mobile radios across 85 percent of the state. All of the agencies throughout Washington County now have some mobile or portable interoperable radios; new ones just arrived this week for police in Hopkinton and the University of Rhode Island, he said. The Rhode Island sheriffs, who work in the courthouses across the state, are now using the system, as are the Capitol Police, and the Coast Guard offices, he said. The radios are going into communities in East Bay, including Little Compton, Middletown, Portsmouth, and Newport, in Warwick for special operations, and eventually into the Providence Fire Department.

The fire service is more accustomed to using plain speech, because they respond to mutual aid calls in other communities more often, but the police are a different story.

The state police have their own codes. So does Providence, and virtually every other police agency. In South County, the departments identify themselves by letters G for Narragansett, C for Westerly, K for South Kingstown and use different series of numbers to identify their officers. So, a chief in Westerly would be "701 from C," while the chief in Narragansett is "301 from G."

"When we begin to talk on the same system and back each other up, it's apparent that we all recognize we have to get rid of most of the codes," said Smith, whose department has led Rhode Island's interoperable radio efforts.

And change isn't easy. "The 10-code system is inculcated in our culture to a degree that it'll be difficult for some people to give it up," Smith said.

He learned that last spring, when his department used the interoperable radio system for the first time in searching for three URI students who'd disappeared in a rowboat. The local police, the Coast Guard, and the state agencies were all speaking together for the first time over the radios but they were using their own codes.

One of the search boats was "301" that's also the code for Chief Smith.

The chief had to stop himself a few times from answering the radio when the call went out for "301," and it wasn't for him.

Hoxsie said they all eventually learned to ask for "RI DEM boat 301."

Hopefully, I have to have a copy of the APCO 10 Codes when listening to some of these departments. Most in Northern RI, don't deviate that much from using these codes to come in to the station or clearing and arriving. However, Woonsocket Police use these 10 codes for everything, and I mean everything.

Hi all,

Is there anyone that actively monitors the RI State System? I have placed the frequencies and talk groups in my 396 and I don't hear anything when I am in the area. Maybe I did something wrong, I am just curious if anyone can hear them. I think all affected agencies are still using their old frequencies too.

Thanks,

Ray

COAST GUARD AIRLIFTS MAN WITH CRUSHED HANDS

BOSTON - A 29-year-old fisherman was hoisted Tuesday night from a lobster boat he was working on 90 miles south of Point Judith, R.I., after his hands were crushed.

The crew of the Mister Marco, a 74 foot boat from Point Judith, called the Coast Guard, 8:03 p.m., and stated that Henry Benitec was injured and needed medical assistance.

Benitec was taken off the Mister Marco, 10:45 p.m., by an HH-60 Jayhawk helicopter crew from Air Station Cape Cod, Mass.

He was flown to Stony Brook Trauma Center on Long Island, arrived at 11:07 p.m., and was treated for six broken fingers.

The cause of the accident is under investigation.

75. Happy Birthday Civil Air Patrol!

Yahoo group: Scan-RI
Date: 2006-11-30 22:59:21 UTC
From: Ken
Topic: 75 Message: 75

Civil Air Patrol Celebrates it's 65th anniversary tomorrow (12/1/06) to include a
moment of silence at 12 noon Eastern Standard Time

See the press release at:

http://www.cap.gov/visitors/news/media_center/press_releases/index.cfm?fuseaction=display&nodeID=6194&newsID=2512&year=2006&month=11

As many of you know CAP has one of the largest emergency radio networks in the country and recently because of mandated narrow band requirements bought more than $10 million worth of new radios. CAP will also vacate most of it's current VHF radio frequencies and will utilize 10 frequencies (9 new) including two new repeater outputs.

Civil Air Patrol is always looking to recruit quality senior and cadet members. Additional information on units & membership can be found at:
http://www.cap.gov/index.cfm?nodeid=6081&audienceID=4 overview of CAP
http://cap.findlocation.com/ CAP unit locations, meeting dates/times & contact points
http://www.cap.gov/documents/ProspectPacketLowRes.pdf Prospective member, membership packet.

Once again a salute to all Civil Air Patrol members, past & present who volunteer so much of their time to the country!!!!!

Ken

78. Official FAA Civilian Airport Aero Frequency Information

Yahoo group: Scan-RI
Date: 2006-12-03 22:39:03 UTC
From: Ken
Topic: 78 Message: 78

Thanks to Iden from the "AirCommSouthwest" yahoo group, now the FAA's "Airport Facilities Directory" has been placed on line.

Go to this webpage first:
http://avn.faa.gov/index.asp?xml=naco/online/d_afd

Than click on the appropriated updated link..

You can search by individual state or specific airport, specific airport name, specific city/town location, or specific airport code. There does appear to be some military aero (UHF) frequency listed also.

The guide was previously available in printed form for approximately $6.75 or different regions of the US.

Enjoy!!!

Ken

79. BOATERS MUST NOT OPERATE 121.5/243 MHZ EPIRBs AFTER 31 DECEMBER 2006

DATE: December 15, 2006 13:09:22 EST
Document Number: 833
First District Public Affairs
U.S. Coast Guard

Press Release Date: December 15, 2006

Contact: Steve Blando
(202) 372-4632

BOATERS MUST NOT OPERATE 121.5/243 MHZ EPIRBs AFTER 31 DECEMBER 2006

WASHINGTON - The Coast Guard reminds all boaters that beginning January 1, 2007, both 121.5 and 243 MHz Emergency Position Indicating Radio Beacons (EPIRBs) are prohibited from use in both commercial and recreational watercraft. Boaters wishing to have an emergency rescue beacon aboard their vessel must have a digital 406 MHz model.

The January 1, 2007, date to stop using 121.5 MHz EPIRBs is in preparation for February 1, 2009, when satellite processing of distress signals from all 121.5/243 MHz beacons will terminate. Following this termination date, only the 406 MHz beacons will be detected by the International Cospas-Sarsat Satellite System which provides distress alert and location data for search and rescue operations around the world.

The regulation applies to all Class A, B, and S 121.5/243 MHz EPIRBs. It does not affect 121.5/243 MHz man overboard devices which are designed to work directly with a base alerting unit only and not with the satellite system.

This change, in large part, was brought about by the unreliability of the 121.5/243 MHz beacons in an emergency situation. Data reveals that with a 121.5 MHz beacon, only one alert out of every 50 is a genuine distress situation. This has a significant effect on expending the limited resources of search and rescue personnel and platforms. With 406 MHz beacons, false alerts have been reduced significantly, and, when properly registered, can usually be resolved with a telephone call to the beacon owner. Consequently, real alerts can receive the attention they deserve.

When a 406 MHz beacon signal is received, search and rescue personnel can retrieve information from a registration database. This includes the beacon owner's contact information, emergency contact information, and vessel/aircraft identifying characteristics. Having this information allows the Coast Guard, or other rescue

personnel, to respond appropriately.

In the U.S., users are required by law to directly register their beacon in the U.S. 406 MHz Beacon Registration Database at: http://www.beaconregistration.noaa.gov/ or by calling 1-888-212-SAVE. Other users can register their beacon in their country's national beacon registration database or, if no national database is available, in the International Beacon Registration Database at https://www.406registration.com/.

The United States Coast Guard is the lead agency for coordinating national maritime search and rescue policy and is responsible for providing search and rescue services on, under and over assigned international waters and waters subject to United States jurisdiction.

From: Ken
Topic: 80 Message: 80

BOATERS MUST NOT OPERATE 121.5/243 MHZ EPIRBs AFTER 31 DECEMBER 2006Thanks for the information Bill, a good primer on Maritime EPIRB's can be found at:

Prime USCG Site: http://www.navcen.uscg.gov/marcomms/gmdss/epirb.htm
Additional Information: http://www.sarsat.noaa.gov/emerbcns.html
Diffences in EPIRB's: http://www.sarsat.noaa.gov/406vs121.pdf

Wondering if all of these models still emit a homing signal on 121.5 mhz? (seems a bit confusing on the USCG Site).

I would assume that Channel 16 (156.80 mhz) would also be used by responding marine & aero assets.

Hello All,

A quick intro to the group as a new member. Name is John and been listening since my first hand held 6 ch crystal bearcat a couple of years ago :)

I am using many scanners (760, 780 rehlm & RS) but have realized the value of the real stuff (Mother, vertex, kenwood, midland) but the vertex 4200 with the sub band board is the best, Hottest receiver I have seen so far cant beat it.

Just getting serious enough to dedicate a bank or 2 to Rhode Island and am looking for a decent database or similar guide since I really don't want to marry the FCC web site to build one unless I really have to.

Thanks,

John, MassNet C-20

84. FRS Radio Channel 1 Emergency Backup Use & Comm Range Experiments (Long Post)?

Yahoo group: Scan-RI
Date: 2006-12-21 16:04:08 UTC
From: Ken
Topic: 84 Message: 84

Hello List Members/Hobbyists.

I'm not sure if any of you followed the story in Oregon, about James Kim & family who took a wrong mountain road & became stranded in their vehicle. James Kim subsequently died while trying to walk out and get help for his family. Kim's wife & children while in the car heard a distant helicopter but had no way to communicate with the helicopter. A pretty good editorial can be found at:
http://www.oregonlive.com/editorials/oregonian/index.ssf?/base/editorial/1166487929309700.xml&coll=7

As well as other information:
http://www.nwasianweekly.com/20062451/travel20062451.htm
http://www.kgw.com/news-local/stories/kgw_120506_news_missing_family_tues.569404ac.html
http://plancksconstant.org/blog1/2006/12/james_kim_gps_and_th.html (sub list)
Also you can just do a www.google.com News search "James Kim, Oregon" to get more info.

I'm a strong advocate of everyone carrying a little FRS radio with them when they travel, take short hikes, etc... BUT also the following information should be considered:

1. One should carry & use a cellphone FIRST if service is available in an emergency to directly call "9/11" -- this is the BEST method!!!

2. If you just have a cellphone and it doesn't work for whatever reason than you have no communications directly with anyone!!

3. There are a variety of backup radio communications that one could carry (and offer potential monitoring targets for hobbyists):

*CB Radio -- basically equipment is too bulky for hiking/walking, etc BUT for vehicles, MIGHT have an appeal if it could be packaged in a relatively small package yet technically allow a signal to get out. CB Radio Channel 9 (27.065 mhz, AM mode) is designated as an official emergency channel. As many of you know CB is plagued with lots of interference especially when sun spot activity is high. It's unclear how many local REACT folks monitor this channel.

*Multiple Use Radio Service (MURS) (VHF high band, 5 channels (NFM)), A very good choice since it offers 2 watts of power, and an external antenna can be utilized. The problem is that the radio service never gained wide consumer acceptance, so there's only 1 manufacturer/distributor (Dakota Alert) that has a consumer grade portable radio available. Most consumers see those 22

channel FRS/GMRS hybrids and the low cost, so would elect to use these in lieu of MURS. No quasi emergency channel was ever designated. Some advocated MURS CH 1 151.82 mhz should be used as the calling channel.

**General Mobile Radio Service (UHF higher power) & Family Radio Service (low power 1/2 watt,
but for all practical purposes, 1 & 2 watt unlicensed units are readily available on consumer market as FRS/GMRS hybrid portable radios). GMRS also has a quasi emergency/calling channel (462.675, ctcss 141.3 hz) BUT there really isn't a plan to monitor this. Most GMRS repeaters users are grandfathered business operations. Equipment costs for portables that have repeater access capabilities are much higher than FRS/GMRS portables that operate on simplex only.

**Marine Radio (VHF low power/high power). This can be used by the boating public BUT recently it appears that some outdoor hunters etc, have been using the portable inland. 156.80 Marine Channel 16 is the official emergency & calling channel. It's always possible that someone could be using one of these portable units.

4. It's unlikely that the average person is going to go out and buy any radio equipment UNLESS there's a public relations campaign to convince them that it is in their interest in an emergency to have a radio as a BACKUP to cellphone.

5. The average person isn't going to study to become an amateur radio operator initially NOR do they want to spend signfiicant amount of money for other communications device. Therefore, FRS becomes the logical choice.

6. Someone (e.g. REACT?) would need to develop a monitoring support program BEFORE going publically in #4 above. To a certain extent they have started this see: http://www.reactintl.org/nuz/nuz.homepage.htm
a.. 7/7/06 REACT Supports SOS Emergency Strategy
REACT International has linked with Midland Radio, D-CERN

Civil Air Patrol, also changed it's policy to allow their search teams to use FRS radios to communicate with search victims.

7. There's many pitfalls in the implementation of the FRS Channel 1 (no CTCSS) monitoring scheme. Since may FRS radios default to this channel, you have lots of children fooling around on the channel. Also because no CTCSS is used, one can get fatigued monitoring this frequency because of the overall use/user's versus some of the other frequencies. Expanded monitoring would most likely be implemented only when there was an indication that a lost/missing individual had such a radio in their posession.

I think it would be GREAT if hobbyists on the various lists would conduct some
experimentation to see (hear) how far one can actually in operational practice monitor an FRS radio signal.

Here's some ideas for experiments to determine some communications ranges.

Using FRS Channel 1 and any other FRS channel of your choice using typical 1/2 watt output -- If license for GMRS than also select appropriate 1, 2, 5 watts if available.
No CTCCSS enabled & then enabled.
Monitoring with the typical FRS portable/portable base
Monitoring with a radio scanner with an appropriate mobile antenna
Monitoring with a radio scanner with an appropriate base station antenna
Monitoring with a radio scanner with a typical stock back of the set antenna
IF possible, try to fly in an aircraft at approximately flight level 1 to 2K with a portable scanner and portable FRS (this IMHO offers the best potential
for communicating with someone in a wooded/mountainous area that needs help)

Mobile monitoring could be done from various elevations in your respective geographic area.
Of course your home monitoring post could already be at a relatively elevated
position.

For those of you that try the monitoring experiments, please report back to the list or give me private email!!!

Thanks for your consideration & potential experimental efforts!!!

Ken

Keith & the Group:

Thank you for your Comments Keith.

There actually are examples in the distant past in the northwest, were an FRS radio was used by a recreational climber to summons aid. Apparently a child who had gotten the radio as a gift picked up the signal, about 30 miles away & his parents after also talking on the radio summond aid for the climber.

Additionally, Civil Air Patrol, had a search mission in the southwest for a group of lost hiking group due to some severe weather conditions (believe it was flash flooding) -- air search had not found the individuals. The local county sheriff found out that the group had FRS radios. Searchers started calling on various channels & finally were able to communicate with the group and assistance was sent.

I'm sure that there's other simple examples that we don't hear about in the press.

In the Kim s & r case, again Mrs. Kim heard a helicopter in the distance BUT since she had no other means to contact/signal it was 1 or 2 days later before she & the children were found.

IMHO the Kim case is vastly different than the 3 recreational hikers. The Kim's were basically driving and took a wrong turn. The recreational hikers should have know that at that time of year weather on the mountain could change (and we see the lack of proper clothing lead to their deaths).

Surely, FRS radio emergency backup usage for victim ground search operations could be best defined as a "short range" communications tool. HOWEVER IMHO, when you add air search support it changes that 1/2 watt radio into a very good communications tool, for potential of allowing the victim to communicate with searchers.

I do agree with you that people who go hiking, bird watching, mountain climbing, off road driving, or for that matter driving anywhere (e.g. mountains) should carry an emergency kit just in case. BUT for the money (we are talking about perhaps $15.00 for a unit) FRS radio could be in that kit, and the channel 1 calling, although not a perfect solution, offers a potential alternative if/when cellphone service does not exist. Otherwise there's no other easy solution!

Surely there are hobbyist who believe that amateur radio would be the best choice. I agree that it would be best; BUT from a practical manner the general public isn't interested in studying and obtaining an amateur radio

license. So what we have to utilize is a radio communications tool that does not require a license, is inexpensive, and has wide spread use. Family Radio Service meets that requirement.

Lets face it the search & rescue community (volunteers & paid professionals) all are closing ranks on the Kim's s&r debacle, BUT that shouldn't have any bearing on FRS' potential in an emergency. I personally think that if the Kim's had a FRS radio & it was part of a national S&R plan (FRS Channel #1 calling/emergency (462.5625), Mr. Kim would be alive today!!

Again I'd like to encourage ALL hobbyists to run some experimentation. Using a FRS unit as well as your scanner, just to get a feel for the comm range of the units in your areas!!!

Ken

I think it would be a better solution for SAR groups to start looking at
the ability to include small portable devices that emulate a "cell site"
such a device would be ideally some kind of "hotline" system in which a
user's IMEI or ESN can be popped into it, and it will actively search
out for that signal. When it finds it, both sides ring.

Or, even better, mandate some kind of "HOLY CRAP! EMERGENCY!" mode be
built into cell phones that put it into a low power consumption mode and
start transmitting a "I'm in distress!" signal.

> Lets face it the search & rescue community (volunteers & paid professionals)

I think that instead of encouraging the potential "resucees" to start
carrying additional devices that need to be kept in working order,
charged, and ready to go, we should start encouraging research and
development into devices that can track and interact with cell phones
for these types of situations. Cell phones are very much ubiquitous now
with people and they newer ones have the ability for augmented GPS, this
would beat the FRS solution as cell phones attempt to communicate with
the network when they are on, even if the user is incapacitated.

Saying to a person "you should start carrying a FRS radio with you in
case you may get lost" will likely fall on deaf ears. Saying to a person
that "if you get lost, make sure your cell phone is on" will likely

click with them.

Heck, instead of FRS, why not encourage people to buy a EPIRB, ELTs, or PLB? Same concept, much better protection.

It comes down to common sense. If you're going to play in the woods or there is a chance you might wind up getting stuck in the woods, then you should be prepared. I did a lot of driving in Northern New York and New England for a previous employer, and the company-issued Nextel phone was simply *not* going to cut it. In such an instance, having a small backpack kit enabling one to camp out for a day or three was a good idea. That kit had an HTX-202 with a 1/2 wave telescoping whip antenna in it. There are also other pieces of signalling equipment in the kit that don't require batteries.

From a monitoring enthusiast's slant, of all the license-free radio systems FRS is the most popular among the general population. It's also the most inexpensive with FRS/GMRS HTs being as low as $20/pair at the local Wal-Mart. While most FRS users seem to think of it as their private chat system as opposed to CB which always was thought of as a public system, if a search was underway for a missing outdoor enthusiast equipped with FRS it would definitely shorten the search time if one could reach the person via radio. Many scanners now feature signal strength meters and PL/DPL tone decoding. Add a small directional antenna like a Ramsey LPY41 and you have a basic RDF/COMINT set-up that would enable you to get an indication of transmiter direction and the necessary channel and PL tone information to talk back to the person. Flares and signal mirrors also work very well for getting found, but chances are your average person playing in the woods who thinks nothing will happen to them will probably have an FRS radio instead a real survival kit.

COMMENT: Great idea, BUT who pays for it? Where are the units going to be kept at, etc.? Of course IF you've got one of the new SPRINT/NEXTEL units that offer the Off net "Direct Talk" http://www.nextel.com/en/services/walkietalkie/offnetwork.shtml mode -- this gives you the capability to talk with others even if there's no cellphone service. Perhaps this may be also be an option in the future as the other major cellphone/pcs providers jump on the bandwagon. With nextel it appears that you have to be on the same channel & code, so this again presents a problem.

>
> Or, even better, mandate some kind of "HOLY CRAP! EMERGENCY!" mode be

COMMENT: In some phones when you dial 911 in freeze the phone on this number and you can't call any other number unless you turn you cell/pcs phone off. The problem with unattended non voice systems is that there's a potential for a lot of false alarms. IF you make it too easy, you may get too much abuse of the system. In certain parts of the country many of the "911" emergency calls aren't emergencies at all!!!

>

COMMENT: I would bet that the federal government already has this technology available to track cellphones that have been left on regardless if there's a cellsite or not. Most likely it is the US Secret Service that has this technology. Now how many units are available throughout the country is unknown. Also again IF it is available has it become part of the National Search & Rescue Plan, http://www.uscg.mil/hq/g-o/g-opr/nsarc/nsp.htm and has the appropriate agency agreed to support this concept and is readily available for response?

AS far as a built in emergency device for a cellphone.
YES it does sound like a very good concept BUT you would have to set aside a specific frequencies 800/900/1900 mhz range & would also have to have relatively inexpensive monitoring d/f equipment that could handle all major modulation schemes presently being used. Also you might need a VERY big battery for the cellphone users, since we now have phones that include MP3 players, satellite radio receivers, digital cameras, and yes even a cellphone that works. The problem is there's so much that the unit is being used for the potential for a dead battery is great!!!
Also from a monitoring hobby aspect we want to have the capability to use a regular radio scanner to hear the signal and respond to it :) ;) . So do search & rescue teams.
>
> Saying to a person "you should start carrying a FRS radio with you in
> case you may get lost" will likely fall on deaf ears. Saying to a person
> that "if you get lost, make sure your cell phone is on" will likely
> click with them.
COMMENT: Hmm, I will admit that locally (SHadley/Hadley -- Skinner State Park http://www.mass.gov/dcr/parks/central/skin.htm) there was one emergency response within the last four months involving an individual who got lost in the woods and called 911 & was helped by a responding PD cruiser (talking to her directly from his cellphone -- kept sounding his siren/warning horn and also had his lights flashing) to find her way out of the woods. So yes it does work. Problem is that cellphone may not work all the time. The FRS proposal as I understand it, is for backup emergency radio communications IF others fail. Gee, $15.00 isnt' too much to pay for a comm device that might help you!!! Will the over general public buy into this.. Perhaps not, BUT subgroups such as typical recreational hikers, bird watchers, off road vehicles, and maybe some other at risk people (elderly) might be initially the groups to market the concept to. Will someone that just drives around in their vehicle buy and have one jsut in case ? Probably

not, BUT I understand that some car groups actually use FRS radio to communicate amont them as they ride into the country side.

>
> Heck, instead of FRS, why not encourage people to buy a EPIRB, ELTs, or
> PLB? Same concept, much better protection.
COMMENT: Well individuals buy PLB's for portable use, others of course are attached/assigned to aircraft and/or boats. The cost is still very high at $500-800 range. MOST folks aren't going to go out and buy this equipment. I totally agree that if you are someone who mountain climbs or goes hiking into the deep backcountry this should be very high on the list. BUT even in these instances an FRS radio (as just another backup) allows two way communcations, not just a one way signal.

Again lets keep this concept very simple -- It's a backup short range emergency radio communications concept that may work. AGAIN, I'd like to encourage all hobbyists to try some communications range experiements with an FRS radio communicating with another FRS radio and than also using a radio scanner (with applicable base, mobile, & portable antennas).

Thanks again for the input!!!

Ken

The same people who fund the rest of the SAR equipment. The equipment
would be kept with the SAR group.

Direct talk wouldn't be needed. This "device" would emulate a "cell
site" tricking the cell phone into thinking it was talking to a tower.
It would be trivial to do this, I just don't know what the hardware
would be like.

Yes, it would have to have some kind of idiot lockout feature to it.
Proper user education would be needed.

Errr, unless your counting some kind of crazy DFing setup, which can be
used on all transmitters, I would say not.

However, the phone companies have had phone tracking available to them
for years. With the addition of the augmented GPS capabilities of newer
phones, this would be simple.

> AS far as a built in emergency device for a cellphone.

No special frequency needed. If you are talking to a cell site it would
use that, if not it would go into "squawk" (Sending out a ping at set
intervals) mode. If it started going into "squawk" mode it would be
easily picked up, as there would be little to interfere with it.

In an emergency mode, all the niceties would be off, keeping power
consumption low.

Also, I really don't think SAR teams wants us "responding" anywhere.

chainsaw

If your targeting a smaller group, why not start educating these smaller groups on the advantages of PLBs rather then have them use something that is designed to find them, rather then encourage them to use something that may help to find them?

While it is important to make sure people are safe, I think it would make more sense to encourage something that is DESIGNED to help them in case of an emergency.

Not necessarily, there are currently 4 protocols: CDMA, GSM, IDEN, and
Analog.

Nextel is starting to stop supporting IDEN moving to Sprint's CDMA
network, GSM is widely used, and analog is being phased out (per FCC
order) in 2007.

I'm in Attleboro so my priority isn't always to listen to the southern half of RI but I occasionally travel south so I like to have the frequencies in the scanner. Give this file a try. I find that the channels are always changing so the file is sometimes out-of-date and sometimes up-to-the-minute. RI channels can be found in bank 0, 3 and 7. From time to time, I do a lot of playing around with the scanner so you'll find "junk" in banks 5, 6, 8 and 9. I'm always scanning the yahoo boards, etc. to find new stuff to listen to.

Newport will host the Tall Ships Parade in Late June/Early July of 2007.

Sponsored by AMICA Insurance this year.
http://www.tallshipsrhodeisland.org/
http://www.amica.com/aboutUs/pressreleases/06Releases/tallShips2007.html

The following Tall Ships will be participating:

BOWDOIN from Castline, Me.;
FAIR JEANNE from Canada;
FRIENDSHIP from Salem, Mass.;
GODSPEED from Jamestown, Virg.;
PICTON CASTLE from Cook Islands (N.Z.);
HARVEY GAMAGE from Watch Hill, R.I.;
PROVIDENCE from Providence, R.I.;
ROYALISTE from San Francisco, Cal.;
SORLANDET (or similar) from Norway;
SPIRIT OF BERMUDA from Bermuda (U.K.);
SPIRIT OF MASSACHUSETTS from Boston;
VIRGINIA from Norfolk, Virg.;
URANIA from the Netherlands;
BLUENOSE II from Canada;
CISNE BRANCO from Brazil;
GORCH FOCK II from Germany;
TARANGINI from India;
KALMAR NYCKEL from Wilmington, Del.;
and PRIDE OF BALTMORE II from Baltimore.

96. Civil Air Patrol Radi Operations Updates & List Members Input

Yahoo group: Scan-RI
Date: 2007-01-06 23:47:08 UTC
From: Ken
Topic: 96 Message: 96

Still haven't seen much reporting regarding Civil Air Patrol Radio Communications traffic.

As many of you know CAP will continue to operate on 148.125S/R, 148.15S/R, 148.1375S, 149.5375S until perhaps the summer period when all of the frequencies currently listed with change to new ones (a link was previous provided on the list to the new frequencies). The change over must be completed by 10/1/07 and the surge in changeover of repeaters etc will be in the April to August 2007.

My understanding from "sources" is that all the New England states (wings) have gotten their first shipment of the new EF Johnson Digital/Analog mobile/bases BUT may not have the authority in the northeast region yet to operate on the new frequencies. BTW another source states that CAP will primarily operate in the analog NFM mode on CAP frequencies, and that the P25 digital was primarily for interoperability with other federal/state/local users. As many of your know CAP has depended heavily on member owned VHF radio equipment in the past, and with the change to narrow band equipment, many of the member's radios do not meet the new technical requirements, and for most members purchasing a Digital/Analog combo radio is very expensive. However, some analog radios have been approved (but all are commercial grade) See: https://ntc.cap.af.mil/comm/equipment/equipment.cfm

Something that you might consider is trying to determine in your area, which Civil Air Patrol Repeater(s) (locations) you can monitor while at home, mobile, and portable.

"Sources" have indicated to me that the new band plan channel designations/frequencies have been approved/completed. I understand that much of the new BPCD is publically available on the web, perhaps due to an oversight.

Also remember that Civil Air Patrol aircraft, use the callsign CAPFLIGHT, followed by either 3 or 4 numbers. CAP aircraft operate on normal VHF Air Traffic Control frequencies (e.g. ground control, tower, approach/departure control, & Boston Air Route Traffic Control), so IF you here activity on these frequencies, it very possible the VHF-FM freqs will be active. CAP also operates on VHF Aero 122.9 & 123.10.

Additionally CAP has over 10,000 1/2 watt Intrasquad (ISR) Radios, operating in the NFM mode on 14 channels in the new military LMR band 396-399 mhz. See channels/freqs at: http://www.freqofnature.com/index.php?m=Common&p=Intra-Squad%20Radio -- this may be the primary radio system in operation for training in many units. Remember 1/2 watt with a fixed type antenna (government type family

radio service)

Surely, CAP radio communications activity normally isn't as exciting as typical law enforcement, fire, & emergency medical activities, BUT remember when a small plane is missing and other natural disaster occur, it's going to be those small CAP aircraft (C172's, primarily C182's, etc.) performing those search & recon missions....

So again your input is appreciated.

Ken

I heard that two of the new frequencies are still in dispute, so things may yet change. Supposedly the Air Force forgot to get all of them cleared first.

I believe that MA has/will have seven repeater locations. I think that NH currently has two, CT has five(?), and RI has one; I don't know if these numbers will change after the change-over.

A few weeks ago someone provided a link to a list of CAP repeater locations as of more than two decades ago. That list is ancient and probably very inaccurate.

Many states (Wings) have daily check-in nets in the evening, so that's a good time to hear activity.

I have heard what might be limited use of Project-25 digital on CAP frequencies, on an experimental basis. I don't have anything capable of decoding P25 though.

> yet change. Supposedly the Air Force forgot to get all of them cleared
> first.
COMMENT: You are correct on the two simplex frequencies. Also might see a change in one of the
repeater output frequencies. Remember band plan could be natiowwide designators and some other helpful information. The key to the changeover will be basically just searching the 138-144, 148-150.8 mhz bands with CAP disappears from their current known frequencies.

>
> I believe that MA has/will have seven repeater locations. I think that NH
> currently has two, CT has five(?), and RI has one; I don't know if these

Another "official" source indicates the following on "fixed" total repeaters by state:
CT: 8
MA: 6
ME: 3 (looks like HF and "High Bird" activity will be used extensively, surprising on the limited #)
NH: 3
RI: 3
VT: 2

>
> A few weeks ago someone provided a link to a list of CAP repeater

> locations
> as of more than two decades ago. That list is ancient and probably very
> inaccurate.
COMMENT: Possibly, you'd have to compare it with the information above to determine if any additional sites were added. Generally I would suspect that CAP sites will be on government owned radio towers BUT there might be some exceptions.

>
> Many states (Wings) have daily check-in nets in the evening, so that's a
> good time to hear activity.
COMMENT: YES and that's what I'd like to see from every New England List (So far VT has given when they check in). Remember that CAP is basically going to be using 148.125 & 148.15 for these nets. SO please report. Ideally day, time, frequency, ctcss, and whether repeater, simplex, or mixed...

>
> I have heard what might be limited use of Project-25 digital on CAP
> frequencies, on an experimental basis. I don't have anything capable of
> decoding P25 though.
COMMENT: Might be some simplex activity on the current authorized frequencies. CAP nationwide has not authorized the use of the new frequencies yet.

Thanks again for your input Andy!!!

104. New FCC General Menu Reports Preview

Yahoo group: Scan-RI
Date: 2007-02-27 22:14:34 UTC
From: Bill
Topic: 104 Message: 104

FYI....

Sent: Tuesday, February 27, 2007 9:55 AM
Subject: New FCC General Menu Reports Preview

You are receiving this email because you have registered as a user of the FCC General Menu Reports application. If you do not wish to receive mail regarding this online web application, please email phil.hamm@... to be removed from this list.

Please take a few minutes to take a look at the new FCC General Menu Reports 3.0.00 preview version, at the location http://selafoss.fcc.gov/General_Menu_Reports/index.cfm.

This new version of the application combines some of the best aspects of the original text/table based application http://gullfoss2.fcc.gov/cgi-bin/ws.exe/genmen/index.hts and the current production application http://svartifoss2.fcc.gov/reports7/.

The Preview version contains simple "quick" direct queries for callsign, file number, and parent/child. It also combines all the License/Administrative queries into one page. We are working on combining the engineering queries in a similar manner right now.

The Actuate reporting services have been removed, and therefore some of the more advanced search and download functionality has been lost. However, user feedback we've received has indicated that these features are rarely used, and simple text based tables are preferable to the complicated "brochure quality" presentations served up by Actuate. Also, Actuate has some incompatibilities with certain internet Web Browsers and hand-held internet devices, which will no longer be a problem moving forward. Printing, as with most web-based text applications, will be dependant on many factors, such as which browser you are using, operating system, printer, etc.

The preview application features the following changes / upgrades:

* There are no detail pages built in to the General Menu Reports application. All records contain links to the appropriate FCC bureau native web page(s).
* File Number entry for obtaining data on pending, cancelled, etc. applications is now available for all databases for whatever information is publicly available as per individual FCC Bureau policies. In the past only pending data was searchable in only the ULS database.
* A new License search replaces the "Licensee", "Licensee / State", "FCC Registration Number", and "State / Service / Radio Service" queries from the old system. All of these data elements and any combination can be used as selectors in the powerful new query.
* In addition to the previous selectors, you can now select licenses based on Grant Date, Expiration Date, or both.

Download functionality will depend on the browser and operating system you are using. Most users will easily be able to capture the General Menu Reports output to their favorite spreadsheet or text editing software using built-in browser export functionality or simple copy/paste menu options.

Please note that the preview application is currently running against the same exact reporting copy database as the production and legacy versions. You can use this system to query against all production data in the FCC Licensing databases.

If you have any comments or suggestions regarding the preview application, please email phil.hamm@....

From: Ken
Topic: 106 Message: 106

Hello Folks:

Please disregard my message. The BEST method if you are having problems
with any periodical including radio related hobby magazines as below is to
have your magazine publisher become part of the USPS program that allows
them to input your complaint directly into a data base. See:
http://epubwatch.usps.gov/epubwatch/login.cfm
Also you can look at the present zipcodes that appear to be having problems
"Participating zip codes" but this is an excel file.....

I found this out after posting my request... Apologies & thanks

108. Monitoring Times Annual Air Show Guide & Airshow Comments

Yahoo group: Scan-RI
Date: 2007-03-07 23:30:51 UTC
From: Ken
Topic: 108 Message: 108

The "Monitoring Times" magazine March 2007 edition provides some extensive information on the upcoming airshow season:

First there's Larry Van Horn's annual guide 4 pages packed with lots of potential frequencies for just about every military & civilian aerobatic team on the airshow circuit.

Next there's an article on "Andrews Air Show, 'Best of the Best", which has some interviews short stories with "The Photographer" (always seen but not heard!!! :)), "The Expert", & "The First Timer"... Many of you may not know this but the "First Timer" and "Scanner Dan" are both the wagon guys who for many years had wagon fulls of mobile/portable radio gear, large battery pack, antennas & speakers. Read Dan's comments regarding the chilling affect after "9/11" and how he adapted to the restrictions. Very interesting reading.

Finally there's Larry's monthly "Milcom" column which covers equipment & the major show schedules. The radio equipment lists all new equipment and doesn't cover the potential used equipment that is less expensive and will still allow you to monitor both the VHF/UHF aero comms. Perhaps we can start a separate list again of all the milcom capable scanners.

BTW for those of you that are interested in ALL airshows (including the smaller ones that don't have the prime performers) being held around the world (including US & Canada), check out the "International Council of Airshows" http://www.airshows.org/ click on the "Events" tab. This is always a good site to check back into at least once a month.

Finally, I would hope that ALL of the airshow organizers & PAO's will make a better effort this year to have static displays open cockpit or at least have elevated stairs so one can look into the fighter type aircraft & have larger aircraft also open to the public. The trend has been that more aircraft are closed and only visible from ground level.

Comments to the appropriate list(s)

From: Ken
Topic: 110 Message: 110

I think one of the best tools available at this point that puts the information on one concise page is:

http://flightaware.com/resources/airport/browse/

If you know the ICAO code for the specific airport you can input OR as an alternative just browse the states.

Great information available on the same page:

*Airport Frequency information (click on the airport diagram)

*Aerial Photo of the Airport -- pops up right on the page & you can move around or focus in/out

*Approach/Depature plate information

*Link to the the arrival/departure page

*Other nice to have information including website links

Give it a try & IF you get a chance report the activity you hear!!!

Colleges in Worcester on alert after FBI warning

By Mike Elfland TELEGRAM & GAZETTE STAFF

The FBI has received information of a possible threat to colleges in the Worcester and Providence areas.

Gail Marcinkiewicz, spokeswoman for the FBI's Boston office, said this morning that agents have gathered information that prompted them to alert public safety officials at the many colleges in and around the two cities.

She declined to detail the threat.

She said FBI agents passed on the information for schools to do "whatever they deemed appropriate."

In an e-mail sent last night to students at Worcester State College, President Janelle C. Ashley told of the FBI warning and urged students to contact campus police if they see anything suspicious.

"At this time law enforcement agencies have not been able to verify the threat," the president wrote. "However in light of the Virginia Tech tragedy, the administration and college police have taken measures to respond to the threat."

Ms. Ashley said information given to the school by the FBI did not include a specific school or time frame.

Clark University also notified its students of the situation by e-mail.

"We always take the safety of our campus and our students seriously," Jack L. Foley, Clark University's vice president for government and community affairs, said this morning.

116. Monitor 153.02 Constant Carrier?

Date: 2007-05-05 20:48:46 UTC
From: Ken
Topic: 116 Message: 116

For those of you in the areas below could you just program this frequency into your scanner for very short while and determine if you get a constant carrier with no modulation on this frequency (153.02)??!!

Bourne, MA
Peabody, MA

Westbrook, ME

Madbury, NH

Providence, RI

Here in my area (Springfield MA), for over 5 months I've been monitoring a constant unmodulated carrier on this frequency 153.02 with a digital tone of (DCS 115) & this same licensee has a transmitter in Agawam MA (Provin Mountain), so I'm wondering if other transmitter sites also have this unmodulated constant carrier??

Thanks

Ken

117. FRS "On Scene" Aero Hobbyists National Common Calling Frequency

Yahoo group: Scan-RI
Date: 2007-05-06 18:30:11 UTC
From: Ken
Topic: 117 Message: 117

Just a reminder that the nationwide Family Radio Service airshows & other airport watching/monitoring "on scene" activities calling/communications Frequency is Channel 14 (467.7125 mhz) with CTCSS 38 (250.3 hz) and the alternate frequency/ctcss is Channel 7 (462.7125 mhz) CTCSS 15 (110.9 hz).

So with upcoming airshow season, or even the opportunity to visit your local airport to watch & radio monitor flight activities give a call out on these frequencies & perhaps you will meet a hobbyists with like interests!!!

Ken

Ken,
I've had that freq in the scaner for a couple of days and had heard NO ACTIVITY. In Rhode Island the RI Turnpike and Bridge Authority is the only licensee. I will keep listening and report any findings.

This used to be used by Woonsocket Fire years ago as a recue frequency to talk to the hospital. After CMED came into being, the use of that frequency was greatly reduced. With the later widespread use of cellphones on recues, CMED died a slow and painful death statewide. I'm not sure that they are still using it, or if it is reserved for "EMA".

I know that when they went for an additional channel, I suggested using it as one side of a repeater pair, but we couldn't do it for some reason. They had to go for two new frequencies.

If you ask anyone from Woonsocket about the frequency, refer to it as the "old rescue channel".

Excitement is in the air over Quonset
06/21/2007 01:00 AM EDT

The Blue Angels will dazzle the crowd at this weekend’s Rhode Island National Guard Open House and Airshow at Quonset State Airport.

AP / DEBI HAUSSERMANN DEBI HAUSSERMANN

Look in the sky. Or look on the ground. Everywhere you look this weekend at Quonset, you’ll see planes.

Saturday and Sunday is the 15th annual Rhode Island National Guard Open House and Airshow. There will be jet fighters, combat carriers, propeller planes and even a truck, which nearly flies.

Among the more notable attractions are the Blue Angels, a promotional squadron for the Navy and the Marines, that will present formation flying in their F-18s. This follows a fatal crash for the squadron in April in Beaufort, S.C., where one of the pilots was killed, the first fatal accident for the Angels since 1999.

The show will also feature an F-15E Strike Eagle and an F-22 Raptor.

There will be a large C-130J combat carrier. And there will be some P-51 Mustangs, which destroyed more enemy aircraft in Europe than any other plane.

There will be a few stunt pilots making barrel rolls and loops. And there will also be several flying soldiers: the Army Black Daggers. They’re parachutists who fall from the sky and float to the ground in formations.

But perhaps you’re wondering what a truck’s doing at an airshow. Well, it’s not flying, but it’s coming close.

Les Shockley’s Shockwave, a Peterbilt truck, is equipped with a jet engine that gives it 36,000 horsepower and a top speed of 350 mph.

The air show is Saturday and Sunday at Quonset State Airport in North Kingstown, 10 a.m. to 4:30 p.m., and in years past has drawn nearly 100,000 people. The gates open at 9 a.m. Admission is free, but a parking donation of $10 is suggested. Proceeds support local charities, most notably Hasbro Children’s Hospital. For more information, visit www.riairshow.com.

122. [Scan-Mass-East] Tall Ships Festival Newport, I

Just thought I'd make everyone aware of the Tall Ships Festival in Newport, RI. There is expected to be an extreme amount of radio traffic. Between all the organizations that are staging for the event and all of the groups actively participating. I'll be operating with the RIUSAR team. I also know that the USCG will be actively patroling and they've got at least 3 helo's in the area for the event. They've also pulled in 2 cutters into Newport Harbor. Newport Fire is getting geared up for the event and Newport PD are ready for the challenge as well. The Army National Guard is more than likely going to be on foot patrol. I know that the airwaves are going to be bustling with activity. The festival runs from Wednesday June 27th to Saturday June 30th.

Ken,
Finally got a hit on that freq in RI. Like I said before it the RI Turnpike Authority. Heard work crew on the Newport Bridge setting up lane shift 153.020 PL-118.8.
Interestingly, I have also heard business comms. Sounds like a greenhouse or landscaping company, no PL/DCS though.

COAST GUARD URGES AWARENESS AND SAFETY DURING TALL SHIPS RHODE ISLAND CELEBRATION

TALL SHIPS TRAFFIC CHART HERE

WOODS HOLE, Mass. - The Coast Guard is urging boaters to operate safely and to obey all rules and regulations in place in Narragansett Bay, R.I., in conjunction with Tall Ships Rhode Island events this week. The event brings multiple tall ships from a variety of countries to the waters off Newport, R.I., and is expected to draw thousands of recreational vessels to the area. A Parade of Sails is scheduled to take place Sunday morning that will affect boating traffic throughout portions of Narragansett Bay. The Coast Guard is urging boaters to become familiar with the planned special rules and various safety and security zones that will be in effect throughout the week.

Newport Harbor - From Wednesday, July 27 through Sunday, July 1, all vessels entering Newport Harbor must:

a.. Maintain a speed of at least 3 knots, or no wake speed, not to exceed 6 knots.
b.. Keep at least 20 yards away from all Tall Ships.
c.. Enter the harbor by Fort Adams State Park and proceed in a counterclockwise direction around the perimeter of Newport Harbor, exiting the harbor by the southern end of Goat Island
d.. If applicable, proceed under sail only if also propelled by machinery power.
East Passage, Narragansett Bay - Sunday, July 1 a large portion of the Narragansett Bay's East Passage will be closed to general traffic from 9 a.m. until the conclusion of the Parade of Sail. During that time spectator vessels must remain outside of a Coast Guard safety and security zone established for the parade. Coast Guard and other law enforcement vessels will be on scene to keep vessels clear of the closed area, but boaters can enhance their enjoyment of the parade by becoming familiar with the safety and security zone before

they leave the dock. Being familiar with the closed areas will allow boaters to avoid the requirement to move their vessels during the parade and will enhance the safety of all mariners in the vicinity.

Special Anchorage - Sunday, July 1 from 8 a.m. to 8 p.m., a special anchorage for excursion vessels and passenger-for-hire vessels greater than 50-feet in length will be established in that portion of Anchorage A that lies north of the Newport/Pell Bridge and west of the Parade of Sail security zone (generally that area west of the "green lane" Recommended Vessel Route on nautical charts). Vessels transiting this portion of Anchorage A must keep at least 20 yards away from anchored excursion vessels or passenger-for-hire vessels, and must maintain a speed of at least 3 knots, or no wake speed, but not more than six knots.

Staging Area - Sunday, July 1 from 8 a.m. to 8 p.m., a safety and security zone has been established to enable Tall Ships to prepare for and secure from the Parade of Sail. The staging area safety and security zone is a 1,000-yard radius circle centered on position 41-25N, 71-23W, which is approximately 1 nautical mile north of the "NB" entrance buoy. All vessels must remain outside the perimeter of this safety and security zone.

A graphic depiction of these areas is available by visiting. http://homeport.uscg.mil/. After entering "SOUTHEASTERN NEW ENGLAND (Providence)" in the "Select Coast Guard Unit" portion of the Port Directory tab click on "TALL SHIPS 2007 REGULATIONS" under the "Notice to Mariners" section. On the graphic, the portion of the East Passage that will be closed is outlined in red. Boaters must remain outside of the outlined area from 9 a.m. Sunday morning until the conclusion of the Parade of Sail. The special anchorage, for use by excursion and passenger-for-hire vessels greater than 50 feet in length, is the area outlined on the east side of Jamestown (Conanicut Island), north of the Newport/Pell Bridge, and the staging area is approximately 2 nautical miles south of Beavertail Point.

Mariners are reminded that life jackets are the single most important safety item to have onboard their vessel and that Rhode Island law requires all children under the age of 13 to wear their life jacket when aboard a boat less than 65 feet in length unless they are below deck or in an enclosed cabin. Approximately 8 out of 10 people killed in boating accidents weren't wearing life jackets.

With sunny and warm temperatures forecasted for this weekend, all boaters should keep in mind that the combination of sun, wind, noise, vibration and boat motion can triple the effects of alcohol and can impair a person much faster than alcohol consumption on land. Approximately 33 percent of all boating fatalities involve alcohol consumption. The Coast Guard will be actively engaged in enforcing boating while intoxicated laws throughout the week.

Other simple tips to enhance the safety of boaters and their passengers are:

a.. Forbid passengers from bow riding on a vessel, therefore preventing passengers from accidentally falling off of the vessel and potentially being struck by the boat and/or its propeller.
b.. Remain aware of the dangers of rafting to other vessels in areas susceptible to wakes from other boats. The wake from one boat can cause violent motion onboard vessels that are rafted together, leading to serious injury.
Additional information on boating safety can be found at http://www.uscgboating.org/

COAST GUARD SEARCHING FOR MISSING MASSACHUSETTS FISHERMAN

BOSTON - The Coast Guard is actively searching for Phillip Stevens, a Massachusetts spear fisherman, off the coast of Newport, R.I. tonight.
Coast Guard Sector Southeastern New England received a 911 call reporting a missing spear fisherman near Brenton Reef, R.I. around 4:30p.m.

The 59 year-old man was spear fishing with his wife and was scheduled to meet with her around 3:30 p.m., but never returned.

His kayak and spear were found on-shore.

He was last seen around 12:30 p.m. wearing a wet suit. He was spear fishing about 20 yards from shore in about 14 feet of water. The water temperature is about 66 degrees Fahrenheit.

The Coast Guard has launched an HH-60 Jayhawk helicopter from Air Station Cape Cod and a 25-foot response boat from Coast Guard Station Castle Hill.

Additional agencies assisting in the search include: Department of Environmental Police, a Middletown dive team, Newport Harbormaster and Newport Police and Fire Departments.

Hi all,

Yes Larry's blog will be interesting.

By the way has anyone monitored the RI 800 Mhz System? What are you hearing? can it be heard in Jamestown or Newport? I think I have all the frequencies and talk groups placed in correctly and I have never heard anything.

If someone wants to check what I have I will be upload my USAD File.

Maybe the system is not that active.

131. QTH (Scituate) Scanning Potential

Yahoo group: Scan-RI
Date: 2007-08-20 01:59:34 UTC
From: kb1gcb
Topic: 131 Message: 131

Hi,

I am interested in buying a scanner and wonder what you think I would receive from my home in Scituate, RI. My preference would be a Diamond discone antenna--already have and enjoy a Diamond vertical vhf/uhf for my ham radio 2m/70cm. The discone would be outside on the house approximately 15-20 feet high. I would be interested in scanning frequencies other than the ham bands, which I can already receive. In other words, what and where do you think I would be able to receive from my QTH near the Scituate reservoir? What might my scanning range be, in miles?

Also, do you thing using a hand scanner with the discone would give me more flexability than a base station since I could also use it with the rubber duck antenna.

Thank you for your time and help . . . John KB1GCB

135. Antenna

Yahoo group: Scan-RI
Date: 2007-08-21 13:51:23 UTC
From: rjhill3@cs.com
Topic: 135 Message: 135

Hi all,

First of all: to John. If you get a Diamond Discone (one of the best Antennas) up about 10 - 20 feet the sky's the limit. You should be able to receive, if you are on level or high ground (not a valley) most of RI, many southern MA, State Police, Worcester Trunked and most of eastern Ct.

I had a Radio Shack Discone on a roof, up 10 feet on a hill on the East Side of Providence between Hope St and Main Street.

I was able to get MA SP, all of RI, Worcester trunked, Boston PD all eastern MA, South Shore and Central MA and suburban Boston PD's and fire. Additionally, I was able to receive S. Coast MA and Cape traffic. I was also able to receive most Eastern Ct PD's and Fire and CT State Police.

I would think you would wish to have a 396 or 996 to receive the CT SP digital transmissions.

Secondly, is anyone monitoring the RI 800 Mhz trunked system? How busy are they? what departments are using the system? I have what I think are the correct frequencies and talk groups and I receive nothing, obviously, I must be doing something wrong. I would be glad to upload what I have here for someone to look at and correct any mistakes I have been made. I have been in Narragansett, Jamestown, Newport, North and South Kingstown for hours and not received anything.

Thanks,

Ray

Hi John....I used to live not far from you....on Rt. 12 and did just fine with just a plain old wire ant that I had....and picked up most of the central part of the state..Of course ur road did not exist when I grew up there...LOL
I now live in Smithfield, on the Johnston line and have the same antenna. and I pick up everything from Pawtucket to Coventry...Foster and Putnam, Ct. Now bear in mind that my antenna is INSIDE...hidden behind the curtain..it is basically a wire dipole - each leg about 15 inches - connected in the middle with a piece of Bakelite. Tied into the coax...homebrew..it actually came from the old Potterville Fire Dept. on Old Plainfield Pike...My husband and I were both members there and when they tore it down after building the new one on Tunk Hill, I got the antenna out of the attic..and have used it ever since...and even though I am not active anymore in Fire and Rescue, old habits die hard I guess....so my scanner runs all the time...

Oh yes, and by the way...I am a Ham also....N1NUY...

Have fun scanning...73 Jean

My preference would be a Diamond discone antenna--already have and enjoy a Diamond vertical vhf/uhf for my ham radio 2m/70cm. The discone would be outside on the house approximately 15-20 feet high. I would be interested in scanning frequencies other than the ham bands, which I can already receive. In other words, what and where do you think I would be able to receive from my QTH near the Scituate reservoir? What might my scanning range be, in miles?

Also, do you thing using a hand scanner with the discone would give me more flexability than a base station since I could also use it with the rubber duck antenna.

Thank you for your time and help . . . John KB1GCB

Subject: [Scan-RI] Naval War College

Does anyone know where the security forces for the Naval War College,
NUWC and the Newport Naval Base went ?? I was hearing them on 140.350
and 138.525. I haven't heard anything on these freqs in a couple of
months.

thanks,
Gil
central Rhode Island

They did go P25 digital, but NOT on those freq's. They now are on 143.125.

To clarify regarding tomorrow's live feed;

Both Scott (Scan Cape Cod) and myself will be providing a dual feed
in Teamspeak for this event. My feed will cover primarily Military
Air/Tower frequencies (analog mode), while Scott will provide
Digital
P-25 ground ops/security traffic from Otis (my man) ANGB. I had my
feed connected late this afternoon, and there was a couple of snags
with frequencies locking up, but hopefully there will be no further
issues for tomorrow.

Although I was not at home today, my Wife said she has never heard
it
so busy and so loud with air traffic as it was today. There was a
LOT
of pre-show activity for sure! This is going to be an extremely
popular event. Attendance is rumoured to be upwards of 60,000 per
day. I won't be home till mid afternoon tomorrow, but will be on my
deck Sunday morning basking in the festivities for sure!

I would like to request that if anyone else has a request to add a
frequency for scanning, or an agency, please contact Scott directly
before you try to add it to the feed yourself. This event has
potential to be a very busy monitoring experience, and Military Air
monitoring is a totally different animal that listening to Public
Safety, if you have never listened to it before. The dual feeds
should work well, please show courtesy to the feeds, and for myself
I
am hoping it provides a great scanning experience for everyone!

139. Annual 76 Auction & Flea Market Announcement

Yahoo group: Scan-RI
Date: 2007-08-25 16:13:55 UTC
From: Peter Harrison AA1PL
Topic: 139 Message: 139

Its that time of year again! The Rhode Island Amateur FM Repeater Service (RIAFMRS) will be holding its annual "76 Auction & Flea Market" on Saturday September 15, 2007 at its usual place which is the VFW Post 6342, 98 Main Street, North Smithfield, RI (the village of Forestdale).

The flea market opens at 8AM and the auction begins at 11 AM. I hope to see you all there. Please come out to mingle with other hams, get a good deal on used electronic gear, radios, and accessories, get a bite to eat, and most importantly support the RIAFMRS repeater projects, upgrades, and maintainence. Of course we will have our popular 50/50 raffle but you must be there to purchase a ticket! (You need not be present to win). We will have a talk-in station on the 146.76 repeater.

Please visit our updated web site at www.qsl.net/riafmrs for more information and directions to the 76 Auction as well as information and photos of our repeaters and repeater projects.

Please pass this along to other ham radio operators and radio/electronic hobyists.

Thank You.

Well, I went and looked for this vessel the other day. Its located at the Providence Hurricane Barrier. It must be some type of recovery boat since its tied up next to the Juliet 484 Russian sub which sunk during an April storm. Will try to get some pics if I can get close enough.

Per a story in the Providence Journal it is a vessel carrying Navy dive and salvage teams. The Juiliet Class Soviet Sub that was the Russian Sub Museum sank in a storm. Since then the Navy has taken a great interest in the sunken sub. They plan on using it as a unique training area to allow their divers to actually dive in and around this sunken Russian submarine. As a fringe benefit the Navy has offered to have their salvage crews raise the sunken sub for free, also as a training opportunity, which is good news for the Museum. Of course odds are when it comes up it will be a rusted mess, which is a shame...

Sept. 1, 2007 - Newport boat collision injures three

Office of Public Affairs
U.S. Coast Guard First District

Press Release Date: Sept. 1, 2007
PR#: 003-09-07
Contact: Petty Officer Etta Smith
(617) 406-9011

Newport boat collision injures three
BOSTON - Three recreational boaters were injured in a collision with a charterboat near Newport, R.I., around 9:40 p.m. today.

A 49-year old male and a 10-year old girl suffered head injuries and a 13-year old boy's leg was injured when their 23-foot center console type boat collided with the 42-foot charter vessel Katherine. No injuries were reported from the fourth passenger aboard the recreational vessel or to the Katherine's nine passengers.

The Katherine's master called the Coast Guard via VHF FM radio to report their collision with the recreational vessel north of Goat Island about 9:40 p.m.

A 25-foot boat crew from Coast Guard Station Castle Hill was in the area and diverted to the scene. An additional 41-foot boat crew from Station Castle Hill launched to assist.

A Newport Harbormaster vessel was first on scene and removed all three passengers aboard the recreational boat. The passengers were transferred to the 41-foot Coast Guard boat and were further transported to EMS standing by at Perrotti Park in Newport Harbor.

The injured passengers were ultimately transported to Newport Hospital for medical treatment.

The recreational vessel sustained some damage to the bow and was towed by Newport Harbormaster.

The case in under investigation.

"The Coast Guard urges all boaters to remain alert at sea, especially at night when visibilty is low. Mariners should contact the Coast Guard via VHF FM radio channel 16 or cell phone in the event of an emergency at sea," said Lt. Bob Griffin who assisted with the case.

144. US Navy Security Base Security Exercise 9/17-9/20

Yahoo group: Scan-RI
Date: 2007-09-15 21:07:36 UTC
From: Ken
Topic: 144 Message: 144

See: http://mt-milcom.blogspot.com/

Time period: 9/17 to 9/20/07

If you live close enough to a naval base, you might be able to monitor increased activity, especially on the security net freqs. Might be a good time to put the scanner in the search mode to try to find any new frequencies!!!

Sept. 30, 2007: Coast Guard airlifts man from boat

First District Public Affairs
U.S. Coast Guard

Press Release Date: Sept. 30, 2007

Contact: PA1 Zach Zubricki
(617) 223-8515

Coast Guard airlifts man from boat

BOSTON - A Coast Guard Air Station Cape Cod helicopter hoisted a man from a boat that ran aground over rocky shoreline about eight miles west of Point Judith Harbor, R.I., Saturday at 4:30 p.m.

William R. Jones, 41, of East Lyme, Conn., was alone on the Interlude, a 28-foot sailboat, when it lost engine power and ran aground on the Quonochontaug Breach Way.

Coast Guard Station Point Judith launched a response boat, which was joined by two rescue boats from the Charlestown Police and Fire departments. The Coast Guard Cutter Chinook, an 87-foot patrol boat homeported in New London, Conn., also responded.

When none of the vessels were able to get close enough to assist Jones because of the danger of the rocks, a Jayhawk rescue helicopter hoisted the man to a nearby shoreline.

"We felt it would be more dangerous to attempt a rescue using one of the boats," said Petty Officer Matthew Oliveira with Station Point Judith. "Our best option was to hoist the man to safety with the helicopter, and we were glad to see it worked out so well."

A local salvage company later removed the sailboat from the rocks.

Jones did not report any injuries.

Subject: [Cruise_Ships] Goodbye summer – Newport tourism cruises into fall

Goodbye summer – Newport tourism cruises into fall
BY RICHARD SALIT
Journal Staff Writer

Providence Journal, RI
01:00 AM EDT on Sunday, October 7, 2007

NEWPORT – One by one, the small tenders load up with passengers and shove off from the side of the towering cruise ship anchored off Goat Island. As a British flag flaps lightly above the deck of the 627-foot vessel, the small boats motor off, veering around the stern bearing the ship's name and home port – Saga Ruby, London.

Moments later, the tenders arrive downtown at the Perrotti Park piers, disgorging small groups of passengers with distinctly British accents.

Newport is ready.

Police cars with flashing lights sit on the side of America's Cup Avenue, slowing traffic. Charter buses idle while waiting to shuttle the visitors to the mansions of Bellevue Avenue, the Cliff Walk and other attractions. A small Saga Ruby tent offers chilled fruit punch. The sun is shining and the air is warm.

"Good morning. There's very good tourist information over here if you'd like," says Sharon Nogg, a Saga Ruby crew member who was directing her ship's passengers to the park's tourism office on this Friday morning.

Fall is the time of year when this Colonial seaport – with its quaint shops, cobblestone streets, Ocean Drive and Gilded Age estates – is a magnet for the world's floating steel behemoths. They arrive every few

days now, helping to extend Newport's tourism season beyond the summer into autumn and enlivening weekdays that might otherwise be rather humdrum for business.

"They bring their ships here because there is a worldwide brand awareness of New England. People think of New England as the quintessential colored maple tree," says Evan Smith, president and CEO of the Newport County Convention & Visitors Bureau.

Even with a slew of competing international destinations – from the Caribbean to the Mediterranean and Mexico to Alaska – New England still catches travelers' fancy, at least for a handful of weeks. And the cruise ships are happy to oblige.

"They know people want to be in New England in the fall. That sells cabins," Smith says.

THE CRUISE LINE Industry Association estimates that $24 million is pumped into Rhode Island's economy annually. Smith says the majority of that is spent in Newport, when passengers and crew come ashore and spend money while touring, shopping and dining in the city.

And, thanks to a cruise ship tax, the city is paid $4 for every person who steps off an ocean liner and comes ashore. That amounted to about $217,640 last year, according to the city's finance office.

The number of cruise ship visits to Newport has actually dropped dramatically over the years. The frequency climbed in the mid- to late-1990s, peaking in 2001 at 66 visits, according to the Convention & Visitors Bureau. The total was about half of that last year and will be comparable this year, with 36 ships slated to visit, all but 9 of them in September and October.

But those statistics are misleading, Smith maintains. More important, he says, are the number of passengers that arrive in Newport waters. That number has grown steadily, from 35,000 in 1994 to more than 70,392 two years ago. This year, 67,250 visitors are expected.

The explanation for the apparent discrepancy, says Smith, is the growth in size of cabin space on ships and Newport's ability to attract the largest vessels.

"Today's ships are much larger, so the bottom line is you can have fewer arrivals but more passengers because the capacity of the ship coming today is much larger," Smith says.

For example, eight days ago, Newport eagerly welcomed the arrival of the 1,132-foot Queen Mary 2, which can carry 3,052 passengers and a crew of 1,253. The day before, two other ships had been in the port: Crown Princess, which has a capacity for 5,000 passengers and crew, and Constellation, which can carry 3,449 people. The day after the Queen Mary 2 arrived saw the arrival of Veendam, which holds 4,000.

The Queen Mary 2 not only flooded the city with its passengers, but with people drawn to Newport on a beautiful Saturday to see the spectacular Cunard cruise liner.

“It was very busy,” says harbormaster Timothy Mills.

People parked on Goat Island and sat on the seawall to gaze at the immense ship. Lay the Eiffel Tower on its side or park 41 buses in a row, and the QM2 is still substantially longer.

There were so many people on Bowen’s Wharf that day that Marie-Luise Inc., a hand-blown glass boutique, swung open its doors before its usual 10 a.m. opening.

“The store was full at 10,” says saleswoman Claire Harrington, adding, “English people love glass.”

THIS PAST THURSDAY, the Saga Ruby arrives alone, with 655 passengers and 380 crew. But it wasn’t supposed to be this way. One of the world’s most renowned cruise liners, the Queen Elizabeth 2, had been expected too, making her last visit to the city before becoming a floating hotel in Dubai in the United Arab Emirates.

But by 10 a.m., with Saga Ruby already unloading passengers, word begins spreading that the QE2 has decided to go straight from Boston to New York, possibly because of delays caused by fog.

“They’ve canceled the ship,” says Thomas Anderson, whose company, Destination Canada New England, serves cruise ships by arranging tour packages for their passengers. “It’s a drag,” he says, but adds, “It’s the nature of the business.”

But the Saga Ruby passengers are thronging the buses Anderson has arranged for them. Most cruise ships that visit New England carry an older, more affluent clientele, unlike some of the Caribbean ships that are popular with young, single people or families with small children. Saga Ruby, in fact, caters to the aged, and it’s plain to see. Many have canes. One is in a wheelchair. Few are moving quickly.

Saga Ruby is on a 31-day transatlantic cruise from Southampton, England, with ports of call in Canada and New England, and its southernmost destination in New York.

“This is our first time on the coast,” says Leslie Trollope, 77.

“We wanted to see the fall and New York,” adds his wife, Margaret, 75.

The couple, cruise ship veterans, head off for a walk through downtown.

The Saga Ruby has anchored just outside the mouth of the harbor and will leave by the middle of the afternoon. That’s common for Newport. Many ships don’t stay overnight, and those that do rarely stick around for a full 24 hours. That’s both the curse and the cachet of being a smaller port that has no space for cruise ships to dock. The ships can’t begin

or end cruises here, and a great deal of time is needed to ferry passengers ashore.

On the other hand, says Smith, Newport is ideally located between Boston and New York, two major cruise ship ports.

“We are just the right distance outside of New York in terms of cruising time,” says Smith.

And while Newport must rely on tenders to ferry passengers ashore, it has a deep, spacious, well-sheltered anchorage that makes it relatively easy for the ships to get in and out, Smith says.

“Generally the ships tend to favor ports that have docks,” says Smith, recalling fruitless studies in the past to develop such facilities in Newport. Fortunately, he says, “the East Passage is very deep. They can negotiate very easily without much tugboat pushing and shoving.”

Ports in New London, Martha’s Vineyard and Prince Edward Island are all eager to lure more cruise ships their way, he says. Even Providence has gotten into the action, drawing the smaller ships of the Warren-based American Canadian Caribbean Line to businessman Patrick Conley’s Providence Piers. The ships used to make weekly stops in Newport.

For Newport to remain competitive, Smith says, it’s all about being convenient and hospitable.

“I think what the City of Newport is working on is how they can improve the efficiency of once [visitors] arrive in Perrotti Park, making sure ship guests are comfortable, that water is available, the efficiency of moving lots of people back and forth.”

Smith readily admits that cruise ship passengers are just a fraction of the 3 million people who visit Newport every year. But after the sailing and beachgoing days of summer are over, and the crowds have largely vanished, cruise ships are one way to keep tourists coming to town, along with motor coach tours, fall festivals and weddings.

“I know the merchants are very anxious for their business,” says Smith. In fact, many seem to have handy copies of the schedule of visits put out by his agency.

What’s particularly appealing about cruise ship visits is that they don’t add more motor vehicles to the city’s narrow, congested streets, Smith says. And if people like what they see, they might very well return.

“I’ve seen customers come back. They come back to spend more time,” says Brian Kiracofe, owner of Newport Scrimshander, on Bowen’s Wharf. “You can’t see Newport in four hours.”

Scanner Software Seminar and Webinar Thursday November 29th 7PM EST

Come to the Scanner Master Open House Scanner and Software Seminar on Thursday November 29th at 7 PM at our office in Natick, MA. Map. Please be sure to arrive 15 minutes early if possible.

You can also join us online for a free "Webinar" version of the presentation. There will be 3 separate Webinars, you may register for one or all three but you must register for each one individually. It only take a second to register, and it's free!

Webinar #1:
Butel ARC996 Software for the Bearcat BCD996T
Thursday November 29th 7:00-7:30 PM
Click here for free registration
Webinar #2:
ARC500 software for the new GRE PSR-500/600
Thursday November 29th 7:30-8:00 PM
Click here for free registration
Webinar #3:
ScannerStation - the unique multi-scanner remote control software
Thursday November 29th 8:00-8:30 PM
Click here for free registration

You'll be able to view the presentation online and ask questions, too.

Gommert Buysen of BuTel Software in Holland will be at our offices in Natick to provide a live and online demonstration of the new ScannerStation software. ScannerStation allows you to control up to eight local and remote scanners from one PC and do some incredible operations never before possible with a single or multi-scanner installation.

Mr. Buysen will also demonstrate a Beta version of ARC500, the programming software for GRE's new PSR-500 portable scanner. This software will also work with the forthcoming PSR-600 base scanner.

For those who do come to the office in Natick for the seminar we'll also be able to show you the new GRE PSR-500 scanner.

The Scanner Master store will also be open from 6:30-8:00 PM for scanner, software and accessory sales.

We hope you can join us live or online for our special event. Be sure to register now for this free webinar.

156. 12 Days of a Scanner Christmas

Yahoo group: Scan-RI
Date: 2007-12-11 00:23:58 UTC
From: Bill
Topic: 156 Message: 156

In the spirit of the Yule tide season, I have brought back the "12 Days Of A Scanner Christmas"! Enjoy!

On the first day of Christmas, my true love gave to me:

A box full of new scanner radios!!

On the second day of Christmas, my true love gave to me:

2 Police Call Directories
And a box full of new scanner radios!!

On the Third day of Christmas, my true love gave to me:

3 Antenna couplers,
2 Police Call Directories
And a box full of new scanner radios!!

On the Fourth day of Christmas, my true love gave to me:

4 cordless phones
3 Antenna couplers
2 Police Call Directories
And a box full of new scanner radios!!

On the Fifth day of Christmas, my true love gave to me:

5 Magnet Mounts
4 Cordless Phones
3 Antenna Couplers
2 Police Call Directories
And a box full of new scanner radios!!

On the Sixth day of Christmas, my true love gave to me:

6 Mounting Brackets
5 Magnet Mounts
4 Cordless Phones
3 Antenna Couplers
2 Police Call Directories
And a box full of new scanner radios!!

On the Seventh day of Christmas, my true love gave to me:

7 Scanner Crystals
6 Mounting Brackets
5 Magnet Mounts
4 Cordless Phones

3 Antenna Couplers
2 Police Call Directories
And a box full of new scanner radios!!

On the Eighth day of Christmas, my true love gave to me:

8 Trunking Radios
7 Scanner Crystals
6 Mounting Brackets
5 Magnet Mounts
4 Cordless Phones
3 Antenna Couplers
2 Police Call Directories
And a box full of new scanner radios!!

On the Ninth day of Christmas, my true love gave to me:

90 Feet of Coax
8 Trunking Radios
7 Scanner Crystals
6 Mounting Brackets
5 Magnet Mounts
4 Cordless Phones
3 Antenna Couplers
2 Police Call Directories
And a box full of new scanner radios!!

On the Tenth day of Christmas, my true love gave to me:

10 Police Blue Light Bars
90 Feet of Coax
8 Trunking Radios
7 Scanner Crystals
6 Mounting Brackets
5 Magnet Mounts
4 Cordless Phones
3 Antenna Couplers
2 Police Call Directories
And a box full of new scanner radios!!

On the Eleventh day of Christmas, my true love gave to me:

11 Unknown frequencies
10 Police Blue Light Bars
90 Feet of Coax
8 Trunking Radios
7 Scanner Crystals
6 Mounting Brackets
5 Magnet Mounts
4 Cordless Phones
3 Antenna Couplers
2 Police Call Directories

And a box full of new scanner radios!!

On the Twelfth day of Christmas, my true love gave to me:

12 Days sitting at dispatch
11 Unknown frequencies
10 Police Blue Light Bars
90 Feet of Coax
8 Trunking Radios
7 Scanner Crystals
6 Mounting Brackets
5 Magnet Mounts
4 Cordless Phones
3 Antenna Couplers
2 Police Call Directories
And a box full of new scanner radios!!

.

161. TF Green Airport Crash/Rescue

Yahoo group: Scan-RI
Date: 2007-12-17 12:40:58 UTC
From: MarkB
Topic: 160 Message: 161

The few times I've been in that area, I've programmed in 154.355 and never heard a thing on it. Is 154.995 their main crash/rescue frequency?
By the way, I'm amazed at how close you can get to the runway on the back side of the airport. Good times watching the planes take off up close !!!

Is there much use of 47.42 MHz in RI?

While I'm being nosy, is the CDSTARS net still active or has it been superseded or upgraded? The radios I saw were ancient Standard crystal units, which belonged in the trash ten years ago.

Bill,
I have not heard anything on 47.42. CDSTARS is gone. Now there is RITERN which is 800 Mhz digital and there is some activity on 148.250, the old CDSTARS freq. I can't remember if the EMA roll call is Tuesday or Wednesday morning at 0900 hrs. Listen to 148.250 and you should hear AAB500 doing the town by town roll call.

The CDSTARS radios (Civil Defense State Radio System) was analog FM on 148.250MHz. It was recently replaced with EMSTARS (Emergency Management State Radio System) which is encrypted P25 digital and operates conventional simplex on the same 148.250 MHz frequency as CDSTARS. The EMSTARS net is not intended for dispatcher's use. It is a radio conduit between the state level government (EMA, the governor, etc.) to the local cities and town governments (EMA directors, mayors, town managers, etc). The EMSTARS radios are supposed to be located in the local EOC, even if they are not normally manned. RIEMA doesn't want them in the local dispatch centers. In some small towns, there is no dedicated EOC, so in those cases they are in the dispatch center.

RITERN is different. It was a quick solution for statewide interoperability system. Every police and fire dispatch in Rhode Island has a RITERN radio. RITERN is not digital (yet). It operates as a talkgroup on the 800 MHz analog trunk system of RI DOT. Its really not used that much, even in situations where it would be useful.

Subject: Re: [Scan-RI] Re: RI Red Cross

Bill,

I have not heard anything on 47.42. CDSTARS is gone. Now there is RITERN which is 800 Mhz digital and there is some activity on 148.250, the old CDSTARS freq. I can't remember if the EMA roll call is Tuesday or Wednesday morning at 0900 hrs. Listen to 148.250 and you should hear AAB500 doing the town by town roll call.

Gil

Subject: RE: [Scan-RI] Re: RI Red Cross

Is there much use of 47.42 MHz in RI?

While I'm being nosy, is the CDSTARS net still active or has it been superseded or upgraded? The radios I saw were ancient Standard crystal units, which belonged in the trash ten years ago.

Bill

Subject: [Scan-RI] Re: RI Red Cross

Pl should be 103.5, I noticed the info in the FCC Database about them when the repeater was first licensed. It also should be noted that the Red Cross does not provide blood services for RI, the RI Blood Center does.

For those with kids here is your Santa Tracker...North American Aerospace Defense Command (NORAD) has a long history of tracking Santa and now with the web they are more precise in his movements. Your kids will enjoy the "pre-Christmas" holiday events as well. Just find the busy buildings and click on them to see what Santa and his crew are up to.

From: HornSmoke
Topic: 174 Message: 174

MAKE SURE YOU DO NOT THROW AWAY ANYTHING IN YOUR BOX!

The yellow battery charging holder is located (actually hidden) inside the top packing cardboard. Several folks have inadvertently thrown their's away!! Here is the RSU re-order number, below:

12430658 HOLDER ASSY BTRY RECHRG $4.69

Regarding preservation of boxes, DO IT. If you ever (for some crazy reason) desire to re-sell your scanner, especially on e-Bay, it looks great having the original accoutrements and packing.

Plus, it looks "neato-keen" having all those colored boxes stacked neatly in one's commo bunker (unless, that is, you hide them from your spouse!)

Best to the Group,

Loren

The USCG Aux Station South Weymouth holds a Roll-Call sunday Mornings at approx 10am [might be 11] on 143.2800 Mhz
Others along the Coast may hold Roll-Call, but South Weymouth is the only station I have ever heard.

With the requirement to move to new frequencies [unless they got an extension] this net will move from 143.2800 Mhz next week
as the new Frequencies go into effect on 01/01/2008.

Channels to monitor and report changes will be

150.7000 Mhz Repeater
149.2000 Mhz Input to Repeater

143.4750 Mhz Nationwide simplex

Additional Simplex and/or Repeater Pairs
138.4750 Mhz and 142.8250 Mhz

143.2800 Mhz is to be vacated by Jan 01, 2008

Contact: Patricia Klinger or Joe Delcambre
Tel.: (202) 366-4831

UPDATE:

US DOT Hazmat Safety Rule to Place Limits on Lithium Batteries Carried by Passengers Aboard Aircraft Effective January 1, 2008

Passengers will no longer be able to pack loose lithium batteries in checked luggage beginning January 1, 2008, once new federal safety rules take effect. The new regulation, designed to reduce the risk of lithium battery fires, will continue to allow lithium batteries in checked baggage if they are installed in electronic devices, or in carry-on baggage if properly protected from short circuiting in their original packaging or by placing them in individual plastic bags or a protective travel case.

Common consumer electronics such as digital cameras, cell phones, and most notebook computers are still allowed in carry-on and checked luggage. Moreover, any number of spare batteries for these devices will be allowed in carry-on baggage if they are properly protected from short circuiting and do not exceed 8 grams (~100 watt hours) of equivalent lithium content. Most lithium-ion cell phone and standard notebook computer batteries are below 8 grams (~100 watt hours) of equivalent lithium content. Batteries not installed in electronic devices are not permitted in checked baggage.

The rule limits passengers to not more than two large spare rechargeable lithium-ion batteries in carry-on baggage. This applies to batteries that exceed 8 grams (~100 watt hours) of equivalent lithium content and less than 25 grams (~300 watt hours) [see attached illustration]. Batteries with more than 25 grams (~300 watt hours) are not allowed in

either checked or carry-on baggage.

"Doing something as simple as keeping a spare battery in its original retail packaging or a plastic zip-lock bag will prevent unintentional short-circuiting and fires," said Krista Edwards, Deputy Administrator of the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration.

Lithium batteries are considered hazardous materials because they can overheat and ignite under certain conditions. Safety testing conducted by the FAA found that current aircraft cargo fire suppression system would not be capable of suppressing a fire if a shipment of non-rechargeable lithium batterieswere ignited in flight. This rule aims to reduce the risk of fires involving lithium batteries in the cabin of passenger aircraft.

"This rule protects the passenger," said Lynne Osmus, Federal Aviation Administration (FAA) assistant administrator for security and hazardous materials. "It's one more step for safety. It's the right thing to do and the right time to do it."

In addition to the new rule, PHMSA is working with the FAA, the National Transportation Safety Board, the Consumer Product Safety Commission, the battery, consumer electronics and airline industries, airline employee organizations, testing laboratories, and the emergency response communities to increase public awareness about battery-related risks and developments. These useful safety tips are highlighted at the public website: http://safetravel.dot.gov.

###

*Examples of large rechargeable lithium-ion batteries (more than 8 but not more than 25 grams of equivalent lithium content):

Extended-life130 watt-hour "universal" lithium ion battery.

Extended-life 160 watt-hour lithium ion battery.

Feb. 5, 2008- Commanding officer of Coast Guard cutter temporarily relieved of commandWhile on the topic of the USCG, has anyone recently confirmed any of the Old LANT channels still in use, by the USCG in Rhode Island [or Sector Southern New England] and it might know
the new channel designations? [Note these are not VHF Marine Channels, but 162-174 Mhz channels]

COMMANDING OFFICER OF COAST GUARD CUTTER TEMPORARILY RELIEVED OF COMMAND
BOSTON- Rear Adm. Timothy Sullivan, Commander of the First Coast Guard District, has temporarily relieved the commanding officer of a Newport, Rhode Island-based cutter following reports of misconduct.
Commander Jeffery Dow was temporarily relieved from his command of Coast Guard cutter Willow on February 1, 2007, following allegations of an inappropriate relationship with a subordinate and subsequent loss of confidence by the operational commander.

The case remains under investigation.

"We take these types of allegations very seriously, and we will investigate this case fully," said Rear Adm. Timothy Sullivan.

Bill, got a nibble on 149.200 with a pl of 118.8 up in Bangor, near the airport. No discernable traffic. Had Bangor Symphony this past weekend....

Loren

From: Bill
Topic: 180 Message: 182

Probably not it, might of been a USCG Aux or Bangor NAS channel.

Many of the LANTS are in the 162-174 Mhz band

183. Offshore warning includes tracking systems

Yahoo group: Scan-RI

From: Bill
Topic: 183 Message: 183

156.8000 Mhz Ch.16
157.1000 Mhz Ch.22

09 Feb 2008 06:23 PM CST
BOSTON - The Coast Guard is increasing its readiness capabilities today due to offshore weather predictions calling for rough winds and seas in New England.

The Coast Guard cutters Escanaba, based in Boston, and Juniper, based in Newport, R.I., will be offshore and ready to respond at a moment's notice.

Additionally, the cutters Sanibel, of Woods Hole, Mass., and Grand Isle, of Gloucester, Mass., have made preparations to get underway four hours sooner than required after being directed to on a typical day.

Aviators from Air Station Cape Cod, Mass., broadcast severe weather warnings to offshore boaters this morning, and several privately-owned vessel tracking companies are following suit.

The National Weather Service is calling for 35-50 knot winds and 15-25 foot seas.

"We hope that mariners will heed the warnings issued by the National Weather Service and take necessary precautions in anticipation of this dangerous storm," said Senior Chief Francis Condon of the First District Command Center.

This article is from Coast Guard News.

Contact: (617) 223-3240 or
(617) 223-5789

UPDATEUnified command continues to assist disabled LNG tanker

Click here for photos or video

BOSTON - The Unified Command at Coast Guard Sector Boston is continuing to monitor and assist the Liquefied Natural Gas tanker Catalunya Spirit, which lost propulsion and became disabled east of Cape Cod Monday morning.

The Catalunya Spirit is about 33 miles east of Chatham, Mass., and is being towed by tugs Freedom and Iona McAllister, traveling about four miles-per-hour in a northwesterly direction, parallel to shore. Additionally, the Coast Guard Cutter Escanaba, the Maine Responder and Atlantic Salvor are also on scene.

The Catalunya Spirit has restored some electrical power to the vessel's switchboards; however, full power has not yet been restored to the vessel.

The vessel is being towed to a northern anchorage point about seven miles off the coast of Gloucester, Mass., to continue to troubleshoot what caused it to lose propulsion.

Though the vessel has not suffered any structural damage or released any substance, as part of the response plan, Coast Guard Sector Boston notified the National Strike Team, established a Unified Command and is helping to coordinate towage and pollution response assets.

The New Jersey and Delaware Responders are still scheduled to assist as well.

Forecast winds are 14 miles-per-hour with two-foot seas.

"The Unified Command is encouraged by the progress of the repairs," said Coast Guard Capt. Gail Kulisch, Federal On Scene Coordinator for the response. "We will continue to work together to safeguard the Catalunya Spirit, the crew and its cargo."

It will be interesting to follow her back to HomePlate and see if she
returns to Elizabeth City Air Station
or Cape Cod Air Station. She was working a Medivac where they transported
to Logan Airport.

I'm thinking 6041 was brought up as a relief crew, due to the Hours spent
airborne
for the Cape Cod crews, but then again...who knows.

188. Set Your Clocks Ahead On March 09, 2008

Yahoo group: Scan-RI
Date: 2008-03-09 02:24:53 UTC
From: Bill
Topic: 188 Message: 188

Greetings all,

This is your semi-annual reminder that the Daylight Saving Time change will occur Sunday, March 09, 2008 at 2 a.m. At that hour you should ADVANCE your clock by one hour to read 3 a.m. Daylight Saving Time has been extended by four weeks. This practice, which began last year in 2007, was due to the passage of the Energy Policy Act in 2005.

I'd hate to hear of anyone missing a sked because they forgot to change their clocks for local time. For the record, UTC time will ~not~ be effected by the changing of clocks in the USA.

QE2 to make final visit to Hub in fall

By Donna Goodison | Thursday, March 20, 2008 | http://www.bostonherald.com | Business & Markets

Photo by Kevin Wisniewski
The Queen Elizabeth 2, which has played hostess to royalty and celebrities, served as a troop carrier and recorded many cruise ship firsts, will make its final call on the port of Boston on Sept. 18.

Launched by Queen Elizabeth in 1967, the QE2 is slated to become a floating luxury hotel in Dubai in November under a $100 million deal struck by owner Cunard Line.

The iconic liner will dock at South Boston’s Black Falcon Cruise Terminal for the day on Sept. 18 before leaving for Bar Harbor, Maine, as part of its final “Autumn Colors” cruise.

Since her 1969 maiden voyage, the QE2 has carried more than 2.5 million passengers, undertaken 25 world cruises and crossed the Atlantic more than 800 times. At 963 feet, she weighs 70,327 tons and carries 2,800 passengers and crew.

“The QE2 is steeped in tradition and is one of the most adored ships to ever set sail,” Massport spokeswoman Lisa Langone said. “She has witnessed history in the making, and the port of Boston was part of her history.”

The QE2 is the fastest passenger ship in the world, according to Cunard, and can sail backward faster than most cruise ships can sail forward. She became the world’s largest hospital ship in 1982, transporting injured troops during the Falklands War.

Many onlookers gather to catch a glimpse of the QE2 when she visits Boston, and Massport expects a good showing by enthusiasts for her final call.

When the ship is in port, viewing will be prohibited at the Black Falcon Cruise Terminal for security reasons, so the best vantage point is the Summer Street bridge over the Reserved Channel in South Boston.

The best viewing while the QE2 is under sail will be at Castle Island a half hour before her arrival at the terminal and a half hour after her departure.

143.125 was used by the Newport Navy Police in Newport, R.I. as of 2006. Of course, I wouldn't be surprised if they have gove P-25 since then.

172.900 comes back as TSA Channel 5. It is listed as a simplex digital.

As far as 409.550, this frequency seems to be a catch-all for the military and park service. I would have to search more to confirm what this one is.

Good hunting. Hope this helps.

From: Bill
Topic: 190 Message: 192

Actually 172.9000 is a Repeater as TSA Ch.7, 8 or 9 [each has a different NAC Code]
Ch. 5, 10 & 11 are simplex.

143.1250 could have been Newport, twas Rte-95 SB area of Exit 4

Dont' rely on many of those on-line guides, 409.5500 is not anything any that those guides have listed.
Many of them are either out-dated or based upon 1980/1990's information that has been changed as the
Entire 406-420 band has been re-farmed by the NTIA.

Let's leave this one out there for awhile, see if anyone takes a trip and/or lives in the area and takes a listen.

Subject: [Scan-RI] Airports

Anyone know of an Airport near Rte-95 the area of Exit 4 other than

http://www.airnav.com/airport/08R Richmond Airport
West Kingston, Rhode Island, USA

I caught 409.5500 Mhz during a drive down Rte-95 to CT over the weekend.

If no Airports other than Richmond, anyone else in the area check out the frequency.

Also caught

143.1250 P-25 ? ? RI- EMA

172.9000 P-25 TSA at TF Green

Thanks Pete

Gotta spent a day down there and scan the

406-420, 137-144, 148-150 & 162-174 Band for awhile, seems
Rhode Island is not been scanned {Posted} for those bands in-awhile

203. Aircraft Freqs

Yahoo group: Scan-RI
Date: 2008-05-16 02:44:25 UTC
From: Peter Harrison AA1PL
Topic: 203 Message: 203

For those interested in monitoring aircraft and military freqs, I often hear the RI Air National Guard C-130 planes on 383.3 MHz (AM mode) which is their primary operations frequency (Rhody Ops). They often fly in groups of two or more planes and I often hear the planes chatting with each other on 311.0 MHz (also AM mode). I find this somewhat strange as an air to air chat frequency because 311.0 is also listed in most frequency guides as the nationwide STRATCOMM/ACC primary frequency. The air to air chat sounds very official/professional so perhaps that is its purpose?

Memorial Day Observation 5/26/08 -- 1500 hr local

All citizens, alone or with family and friends, wherever they may be at 3p.m. local time, are asked to pause for a moment of reflection and rededication to give something back to our country, in memory of our nation's fallen. The goal is to put "Memorial" back into Memorial Day; a Gallup poll revealed that only 28 percent of Americans know its true meaning.

Coast Guard rescues fishing crew from sinking vessel

BOSTON- The Coast Guard saved the three-member crew of an 82-foot fishing vessel from Point Judith, R.I., around 8:45 p.m., that had to abandon ship more than 180 miles southeast of Cape Cod today.

Coast Guard Sector Northern New England and the Rescue Coordination Center in Halifax, Canada, got a radio call around 6:30 p.m., from the sailing vessel ING Coffer relaying distress calls overheard from the fishing vessel Dona Maria stating they were rapidly taking on water.

The Coast Guard Command Center in Boston dispatched a Falcon jet and a Jayhawk rescue helicopter from Coast Guard Air Station Cape Cod, and the Dona Maria's crew was instructed to manually activate their Emergency Position Indicating Radio Beacon so the air crews could track their location.

The Falcon jet crew arrived on scene around 7:20 p.m., to pinpoint and maintain the location of the crew in the life raft.

The helicopter crew arrived on scene around 8:30 p.m., and hoisted the crewmembers, all reported to be in good condition, and arrived back at Air Station Cape Cod around 9:50 p.m.

"The key to this case was the relay of information between all parties involved that allowed us to respond quickly," said John Tomaszewski, a search and rescue controller at the Coast Guard Command Center in Boston. "The EPIRB aboard the vessel was essential to allow us to monitor the location of the crew in distress."

The crew of the Dona Maria had a 406MHz EPIRB aboard their vessel when they began taking on water. The Coast Guard reminds mariners to make the switch to this new life-saving digital Emergency Position Indicating Radio Beacons before the clock runs out on older non-digital equipment.

Beginning Feb. 1, 2009, the Coast Guard and other search and rescue personnel will only monitor mayday calls that are broadcast using digital 406MHz EPIRB beacons. Older 121.5 MHz EPIRB distress signals will no longer be detected or sent directly to search and rescue personnel.

Press Release Date: June 28, 2008
Contact: Petty Officer Zach Zubricki

(617) 406-9011

Coast Guard rescues man stranded on rocks
BOSTON - A Station Castle Hill, Rhode Island, 25-foot response boat crew working closely with the Newport Fire Department rescued a man stranded on some rocks at 7:08 p.m., at Kings Beach today.

A Newport police officer called the Coast Guard station after he watched the man go into the water after warning him not to drive home because he was drinking.

The Coast Guard boat, the Newport Fire Department and the Rhode Island Department of Environmental Management all responded to the scene and began to search for the man.

The man was located stranded on some rocks near the beach and was rescued by three Newport Fire Department rescue swimmers and the Coast Guard boat crew, which transported him back to Station Castle Hill. Officers from the Newport Police Department and the Rhode Island Department of Environmental Management were waiting for the man at the Coast Guard Station, where he was questioned and taken into protective custody. He did not suffer any serious injuries.

"This was an unusual case for us," said Petty Officer 2nd Class Jason Andrade of Station Castle Hill. "Our priority was to find this guy to make sure he didn't hurt himself. We were glad we could get him safely to the Station."

U.S. Consumer Product Safety Commission
Office of Information and Public Affairs
Washington, DC 20207

FOR IMMEDIATE RELEASE
July 2, 2008
Release #08-319

Firm's Recall Hotline: (800) 843-7422
CPSC Recall Hotline: (800) 638-2772
CPSC Media Contact: (301) 504-7908

RadioShack Recalls Power Supplies Due to Electrocution and Fire Hazards

WASHINGTON, D.C. - The U.S. Consumer Product Safety Commission, in cooperation with the firm named below, today announced a voluntary recall of the following consumer product. Consumers should stop using recalled products immediately unless otherwise instructed.

Name of Product: 13.8V DC Power Supplies

Units: About 160,000

Importer: RadioShack Corp., of Fort Worth, Texas

Hazard: The recalled power supplies are wired incorrectly, posing electrocution and fire hazards.

Incidents/Injuries: None reported.

Description: The recall involves RadioShack 13.8V DC Power Supplies, catalog numbers 22-507 and 22-508 with date codes from 08A04 through 01A08.

Date code format is MMAYY where MM is the month and YY is the year. The catalog number and date code are located on the back of the power supply.
Power Supplies with a green dot on the product and the product's packaging have already been repaired and are not included in the recall.

Sold at: RadioShack stores nationwide from October 2004 through January 2008 for between $50 and $85.

Manufactured in: China

Remedy: Consumers should unplug the recalled power supply immediately and take it to any RadioShack store for a free repair. Registered owners of the recalled power supplies will be mailed a notice.

Consumer Contact: For additional information, contact RadioShack at 800-843-7422 anytime, or visit the firm's website at:
http://www.radioshack.com/recall

Incident Near Block Island
Car Ferry, Coast Guard Cutter Collide In Fog
By DANIEL P. JONES
Courant Staff Writer

Hartford Courant, United States
July 3, 2008

NEW LONDON - – A U.S. Coast Guard cutter collided Wednesday in dense fog with a ferry bound for Block Island, about 3 miles north of the island, Coast Guard officials said.

No one was injured, but passengers aboard the ferry said vehicles being carried on the ferry shifted and had minor damage.

The ferry had a 4-foot-long dent about 2 feet above the water line, while the Coast Guard vessel had minimal damage and remained fully operational.

Ferry passengers told The Associated Press that the ferry captain was sounding his horn about every five minutes as the vessel made its way through fog.

Passengers said the Coast Guard cutter appeared out of the fog about 100 feet off the port side, the left, of the ferry. Both vessels slowed before the collision, and passengers said the ferry hit the cutter in the stern, or back of the vessel.

"I knew we weren't going to be able to stop. I was like, 'We're going to hit this thing.' And then it got closer, closer, closer. They started honking their horns back and forth. And before we knew it, we made impact," Brad Barco, 28, of West Greenwich, R.I., told the AP.

The collision took place about 12:15 p.m. The Block Island Ferry, carrying 257 passengers and eight crew members, was en route from Point Judith, R.I., and arrived at Block Island about 2:30 p.m.

The Coast Guard cutter Morro Bay, a 140-foot buoy tender, was bound for its home port of New London from Newport, R.I.

Coast Guard investigators from Boston are interviewing the crews of both vessels and ferry passengers who can be identified, said Coast Guard Chief Petty Officer Amy Thomas.

"We're very relieved that there were no serious injuries," she said. "We're committed to being as transparent as possible in our investigation and throughout the process."

From: Bill
Topic: 217 Message: 217

With all the Attention on the PawSox this weekend, due to Big Pappi's rehab assignment, wondering if anyone has some Good Frequencies to put into the Scanner.

PawSox
McCoy Stadium
Pawtucket PD / FD / EMS

OK, here's what I have.
470.950 Pawtucket Fire ch 1 D-503(dispatch)
471.325 Pawtucket Fire ch 2 D-734
154.445 Pawtucket Fire ch 3 pl-74.4

470.0725 Pawt. PD ch 1 P-25 digital
471.075 Pawt PD ch 2 P-25 digital
472.725 Pawt PD ch 3 P-25 digital

McCoy Stadium ops are on FRS freqs which they change day to day (along with associated PL).
New England Ambulance is on site and uses Nextel, leased 460 Mhz business band radio, and McCoy FRS radios.

I have not monitored any use of the 152 Mhz frequency McCoy is currently licensed on.

Gil
central Rhode Island

152 Mhz ?
I could only find 460 Mhz stuff.

Thanks for the info, going down on Saturday

Other than FRS [Non Stadium Ops] with lost kids [BoyScout Camp Over night] the only radios being used for McCoy Stadium were on 467.8500 and 467.8750 Mhz at 67.0 Hz The wiki at ScanCapecod of Rhode_Island_Recreational_Facilities has been updated

RI Hurricane BrfPRESS RELEASE_ * **_NATIONAL WEATHER SERVICE HURRICANE PROGRAM_** *
The National Weather Service (NWS) will be conducting a program about the "Realities of New England's Hurricanes" at Warwick, Rhode Island, on Thursday August 7, 2008

The program will be held at the Community collage of Rhode Island Knight Campus.

The speaker will be:

Matthew Belk Hurricane Program Leader from the National Weather Service in Taunton Ma.

This seminar is open to the public at no charge. Everyone is welcome to attend, especially those who are interested in learning about hurricanes as they affect New England.

The program will discuss:

1. How and when hurricanes form, especially those that affect New England.

2. The strengths and damage potential of hurricanes.

3. The "Rules of Thumb" for hurricanes in New England.

4. Safety Rules for people living where hurricanes strike.

It is not necessary to pre-register for this talk. However, if you have any questions about the program, please contact Matthew Belk at 1-508 823-1900 ext. 405 during normal business hours.

Again, the following seminar is planned for Thursday August 7, 2008 From 7:00 PM to 8:30 PM

* * At the Community College of Rhode Island, Knight Campus* *400 East Avenue* *Warwick**, Rhode Island 02886*

*Room 2510 *

Police Call's Gene Hughes dead at 80

Gene Hughes, originator of the much beloved Police Call radio directories has died.

Here is his obituary as published in the LA Times:

COSTIN, Gene Born in Louisville, KY November 25, 1927. Gene Costin moved with his parents at the age of 12 to Los Angeles and loved this community. He lived a full and accomplished life. As a young man Gene developed interests in politics and astronomy and closely followed developments in both areas throughout his life. He was a passionate civil libertarian and supporter of many liberal causes and other charities. He was well known in the two-way radio communications business and renowned to radio hobbyists nationwide for Police Call, which he published under the name Gene C. Hughes. After retirement he served long hours as a volunteer at the LAPD, for which he received a Volunteer of the Year award from the State of California. He was loved and will be missed by a wonderful family- his devoted wife Mitzi, three children, and their spouses-Cathy Costin (Mitchell Reback), Robert Costin (Yves Yarborox), and John Costin (Rachel Phipps). He was proud of his four grandchildren, Isaac Reback, Mia Reback, Silas Phipps-Costin, and Judah Phipps-Costin, and he adored his dog Murray. In lieu of flowers, contributions may be made to Tower Cancer Research Foundation or a charity of your choice. Services will be private at Gene's request. Published in the Los Angeles Times on 8/3/2008

The MMRA would like to remind all of the ARRL New England Divison Convention in Boxborough on Friday August 22 through Sunday August 24. For more information see: www.boxboro.org.

A special Boxboro edition of the MMRA newsletter is available at: www.mmra.org/newsltrs/mmnews_200808.pdf.

Please stop by and visit the MMRA hospitality booth off of the main courtyard.

Glad to see there is LIFE here, thought I was the only one who posted.

As to your comment Glenn, I doubt it. There is always plenty to listen to.
And these are the same comments when P25 came along. Hmm, I can listen
to P25 no problem.

Maybe the Chiefs will learn and P25/Enc will be shortlived, maybe not, but there is
plenty out there to listen to.

Hi All,

It's not going to happen tomorrow, but eventually most communications will be encrypted. You go to other countries and they are astounded at how open our communications are, especially after 9-11. This is not lost on public safety it's just been too expensive to encrypt. What people forget is: it's not illegal to monitor trunked comunications, nor digital communications, so it was just a technical obstacle to monitor those systems, anything to do with encryption is a legal matter.

The hobby has a finite existence, I hope I am still around to see it, so I can hear what the non beleivers have to say then.

Hi,

Bill, yes but as I said trunking and digital were never illegal they just needed the technological know how to do it. As it is now there are systems Open Sky and certain types of EDACS that are not receivable on scanners and never will be. If I lived in Florida, PA or NY I wouldn't be too happy right now and more so as their systems go on line.

I never said to anyone they couldn't monitor P 25 or trunking, I think most people said until the scanners are built to incorporate this technology you can't listen to those systems, they didn't mean forever. I always listened to Federal Agencies until they went encrypted. What happens when other systems go encrypted?

I do believe that most systems will be encrypted in 20 years. N. Prov PD went encrypted, why? who knows, but as the 800 system develops I think most of the participants will go encrypted, why not? How will we monitor those systems?

Maybe people have answers I don't know, I just haven't seen any yet everyone wants to keep pointing to technological hurdles that were never illegal to overcome.

Thanks,

Ray

PS Bill, have you been able to monitor the 800 Mhz RI system? Do you have a file on it, maybe I could at least export it to Excel and look at it. I am not doing something right as I never receive the system.

Many folks confuse [following in trunking, with monitoring]

Hell, I don't even need a Trunking Scanner to listen to the Mass State Police.
follow a talk-group, well yea, but to listen, Nop regular ole 800 Mhz Scanner.

As for the RI Statewide Digital System, ScanCapecod has plenty of information
on the system [so it must be monitorable]
http://www.scancapecod.us/wiki/index.php/Rhode_Island_Digital_System

There have been reports of limited coverage, by Scannists, guess the radios
are still being overloaded by Nextel-Hell.

There is actually a lot of issues with running encrypted radio systems,
similar to the issues that have faced computer encryption for the past
10-15 years. Encryption is a double edged sword, it provides privacy but
requires a certain amount of administrative overhead. It's easy to get
set up when you pay the consultants to come out and set it up, but once
they are out the door and someone needs to reissue the encryption key
for radio #24, who's going to do it?

I think there was some community in MA that went from encrypted P25 to
unencrypted because of the headaches with maintaining encryption.

> Maybe people have answers I don't know, I just haven't seen any yet

Three words - analog cell phones. :)

There was a thriving community dedicated to modifying scanners that were
"cellular blocked" despite the illegality of the act. People did it
because it was illegal, not despite it.

The "illegalness" of it is a major issue, but not one that can't be
overcome. UK has made scanning illegal but there is still a community
out there that does it.

Delaware was the first to go "statewide" with the ^^ P25 system. From the get go the police went encrypted on all of their talkgroups except for the dispatches. Why? They felt that in the "future" someone would make a scanner to listen to P25 trunking. Well it happened and their non dispatch talkgroups are "secure". They left the dispatches in the clear and even provided a internet streaming audio of each county dispatch! They felt that there are still some good people out there that turn in tips to the PD when they are looking for someone. They also did it as a public service to the traffic reporters so that they could report collisions and disabled vehicle blocking the roads. Anyone anywhere can hear the dispatch via the internet or a digital scanner.

Encryption is good and bad. Yes there is the overhead of keeping all the keys updated but is does provide for some "secure" communications. When the homeland security candy was handed out agencies bought more and more radios for just in case. As they got more the ability to lose them has become and issue and in the end compromises the security. How? They end up getting unaccounted for and sometimes goes unnoticed for an unknown amount of time. I know we have had to deal with it....

Hi,

Bill, yes but as I said trunking and digital were never illegal they just needed the technological know how to do it. As it is now there are systems Open Sky and certain types of EDACS that are not receivable on scanners and never will be. If I lived in Florida, PA or NY I wouldn't be too happy right now and more so as their systems go on line.

I never said to anyone they couldn't monitor P 25 or trunking, I think most people said until the scanners are built to incorporate this technology you can't listen to those systems, they didn't mean forever. I always listened to Federal Agencies until they went encrypted. What happens when other systems go encrypted?

I do believe that most systems will be encrypted in 20 years. N. Prov PD went encrypted, why? who knows, but as the 800 system develops I think most of the participants will go encrypted, why not? How will we monitor those systems?

Maybe people have answers I don't know, I just haven't seen any yet everyone wants to keep pointing to technological hurdles that were never illegal to overcome.

Thanks,

Ray

PS Bill, have you been able to monitor the 800 Mhz RI system? Do you have a file on it, maybe I could at least export it to Excel and look at it. I am not doing something right as I never receive the system.

Why worry about what might happen, instead of going out there and grabbing the stuff we CAN hear?

With Pro-97's at an all-time clearance-priced low, and with the new RS PSR-500 look-alike coming out, it's getting even better, and more fun, to scan.

"So many frequencies, so little time...."

Bring on the band scans!

Updates are On the Way

In This Issue

a.. Rebanding Update

a.. Update Schedule

a.. What's Next?

a.. Until Next Time

Rebanding Update

Well, a couple of Motorola Analog systems have now rebanded, so we are hard at work on firmware updates for all our current Trunk Trackers (as well as a couple of older models). These updates will give you the ability to enter custom band plans for 800 MHz Motorola systems, which will allow you to set up the scanner for rebanded systems, whether they are "normal" rebanded systems as are the few that have recently switched over, or "inverted" rebanded systems which use a variation of the channel assignment method. So far, no systems have switched to the inverted type, but we'll be ready when they do.

I know that many of you have wanted more features in the current models. So, we are also taking this opportunity to put a few more treats into this update. Here's a quick rundown of the new goodies:

Hidden Menu Items: These will all be incorporated into the main menu structure. No more keyboard tricks to get to these tweaks. (BCD996T/BCD396T)

Close Call DND: I sure wish I had thought of this mode earlier so that we could have included it in the BC246T, BR330T, and BCD396T, but this update takes care of that.

Extended Tone-Out Delay: We're adding the much-requested 30-second option to the Fire Tone-Out Delay feature (BR330T, BCD396T, BCT15, BCD996T)

RSSI Reporting Improvements: I've been very surprised that none of the software developers have taken advantage of the improvements in RSSI reporting (high speed, 1024 levels of RSSI), but I am hearing some hints that updates are on the way. This would make for a pretty slick band scope feature, and we added it to the PC protocol for the BCD396T and BCD996T with a previous update. This update will extend it to the BC246T, BR330T, and BCT15.

EDACS ESK Support: We'll be adding ESK support to both the BCD396T and the BCD996T. Sorry, no ProVoice (or OpenSky, V-SELP, iDEN.).

Improved P25 Automatic Threshold Detection: This update should allow the BCD396T and BCD996T to fully auto-adjust for P25 systems, even if those systems are out of spec for P25 deviation, as we've found is the case in a number of areas.

Now for the 2nd big question. How much is it going to cost you? Well, while we'll still need to use ESN control for this update for some models, this update will cost you absolutely nothing (well, a little time, perhaps, and a little patience).

Update Schedule

Now to answer the 1st big question: When will all this happen?

Since we'll be working on updates for 9 models, we can't get these all out at the same time. So, we'll be issuing updates with a goal of wrapping all this up by early 2009. Our estimated release dates for these updates (remember, we still have to recode, debug, test, and package all this, so it is possible for an update to slip a bit if we need time to address problems found in testing) are as follows:

BCD396T/BCD996T
9/30/2008

BC246T/BCT15
11/20/2008

BCT8/BC898T
12/31/2008

BC296D/BC796D/BR330T
1/31/2009

What's Next?

Watch your in box for a major announcement on 9/29/2008. Can't say more, now.

Until Next Time
In closing, I want to recognize the great contributions Gene Costin (aka Gene Hughes) made to the scanning hobby. His long-running "Police Call" series made it possible for scanner hobbyists to program their scanners with local law enforcement frequencies long before the internet . or even the widespread use of trunked systems. Our thoughts and prayers go out to his family and friends. His spirit lives on every time you help out a fellow "scannist." No manufacturer would last in this business without the kind of community help and support that he epitomized.

From: Loren Fields
Topic: 245 Message: 245

http://www.greaterstateofmaineairshow.com/

JUST A REMINDER: this Friday, Sat. & Sunday (5-7 SEP 2008) at Brunswick Naval Air Station, the Blue Angels will be performing, along with the Army Golden Knights parachute team. There are also excellent ground exhibits, too. Click the link above for access to the actual schedule.

Several of us are planning a coordinated frequency sleuthing operation that weekend. Each participant will receive, on site, a comprehensive BNAS freq. guide that has all known freqs on it, plus suggested band scan plans.

As I mentioned in earlier emails, this kind of event makes up for the long dry spells Maine seems to have with any sort of varied federal/military activity (other than the perfunctory FBI/FPS/ICE mundane stuff.)

Here's what I intend on bringing to the operation:

(1) Kenwood D-710
(1) Yaesu VX-7R (the spectrum analyzer feature is great!)
(3) Pro-97 scanners (Signal Stalker 2/PL-DPL ops)
(1) Pro-2055 (the mobile version of the Pro-97)
(1) Pro-96 digital
(1) Pro-2096 digital
(1) Pro-95 (misc.)
(1) Pro-92 (pl-dpl)
(1) Pro-90 (for mundane local law enforcement, etc.)
(1) Pro-83 (Signal Stalker 1)
(1) Pro-63 (band scanning)
(1) Pro-60 (UHF air)
(1) Pro-39
Plus other assorted scanners. I will also have a myriad of yagi antennas, etc.

Anyone out there up for a day of fun? Send me your names, contact info and cell number (if you have one) OFF LIST. I'll make up a roster for us, and provide an internal list on "link-up" protocols, etc.

Bring on the fun....

247. Heavy Rains, Flooding this weekend

Yahoo group: Scan-RI
Date: 2008-09-05 15:10:19 UTC
From: Bill
Topic: 247 Message: 247

--- In Scan-Mass-East@yahoogroups.com, "Bill" <ecps92@...> wrote:

With the talk about the heavy rains and flooding anticipated for this weekend I started to do some research on the Army Corps Of Engineers who control numberous dams and locks throuout New England. http://www.nae.usace.army.mil/

I've found the following freqs., mostly through the Scanner Master pocket guide and the big book 6th edition and past Scan-Mass-East mailings.

F-1 168.3250 (110.9) Reservior Conrol, MT. Wachusetts repeater
F-2 168.1250 (110.9) Bourne Railroad Bridge, Mt. Kearsage, NH and Ivy Mountain, Ct
F-3 167.9250 (110.9) Okemo Mountain, VT and Meetinghouse Hill, Ct
F-? 163.4125 (173.8) Cape Cod Canal Operations
Link Freqs of 148.6, 148.75, 148.925, 149.825
Microwave links of 1720.0, 1765.0, 1795.0, 1840.0

Some of the Links, may actually be Local Repeaters in CT, RI, NH or VT that are linked to the 168 Rptrs. I would recommend searching the 162-174 , and 148-150.700 Range.
Nothing has been reported in the past for the 138-143 band, but if anyone wants to try.

Condition reports
Item 1 - Time of observation
Item 2 - Precipitation in the last 24 hours
Item 3 - Form of percipitaion
Item 4 - Present weather conditions
Item 5 - Pool stage depth
Item 6 - Tendency of water level (raising, falling or steady)
Item 7 - Flood gate openings
Item 8 - Tailwater guage
Item 9 - Water Overflow in cubic feet/second (CFS)

You will hear some of the Dams reporting in the AM on 168.325, with Reservior Control (Watham, MA) taking reports from a few different sites

Does the US-ACE control the Hurricane Barriers in New Bedford / Fall River or are those now local control. Stamford CT is still USACE Any Frequencies ??

Anything to add?

249. Newport Police going digital

Yahoo group: Scan-RI
Date: 2008-09-06 20:36:22 UTC
From: jml19621
Topic: 249 Message: 249

In last weeks, "Newport Daily News" it was reported that the Newport Police Department would be switching over to digital radios soon. The artical also implied that the Fire Department will be doing so as well. The effort is stated that this was to help with interoperatablity between local, state, and federal agencies in the time of emergency. The chief stated that they would be joining the state emergency trunk system. The last line of the article was a quote by the chief in which he stated, "this may make household scanners obsolete."

I have several questions for people who are more knowledgeable about scanning.

I should still be able to monitor the new setup provided I have a digital scanner?

Is the state setup encrypted?

What are the frequencies for the State setup? I had heard at one time they were taking over part of the RIDOT setup, is this true?

Any insight into this would be greatly appreciated.

Yes. If your scanner is capabe of receiving and decoding digital signals, then you should be able to monitor them. Even with a digital scanner, you won't be able to decode encrypted transmissions.

>
> Is the state setup encrypted?

Yes and no. Some agencies might have one channel non-encrypted, but many have gone to encrypted. The system itself was set up to be 100% digital, with the CAPABILITY of encryption. No one has to be encrypted. With that being said, many PD's are looking at it with an eye towards security of radio traffic. Fire departments are being warned to stay away from digital and encryption due to interference issues with noise on the fireground. It seems digital radios can't tell the difference between the human voice and a K-12 running in the background.
>
> What are the frequencies for the State setup? I had heard at one
> time they were taking over part of the RIDOT setup, is this true?

This link should answer all your technical questions about the system.
http://www.radioreference.com/apps/db/?sid=4275
However, the system as "painted" by the state is not 100% up-and-running yet, so there are still some big coverage issues, especially in the northern part of the state. The DOT has thier own system, and will be keeping it for themselves. Agencies such as RIEMA that are on the DOT system will probably be moving to the RISCON system.

From: Bill
Topic: 253 Message: 253

There has been a rash of messages back and forth on various Yahoo Owner Groups of a "service" called Grouply. Grouply allows you to supposedly manage your subscriptions to various mail lists from Yahoo and others but it also requires that your Yahoo name and password be stored and provided to Grouply, thus they have full access to all your Yahoo services. Other people who have subscribed to Grouply have reported a large increase in spam, virus and malware being transmitted due to it.

While the owners of Grouply assure that there will be no problems and they promise to behave there is no protection against a Grouply employee or hacker accessing the information. It also allows Grouply to send invites and other spam to members of your lists, whether you want it or not.

For these reasons Grouply is NOT allowed on this list. DO NOT join Grouply under any IDs that are subscribed to this group. While this list is a well protected list we can not protect it against the actions of Grouply, therefore any Member ID that subscribes to Grouply will be dropped from the List.

Port to bid farewell to the Queen Elizabeth 2
Written by Jeff Walls

Mount Desert Islander, ME
Friday, September 12, 2008

BAR HARBOR – The Queen Elizabeth 2 is scheduled to make her final stop in Bar Harbor on Friday, Sept. 19. The QE2 is expected to arrive at 7 a.m. and make her final departure at 6 p.m. The royal nautical legend is going to be revamped as a luxury floating hotel, retail and entertainment center at a luxury resort in Dubai after she arrives there in November.

The 40-year old ship first visited Bar Harbor on July 23, 1981 and has been here almost every year since with the exception of her involvement in the Falklands War and another year when there was a plan to decommission her that didn't materialize.

Earlier this year, the ship's owner, Cunard Line, announced that it was nearing time for the QE2 to retire. The ship was sold for $100 million to Istithmar, the investment arm of Dubai World, a company owned by the government of Dubai.

The QE2 will be delivered to Dubai World, where she will relinquish her assignment as an ocean-going passenger vessel and be refurbished and customized for her new home in Jumeirah, Dubai, United Arab Emirates. In 2009, the vessel will be berthed at a specially constructed pier at The Palm Jumeirah, the world's largest man-made island.

Palm Jumeirah was opened in 2001 and is the centerpiece of a series of man-made islands off the coast of Dubai. Palm Jumeirah has been called the eighth wonder of the world. The complex of reclaimed lands was created by state-owned development company, Nakheel.

The island has doubled Dubai's existing coastline and also doubles the number of beachfront hotels in the city.

For 35 years QE2 was the flagship of the Cunard Line until replaced by RMS Queen Mary 2 in 2004. Built in Clydebank, Scotland, she was considered the last of the great transatlantic ocean liners prior to the construction of the QM2. Before the QE2 was upgraded with a diesel power plant in 1986, she was also the last oil-fired, steam passenger steamship to cross the Atlantic in scheduled liner service.

The ship has a gross weight of 70,327 tons and is 963 feet long. She had a top speed of 32.5 knots using her original steam turbine powerplant, which was increased to 34 knots when she was refitted with a diesel electric powerplant.

In her civilian capacity, the QE2 carries 1,900 passengers and 1,015 crew.

The QE2 participated in the Falklands War in 1982, carrying 3,000 troops from the British Fifth Infantry Brigade and 650 volunteer Cunard crew to South Georgia Island in the south Atlantic.

She was refitted in Southampton, England to get ready for the war effort, including the construction of three helicopter pads, the rebuilding of lounge area into personnel berths, fuel pipes were run through the ship down to the engine room to allow for refueling at sea, and the covering of carpets with 2,000 sheets of hardboard.

Now, her age is being seen as a potential liability. Cunard had to consider the economics of maintaining a 40-year-old liner in operation, particularly with regard to new Safety of Life at Sea (SOLAS) safety regulations that would apply from 2010 onward, requiring major structural reworking of the QE2.

The original version of the SOLAS treaty was passed in 1914 in response to the sinking of the RMS Titanic. It defined numbers of lifeboats and other emergency equipment along with safety procedures, including continuous radio watches.

In a press release from Istithmar, Sultan Ahmed bin Sulayem, chairman of Dubai World, said, "QE2 is without a doubt one of the wonders of the maritime world, and is easily the most famous serving liner in the world today. I am delighted we will be able to create a home for her on the newest wonder of the world, The Palm Jumeirah.

"The QE2 at The Palm Jumeirah will become one of the must-see experiences of Dubai and of the Middle East," he said. "We are investing in creating a truly global tourism destination."

"Dubai is a maritime nation and we understand the rich heritage of QE2," he said. "She is coming to a home where she will be cherished."

The renovations of the QE2 are supposed to emulate the original interior design. A museum covering the long history of the QE2 also is planned as part of the rebuild.

Teamspeak Server Registration

I am posting this here as well as I don't seem to be getting a great deal of response from users. [ScanCapeCod aka Scott]

During the evening of Wednesday October 1, the New England Scaner Feeds Teamspeak Server will require users to register in order to continue to listen to feeds. I have enabled the registration process; you are now able to register.

Once connected to the server, you may register by accessing the "Self" menu and then selecting "Register With Server". Follow the prompts, remember your login name and password, log back in as a registered user with the information just created, and you're all set. The entire process takes about 30 seconds roughly.

If you are not registered by 10/1 evening, you'll find that you can't navigate out of the INSTRUCTIONS channel. Simply follow the above procedure to gain access.

Thank you for your attention.

263. Warning about My Yearbook & Grouply

Yahoo group: Scan-RI
Date: 2008-10-14 21:25:31 UTC
From: Bill
Topic: 263 Message: 263

As if Grouply was not enough trouble, now we have a thing called "My Yearbook." My Yearbook is sending messages to people inviting them to join, and a lot of people are joining.

The problem is that when you join My Yearbook, it goes through your address book and sends everybody in your addressbook a notice and a request for you to become a "Friend."

It sends this spam to EVERYBODY in your addressbook, including to every Yahoogroup listed in your address book.

If I start getting these spam postings in my groups I will simply bounce the member.

So take this as a warning before you join My Yearbook or Grouply or any other foolish scheme. I will bounce you from membership in all my Groups.

I read every posting in every one of my groups; it will not get by me.

<information_security_hat=ON>
Sorry to delve into off-topic territory here, but as a matter of course, you should *never* give *any* site access to your yahoo/gmail/hotmail/etc address book. Usually this requires the web site to take your password and sign you into the mail service, which while very convenient, is a fairly major security risk. Despite the sites best assurances, there is no way to know how your password is stored and used. If that site is compromised and some lazy web developer logs every password for troubleshooting, now someone has access to your mail. If you use this password across multiple sites, it's trivial to try the same username/password on popular sites to attempt to gain access. It's a minor convenience, but, it's a major risk.

Just play it safe and opt not to do it. If you have no choice, don't use the site.

</information_security_hat>

Bill & the list, again, sorry for my rant. It's a bit of a sore spot.

Many of us are also Scan New England members, and rely on both the Message Board there and the e-mail lists here.
Here is a GREAT OFFER to Save 15% with a PRE-ORDER

Nov 17, 2008 - 6:19 PM

Scan New England in our partnership with Scanner Master is pleased to announce the impending release of Scanner Master's MA, RI & So. NH Pocket Guide 11th Edition. What's better yet is that Scanner Master is offering readers and members of Scan New England a coupon code for 15% off of the normal price of $29.95. This offer expires December 1.

Please read this information from the company before you order:

This is a pre-order only, the book is NOT in stock yet. Your credit card WILL be charged but the book will not ship until the first week in December.

With the above in mind, if you would like to pre-order, please click THIS LINK to do so. Ordering via this link benefits Scan New England also. If you are going to order please consider doing so from here or from any of the Scanner Master logos at this site.

During the order process you will be prompted for a Coupon Code. The code is:

smmpg11

This guide may be ordered immediately. My thanks (and I hope yours as well) to Scanner Master and Scott at ScanNewEngland for providing this opportunity to the Scannists readers and members!

If the "This Link" does not work try here
http://www.scannermaster.com/ProductDetails.asp?ProductCode=01-511320&Click=31468

http://www.radioshack.com/search/index.jsp?kwCatId=&kw=20.164&origkw=20.164&sr=1

Avail yourselves...the Pro-164 (handheld) & Pro-163 (base/mobile) are excellent scanners, featuring all the bells and whistles of the Pro-97, yet with a better squelch knob, signal strength meter on the display, and analog 700 MHz feature.

I recommend one buy the service plan, especially on the handheld (Pro-164.) It is worth it, especially if you carry it around as much as I do my handhelds.

The cost for both will be $149.99. This is $70 off.

Also, the alkaline batts are excellent. Two for 1 tomorrow, including the 40-pack AA/AAA blister packages, which I intend on getting to "stock up."

Best to you all,

Loren

Does anyone know how to find out if Verizon Wireless has a new site on North Road in the Shelburne, NH area ?

I am fairly certain someone was in the process of installing a new tower there this past summer. We camp up there and the cell service with Verizon is spotty. Residents of the area have told me that Verizon was putting a new tower.

Just trying to see if it is a fact.

Thank you

BRUCE RICE

Bruce:

You mean you use one of those wireless thing-a-ma-jiggy's?

SBA Towers has been granted an application to build a 150', free-standing tower in Shelburne - at 41 Grumpy Old Men Road. Maybe that's in your back yard. The permission was granted July 31, 2008.

Scott Caron

278. Verizon Wireless Towers

Yahoo group: Scan-RI
Date: 2008-12-02 21:56:34 UTC
From: Bill
Topic: 278 Message: 278

Well this is the Rhode Island List, you might want to check with the folks
in New Hampshire
[Also, Please Change the Subject when you change subjects]

First, did you try the Verizon Wireless Web site that lets you map coverage
down to the Street Level ?
Most of the Vendors are pretty good about listing new tower sites on-line as
well.

The Other option is plug the Lat/Lon into the FCC Web search.

However, I don't think Verizon is the Carrier north of Plymouth NH, for
years it was 1.) Cellular One and 2.) US Cellular

279. Pro-106 programming/operational software question to the Group

Yahoo group: Scan-RI
Date: 2008-12-03 22:16:51 UTC
From: Loren Fields
Topic: 279 Message: 279

Is there one piece of software that will "do it all", to the extent of logging, etc? StarrSoft? BuTel??

I ordered my Pro-106 from my local RS store here in Augusta, Maine and should have it in the next few days. I will be purchasing the software, and would welcome any illumination and direction from the List.

Best,

Loren Fields

282. Major Snow Storm

Yahoo group: Scan-RI
Date: 2008-12-18 20:15:30 UTC
From: Bill
Topic: 282 Message: 282

This might be a good Storm to make confirmations of DPW, Highway Dept, EMA, Power and other Frequencies, outside of the Normal Day-Day Police, Fire and EMS

Post them as you find them....

~~~~~~~~~

URGENT - WINTER WEATHER
MESSAGE
NATIONAL WEATHER SERVICE TAUNTON
MA
1123 AM EST THU DEC 18
2008

...THE POTENTIAL EXISTS FOR HEAVY SNOW FRIDAY INTO FRIDAY
NIGHT
FOR ALL OF SOUTHERN NEW ENGLAND AND PERHAPS INTO SATURDAY
FOR
SOME...

1123 AM EST THU DEC 18
2008

...WINTER STORM WATCH REMAINS IN EFFECT FROM FRIDAY
MORNING
THROUGH LATE FRIDAY
NIGHT...

A WINTER STORM WATCH REMAINS IN EFFECT FROM FRIDAY
MORNING
THROUGH LATE FRIDAY
NIGHT.

THE WINTER STORM WATCH IS IN EFFECT FOR ALL OF SOUTHERN
NEW
ENGLAND.

SNOW IS EXPECTED TO DEVELOP FROM WEST TO EAST LATE FRIDAY
MORNING
OR EARLY AFTERNOON. THE SNOW IS EXPECTED TO BECOME HEAVY NOT
TOO
LONG AFTER ONSET. THE POTENTIAL EXISTS FOR SNOWFALL RATES OF 1
TO
2 INCHES PER HOUR FRIDAY AFTERNOON AND EVENING. ROADS DURING
THE
FRIDAY AFTERNOON AND EVENING RUSH HOUR WILL LIKELY BE
~~~~~~~~~

SNOW
COVERED AND TREACHEROUS. THE SNOW SHOULD TAPER TO SNOW
SHOWERS
ACROSS THE INTERIOR DURING THE EVENING HOURS...BUT THE
STEADY
SNOW WILL LIKELY CONTINUE ALONG THE COAST WELL INTO THE
NIGHT.
ADDITIONAL POWDERY WIND DRIVEN SNOW ACCUMULATIONS ARE
POSSIBLE
WELL INTO SATURDAY ALONG THE COAST DUE TO OCEAN
ENHANCEMENT.

AT THIS TIME...IT LOOKS AS THOUGH MOST OF SOUTHERN NEW
ENGLAND
HAS THE POTENTIAL TO SEE 6 TO 12 INCHES OF SNOWFALL BY
MIDNIGHT
FRIDAY NIGHT. MARTHAS VINEYARD...NANTUCKET...BLOCK
ISLAND...AND
PERHAPS EVEN CAPE COD MAY SEE RAIN AND SLEET MIX IN WITH THE
SNOW
FROM TIME TO TIME LATE FRIDAY AFTERNOON AND EVENING. THIS
COULD
CUT DOWN ON SNOW ACCUMULATIONS
THERE.

IN ADDITION...STRONG WINDS ARE EXPECTED TO DEVELOP ON THE
COAST
LATE FRIDAY AFTERNOON AND CONTINUE INTO THE NIGHT. THIS
MAY
RESULT IN NEAR ZERO VISIBILITIES AT TIMES ALONG WITH BLOWING
AND
DRIFTING SNOW. THE STRONGEST WINDS ARE EXPECTED ON THE CAPE
AND
ISLANDS.

THIS SNOWSTORM IS STILL ABOUT 30 TO 36 HOURS AWAY SO
EVERYTHING
IS NOT SET IN STONE. IF THE SYSTEM TRACKS FURTHER NORTH
OR
FURTHER SOUTH THAN CURRENTLY FORECASTED...SNOWFALL AMOUNTS
WOULD
LIKELY CHANGE. HOWEVER...AT THIS TIME...IT MAY BE WISE TO
PLAN
AHEAD OR MAKE ALTERNATE PLANS FOR FRIDAY AFTERNOON AND
EVENING/S
COMMUTE...AS PRESENT DATA INDICATE THAT IT WILL BE SNOWING
QUITE
HARD BY
THEN.

A WINTER STORM WATCH IS ISSUED FOR THE POTENTIAL OF
ACCUMULATING
SNOW OF 6 OR MORE INCHES IN A 12 HOUR PERIOD...OR 8 OR
MORE
INCHES IN A 24 HOUR PERIOD. ANYONE TRAVELING IN THE NEXT 24
TO
36 HOURS SHOULD MONITOR LATER FORECASTS AND BE PREPARED TO
MODIFY
TRAVEL PLANS SHOULD WINTER WEATHER
DEVELOP.

283. New Printed Pocket Frequency Guide

Yahoo group: Scan-RI
Date: 2008-12-21 17:40:12 UTC
From: Ken
Topic: 283 Message: 283

Recently got my new Scanner Master Corporation's 11th edition "MA, RI, & So NH Communications Guide"
http://www.scannermaster.com/MA_RI_So_NH_Pocket_Guide_11th_Edition_p/01-511320.htm
(Cost: $29.95)

This is an outstanding guide in a pocket book format (7" X 4 1/4"), that provides at your fingertip comprehensive information to easily monitor the radio scanner action in your area.

Here's some specifics on the book:
Total Pages: 309
Massachusetts: Page 1 to 235
Rhode Island: Page 236 to 270
Southern New Hampshire: Page 271 to 309

Here's what the book covers (I'll give the detail for Rhode Island)
*Community Listings (as applicable): Police, Fire, Highway, Schools/Colleges, Public Works, Emergency Management, Other Misc Local Government, Site Property Management (if applicable) (e.g. Malls, Stadiums, Conference Centers/Arenas, Hotels/Motels, Civic Centers, Museums, Golf Courses, Hospitals, Other Amusements/Attractions). IF a trunking system is used by the city/town all of the talk groups & appropriate frequencies are listed.

*Rhode Island State Police (Base/Mobile/Portable standard Channel Plans, Zones & Baracks, Radio Signal Codes).

*Rhode Island Digital Radio System (zone frequencies, talkgroups)

*RISPERN (one frequency, used by portables & mobiles statewide).

*Division of Fire Safety (State Fire Marshal).

*Department of Corrections (statewide system, trunking system at Cranston).

*Department of Environmental Mangement (channel plan/frequencies for: Enforcement Division, Firsh & Wildlife Division, Forest Environment Division, Parks & Recreation Division, also Federal lands (fed freqs)).

*Department of Transporation (Conventional, trunked radio system, talk groups, locations/ID, Motorist Call Boxes).

*Rhode Island Public Transit Authority (conventional & trunked systems).

*Rhode Island Medical Radio System (note that cellphones are now used).

*State Civil Preparedness (2 simplex frequencies).

*Amateur Radio Civil Defense/RACES Nets

*Miscellaneous State Agencies (Attorney General & Economic Development Corp).

*Army & Air National Guard (limited).

*Division of Airports (includes aero & other support nets for: TF Green, Quonset State. Also for the smaller airports in the state, there the typical UNICOM, tower, ground control, approach/departure control freqs listed (if applicable): (Block Island, Newport State, Quonset State, North Central, Providence Helo, TF Green, West Kinston, Westerly State).

*US Coast Guard (standard marine as well as other VHF).

*Newport Naval Base (maintenance, security, & fire department).

*Railroads (Amtrak, CSX, Seaview Railroad, Newport Dinner Train, Providence & Worcester, Old Colony & Newport).

*New Media (TV, Radio, Newspapers).

*Utilities (Narragansett Electric, Capitl North LTR Trunk, Coastal South LTR Trunk, Ocean State Power, New England Gas Company, Providence Water Co, Misc Utilities (e.g. Algonquin Gas, Bristol &Warren Gas, Tiverton Electric, Verizon, Valley Gas Cumberland).

Quite a bit of information, in this book, easy to read due to the type size.

Ken

From: Ken
Topic: 283 Message: 285

Regarding CT not being in the book, apparently the editor who was involved for that state in the 10th edition (BTW the only edition which had CT), decided not to participate.

Not sure what you mean by "PR piece"... Personally I've always found that Scanner Master's frequency guides/books have been VERY helpful to me in enjoying the radio scanner monitoring hobby. As with any frequency guide, surely there will be errors & if they are found, please post to the appropriate list & give them an email. There's a lot of websites on the internet that have frequency information. Some are very good, others are outdated. Again what I like about this guide book is that it is small but yet concise. When you have to pull down information from the internet you have to store it, edit it, and then print it, that takes time & money to do!!!

Ken

Subject: [ScanMe] Radio Shack 40-pack of AA'a and AAA's on sale for $10

Sale runs until Jan. 3 2009. I just bought three more AA's and one more AAA.

Great stuff to have stashed in the commo bunker, backing up the banks of rechargeables.

If there are none left, pay for them and make sure the salesperson logs in their database (that is available from every terminal.) That's what I did. Pick them up after the store re-supplies itself.

Avail yourselves.

Best to the List,

Loren

290. Newport Police New Frequencies

Yahoo group: Scan-RI
Date: 2009-01-02 14:58:09 UTC
From: jml19621
Topic: 290 Message: 290

It appears that Newport Police has gone digital. Does anyone know if they are encrypted? What would the new frequencies be?

[Moderators - note] other towns have gone to RISCON and the information can be found at ScanNewEngland.net [End Note]

I checked Radioreference.com for information. It appears that they have joined RISCON system. There is information regarding Newport Police and Fire. I know for a fact that the Fire end has not gone digital, and may not for a while. Any help would be greatly appreciated. Also the Newport Navy base police have gone silent as well.

Jeff.

293. We'll try this again

Yahoo group: Scan-RI
Date: 2009-01-04 10:00:09 UTC
From: RJH
Topic: 293 Message: 293

Hi all,

We'll try this again. I have the RISCON system programmed in my scanner a 396T. The system has been programmed, with additions for several years. I have never received one signal, sat in Jamestown, Little Compton and Narragansett for hours. Obviously, I have done something wrong, does anyone have the system as a Scan Control or USAD File? If you wish I will send you the files and you can look at them. With Providence PD on RISCON there should be some traffic on the system and it's been silent since the day I programmed it.

I have asked this before and never received any replies.

Thanks,

Ray

For all of those who replied to my post about Newport Police I am now all set. Yes, they are digital, yes, using the right scanner it works perfectly. Radio Shack Pro-96. It does appear however that they will be doing encrypted at some point. As for the Newport Navy base police, I am working on that right now, I may have programed it incorrectly, but there is only so much time in one day.

You might compare this with what you have and this link might not be accurate either, also most police operations are encrypted so you would not hear most police depts. on the system using the 396T. ScanNewengland.net also has a nice explanation of the system.

From: Bill
Topic: 298 Message: 298

The "web beacon issue" comes up periodically, even though Yahoo's policy hasn't changed in more than 8 years, and it appears to be happening again.

This page, which Yahoo put up more than a year ago when this issue last flared up, is still the best summary of beacons and Groups:
http://help.yahoo.com/l/us/yahoo/groups/original/members/privacy/privacy-16.html

.

- Yahoo! Groups

P.S. I am noticing that the link at the bottom of the help page above for contacting Yahoo is now out of date: it should be
http://help.yahoo.com/l/us/yahoo/groups/original/members/forms/forms_index.html

.

From: jeff lemler
Topic: 294 Message: 300

The pro 96 was bought about 2 years ago when they first came out. It was around 500 and change. I have seen them recently on EBay for about 299.00.

As for the encryption situation, if you go to RadioRefrence.com and look up the State of RI RISCON information many of the departments have some of there frequencies encrypted. After I finally programed the Pro 96 some of the frequencies were coming across as such. Newport Police specifically has about three channels designated for encryption. Their primary dispatch channel is not.

I do believe and fear that eventually most important information (or anything worth listening to) is going to be encrypted, national security and all the BS, like a car stop is on the same level as a terrorist attack.

oh ok, didn't know if you had some inside info..as long as they keep their dispatch in the clear I'll take it over nothing, like Jamestown, now narragansett, north providence etc.

In a message dated 1/6/2009 11:28:38 A.M. Eastern Standard Time, jefflemler@... writes:

The pro 96 was bought about 2 years ago when they first came out. It was around 500 and change. I have seen them recently on EBay for about 299.00.

As for the encryption situation, if you go to RadioRefrence.com and look up the State of RI RISCON information many of the departments have some of there frequencies encrypted. After I finally programed the Pro 96 some of the frequencies were coming across as such. Newport Police specifically has about three channels designated for encryption. Their primary dispatch channel is not.

I do believe and fear that eventually most important information (or anything worth listening to) is going to be encrypted, national security and all the BS, like a car stop is on the same level as a terrorist attack.

303. Newport Police Frequencies

Yahoo group: Scan-RI
Date: 2009-01-27 01:28:48 UTC
From: wmgeorge5280
Topic: 303 Message: 303

The Newport Police Department is on RISCON (TGP 1300) and doing buisness as they did when on 155.7300, in other words everything is going thru Dispatch which is NOT encrypted. Yes the officers have MDT's, but often ask Dispatch to verify the info they get. Depending on what site you get you information from TGP 1303 may be a Detail/Event Channel which is also Not Encrypted but I can not verify that has there have not been any big events since I started monitoring Newport on Riscon. I would also recommend that you continue to monitor Newports old VHF Freq's as they use that to dispatch the Zoning Officer to noise complaints and I have heard Officers call Dispatch on those channels when thier digital radio's act up.

Regarding the Newport Navy Base, as a dispatcher there I can verify there have not been recent radio changes. Base Police are still on 143.1250 and Fire is still on 149.2875 and 148.8125 has of this morning, but will be moving to the 380-400mhz ELMR system the Navy is pushing nationwide in the next 18months or so.

304. Senate Passes DTV Transition Delay

Senate Passes Bill to Delay Transition to Digital Television

By Kim Hart

Washington Post Staff Writer Tuesday, January 27, 2009; D01

The Senate last night approved a four-month delay in the nation's transition to all-digital television to give consumers more time to prepare for the switch.

Broadcasters are scheduled to stop airing analog broadcasts Feb. 17. Consumers with an analog television will need a converter box to get broadcasts. People with digital televisions or cable or satellite service will not lose programming.

President Obama earlier this month urged Congress to postpone the transition, citing evidence that many consumers are not ready. The Nielsen Co. said last week that more than 6.5 million U.S. households are not prepared and could see their television sets go dark next month.

But some Republicans say that changing the date would further confuse consumers and create additional costs for broadcasters who have made extensive preparations to switch next month. Wireless companies and public safety agencies also are waiting for airwaves that will be freed by the transition.

It is unclear if the House will immediately pass the Senate's version of the bill, which does not specify how the costs of a delay would be covered. The House could add its own provisions, which would require further Senate action. It could also waive budget rules and seek funds in the stimulus package.

Sen. John D. Rockefeller IV (D-W. Va.), chairman of the Senate Commerce Committee, urged the House to pass the bill, which would push the transition back to June 12. "Delaying the upcoming DTV switch is the right thing to do," Rockefeller said. "I firmly believe that our nation is not yet ready to make this transition at this time. The Senate acted responsibly to give the Obama administration time to attempt to bring order to a mismanaged process."

PBS chief executive Paula Kerger said yesterday that a delay would cost public broadcasters $22 million. She said she hoped lawmakers would provide funds to PBS if they proceed with a delay.

The bill would allow broadcasters to turn off analog signals before the June 12 deadline, and public safety agencies would be allowed to use

those airwaves as soon as they are available. The bill would also allow consumers with expired coupons for converter boxes to re-apply for new ones. The National Telecommunications and Information Administration, which is running the coupon program, has hit its $1.34 billion funding limit. More than 3 million consumers are on the waiting list for coupons, which will come available as already issued coupons expire.

306. Aircraft Emergency Beacons Satellite Monitoring Ends Today 2/1/09

Yahoo group: Scan-RI
Date: 2009-02-01 21:15:17 UTC
From: Ken
Topic: 306 Message: 306

Well today (2/1/2009) the SARSAT (satellite) that monitors the 121.5 mhz emergency beacon signals is shut off. (See: http://www.fcc.gov/Daily_Releases/Daily_Business/2009/db0114/DA-09-33A1.pdf) General Aviation (private small aircraft) have been encouraged (it is not mandatory) to buy the new ELT beacons that operate on a 406.0 mhz with an instant data burst to the SARSAT (satellite) (BUT homing beacon remaining on 121.5 mhz), however, due to cost most private small aircraft remain with the older 121.5 ELT beacons only.

Generally Satellite monitoring/alerts could get a Civil Air Patrol ground or air Direction Finding team within approximately a 30-40 square mile area and than additional DF equipment aboard the aircraft & subsequent air/ground team response (working together) would further define the signals actually location within 2-3 hours after the first satellite alert (CAP is generally designated as the agency to respond to ELT beacons). Without satellite support, response teams will now have to depend upon aircraft reports received by the FAA Air Traffic Control Radios systems (e.g. Boston Air Route Traffic Control Center, Various major airports Approach/Departure Control, & Flight Service Stations). This will result in a longer time period until initial response, as well as a potential considerable time delay in finding the ELT beacon IF weather conditions prevent ELT search aircraft launch.

IF a private aircraft were to crash and did not have a flight plan and or VFR (radar) flight following established, it is very possible that the response would not even start for 8+ hours even IF the ELT beacon was working after the crash, because it is possible NO one would hear it! (So at the very least encourage your private pilot friends to file a flight plan or request flight following OR for that matter IF you are a passenger in a private plane, perhaps ask the pilot).

How can we as monitoring hobbyists assist?

Well basically it's a matter randomly monitoring (unsquelched) 121.5 mhz (AM mode) and reporting to the nearest FAA Air Traffic Control facility or Flight Service Station or possibly the Local Airport Manager IF you monitor an ELT homing beacon. (Flight Service Stations can be contacted at: 800-992-7433) This is especially important IF you live close to or travel by any of the uncontrolled smaller airports in your geographic area. Also if you live in a rural area & are at a higher elevation it would be helpful to listen on a daily basis as often as you can. (It's doubtful that you will be able to pick up an ELT signal with your scanner in the scanning mode/squelched).

What an ELT alert signal sounds like can be found at: http://www.ipg-protect.com/sar/doc083.htm

More information & history about the beacon can be found at:
http://en.wikipedia.org/wiki/Emergency_Position-Indicating_Radio_Beacon

I'd be interested on the outcome of any ELT beacons you monitor and report to any of the officials above. Contact me at rfinder1@...

Greetings All,
We are gearing up for our Biggest Sale of the Year, Our Annual Washington's Birthday Sale. This year we have pulled out all the stops. Our two Huge Showrooms are Jam Packed with products at unbelievable prices. Many items on sale as early as February 11th, 2009. Stop in for a preview or take advantage of products already on sale. Our "Snail Mail" mailer is already in transit to our "Snail Mail" mailing list customers. Sorry this mailing is only directed to the New England States, as there are specials which are only available "in store" on Monday February 16th, 2009. Attached is an advance notice flyer with a valuable coupon, for in store redemption only.

We hope you can join us Monday February 16th, 2009. It is truly an event that needs to be experienced. Special 8:00 am opening Monday, the sale lasts all week. Don't be disappointed, arrive early, many products will sell out quickly.

309. USCG Aux

Yahoo group: Scan-RI
Date: 2009-02-22 19:19:13 UTC
From: Bill
Topic: 175 Message: 309

As summer begins to get closer, and with Boston hosting "Op Sail 2009" the USCG Aux has been busy
with the migration from wideband radios/network to a new Narrow Band [Analog] network on 150.7000 Mhz.

So far, [in the past year] many of us have been able to monitor them, and caught/captured the following
information, which should make for some fun [Non VHF Marine] monitoring this summer.

There have been reports of a repeater or two in Maine, but not CTCSS Tones reported
Damariscotta and/or Bar Harbor

Vermont has reported from Mt. Mansfield for Burligton a Repeater, possibly using 110.9 Hz

Nothing in NH as they use the MA and ME Repeaters

Massachusetts has a couple of repeaters in operation and others which should be up before OP Sail

Amesbury - 103.5 Hz
Swampscott - 85.4 Hz
Kingston - 94.8 Hz
Falmouth - Pending Instalation

Rhode Island - Nothing Reported, which leaves a big Gap in coverage, so there might be something
missing or not reported yet.

Connecticut has reported two Repeaters [altho there might be more]
New Haven - 118.8 Hz
New London - ?? Not Reported yet.

New York / New Jersey and Deleware are full of Active Repeaters.
Albany - 167.9 Hz
Farmingdale - 136.5 Hz
Montauk - 151.4 Hz
Lake George - 127.3 Hz
Hudson - 186.2 Hz
NYC - 131.8 Hz
Manasquan NJ Area - 88.5 Hz
Manasquan DE Area - 100.0 Hz

Boston Area NETS occur Sundays
0930 - Div 4
1000 - Div 12
1030 - Div 3

Also another NET occurs on Wednesday Evening around 2000 hrs, if memory serves correct.

Take a listen, post back what you hear, that might fill in the blanks. !

310. FIRST MAJOR U.S. & U.K. EXCHANGE OF RAILROAD SECURITY &COUNTERTERRORISM OPERATIONS

Yahoo group: Scan-RI
Date: 2009-02-28 14:09:55 UTC
From: Bill
Topic: 310 Message: 310

Thanks to Scan-DC for the info.

Amtrak Police operate on 161.2950 Mhz with a variety of CTCSS tones
for each of the Repeaters along the NE Cooridor.

Curious if the Brits might bring their own radios, which might make for
some fun listening/search'n

Please see the attached media advisory issued today by Amtrak.

Thank you ?

Amtrak Media Relations

MEDIA ADVISORY

FIRST MAJOR U.S. & U.K. EXCHANGE OF RAILROAD

SECURITY & COUNTERTERRORISM OPERATIONS

WASHINGTON, D.C. ? Members of the Amtrak Police Department (APD),
Amtrak Office of Security Strategy and Special Operations (OSSSO), and
British Transport Police (BTP) will jointly patrol several train
stations along Amtrak?s Northeast Corridor, as part of the first major
exchange of security and counterterrorism best practices and tactics.

The uniformed British rail police Sergeants, Constables and
Superintendent will witness APD and OSSSO tactical units, counter
surveillance personnel and K-9 bomb teams during security operations
at four different station locations.

The goal of the visit and exchange is to solidify a security partnership and share lessons learned and best policing methods to protect rail passengers and systems on both sides of the Atlantic.

Schedule of Events for the British Transport Police Visit:

Monday, March 2, Washington, D.C.

8:00 ? 10:00 a.m. Washington Union Station Gate F, Security Operations

10:00 a.m. Kick off Press Conference, Gates C and D, Starlight Room

Tuesday, March 3, Philadelphia

9:00 - 11:00 a.m. Philadelphia 30th Street Station, Media Availability

During Security Operations

Tuesday, March 3, Baltimore

4:00 ? 5:00 p.m. Baltimore Penn Station, Media Availability

During Security Operations

Thursday, March 5, New York

9:00 ? 11:00 a.m. New York Penn Station, Media Availability

During Security Operations

Turn clocks ahead

Don't forget to turn your clocks ahead one hour this weekend. Daylight savings time begins on the second Sunday in March officially at 2:00 a.m.

This is a good time to change the batteries in your smoke detectors and also your carbon monoxide alarms.

And, oddly enough, remember to change the batteries in your car
alarm/lock key fob.

The tones for Potterville are as follows

I think Potterville is: 1036.0 - 1232.0

I interpreted that you wanted disp tones ?
I have quiet a collection of dispatch tones for RI and Maine.

I use to be on the communications board when a former member of the Scituate Fire Dept which has hope jackson, potterville, n. scituate and chopmist fire.

I do not have the PL tone as they operate on a new RPT freq since I moved out of state. I am hoping my friend Elmer in RI can supply the PL tone.

154.040 is the repeater input
158.9475 is the repeater output

I have heard Scituate Fire using 154.040 SIMPLEX 127.3pl. I'm assuming thats how they operate on "fireground".

Hope this helps.

Josh I THINK you might be confussing folks with your terms.

The Repeater aka Dispatch is done on 158.9475 Mhz DPL
Fireground is 154.0400 CTCSS, what you might be calling Primary Ops
or are you listening to the input of the Repeater not knowing it is the input.??

Are you providing something different ?

328. SKYWARN Newsletter #257

Yahoo group: Scan-RI
Date: 2009-03-23 22:04:16 UTC
From: Bill
Topic: 328 Message: 328

Contained in the newsletter are various Dates for SkyWarn Training.

Subject: SKYWARN Newsletter #257

Hello to all..

SKYWARN Training 2009 Update..
SKYWARN Training in Belmont for Belmont CERT/EMA Successful..
NWS Taunton SKYWARN Recognition Day 2008 Report Featured in April 2009 QST Magazine..
SKYWARN Strategy Meetings at NWS Taunton, Mass. and Gray Maine Offices Held..
National Hurricane Center Announces Changes to Products for 2009 Hurricane Season..
National Hurricane Center Announces New Q&A Topics for Web Site..
Ice Storm Information and ARRL Letter Article: New England Ham Response to Ice Storm..
ARRL Letter Article: Oklahoma Hams Warn of Oncoming Tornadoes..
ARRL Letter Article: Hams in Australia with Massive Bushfires..
ARRL Letter Article: As Storms Pummeled Northwestern States, Hams Responded to Local Needs..
ARRL Web Site Article: In Nevada, Hams are NWS' Eyes..

Newsletter Issued: 3/22/09.

SKYWARN Training 2009 Update..

SKYWARN Training sessions are being scheduled and taking shape across the region.
The latest schedule can be seen at the following links:
http://www.wx1box.org/node/36
http://www.erh.noaa.gov/box/skywarnTraining.shtml

It is noted that the NWS Taunton web site link does not have a few of the Amateur Radio sessions. That link will be updated over the next week.

The schedule from the WX1BOX web site is listed below for convenience.

The following is the current SKYWARN Training Schedule for 2009. Please check back frequently for updates on the SKYWARN Training that will be scheduled throughout this year.

Tuesday April 14th, 2009 6-9 PM:
Salem State College (North Campus)
Room TBD
Salem, Massachusetts
Sponsored by: Salem State College

Taught by: NWS Taunton Forecasters

Saturday April 18th, 2009 11 AM-2 PM:
Dexter-Southfield School - Clay Center Auditorium
20 Newton Street
Brookline, Massachusetts
Sponsored by: Brookline Emergency Management and the Dexter Southfield School and Amateur Radio Club
Taught by: Amateur Radio SKYWARN Coordinators

Thursday April 23rd, 2009 7-10 PM:
Sturdy Memorial Hospital
Rice-Webb Auditorium
Attleboro, Massachusetts
Sponsored by: Sturdy Memorial Amateur Radio Club/ARES
Taught by: Amateur Radio Coordinators

Tuesday May 5th, 2009 7-10 PM:
Cape Cod National Seashore
Salt Pond Visitor Center
Intersection of Route 6 and Nauset Road
Sponsored by: Cape Cod National Seashore and Cape Cod ARES
Taught by: NWS Taunton Forecasters

Tuesday May 12th, 2009 630-930 PM:
Spofford Fire Station
9 Pontiac Drive
Spofford, NH
Sponsored by: Cheshire County ARES and the Chesterfield/Spofford Fire Department
Taught by: NWS Taunton Forecasters

Saturday May 16th, 2009 1-4 PM:
Island Free Library
9 Dodge Street
Block Island, RI
Sponsored by: Island Free Library and Rhode Island SKYWARN
Taught by: NWS Taunton Forecasters

Monday May 18th, 2009 7-10 PM:
Morton Hospital and Medical Center - Margaret Stone Conference Room
88 Washington Street
Taunton, Massachusetts
Sponsored by: Taunton Amateur Communications Group (TACG)
Taught by: Amateur Radio Coordinators

The following sites are going to be booked for the spring timeframe. Sessions
will be taught by NWS Forecasters unless otherwise noted:
-Woodstock, Connecticut
-Western Franklin County Massachusetts
-Northwest Hillsborough County New Hampshire

-Northbridge, Massachusetts
-Providence, Rhode Island
-Scituate, Massachusetts (Taught by Amateur Radio Coordinators)
-Nantucket Island
-Martha's Vineyard Island
-Western Essex County Massachusetts (Taught by Amatuer Radio Coordinators)

The following sites are going to be booked for the Summer/Fall Timeframe. Sessions
will be taught by NWS Forecasters unless otherwise noted:
-Middlesex County Massachusetts (Taught by Amateur Radio Coordinators)
-Walpole Massachusetts (Taught by Amateur Radio Coordinators)
-Blue Hill Massachusetts
-Providence RI at Channel 12 if Channel 12 cannot be done in the Spring timeframe.

Please review the links and this SKYWARN Newsletter for updates on the 2009 SKYWARN Training Schedule.

SKYWARN Training in Belmont for Belmont CERT/EMA Successful..

On March 12th, approximately 40 members of the Belmont Emergency Management Agency and CERT, Citizens Emergency Response Team was completed at the Belmont
High School. The training went very well and bolstered the SKYWARN Spotter ranks in an area just outside of Boston, Massachusetts. Below is a link with photos as the training was given to the Belmont CERT/EMA personnel:

http://ema.arrl.org/node/1579

NWS Taunton SKYWARN Recognition Day 2008 Report Featured in April 2009 QST Magazine..

The NWS Taunton SKYWARN Recognition Day 2008 Report and pictures were featured
in the April 2009 QST Magazine. The article can be seen on page 71 of QST and
is part of a broader article on the Ten Year Anniversary of SKYWARN Recognition
Day found on pages 69-71 of the magazine. The report of NWS Taunton SKYWARN Recognition Day activities which included some mention of recent SKYWARN Activations in December 2008 since it delayed the submission of the SRD logs is listed below:

After a historic summer severe weather season by New England standards, we were greeted 5 days after SRD with an epic ice storm that wreaked major havoc in our County Warning Area, north of the Mass. Pike and along and west of I-495 through Northeast, Central and Western Massachusetts and Southern New Hampshire. It resulted in our largest ARESMAT deployment since the 9/11 attacks and resulted in a 27 consecutive hour SKYWARN Activation that spanned one overnight. At the height of the storm, we had close to 400,000 without power in Massachusetts with a similar number in New Hampshire. We

then had 4 additional SKYWARN Activations after that for snow/wind issues which also kept us busy.

We had 313 unique contacts, 364 total contacts with duplicates and 62 NWS Forecast Offices contacted. Our highest numbers ever. We had 14 Ham Operators participate and 2 weather forecasters participate. They were as follows:

W1MPN-Mike Neilsen
N1PJ-PJ Howe
K2DCD-Dennis Dura ARRL HQ Manager of Preparedness and Response
KB1KQW-Jim Palmer
KB1CYO-Phil McLaughlin
KB1FVN-Joanne McLaughlin
KB1G-Bill Boyes
KD1CY-Rob Macedo
W1VFB-Gregg Glynn
KB1PQB-Jason Sample
KB1QKI-Chris Sample
KB1NEG-Andrew Barden
2 Belmont CERT Members who were Amateur Radio Operators
KB1GHX-Glenn Field, Warning Coordination Meteorologist
Eleanor Vallier-Talbot, Outreach Coordinator

SKYWARN Strategy Meetings at NWS Taunton, Mass. and Gray Maine Offices Held..

On Saturday March 14th, 2009, the NWS Taunton office held its first of 2 meetings
for 2009 for SKYWARN Coordinators and Net Controls. On Sunday March 15th, 2009,
a similar strategy meeting was held at the NWS Gray, Maine office. Detailed meeting summaries for this meeting will be posted in the next SKYWARN Newsletter.

National Hurricane Center Announces Changes to Products for 2009 Hurricane Season..

The following is some information on some changes to the National Hurricane Center products for the 2009 Hurricane Season. All of these changes are listed in the NHC Public Information Statements under the following link:

http://www.nhc.noaa.gov/pns_index.shtml

The exact product changes and links to those product changes are listed below:

Changes to storm surge information in Tropical Cyclone Public Advisories effective May 15th, 2009:
http://www.nhc.noaa.gov/pns8_2009.shtml

Format Changes to the Tropical Cyclone Public Advisory Effective May 15, 2009:

http://www.nhc.noaa.gov/pns7_2009.shtml

Atlantic and Eastern Pacific Tropical Cyclone Wind Field Graphics
Operational
Effective May 15, 2009:
http://www.nhc.noaa.gov/pns6_2009.shtml

Atlantic and Eastern Pacific Graphical Tropical Weather Outlooks Operational
Effective May 15, 2009:
http://www.nhc.noaa.gov/pns5_2009.shtml

Probabilistic Hurricane Storm Surge Products become Operational and Expand
in
Thresholds Effective June 1, 2009:
http://www.nhc.noaa.gov/pns4_2009.shtml

Discontinuation of Special Tropical Disturbance Statements and Beginning of
Special Tropical Weather Outlooks Effective May 15, 2009:
http://www.nhc.noaa.gov/pns3_2009.shtml

Format Change to the Tropical Cyclone Discussion for the Atlantic Basin
Effective
June 1, 2009:
http://www.nhc.noaa.gov/pns2_2009.shtml

Format Change to the Tropical Cyclone Discussion for the Atlantic Basin
Effective
June 1, 2009:
http://www.nhc.noaa.gov/pns1_2009.shtml

National Hurricane Center Announces New Q&A Topics for Web Site..

The National Hurricane Center (NHC) announces a new feature highlighting one
member of the NHC staff each month. The inaugural issue can be seen in PDF
or Word format via the following link off the NHC web site:

http://www.nhc.noaa.gov/q_and_a.shtml

Ice Storm Information and ARRL Letter Article: New England Ham Response to
Ice Storm..

The Major Ice Storm of December 11th-12th led to one of the largest
responses
of ARES and SKYWARN in recent memory. It resulted in a 27 consecutive hour
SKYWARN Activation and the largest ARES Mutual Aid Team (ARESMAT) deployment
since the September 11th, 2001 Terrorist Attacks. A review of this event was
done on the VoIP Hurricane Prep Net with presentations on the Ice Storm
given to other Amateur Radio groups in the section as well as a detailed
ARES report written by North Shore ARES. The following are links
to various articles and an article that appeared in the ARRL Letter. A
complete
SKYWARN Activation report on the Ice Storm will be sent in addition to these
resources and reports to the SKYWARN email list. See articles and links

below:

March 2009 VoIP Hurricane Net Training Topic on ARES/SKYWARN Ice Storm Response:

http://www.arrl.org/news/stories/2008/12/18/10511/?nc=1

ARRL Letter Article:

==> HAMS STAND BY TO HELP AS NEW ENGLAND RECOVERS FROM ICE STORM AND PREPARES FOR MORE

The major ice storm that hit New England December 11 has pretty much gone away <http://www.arrl.org/news/stories/2008/12/15/10506/?nc=1>, but with forecasters calling for more winter weather in the next few days, hams are still on the job. During the storm, Amateur Radio operators from all over the area responded to calls for assistance from various served agencies, and local leadership does not expect the need for the hams to lessen anytime soon.

According to Eastern Massachusetts Section Emergency Coordinator Rob Macedo, KD1CY, almost 400,000 customers in Massachusetts lost power at the height of the storm. Phone service, particularly landline service, was disrupted in some areas. Crews have been working hard to restore power to residents, Macedo said: "As of late Sunday evening, almost 140,000 were without power in Massachusetts with over double that number in New Hampshire. On Wednesday, the number of homes without power had dropped to 45,000-50,000 in both states." Southern New England received 2-4 inches of rainfall; isolated higher amounts caused river, stream and urban flooding. Strong winds in the region resulted in tree and wire damage, as well as coastal flooding along the shoreline.

In Western Massachusetts, Section Emergency Coordinator John Ruggerio, N2YHK, reported that ARES units in his Section responded to calls for assistance from local EOCs. "EOC operations in Worcester were secured on Monday evening, as the shelters were closed and power was restored to most areas at that time," Ruggerio said.

"Amateur Radio operators from the North and South Shore of Eastern Massachusetts assisted with operations in Western Massachusetts, fulfilling needs from Saturday night into Monday morning," Ruggerio recounted. "ARES units in the Western Massachusetts Section provided support during the day on Monday for the town of Gardner in Franklin County. An additional team from Eastern Massachusetts -- including one

ham from the Rhode Island/Massachusetts border -- came in on Monday evening. That team helped out in Gardner until 12:30 Tuesday afternoon when the shelters and communications for the local hospital were no longer required, as power was restored to much of the area."

Ruggerio said that the local hospital in Gardner lost phone service for much of the day starting Monday morning. "They got service back later that evening, but until then, Amateur Radio was the only means of two-way communications between the hospital and EOC." Message traffic on prescription fills and other priority, but non-emergency traffic, were fulfilled during that timeframe, he said.

"The Gardner operation was the largest Amateur Radio Emergency Services Mutual Aid Team (ARESMAT) that Eastern Massachusetts ARES has supplied since the September 11 terrorist attacks," Macedo said. "Including the one amateur provided for the Worcester EOC, a total of 16 hams assisted for all the ARESMAT needs in Western Massachusetts."

Macedo said the ARES unit in Franklin County completed its support in the town of Heath on early Monday Morning: "Many of the Franklin County ARES team also assisted with Gardner, providing an additional seven hams to the operation. More than 200 man-hours were logged just in the Gardner ARESMAT alone -- this does not include State Emergency Operations Center operations or the National Weather Service response phase operations."

Support for the Massachusetts State Emergency Operations Center also continues, Macedo said. "Massachusetts State RACES Radio Officer Tom Kinahan, N1CPE, told us that support was required at least through Wednesday evening for the aftermath of the storm. We will continue to provide support for as long as requested to support the State EOC." Eastern Massachusetts ARES supplied three Amateur Radio operators to support the state EOC during the storm.

Throughout the storm, Section leadership from across the region met in twice-daily conference calls with ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD. In a call on Tuesday, New Hampshire Assistant Section Emergency Coordinator David Colter, WA1ZCN, told Dura he had just got his power back early that morning. "I spoke to the ECs for Hillsborough and West Rockingham Counties last night," Colter said, "and they continue to staff two shelters and EOCs. Apparently, neither site has an available landline. There is cell service in the area, but it's spotty. The Milford animal shelter folks have been using ham radio for coordination in a limited way for several days as they retrieve chilly animals. The temporary animal shelter is co-located at the Milford people shelter."

According to American Red Cross Communications Volunteer Tom Carrigan, NE1R, the Disaster Operations Center (DOC) at the Central Massachusetts Chapter of the American Red Cross is a "beehive of activity trying to cover all the demands for services from the many towns still operating shelters and for mobile feeding operations throughout the affected area.

We are still sending cots and blankets, as well as water, heater meals and snacks to New Braintree, and other towns. Nearly every Worcester County town north of Worcester and west of the Wachusett Reservoir has received services from the ARC. Mobile feeding has continued in Worcester, Paxton, Rutland, Gardner, Leominster and many other communities where utility workers and public safety workers have been working long hours outdoors. Several shelters have been supported by Red Cross volunteers during the over-nights, as well as days, and Red Cross volunteers from Massachusetts, Connecticut, Pennsylvania and New Jersey have joined the effort."

Carrigan said that as "thousands of people remain without electric power as the weather turns colder and messier, we expect that some who have been toughing it out at home may give in and come to a shelter."

Macedo noted that the bad weather is just beginning for New England, as the active storm pattern shows no signs of abating: "Another major winter storm is expected on Friday that could dump a significant amount of snowfall on the region. Another major storm is also possible Sunday night into Monday. We have been advised that the State EOC could be back in operation on Friday and we are preparing staffing for those needs. We will leave ARES on standby status through Monday, pending the impact of these storms on our region, as well as the weakened infrastructure that remains from the impact of the ice storm."

ARRL Letter Article: Oklahoma Hams Warn of Oncoming Tornadoes..

The following ARRL Letter Article describes Oklahoma Hams warnings of oncomoing tornadoes in their states.

==> OKLAHOMA HAMS WARN OF ONCOMING TORNADOES

A rare winter tornado struck Oklahoma around dinner time on Tuesday, February 10. According to various news reports, Oklahoma officials credited Amateur Radio operators with spotting the tornadoes and relaying the information to the National Weather Service.

ARRL Oklahoma Section Emergency Coordinator Charles Goodson, KC5UEG, told the ARRL that the Southern Oklahoma ARES group (SOARES) <http://www.soaresss.org/> and other Amateur Radio operators from the Ardmore area served as SKYWARN storm spotters. "After the tornado passed Lone Grove and Ardmore, several hams went back to the Lone Grove area," Goodson said. "One ham went to the Red Cross building and set up a communication command post from the Red Cross radio room. It was amateur operators who had the first visual contact with the tornadoes. They started reporting the tornado to Neil Mayo, KC5AMX, the Emergency Coordinator for Murray County and our Net control for severe weather events; he in turn reports to the National Weather Service in Norman via Amateur Radio."

The town of Lone Grove, population 4600 and located about 100 miles south of Oklahoma City, bore the brunt of the storm, with the Oklahoma

Department of Emergency Management (ODEM) reporting eight deaths and more than 100 homes destroyed. Two other tornadoes hit the Oklahoma City metro area and the north-central Oklahoma region late Tuesday. No serious injuries were reported in the Oklahoma City storm, but at least six homes were destroyed and businesses were damaged there, ODEM officials said.

ARRL Oklahoma Section Public Information Coordinator Kevin O'Dell, N0IRW, told the ARRL that his Ardmore home survived the tornado, but they are without power, water and other services. Other homes in his neighborhood were completely destroyed. Oklahoma Gas and Electric reported about 6000 customers are currently without power, with 3461 in Lone Grove.

Well-known contester Tim Duffy, K3LR, told the ARRL that he lost 40 percent of his home as a tornado blew through his town of Edmond, a suburb of Oklahoma City: "We lost all the doors and windows in the house, all the power, just everything. The damage is amazing. The cell phone system is still 'on tilt' with emergency services taking most of the channels. We're making big progress on getting things sorted out here. We will rebuild and make it better than it was before. With the house in complete disrepair, we'll be staying in a hotel for a while."

Duffy said that National Weather Service officials told him that the wind speed at his home was more than 150 MPH. While the family dog, a golden retriever, made it through the storm okay, Duffy said their pet cat is still missing. According to emergency management officials in Edmond, six homes were destroyed in the storm.

This storm took many by surprise because even in tornado-prone Oklahoma, February twisters are rare. According to the NWS, since 1950, only 44 twisters have touched down in the state during the month of February. The Lone Grove tornado was the third to cause multiple fatalities in the state since March 2007, when a Panhandle couple became the state's first tornado deaths in almost six years.

ARRL Letter Article: Hams in Australia with Massive Bushfires..

The following ARRL Letter article describes the efforts of Hams in Australia with the massive bushfire incident that occurred several weeks ago.

==> HAMS IN AUSTRALIA ASSIST WITH MASSIVE BUSHFIRES

In the Australian state of Victoria, Amateur Radio operators have been activated to provide communications links into towns that have had their normal communications destroyed by the bushfires that have decimated the state. Members of the Wireless Institute Civil Emergency Network in Victoria (WICEN (Vic)) <http://www.vic.wicen.org.au/> -- Australia's version of ARES -- were activated on February 8, with members being deployed to areas with loss of power and other facilities.

According to the Wireless Institute of Australia (WIA) <http://www.wia.org.au/> -- that country's IARU Member-Society -- authorities and resources in Victoria have been "stretched to the limit." WICEN has been on high alert since the fires started on January 28. On February 11, WICEN (Vic) Secretary Mark Dods, VK3XMU, said, "It now appears that WICEN's role in this emergency is going to be a long hard marathon over an extended period."

The fires -- some of which are believed to have been deliberately set, while at least one fire began due to a lightning strike -- have so far claimed 201 lives, including one firefighter; local police say they do not expect the death toll to go much higher. Covering more than 1100 square miles, the fires have destroyed more than 1800 homes; officials estimate at least 7500 people are now homeless due to the fires. Victoria Premier John Brumby, in speaking about the bushfires, said, "Out there, it is hell on earth" <http://www.premier.vic.gov.au/index.php?option=com_mymedia&Itemid=29%C3%83%C2%A2%C3%82%C5%92%C3%82%C2%A9=en&media_id=364&task=text>.

On February 12, Dods said that "WICEN was given the task of establishing a link between Narbethong and the Municipal Emergency Coordination Centre in Alexandra. Initially, the Narbethong-Alexandra link will be on HF. The two WICEN operators that were on standby for deployment to Buxton have been dispatched to Alexandra to join a column that will be moving down the Maroondah Highway to Narbethong this afternoon. An extra WICEN operator is being deployed to the Alexandra MECC to assist the operator already there with expected extra traffic from Narbethong Three WICEN operators are now working 8 hour shifts at the Alexandra Incident Command Centre (ICC), operating CFA/DSE radios. We will be providing operators for this task until further notice."

Dods said hams would make "temporary repairs" to VK3RTN, the 6 meter repeater on Mt Gordon that suffered damage during the fire, making it usable until they can get and install a new repeater. The Mt Gordon repeater is being used as a link between Alexandra and Narbethong. The WICEN station in Narbethong closed Saturday, February 14. "The Alexandra WICEN station will continue to operate after the closure of Narbethong," Dods said. "Their role includes guiding relief operators into the town, maintaining an HF link to Melbourne and a listening watch. Operators in the Alexandra ICC have reported increased radio traffic overnight and emphasised the need for concise, prompt and accurate handling of the traffic despite the sometimes tense environment."

Dods recounted that there was what he called a "flurry of activity" on the evening of February 14: "WICEN received a request from DSE [Department of Sustainability and Environment] to provide operators at Woori Yallock ICC. We were asked to cover the night shift last night and the next four nights. Being a Saturday night, it was difficult to contact operators with many being not at home, and others having their mobile phones diverted to voice mail. Two operators agreed to be deployed at short notice, however. They travelled to Woori Yallock only to find that there had been an administrative foul-up and that they were

not required. Those operators have returned home with my thanks and apologies. This false start at Woori Yallock does give us a 'heads up' that DSE and CFA [Country Fire Authority] resources may be beginning to stretch thin, and lead to more ICC deployments."

On February 17, Dods said that two WICEN operators will be going to "McAdam's Hill, east of Lake Mountain, to provide health and welfare communications for the firefighters at a Base Camp being set up there. Initially, the primary operating frequency will be 3.6 MHz, so there may well be a need for stations monitoring that frequency to relay traffic. Deployment of a portable 2m repeater to support the McAdam's Hill station is under consideration."

The WICEN HF Net continues to operate on 3.6 MHz at 1000 and 2130 hours (UTC + 11) daily. "As well as keeping a check on the welfare of operators in the field, the Net is being used to pass updated activation information, and also for amateurs in remote areas of the state to check their communications," Dods said. "It is reassuring to hear stations from all over the state and interstate on the Net, demonstrating that we can, if necessary, establish communications independent of hilltop infrastructure. It has been very handy to have other amateurs monitoring 3.6 MHz when they can to relay when fading occurs. Many thanks to those operators who have relayed traffic so far."

Dennis Dura, K2DCD, ARRL Emergency Preparedness and Response Manager said: "The work the Australian hams have been doing and the issues WICEN have been facing are not unlike what ARES personnel encounter here. The long hours and duration of the disaster response and the dwindling availability of amateur volunteers take a toll. Yet Amateur Radio still is able to complete the mission. The flexibility we bring is key to meeting the emergency communications needs of those the amateur community serves. Our hearts go out to all those that have lost loved ones and whose lives have been forever changed by these fires. Our colleagues in WICEN make the Amateur Radio community proud in the work they are performing in these very difficult conditions."

ARRL Letter Article: As Storms Pummeled Northwestern States, Hams Responded to Local Needs..

The following ARRL Letter article is on Hams response in Northwestern states to storms in late Decmeber and early Janaury. See article below:

==> AS STORMS PUMMELED NORTHWESTERN STATES, HAMS RESPONDED TO LOCAL NEEDS

After another week of wild weather in Oregon and Washington (January 7-9), residents in those states are just beginning to see the Sun. With an onslaught of wind, snow and rain this winter season, hams in the affected areas have been called upon by local served agencies to lend a hand. From providing 911 support to helping out with communications in area shelters, Amateur Radio operators have assisted since the beginning of the storm events

<http://www.arrl.org/news/stories/2008/12/24/10525/>.
<http://www.arrl.org/news/stories/2008/12/26/10528/?nc=1>

According to David Kidd, KA7OZO, District Emergency Coordinator for Oregon's District One <http://www.oregonaresd1.org/main.html>, the storms moved into his area on Wednesday, January 7 and continued throughout the rest of the week. ARES units in Clatsop, Columbia and Tillamook Counties were activated in advance of the storms that brought flooding, mud slides, blocked roadways from downed trees, as well power outages.

In Clatsop County, Kidd said that amateurs assisted in the county's Emergency Operations Center, while in Columbia and Tillamook Counties, the County Emergency Coordinator activated their local ARES units for the duration of the storms. "Columbia County deployed radio teams to four areas where they anticipated getting severe floods," Kidd told the ARRL. "These places can flood at the blink of an eyelash, so they pre-deployed hams to these areas."

Luckily for Oregonians, the storm tracked through Washington. "We were spared somewhat when the storm stalled over Washington," Kidd said. "Granted, we got a lot of wind and rain, but not like they did north of us. All the counties here are watching their rivers go down and are in some level of recovery mode."

In Lewis County, Washington, hams were prepared for the storms. On Wednesday, January 7, the Lewis County Board of County Commissioners declared the county a disaster area "due to exhausted resources and flood level predictions at or exceeding 1996, 2006, and 2007 flood levels." The Lewis County EOC placed Amateur Radio operators affiliated with local ARES units on standby.

According to Lewis County Emergency Management Deputy Director Ross McDowell, the unincorporated areas of Packwood and Randle had been without land-line telephone service since January 7. "Repairs cannot take place until the flood waters recede. This area is without 911 service due to all alternate facilities being under water. Ham operators/radios will be used in emergencies [to facilitate 911 services]."

On January 10, the Lewis County Department of Emergency Management expanded its use of RACES ham radio operators to stay in contact with the City of Centralia EOC and to continue communication with Morton, Randle and Packwood ham radio operators. RACES continued to provide support throughout the storm event.

The storm brought rain and high winds to Washington, causing widespread avalanches, mudslides, flooding and road closures, as the heavy snowfall that buried parts of the state began to melt rapidly. More than 30,000 people were told to leave their homes in flood-endangered areas across western Washington as authorities warned of heavy flooding.

Warmer temperatures and heavy rains were melting snow dumped on the mountains during the weekend storm, with 10 inches of snow melting in a 12 hour period at Snoqualmie Pass, about 50 miles east of Seattle. Throughout the state, about 60 highways were closed.

ARRL Eastern Washington Section Manager Mark Tharp, KB7HDX, reported that hams in Kittitas and Yakima Counties were on standby during the storms, but "Spokane is holding their own." ARRL Northwestern Division Director Jim Fenstermaker, K9JF, said, "So far, most of the problems are in Western Washington. We here in Seattle are cut off from the rest of the USA by landslides and avalanches to the east, and flooding to the south and north. All major highways are affected, as is all rail transportation. The only way out or in is via air. We had more unexpected rain on Thursday, but it should clear up by the weekend."

ARRL Web Site Article: In Nevada, Hams are NWS' Eyes..

The following ARRL web site article is how a storm near Christmas 2008 damaged the NWS Reno Nevada Radar and how the local NWS office relied on Hams for weather data with the radar damage. The article and a link to an article that has pictures of the damaged radar is listed below:

ARRL Web Site Article Link: In Nevada, Hams are NWS' Eyes:
http://www.arrl.org/news/stories/2008/12/24/10523/?nc=1

Article below:

With winter upon us, and inclement weather coming almost daily in one form or another, the wind and its treatment of mountaintop equipment is a major concern. According to ARRL Nevada Section Emergency Coordinator Don Carlson, KQ6FM, the mountains of Northern Nevada take their share of beatings, but he said that in this case, "winter has certainly come in like a lion. On December 19, a major winter storm hit the area, bringing with it hurricane-force winds to high elevations." Gusts of more than 140 miles per hour battered the mountain, damaging sensitive electronic weather gear, including the NEXRAD radar system used by the National Weather Service office in Reno.

"Fortunately, Northwest Nevada has a very active team of amateurs who are members of the National Weather Service's SKYWARN weather spotter program," Carlson said. "Since the demise of the radar system, NWS Reno has asked spotters to assist by providing real-time weather information via Amateur Radio."

Carlson said that Dee Arnold, KA7LOZ, manned WX7RNO, the amateur station at the NWS Reno office to take reports that came in from a very large area of the region. At times when no one is available to actually be on site, weather service personnel turn the 2 meter radio on and monitor reports that can be delivered at any time of the day or night. "We will have to be their eyes for the time being until the radar site can be accessed and repaired, which may not be for some time and could be several weeks," Arnold said.

Spotters file reports on the Wide Area Data Club's high-level linked system that covers a good portion of both Northern Nevada and North Central California. "The Amateur Radio SKYWARN weather spotters will remain on duty giving reports until further notice, as another storm approaches the area over Christmas," Carlson recounted. "Amateurs have also been providing highway information over mountain passes during the recent flurry of early winter storms."

Respectfully Submitted,

Robert Macedo (KD1CY)
ARES SKYWARN Coordinator

NOAA - Emergency Managers to Test Atlantic/Gulf Tsunami Warning and Response First Coordinated Drill for Atlantic, Gulf of Mexico and Caribbean Locations

March 23, 2009

Tsunami Warning Message Poster.
http://www.noaanews.noaa.gov/stories2009/images/messagesposter.jpg
(Credit: NOAA)

Residents and visitors along the Atlantic coasts of the United States and Canada, the Gulf of Mexico, Puerto Rico and the Virgin Islands should not be alarmed when they hear tsunami test messages broadcast over their televisions and radios on Thursday, April 2, 2009. That day, at 9:00 a.m. EDT (8:00 a.m. CDT), officials will test the region's communication and response plans to help communities prepare for a tsunami.

Co-sponsored by NOAA and the U.S. National Tsunami Hazard Mitigation Program http://nthmp.tsunami.gov/
this is the first region-wide tsunami warning test to include the Atlantic and Gulf of Mexico coasts of the United States, Canadian Atlantic Provinces, and the U.S. Caribbean Territories and Commonwealths.

NOAA's Tsunami Warning Center in Palmer, Alaska http://wcatwc.arh.noaa.gov/
will commence the exercise by issuing a test bulletin through tsunami warning communication channels. The test bulletin, clearly marked "test message", will prompt local officials to implement their tsunami response plans.

During this exercise, some communities in Puerto Rico will conduct evacuation drills while participating emergency management agencies on the U.S. East and Gulf coasts will conduct preparedness activities, such as workshops and table-top exercises. Upon completion of the exercise, participants will evaluate the effectiveness of their tsunami preparedness plans and make adjustments as necessary.

The United States expanded its tsunami warning system and preparedness activities in 2005 after a devastating tsunami in the Indian Ocean struck the coasts of several countries including Sumatra, Indonesia, with little or no warning, killing nearly 230,000 people. The Indian Ocean region was
considered to have a relatively low risk for a destructive tsunami.

http://www.noaanews.noaa.gov/stories2008/images/tsumamiready.jpg
(Credit: NOAA)

"The 2004 Indian Ocean tsunami raised awareness about the urgent need to be prepared," said Jack Hayes, director of NOAA's National Weather Service http://www.nws.noaa.gov/
"This important exercise will test the Tsunami Warning System to identify operational strengths and weaknesses in each community that takes part."

The exercise will increase tsunami preparedness and improve coordination throughout the regions. Coastal residents and visitors are encouraged to prepare their personal tsunami plans prior to this exercise and locate their community's tsunami evacuation routes. The exercise will be cancelled if
a real tsunami threat occurs within 24 hours of the test.
NOAA understands and predicts changes in the Earth's environment, from the depths of the ocean to the surface of the sun, and conserves and manages our coastal and marine resources.

From: Josh Sylvain
Topic: 314 Message: 330

154.040 was wrong i had my pager reprogramed to 158.950 (minitor 3 cant dot he narrow banf 158.9475) and if you visit north scituate fires website they talk about switch to the narrow band 158.9475 which i think already took place. I can hear a lot better on my pager now. Before i couldnt hear the rescues until they were out at the hospital now i can hear them at the stations. Thansk to all who helped. And the tones were correct thank you Denis.

Josh I THINK you might be confussing folks with your terms.

The Repeater aka Dispatch is done on 158.9475 Mhz DPL
Fireground is 154.0400 CTCSS, what you might be calling Primary Ops
or are you listening to the input of the Repeater not knowing it is the input.??

Are you providing something different ?

332. Yahoogroups information

Yahoo group: Scan-RI
Date: 2009-04-09 22:35:33 UTC
From: Bill
Topic: 332 Message: 332

Here is a message I received from Yahoogroups that I will share with all of you.

==========
We wanted to keep you updated on a few issues that may have been impacting your groups over the past few days.

Digest Delivery: Several users have recently reported issues with the delivery of daily digests. Digests were not being delivered unless a group hit
"25 messages," which affected some groups We have corrected this issue and all groups should be fixed by tomorrow (Thursday, April 9, 2009).

Delayed Messages and Bounces: Group members and moderators who receive their email through Verizon may not be receiving all messages, or may be receiving messages long after they've been posted to the group. Verizon has apparently been "grey-listing" mail from Yahoo! Groups. We have contacted Verizon to remedy the problem, but we are ultimately dependent upon them to resolve the issue.

If you feel as though your ISP may also be delaying the delivery of Yahoo! Groups mail, you can find the official list of outgoing mail servers here: http://tech.groups.yahoo.com/group/ygmailadmin/ This list will be useful when reporting the issue to your ISP as they will likely ask for the IP addresses of the mail servers that need to be "white-listed" to prevent future
issues.

Once we have an update or confirmation from Verizon we'll be sure to share it with you all on the blog (http://ygroupsblog.com). In the meantime, thanks for your patience!

334. Groups Update: Missing Groups, AOL, Missing Members, Message Search

Yahoo group: Scan-RI
Date: 2009-04-16 10:08:30 UTC
From: Bill
Topic: 334 Message: 334

FYI, from Yahoo

Thank you all for your patience during this week's outage. We wanted to keep you updated on a few issues that may be impacting your experience on groups.

Missing Groups
After Monday's maintenance a few of you have reported that some of your groups were "missing" from your groups list. If you are missing any of your groups please go through the Membership Wizard, found here: http://groups.yahoo.com/memwiz This will detect any groups registered to your ID. Once you've completed the Membership Wizard any "missing" groups should return to your groups list.

AOL Users
We're receiving reports from some moderators and users that some AOL users are not receiving messages from Yahoo! Groups and are being put into bouncing status. For more information on this issue and information on how to "unbounce" yourself, please go here : http://help.yahoo.com/l/us/yahoo/groups/original/issues/aol.html

New Members Not Showing Up
If there are members who have recently joined your group but do not show up in your Membership List, please report this issue to Customer Care, as this is a bug. When reporting the issue to Customer Care please provide a list of the missing members. To report this issue, please go here : http://help.yahoo.com/l/us/yahoo/groups/original/members/forms/forms_index.html

Message Search
While we know that many of you are disappointed that this week's maintenance did not include a fix to the message search issue, we are happy to report that we will be pushing out a fix to ALL groups in the next month that should resolve this problem. Currently groups that are affected by this bug are not returning search results altogether, or, may not be returning complete results. If your group meets these criteria, please register your group here : http://surveylink.yahoo.com/wix/p6290938.aspx and it will be one of the first groups migrated over to the new Message Search next month.

As always, please stay up to date on the latest issues by checking the blog (http://www.ygroupsblog.com) or the Known Issues page (http://help.yahoo.com/l/us/yahoo/groups/original/issues/index.html;_ylt=AqMe.blDgWspDQU_a1af7mlmcXdG) in the Help section. If you're having an issue that isn't addressed here or in the help section, please report the issue to Customer Care so we can investigate the issue further.

Thanks!

Melissa Daniels

ON THE MOVE: Russian Sub May Move Saturday ABC 6 News Story Created: Apr 16, 2009 at 2:19 PM EDT Story Updated: Apr 16, 2009 at 4:55 PM EDT

The former Soviet submarine Juliett 848 may be on the move Saturday.
The new owners of the sub, RU Recycled Metals LLC, announced tentative plans to move the sub about 1000 yards from its current resting place in the Providence River, Thursday.

A spokesperson for the company said that the sub could be moved as early as Saturday, but that the final decision will be made at a planning meeting with the US Coast Guard on Friday.

http://mt-milcom.blogspot.com/2009/04/cap-radio-comm-system-transition-has.html

Saturday, April 25, 2009
CAP Radio Comm System Transition Has Begun
According to field reports, CAP has begun the transition to their new narrowband frequencies in several states. That means they are moving towards the new 12.5 kHz frequencies in the 138-144 and 148-150.8 MHz ranges. Time to dust off the old search buttons on our scanners and see what this super secret branch of our imperial government has finally moved to.

Any and all field reports are welcomed here and will be shared. Those wishing to remain anonymous will be so.

Below are my previous post on this blog on what use to be a mighty fine organization, who got themselves caught up in the post 9/11 DHS web of money, secrecy, and fraud, waste and abuse.

http://mt-milcom.blogspot.com/2008/06/civil-air-patrol-new-narrowband-freq.html

http://mt-milcom.blogspot.com/2007/05/cap-ground-callsigns.html

http://mt-milcom.blogspot.com/2007/05/cap-ale-address-ided.html

http://mt-milcom.blogspot.com/2007/02/proposed-legislation-cap-air-support.html

I have also listed the old and new CAP frequencies in our annual airshow guide.

http://www.monitoringtimes.com/MT_Air_Show_Guide_mar08.pdf

The 2009 guide should be published online early next month on the MT website.

Scanner Master

Father's Day Specials!
B-Stock Blowout Sale

Now Through Father's Day Only!

You must use this instant coupon code when placing your order!

Limit 3 per customer.

You must use this instant coupon code when placing your order!

A scanner must be included to qualify for free shipping.

Simply order Gift Wrapping when placing your order!

Applies only to products eligible for gift wrapping.

In Store B-Stock Blowout Day!
Just announced, our first one day IN STORE ONLY B-Stock BLOWOUT.

Thursday June 11th 8:30am-7:00pm at our Natick, MA office.

The boss is out of town and we are making deals!

It's widely known that we only sell new scanners, but for one day we are opening up our Natick, MA store to blowout all models we do not sell as new (B-Stock). Most are like new with packaging torn or returns with some other minor imperfection that does not meet our strict "new" criteria. All scanners are tested and functioning perfectly.

Some of the models available include BCD996T, BCD396T, BC246T, BC898T, BC340CRS, GRE-100, GRE-500 and MANY more. Also availble, tons of accessories for all models!

See our new blog!

Did you know?
By Jonathan Higgins - The Scanner Expert

Are you looking for an inexpensive option to run two scanners sharing the same antenna? Multi-couplers can be pretty costly. Why not try a cheaper solution?. With the SP-1300 Combiner/splitter and jumper coax cable (sold separately) you can hook up two scanners to one antenna with minimal to no signal loss.

This is a simple hook up:

Step One - Run your antenna coax cable to "Input' on the SP-1300
Step Two - Connect "Output A" to Scanner One via BNC
Step Three - Connect "Output B" to Scanner Two via jumper cable (sold separately)

[Click here to see photo of set-up]

After testing the SP-1300 for over a month now, it works like charm, with no signal lost.

SP-1300 Combiner/Splitter
RG58 Jumper Cable, 3', BNC Male to BNC Male
RG58 Jumper Cable, 6', BNC Male to BNC Male

Same Day Shipping!*
Gift Wrapping Available.

It's coming back, thanks. It hadn't propagated to Comcast here on Cape Cod anyway at the time of this message, but it's spreading. Thanks for the updates, Bill.

350. Coast Guard searching for kayak owner

Yahoo group: Scan-RI
Date: 2009-06-21 14:05:04 UTC
From: Bill
Topic: 350 Message: 350

June 21, 2009: Coast Guard searching for kayak owner

Office of Public Affairs
U.S. Coast Guard First District

Press Release Date: June 21, 2009
Contact: Petty Officer Zach Zubricki
(617) 406-9011

Coast Guard searches for missing kayak owner
BOSTON - The Coast Guard is searching for the owner of a kayak that was found washed up on the beach near the mouth of the Narrow's River and behind the Dune's Club in Narragansett, R.I. this morning.

Fishermen discovered the kayak, and also located nearby was a shoe, sweat pants, a cooler with live eel, and a kayak back rest.

The kayak is described as a 16-foot orange Wilderness Tarpon 160I.

The Coast Guard is asking that anyone who may have information about this kayak or its owner to call Sector Southeastern New England at 1-508-457-3211.

A Station Castle Hill, R.I. 41-foot utility boat and an Air Station Cape Cod Jayhawk rescue helicopter are actively searching the area.

"We still don't know if someone fell out of this kayak and is in trouble," said Chief Gerald Welpon of the First District Command Center in Boston. "However there is enough evidence in this case that makes us think there could be a problem, which is why we want to locate the owner of the kayak and get this resolved as quickly as possible."

From: Ken
Topic: 350 Message: 351

June 21, 2009: Coast Guard searching for kayak owner
Bill & the group:

One would think that with any boat that the owner would include some ID mounted somewhere in a water proof pouch that at least would include the owner's name, telephone #, & emergency contacts. Also what could be considered is a short note of what that trip was going to be about. That sure would help all emergency responders.

BTW I attended my local ham repeater club meeting (Springfield MA) recently and the USCG Aux made a presentation on what they do & about joining. There's a very big push on for them to train safety measures to non powered type small boats such as kayak's.

Coast Guard searches for missing kayak owner
BOSTON - The Coast Guard is searching for the owner of a kayak that was found washed up on the beach near the mouth of the Narrow's River and behind the Dune's Club in Narragansett, R.I. this morning.

Fishermen discovered the kayak, and also located nearby was a shoe, sweat pants, a cooler with live eel, and a kayak back rest.

The kayak is described as a 16-foot orange Wilderness Tarpon 160I.

The Coast Guard is asking that anyone who may have information about this kayak or its owner to call Sector Southeastern New England at 1-508-457-3211.

A Station Castle Hill, R.I. 41-foot utility boat and an Air Station Cape Cod Jayhawk rescue helicopter are actively searching the area.

"We still don't know if someone fell out of this kayak and is in trouble," said Chief Gerald Welpon of the First District Command Center in Boston. "However there is enough evidence in this case that makes us think there could be a problem, which is why we want to locate the owner of the kayak and get this resolved as quickly as possible."

June 21, 2009: Update Coast Guard locates kayak owner

Office of Public Affairs
U.S. Coast Guard First District

Press Release Date: June 21, 2009
Contact: Petty Officer Zach Zubricki
(617) 406-9011

*UPDATE*Coast Guard finds kayak owner safe
BOSTON - A 55-year-old Exeter, R.I. man called the Coast Guard this morning at 9:26 a.m. to report he is the owner of an abandoned kayak that washed ashore behind the Dune's Club in Narragansett, R.I. last night.

The abandoned kayak prompted an intensive Coast Guard search using an Air Station Cape Cod helicopter and a 41-foot utility boat from Station Castle Hill, R.I.

Fishermen reported finding the abandoned kayak last night, and also located nearby was a shoe, sweat pants, a cooler with live eel, and a kayak back rest.

Narragansett, R.I. police called Sector Southeastern New England 12:50 a.m. after becoming concerned that a person or persons may be missing on the water.

The 41-foot utility boat launched at 1:30 a.m. and the helicopter arrived on scene and began actively searching at 2:36 a.m.

At 7:45 a.m, the Coast Guard issued a press release asking anyone with information on the kayak to call Sector Southeastern New England.

The Rhode Island Environmental Police talked to the owner, who stated that he and another man were fishing around midnight last night when their kayaks overturned. They both struggled to get to shore, but the left the scene without initially reporting the incident, leaving one of the kayaks adrift.

"We strongly encourage those seperated from their boats to call their nearest Coast Guard unit right away," said Chief Gerald Welton. "If we got this information sooner, then we could have called off our search. These men were in distress and luckily were able to save themselves because they were wearing life jackets. Without knowing they made it to shore, however, it made us think they could have still been in the water and needing help. We are glad they are both ok."

Subject: Severe Weather/Amateur Radio Field Day Coordination Message #5

> Hello to all..
>
> ..The following is the fifth in a series of messages on Amateur Radio
> Field Day Weekend. Amateur Radio Field Day Weekend is an annual event
> where Ham Operators across the United States setup at Emergency Operations
> Centers, field locations, home locations etc. to operate and test their
> equipment and skills and make as many radio contacts as possible during
> the weekend. Many locations can be visited by the public and Amateur Radio
> Field Day can be a form of outreach to Ham and non-Ham Operators. It is
> both a fun/preparatory event for Ham Radio Operators for Emergency
> Communications scenarios..
> ..As have been done over the past 10 years, this will be the first in a
> series of Severe Weather/Amateur Radio Field Day Coordination Messages to
> pass instructions to Amateur Radio Field Day sites on what to do if
> threatening weather approaches and to have Field Day sites guard their
> SKYWARN repeaters as required if threatening weather approaches..
> ..Field Day Weekend is expected to have better weather than what we have
> seen in the past several days, however, threats for severe weather and
> thunderstorms with their attendant lightning risk exists for Saturday.
> Damp weather will return later Sunday and into next week..
> ..A widespread severe weather outbreak occurred in the state of
> Connecticut Friday. The Newington Amateur Radio League Field Day site was
> in the direct line of a severe thunderstorm and Hams took cover and gave
> critcal reports to the Hartford-Tolland County SKYWARN Net along with many
> other Amateur Operators and SKYWARN Spotters in the state of Connecticut.
> Details follow in the text of the coordination message..
> ..Saturday will bring another round of scattered to numerous strong to
> severe thunderstorms across the region. This has the potential to threaten
> Field Day sites with lightning and the potential for hail and strong to
> damaging winds. All Field Day sites should use extreme caution and closely

> guard their local SKYWARN Frequency, NOAA Weather Radio or Internet and
> local media outlets for hazardous weather information..
> ..Sunday appears to have less of a threat for thunderstorms and severe
> weather then Friday and Saturday though this forecast is still a bit into
> the future. Damp weather will be returning later Sunday into early next
> week..
> ..Rememeber, thunderstorms even if non-severe can contain dangerous
> lightning and that is a threat to any outdoor Amateur Radio Field Day
> sites in the region..
> ..This Week is also Lightning Awareness Week and safety information on
> lightning gets propagated during this period and has coincidentally
> coincided with Amateur Radio Field Day weekend and that information is
> included in this coordination message..
> ..SKYWARN Activation with Ops at NWS Taunton will commence at 1PM
> Saturday. SKYWARN monitoring for even non-severe thunderstorms will be
> done over the weekend to protect Amateur Radio Field Day sites as best as
> possible..
>
> There are a large number of Amateur Radio Field Day sites across the NWS

357. US Postal SVC

Yahoo group: Scan-RI
Date: 2009-06-30 13:23:46 UTC
From: Dunn-CHS, William (CHS)
Topic: 357 Message: 357

While returning from CT Sunday evening, I finally captured one of the US Postal Service Frequencies for the P&DC in Providence.

406.1375 R D-606 was what I Captured. Typically at a GMF there is plenty more as well as Security/Police.

P&DC = Processing & Distribution Center

From: Scott Caron
Topic: 358 Message: 359

There is no 800 MHz frequency for Scituate Fire. When they move to
800, it will be part of the statewide digital trunked system now being
constructed. Each agency will be assigned one or more talk groups. The
easiest way to think about it is to consider each talkgroup like a
channel. The system will have a group for each agency.

[Moderators Note: Here is the link to the RI 800 system, when Scituate does move over
there]
http://www.scannewengland.net/wiki/index.php/Rhode_Island_Digital_System
[End Moderators Note]

Scituate isn't quite ready for the move yet, since the "statewide"
system hasn't been finished up north yet. The state forgot that there is life above
Cranston.

About the Department Open for Business Press Room

The threat level in the airline sector is High or Orange. Read more.

Release Date: July 1, 2009

For Immediate Release
Office of the Press Secretary
Contact: S&T Press Office, 202-254-2385

The U.S. Department of Homeland Security's (DHS) Science and Technology Directorate today announced the 14 lead organizations for the upcoming pilot phase of testing and evaluation (T&E) for the Multi-Band Radio project. The pilots comprise the final phase of a three-part T&E process that includes laboratory testing, short-term demonstrations, and pilot projects.

In 2008, the DHS Science and Technology Directorate awarded a contract to demonstrate a multi-band radio that enables emergency responders-police, firefighters, emergency medical personnel and others-to communicate with partner agencies, regardless of the radio band on which they operate. Currently, radios only operate within a specific frequency band; subsequently, responders are often unable to communicate with other agencies and support units that operate in different radio frequencies. Comparable in size and weight to existing portable radios with similar features, multi-band radio would provide users with much-improved incident communications capabilities.

The pilot phase provides a unique opportunity for agencies to access the latest technology and implement it in their daily operations. Feedback from local, state, and federal participants during the first two phases was incorporated into a production-ready multi-band radio to be used for this pilot.

The 14 lead organizations in the pilot are:

· 2010 Olympic Security Committee (Blaine, Wash., and Vancouver, B.C. Canada)

· Amtrak (Northeast Corridor)

· Boise Fire Department (Boise, Idaho)

· Canadian Interoperability Technology Interest Group (Ottawa, ON Canada)

· Customs and Border Patrol (Detroit)

· Federal Emergency Management Agency (Multiple Locations)

· Hawaii State Civil Defense (Honolulu)

· Interagency Communication Interoperability System (Los Angeles County, Calif.)

· Michigan Emergency Medical Services (Lower Peninsula Areas)

· Murray State University (Southwest Kentucky)

· Phoenix Police Department and Arizona Department of Emergency Management Greater Phoenix and Yuma County)

· Texas National Guard (Austin, Texas)

· U.S. Marshals Service (Northeast Region)

· Washington Metro Area Transit Authority Transit Police (District of Columbia)

Each agency will conduct a minimum 30-day pilot in fall 2009. The pilots are designed to focus on the capabilities and effectiveness of the technology, with users primarily in a command-and-control role or involved in special operations with multiple entities. The agencies and sites were chosen to represent a broad range of communication environments. Factors such as operating bands, partner agencies and disciplines, interoperable conditions, and geographic landscapes were considered when selecting pilot sites.

Results will be documented at the conclusion of the test, and all findings and lessons learned will be published in a comprehensive report that is expected to be posted on the SAFECOM program Web site, www.safecomprogram.gov, in early 2010. The report will provide details to manufacturers about the needs of the response community and assist officials in making informed radio purchasing decisions in the future.

###

Through a practitioner-driven approach, the Science and Technology Directorate's Command, Control and Interoperability Division (CID) creates and deploys information resources-standards, frameworks, tools, and technologies-to enable seamless and secure interactions among homeland security stakeholders. With its federal partners, CID is working to strengthen capabilities to communicate, share, visualize, analyze, and protect information.

Subject: [Scan-RI] Scituate fire Dept. 800MHZ Frequency

There is no 800 MHz frequency for Scituate Fire. When they move to 800, it
will be part of the statewide digital trunked system now being
constructed. Each agency will be assigned one or more talk groups. The easiest way to
think about it is to consider each talkgroup like a channel. The system
will have a group for each agency. [Moderators Note: Here is the link to the
RI 800 system, when Scituate does move over there]

364. Tips for Having a Safe and Happy 4th

Yahoo group: Scan-RI
Date: 2009-07-02 23:48:54 UTC
From: Bill
Topic: 364 Message: 364

HOLIDAY SAFETY BRIEFING
The 4th of July is a day of celebration of our nation's independence. But tragically, the 4th of July weekend is also one of the most dangerous days of the year in America. Whether your plans involve grilling or shooting fireworks, please remember to keep your Independence Day safe by following these safety tips:

Be conscious of fireworks safety.

· Although many cities ban only certain ones, ALL fireworks are a fire hazard.

· Carefully read all instructions, and never use fireworks near wooded or dry areas.

· Always have water available to put out sparks or flames that may occur when using fireworks.

· Never point fireworks at people, animals, and property (especially ones that you'd like to keep intact).

· Do not allow children to play with fireworks.

Be additionally cautious on the road.

· Do not drink and drive- always have a designated driver and never let friends drive drunk.

· Remember that even if you are not drinking and driving, other people may be, so make sure you are alert for drunk drivers.

· Drivers may be distracted by fireworks and other excitement in the area.

· Take frequent breaks when traveling long distances, and always stop driving if you become drowsy.

· All Terrain Vehicle use should be supervised and operated by persons of the correct age.

Always grill in a safe manner.

· Be aware of children playing around the barbecue area.

· Before starting your gas grill, be sure it has been maintained and properly cleaned.

· Make sure coals are completely extinguished before leaving the area.

· Take precautions to avoid creating unnecessary fires outside of the grill.

Handle food properly to avoid food poisoning.

· Preserve food in a timely and proper manner.

· Never leave food out for more than 30 minutes, especially in the heat.

· Always make sure the served food is at the proper temperature.

Keep your children and pets safe.

· Always keep children in your vision unless accompanied by someone reliable.

· Ensure playground equipment, such as swing sets and trampolines, are in proper working order and that all safety equipment is installed.

· If possible, keep pets indoors as they are generally frightened by fireworks.

· Once more, do not let children tamper with fireworks.

Be careful around swimming pools.

· Ensure swimming areas have adequate supervision by someone trained in CPR.

· Exit the swimming area and shelter indoors during a thunderstorm.

· Do not swim while intoxicated.

Take concern of your body outdoors.

· Use proper sunscreen to avoid burning.

· Drink plenty of water to stay hydrated and reduce the chance of heat exhaustion or stroke.

Statistics show that more than 7,000 people each year are treated for 4th of July-related accidents. Do not be one of them. Stay safe this year while celebrating our nation's birthday.

Have a happy 4th of July!

367. Yahoo is Closing Geo Cities

Yahoo group: Scan-RI
Date: 2009-07-11 13:28:50 UTC
From: Bill
Topic: 367 Message: 367

For any of you who have built and/or maintained a scanner related site thru the old GeoCities, you need to find a new home :(Heads Up

Important notice: GeoCities is closing.
Dear Yahoo! GeoCities customer,

We're writing to let you know that Yahoo! GeoCities, our free web site building service and community, is closing on October 26, 2009.

On October 26, 2009, your GeoCities site will no longer appear on the Web, and you will no longer be able to access your GeoCities account and files.

What You Need to Do
If you'd like to move your web site, or save the images and other files you've posted online, you need to act now by choosing one of the following options:

• Move your site to Yahoo! Web Hosting.
We know your files are important to you, and we want to make moving to Web Hosting as easy and affordable as we can. For a limited time, you can move your files automatically, take advantage of terrific features like a personalized domain name and email, even redirect your GeoCities web address to your new site — all for only $4.99 a month for a full year.

For more information and complete terms, please see our special offer now.

• Download your files to your own computer.
With your pages and images saved offline, you can re-create your site with any hosting provider.

To quickly download your published files, visit your GeoCities web site, right-click on each page, and choose Save Page As... from the menu that appears. Choose a location on your computer to save your files, then click OK or Save. Learn more about downloading your files.

Don't Wait
Please be aware that after October 26, your GeoCities files will be deleted from our servers, and will not be recoverable. If you'd like to save your files, you must download them now or move to Yahoo! Web Hosting. If you need assistance, please visit the help center.

We want to thank you for being a GeoCities customer, and hope you continue to enjoy our other Yahoo! services.

Best regards,

The Yahoo! GeoCities team

just a guess but facilities like that usually use low power systems. So unless your right on top of them you will not hear them.

John-
The ACI operates on an LTR system.
The Frequencies are:
851.350000
851.887500
852.837500
853.100000
853.787500
851.387500
852.812500
853.062500
853.587500
853.837500
The talk group that I have captured so far are:
Cranston ACI Group Wildcard 48
Cranston ACI Private Wildcard 0
*ID: 0-08-064 Group 0-08-064 30
*ID: 0-07-060 Group 0-07-060 1892
*ID: 0-02-050 Group 0-02-050 94
*ID: 0-10-040 Group 0-10-040 1429
*ID: 0-08-070 Group 0-08-070 1777
*ID: 0-09-030 Group 0-09-030 1159
*ID: 0-03-020 Group 0-03-020 1167
*ID: 0-06-010 Group 0-06-010 867
*ID: 0-08-104 Group 0-08-104 6
*ID: 0-05-168 Group 0-05-168 9
*ID: 0-06-013 Group 0-06-013 8
*ID: 0-08-062 Group 0-08-062 38
*ID: 0-08-061 Group 0-08-061 72
*ID: 0-05-159 Group 0-05-159 4
*ID: 0-08-113 Group 0-08-113 0
*ID: 0-06-009 Group 0-06-009 41
*ID: 0-10-035 Group 0-10-035 9
*ID: 0-08-063 Group 0-08-063 2

*ID: 0-18-121 Group 0-18-121 1
*ID: 0-08-069 Group 0-08-069 0
I am monitoring on a Pro-106. Set this up as an LTR system in your scanner and let the scanner auto place the talk groups or capture the talk groups automatically if possible. I do not know who any of these talk groups belong to though. Can anybody elaborate further?

375. ACI Frequencies

Thanks to all for the replies.

These are the same frequencies I have programmed in my 396xt. I am using the RS 800mhz antenna and I am located approximately 10 miles the ACI. I live in scituate, maybe too far away or maybe I am not programming properly. I have only had the uniden 396xt for one week and also use the arc xt pro software. So far, I like both products very much.

I have the following talkgroups:
001050 Admissions
003060 Female Facility Security
005070 Operations

Did not have the 'LCN' numbers--I used 1 to 10. New to scanning, find very interesting-I'm probably doing something incorrectly!

Did program in a digital statewide system--seem to be working ok.

Thanks again for the help!

John-
The ACI operates on an LTR system.
The Frequencies are:
851.350000
851.887500
852.837500
853.100000
853.787500
851.387500
852.812500
853.062500
853.587500
853.837500
The talk group that I have captured so far are:
Cranston ACI Group Wildcard 48
Cranston ACI Private Wildcard 0
*ID: 0-08-064 Group 0-08-064 30
*ID: 0-07-060 Group 0-07-060 1892

*ID: 0-02-050 Group 0-02-050 94
*ID: 0-10-040 Group 0-10-040 1429
*ID: 0-08-070 Group 0-08-070 1777
*ID: 0-09-030 Group 0-09-030 1159
*ID: 0-03-020 Group 0-03-020 1167
*ID: 0-06-010 Group 0-06-010 867
*ID: 0-08-104 Group 0-08-104 6
*ID: 0-05-168 Group 0-05-168 9
*ID: 0-06-013 Group 0-06-013 8
*ID: 0-08-062 Group 0-08-062 38
*ID: 0-08-061 Group 0-08-061 72
*ID: 0-05-159 Group 0-05-159 4
*ID: 0-08-113 Group 0-08-113 0
*ID: 0-06-009 Group 0-06-009 41
*ID: 0-10-035 Group 0-10-035 9
*ID: 0-08-063 Group 0-08-063 2
*ID: 0-18-121 Group 0-18-121 1
*ID: 0-08-069 Group 0-08-069 0
I am monitoring on a Pro-106. Set this up as an LTR system in your scanner and let the scanner auto place the talk groups or capture the talk groups automatically if possible. I do not know who any of these talk groups belong to though. Can anybody elaborate further?

.

Coast Guard locates diver down in North Kingstown, R.I.
BOSTON - A Station Castle Hill 25-foot response boat crew found a commercial dive boat at anchor at 5:08 a.m. Tuesday one mile from Allen Harbor, North Kingstown, R.I. where a deceased diver was brought to the surface by the Warwick Fire Dept. at 6:40 a.m.

Deceased is Louis Ricciarelli, Jr., 56, of Exeter, R.I., who was known to dive for quahogs from his 25-foot boat, the Chelsea Ann, which is based at Gardner's Wharf in North Kingstown. Quahogs are a type of clam.

Ricciarelli's wife called the Rhode Island State Police at 2:15 a.m. after returning from work Tuesday to report her husband should have returned at about 4 p.m. Monday. She stated he probably left Allen Harbor alone between 8:30 and 9:30 a.m. Monday in the Chelsea Ann to dive for quahogs. The State Police contacted the Coast Guard to report the overdue vessel, the location of which was completely unknown to search and rescue coordinators.

After narrowing down a search area, Castle Hill launched at 4:44 a.m. and found the Chelsea Ann at anchor about six miles away from the station. The boat crew noticed a diver air hose deployed over the side. They immediately called for a dive team, and Warwick Fire Dept. divers deployed from their own boat at 6:40 a.m. when they found Ricciarelli deceased at the bottom in 20 feet of water.

A Station Castle Hill Coast Guard boat towed the Chelsea Ann back to the Gardner's Wharf in North Kingstown, and the R.I. Dept. of Environmental Management Police are investigating the cause of the incident.

"We would like to express our condolences to Mr. Ricciarelli's family," said Petty Officer 2nd Class Jason A. Armstrong, who works at Station Castle Hill. "This was a tough case for us because we had no idea at first where the dive boat could be. Once we were able to narrow down a potential search area, we launched our boat crew."

Scanner Master

-Free Updated BuTel ARC Software-
-Important News about Web Interface-

RadioReference will soon require the Free Update of your BuTel ARC Software Now Available

For those of you who have already purchased the Butel ARC Software you can now download at your convenience a major software upgrade which is designed to work seamlessly with the new RadioReference.com web service. The current web service will soon cease operation and thus to continue downloading from RadioReference.com into Butel Software -for those of you who have a RadioReference.com subscription- you will need this free software update.

Butel ARC Software for Uniden, GRE & RadioShack Scanners
For those of you who haven't tried the powerful and easy-to-use Butel software, now is a great time to do so! The software now contains the newly updated RadioReference.com web service interface for easy downloading of frequencies and trunking systems directly into the software for those with a RadioReference.com subscription. The software is available in different versions for just about every Uniden-Bearcat, GRE, RadioShack and AOR scanner ever made that contains a PC serial interface port. Program your scanner and also, for higher-end models, control your scanner, from the ARC program.

Scanning with software has never been more easy or more fun. Try our free demo download today or order your copy via instant download now. Just pick the model scanner you have, insure that you have a PC to scanner interface cable (or order one from us), and you're ready to go. Software is available for PC/Windows systems only. Prices range typically from $29.95 for Program only software to $69.95 for Program and Control with WAV file recording and activity logging (number of times a channel is active, time of day, frequency/PL/Talkgroup ID used, etc.) (Note that you can purchase a CD-ROM version of the software now but you will have to download an update of the software from our site as well as the currently stocked CDs do not include software to work with the new RadioReference web service.)

Did You Know?
We are seeing a lot of public safety agencies leaving their VHF and UHF systems for 800MHz trunking. I have found that it's more difficult to pick up these systems with a handheld scanner and the stock rubber-duck antenna because I'm always on the move and the signal will degrade at times when you're on-the-go. A simple fix to improving this reception problem is the 800 MHz 2.5dB Gain Professional Antenna. This rubber duck-like antenna is 9 inches in height and comes with BNC or SMA connections (BNC for older Unidens and for GRE/RadioShack and SMA for newer Unidens such as the BC346XT, BCD396T and XT and BR330). After testing this antenna I discovered a dramatic difference on 800MHz reception. Please keep in mind that this antenna is tuned to 800MHz, so it will not improve reception other bands. I found that the other bands received just as they did with the stock antenna, but you may find in your area that certain non-800MHz channels will degrade in reception. Still, if you monitor mostly 700/800, this is a great way to go.

800 MHz 2.5dB Gain Professional Antenna with SMA

Scanner MasterBased on reading a few RR Threads, No.

The posting was just a relay from Scanner Master who has a relationship with that one Vendor.

Personally, I still program by Hand.

Hello Bill & the group:

So does this mean that those that have subscriptions to the Radio Reference site for download to a other than Butel software program, will now have to purchase BuTel ARC software in order for the download to work?

Ken

383. RadioReference.com Web Service Change

To: <PSREdit@yahoogroups.com>
Subject: [PSREdit] RadioReference.com Web Service Change

I apologize for not having sent this earlier.

All of the PSREdit applications have full support for the "new"
RadioReference.com web service. Unless you are using a very old version
of one of these software programs, you should see no difference between
how the import worked before August 1st, and now.

PSREdit500 has supported the SOAP system since version 1.71 released
September 5th, 2008.

PSREdit300 has supported the SOAP system since version 1.15 released
August 21, 2008.

PSREdit100 has supported the SOAP system since version 1.05 released
September 6th, 2008.

Pro96Com has supported the SOAP system since version 1.7.1 released
September 5th, 2008.

Mike

Software updates may be downloaded from http://www.psredit.com

Topic: 392 Message: 393

Yes, Prov Fire has moved over to the 800 TRS
http://www.scannewengland.net/wiki/index.php/Rhode_Island_Digital_System

This is a Multi Frequency Trunked System, shared with Other Agencies.

Depending on your Make/Model of Radio, you may need to Program ALL the
channels [Voice and Control] or if you have a newer Control Channel Only
Radio you can put in the Control Channel for the Zone of preference.

Subject: Cash for Radio Clunkers:

Now is the time to upgrade your old radio.
In an effort to further revive the weak economy, the government announced that it started a new Cash for Radio Clunkers program on August 17th.

The program is aimed at members of the Amateur Radio Service, also known as ham radio operators. Operators with transceivers having less than
50dBc@10kHz of Phase Noise and/or with Noise Figures higher than 10dB
Will be eligible to trade in their old units (which must be crushed) for new transceivers and will receive a credit based upon the improved performance.

NF Improvements of 5 dB are eligible for $100 credit and
8dB or better are eligible for $200. Phase noise
improvements to better than 85dBc@10kHz will be eligible for an additional $100 plus 1000 contest points. Operators must be currently licensed and must show proof of purchase of the old transceiver, which must be in working order. Tube transceivers are deemed to be museum pieces and not eligible for this program. See your retailer for further details.

-----Original Message-----
From: SkyWarn Announcement List [mailto:SkyWarn-list@...]

Sent: Wednesday, August 26, 2009 8:06 AM
To: Skywarn-list@...
Subject: Special Announcement: Southern New England Weather Conference Saturday 10/24/09 Early-Bird Registration

Hello to all..

The Southern New England Weather Conference will be held on Saturday October 24th, 2009. Early-bird registration, which is at the lowest registration prices, is now available. Details on the weather conference can be seen at the following link:

http://www.sneweatherconf.org/

Early-Bird Registration has opened and will remain open through September 14th with a registration fee of $65 dollars and for those who come to the dinner, an additional $30 dollars for the optional dinner in the evening. Regular registration between September 15th through October 17th is $75 dollars with an additional $30 dollars for the optional dinner in the evening, and late registration between October 18th-25th of $85 dolalrs with an additonal $30 dollars for the optional dinner in the evening. It is noted that students and teachers are given a $10 dollar discount and their affiliation should be listed on the registration.

While this conference does have a cost associated with it, it is high value for the money with speakers coming from other parts of the country to give talks at the conference. The registration fee does include breakfast, lungh and snacks. Of note, Julio Ripoll-WD4R, Assistant Amateur Radio Coordinator for the National Hurricane Center Amateur Radio station WX4NHC will be giving a presentation on the 29-year history of their operations at the Hurricane Center and the role they play in National Huricane Center operations and is coming up from Miami Florida. Additional presentations of topics include:

The July 24, 2008 New Hampshire Tornado (Mish Michaels)
Hurricanes Affecting Atlantic Canada (Peter Boyer, Canadian Hurricane Center)
How Weather Affects Aviation
An Analysis of Waterspout Development in Southern New England

(NWS Forecasters)
Ice Storm 2008 (NWS forecasters, National Grid, US Dept. of Agriculture, Amateur Radio SKYWARN Coordinator)

After the optional dinner, Reed Timmer from the Discovery Channel's Storm Chaser program will be the after dinner speaker. He will discuss what he has seen and his experiences on the program.

This is one of the best Southern New England Weather Conference line-ups in the last couple of years. It is hoped that many can attend. This will be posted again via a SKYWARN Newsletter in the coming weeks.

Respectfully Submitted,

Robert Macedo (KD1CY)

400. Let us NEVER forget...

Yahoo group: Scan-RI
Date: 2009-09-11 09:58:42 UTC
From: Bill
Topic: 400 Message: 400

Eight years ago many of our lives changed forever. Not only those who paid the ultimate price of their lives and the love ones they left behind, there are those of us who worked for weeks to bring families closure. We were scared as well. War started that sunny morning in the nations largest city and is still being fought around the world. We must not forget, we must not loose. We must support our brave solders, airmen, sailors, marines and coast guard who keep us safe and fight this fascism which wants to destroy us.

In case you have forgotten here is the timeline of the cowardly attacks against our country.

08:46 Flight 11 – Flies into the World Trade Center North Tower

09:03 Flight 175 – Flies into the World Trade Center South Tower

09:37 Flight 77 - Flies into the Pentagon

10:03– The brave passengers of Flight 93 sacrifice themselves for others in a field at Shanksville, Pa

Again – WE WILL NEVER FORGET!!

Places to search for Frequencies would be

457-458 Mhz [Same as Cruise Ships]
406-420 Mhz
380-399 Mhz

They could be Conventional, Simplex, Motorola TRS or EDACS LTR

Subject: [NYCMaritime] Naval visitor to Narragansett Bay

Hi everyone:

The Navy's newest DDG, USS WAYNE E. MEYER DDG 108, arrived in Narragansett Bay today (September 26th) for a port call at Navsta Newport's Pier 2. She is stopping over while enroute to Philadelphia where she will be commissioned on October 10th 2009.

The pictures are located at the link below:

http://www.narragansettbayshipping.com/ships.cfm?loc=1&year=2009&month=9&day=26

Cheers.

Places to search for Frequencies would be

457-458 Mhz [Same as Cruise Ships]
406-420 Mhz
380-399 Mhz

They could be Conventional, Simplex, Motorola TRS or EDACS LTR

407. New Radio Shack Scanner Pro-107 "iScan"

Yahoo group: Scan-RI
Date: 2009-11-11 15:58:54 UTC
From: Bill
Topic: 407 Message: 407

Via the folks at CARMA

New Radio Shack scanner resembling an iPod apparently just came out; It's called the Pro-107 iScan. Not much info on the RS website:

http://www.radioshack.com/product/index.jsp?productId=3730721&tab=features

But here is a nice encapsulated story on it:

http://blog.big-dutch.com/?p=312

Coast Guard rescues two men from fishing boat

Fising vessel Patricia Jean is hard aground on the West break wall in Point Judith Harbor of Refuge Saturday, Nov. 21, 2009. (U.S. Coast Guard photo / Petty Officer 3rd Class Riley Harriman.)

BOSTON — A Coast Guard Station Point Judith, R.I. 47-foot motor life boat crew rescued two fishermen after their boat lost steering and went aground on the West break wall in Point Judith Harbor of Refuge Saturday at 4:35 a.m.

The men aboard fishing vessel Patricia Jean, a 65-foot fishing boat home ported in Point Judith, called 911 after their boat lost steering and went hard aground in 2-to-4 foot seas. The 911 operator called Station Point Judith, which launched the boat crew at 4:27 a.m.

The Coast Guard boat was unable to get close to the fishing vessel because of the rocks, so the fishermen put on survival suits and jumped into the water, which is 51 degrees Fahrenheit. The Coast Guard boat crew threw the men heaving lines, hauled them aboard, and brought them back to the station. The Patricia Jean sank, and the vessel's owner has contracted with Clean Harbors to contain any pollution.

An MH-60 Jayhawk helicopter from Coast Guard Air Station Cape Cod, Mass. flew over the vessel this morning, and noticed a light fuel sheen surrounding the vessel. Two Coast Guard pollution response petty officers based in Providence, R.I. are on scene to coordinate pollution containment.

The rescued men, who were heading out to sea on a fishing trip, are Daniel Conrad, the vessel's owner, and Robert Kenyon. Neither man suffered any injuries during the incident.

The Coast Guard is working closely with Conrad and commercial salvage to develop plans to extricate the boat from the rocks. Current on scene weather is 10-knot winds, with 1-to-2 foot seas.

"We couldn't get too close to the fishing boat because it was aground on rocks, so the fishermen had to abandon ship," said Petty Officer 2nd Class John Borzilleri from Station Point Judith. "Luckily the men had survival suits and were only in the cold water for about two minutes before we were able to haul them onto the Coast Guard boat."

>
> The Ottawa Sun
>
> November 21, 2009 Saturday
> FINAL EDITION
>
> Original eyes on the skies;
> Ottawa Airport Watch started 10 years ago as a collection of 'groupies'
> ... now they're a valuable layer of security
>
> BYLINE: BY JON WILLING
>
> SECTION: NEWS; Pg. 14
>
> LENGTH: 848 words
>
> A radio scanner attached to Nelson Plamondon's jacket crackles as he
> focuses his high-powered binoculars on a commercial plane landing at the
> Ottawa International Airport.
>
> It's one of his favourites, the Dash 8.
>
> "Really rugged," Plamondon says of the plane as it glides onto a runway a
> few hundred yards over a fence that separates the airfield from civilians.
>
> Like most members of Ottawa Airport Watch, Plamondon knows his air
> machines. The 63-year-old former military police officer was in the air
> force and worked as a customs agent, often investigating incidents
> involving aircraft.
>
> "I've been around aircraft all my life and when I heard about the airport
> watch many years ago, I immediately got involved as a member," he says.
>
> They are, as Plamondon describes, aircraft "groupies."
>
> In 1999, Ottawa Airport Watch was one of a kind. Here was a group of
> aviation nuts, their eyes glued to the runways, and police didn't know

> they had an auxiliary unit right under their noses. An Ottawa Mountie
> working in a national security branch realized the potential.
>
> ON ALERT
>
> A decade later, airport watch chapters have popped up around the world.
> They all have their roots on a 6-km stretch of road behind the Ottawa
> airport.
>
> Alert Rd. is one of the prime watching spots for the 40-member Ottawa
> Airport Watch volunteer organization. You know when members are there by
> the large magnetic signs on their cars. They wear matching windbreakers
> and red golf shirts. And if you're causing a problem, maybe you'll meet
> them face-to-face.
>
> "It's a community service we perform, not unlike the neighbourhood watch.
> In this case, of course, the neighbourhood is the airport," Plamondon
> says.
>
> Plamondon, chairman of the local chapter for about three years, puts in
> about 1,200 hours a year watching the airfield. The front of his SUV is
> set up like a mini-cockpit. He carries a power supply for his laptop,
> which he uses to track arrivals, departures and aircraft registrations.
> Two scanners help him monitor the chatter between pilots and the air
> traffic tower.
>
> When he's not watching the planes, Plamandon is eyeing the airfield or the
> perimeter.
>
> The group's motto: Observe, record, report.
>
> "Having spent so much time out here, we very much know what's normal in
> the operation of this particular airport," Plamondon explains.
>
> "Anything we see that is out of the ordinary or possibly something we see
> that may not be right about a particular aircraft when it's taxiing or
> landing, we immediately, in fact are obligated, to contact the security
> operations centre and report that information."
>
> The group hasn't unmasked any bombshell security threats, but members have
> reported cut locks, opened gates and even a large woodpecker hole that
> could have toppled a transformer pole.
>
> "Our eyes are always open," Plamondon says.
>
> RCMP Cpl. Jacques Brunelle, who in 1999 was a plainclothes officer with
> the national security division at the airport, came up with the idea of
> starting an official watch program when he noticed more and more people
> parking along the airport fence to watch planes touch down. The dashboards
> were covered in newspapers and books. Brunelle would ride around the

> property in the morning, and these strangers would still be there later in
> the day.
>
> Instead of shooing them from their perches, Brunelle harnessed their
> potential as another layer of airport security. The members were
> deputized, per se, as volunteer airport watchers, although they have no
> powers beyond those of a regular citizen.
>
> "What draws these volunteers is their love for aviation, and it gives them
> a reason to justify their hobby of sitting out at the airport," Brunelle
> says.
>
> Seeing how useful watchers were to law enforcement, Brunelle started
> expanding the organization to other Canadian airports.
>
> In 2000, the watch became an RCMP "best practice" for airport policing.
>
> Today, there are roughly 400 members of airport watch chapters across
> Canada and Brunelle, as the national co-ordinator, is trying to expand the
> program internationally. He's working with people in the U.S., United
> Kingdom and Australia.
>
> HIS SECOND HOME
>
> Members, who all require police background checks, take tremendous pride
> in their volunteer responsibilities.
>
> For some, it is a great way to combine all their hobbies into one
> organization.
>
> Retired military airframe technician John Davies, 62, has been a member of
> Ottawa Airport Watch for nine years. The outside perimeter of the Ottawa
> airport is somewhat of a second home for Davies, an avid photographer who
> has snapped thousands of pictures of planes.
>
> "To me, it's something to do. It's relaxing. I come out here and read a
> book instead of staying at home and reading a book," Davies says. "I have
> my camera and I listen, and if there's an airplane I haven't seen before,
> I'll get out and take a picture of it."
>
> Even with the airport abuzz in recent months with visits from the U.S.
> president and the Royals, Davies says the real star attractions are the
> hulking beasts carrying them to the nation's capital.
>
> "I'm interested in taking pictures of the plane, not the people coming off
> of it."

1-800-SCANNER
Black Friday - Cyber Monday
Super Pricing on Scanners!

Great Gifts Now on Sale!

Hello William,
Take advantage of very special pricing on selected models of scanners now through Monday 11/30.

GRE PSR-500- Save $50.00!
GRE's powerhouse portable scanner has an amazing digital voice decoding capability, great audio and loads of features and memory. Menu-driven operation. This is the best price we've ever had for a digital scanner!
$398.00

GRE PSR-600-Save $29.00!
A super advanced base/mobile digital police scanner. Superior digital voice decoding quality. Huge memory and many unique features.
$419.00

Uniden BCD396XT - Save $10.00!
Top of the line trunked digital scanner workhorse that's slim but powerful, packed with incredible features. Now with improved APCO-25 digital decoding, Close Call DND, Fire Tone out, GPS and more.
$485.00

Uniden BCD996XT-Save $10.00!
An ultimate trunking APCO-25 digital base/mobile police scanner. This scanner does it all including Close Call, GPS control and much more.
$485.00

Uniden BCT15X- Save $10.95!
One of our most popular radios, the 15X is a great (non-digital) trunking scanner that can be used as a base or mobile. Includes loads of terrific features including GPS operation. Contains pre-programmed Highway Patrol frequencies and non-digital trunking.
$209.00

Uniden BC340CRS- Save $10.95
A basic desktop scanner for areas with conventional radio systems. Great for the night table or family room. It's also an AM-FM/clock radio!
$79.00

GRE PSR-200-Save $14.95!
Entry level, simple to use, non-trunking and non-digital 200 channel desktop police scanner with 10 channel storage banks and one-touch weather, Ham radio and aviation service searches. A good starter scanner for areas without trunking or digital.

$85.00

GRE PSR-100- Save $14.95!
Entry level, simple to use, non-trunking and non-digital 200 channel handheld police scanner with 10 channel storage banks and one-touch weather, Ham radio and aviation service searches. A good starter scanner for areas without trunking or digital.
$85.00

Uniden BC95XLT- Save 10.95!
Tiny portable scanner covers all the major bands but lacks trunking and digital. No alpha display. Great as a Close Call radio for around town use or at the race track with 200 channels.
$99.00

GRE PSR-400-Save $10.95!
1000 channel analog trunking base/mobile police scanner packed with great features. Great for the home or car in non digital areas.
$139.00

GRE PSR-300- Save $10.95!
A fine all around trunking (non digital) handheld scanner with loads of great features. Easy to program for a trunking scanner. Includes alpha text display capability that is PC programmable with software.
$139.00

Uniden BC346XT - Save $9.95!
A non-digital trunking scanner with abundant memory, text-tags, Close Call, a great display and many more features. Compact design fits in your shirt pocket. An amazing feature set for such a small scanner.
$205.00

Take advantage of this very special pricing on selected models of scanners now through Cyber Monday, November 30th.

We're not waiting for Black Friday. We're offering these amazing prices starting today .

Scanner Accessories and HomeTown Programming are also available for these models.

While supplies last.

Did You Know?

By Jonathan Higgins - The Scanner Expert

It's that time of the year again finding the right gift for that special loved one. How about a scanner? Here are 5 things you should keep in mind when buying a scanner.

1. What type of scanners is needed for their area? Please visit our sister website PoliceScanners.net to find the right scanner.

2. Deciding Base/Mobile Vs Hand Held - Base/Mobile Scanner are normally kept one location. Hand Held Scanner is great for someone that wants the scanner everywhere they go.

3. Scanner Programming options - Software or HomeTown Programming. If they are not computer savvy HomeTown Programming is the best option. HomeTown Programming means the scanner will be ready to go out of the box! HomeTown Programming takes 7 to 14 business days, so get your order in early!

4. Accessories…
Make sure they have everything they need to when they get there new scanner! Carry Case, Computer Cable, Software, and so on. With each scanner on our website you can make your own package.

5. Make sure you select the best shipping option, visiting our Holiday Shipping Schedule.
Police Scanner Museum

Scanner Master is in the very first stages of organizing the nation's first police scanner museum. We have many models dating back 40 years that will be on display. Very soon our museum will be open to the public during our normal business hours. Reminder, we recently moved our Natick office to Holliston, MA. Now open weekdays 9-5. No appointment necessary. Our new mailing address is 260 Hopping Brook Road, Holliston, MA 01746 and our phone number remains 1-800-SCANNER.

Secure, Safe Ordering!

Same Day Shipping!*
Gift Wrapping Available.

Does any know which dept is assigned tg 1870 on the north system?

Receiving some ops today on that group.

Thanks
Ken

From: Bill
Topic: 415 Message: 415

Amateur Radio Emergency Communications Workshop Saturday 1/23/10 in Middleboro, Massachusetts..

http://ares.ema.arrl.org/node/478

There will be an Emergency Communications Workshop on Saturday January 23rd, 2010 from 9:00 AM-4:00 PM at the Eastern Bank Building (3rd Floor) on 1 South Main Street in Middleboro Massachusetts. This session is being put on by the ARES Section Staff through the efforts of South Shore Massachusetts ARES District Emergency Coordinator Phil McNamara, N1XTB, and Eastern Massachusetts ARES Assistant Section Emergency Coordinator, Carl Aveni, N1FY. This Emergency Communications Workshop will provide the background and information to serve Amateur Radio Operators when they need to respond to a communications emergency or when supplemental communications via Amateur Radio is required. It will feature an Introduction and Conclusion to Emergency Communications, and five 1-hour training sessions on topics including:

Overview of Eastern Massachusetts ARES-RACES-SKYWARN Programs
Net Operations
NTS Traffic Message Handling
Basic Overview of ICS
Go Kits

This training will also feature a 1-hour lunch that will be provided at no coerced cost to any Amateur who attends the session. The presentations will be given by other Amateur Operators well versed in the topics listed above. The training will be a worthwhile endeavor not just for emergency communicators but for anyone who is an Amateur Radio Operator, and wants to learn more about the hobby. Preregistration is required as the location has limited seating of up to approximately 30 people. Please try to preregister by Monday January 18th, 2010 to assure the meeting place is setup properly and we have enough refreshments for breaks between lectures and for the lunch break. We will, however, accept any last minute preregistrations after that day or any walk-ins as long as space permits.

Directions to Eastern Bank in Middleoro Massachusetts:
http://maps.google.com/maps?hl=en&source=hp&um=1&ie=UTF-8&q=eastern+bank+middleboro,+mass&fb=1&gl=us&hq=eastern+bank&hnear=middleboro,+mass&ei=klVAS8bbFM-plAfitrnXBQ&sa=X&oi=local_group&ct=image&resnum=1&ved=0CBAQtgMwAA

Talk-In will be on the 147.180-Bridgewater Repeater PL: 67.0 Hz.

For any additional information and to preregister for the workshop, please contact:

N1XTB-Phil McNamara N1XTB at powersrvcs.com
N1FY-Carl Aveni caave at peoplepc.com
KD1CY-Rob Macedo rmacedo at rcn.com

This training should be a worthwhile endeavor for anyone interested in learning more about emergency communications and amateur radio in general. Please forward this on to anyone you feel may benefit from this workshop.

419. HHAN Alert (Extreme): Child Abduction Emergency

Yahoo group: Scan-RI
Date: 2010-02-18 20:42:37 UTC
From: Dunn-CHS, William (CHS)
Topic: 419 Message: 419

Since this happened at a border town, I am passing along to the Rhode Island List.

The following is an alert message from the Massachusetts Health and Homeland Alert Network:

Title: Child Abduction Emergency
Group: MEMA
Time Sent: 2010-02-18 15:16:43
Severity: Extreme
Sensitivity: This message does not contain sensitive information.

Alert Identifier: TORKXLXG1A4N92942MSJSC0XGJL17Z4A

Alert Message:
The Massachusetts State Police are currently assisting the Swansea Police Department in investigating the alleged abduction of a one-year old girl shortly before 1 P M. We are, however, providing a description of a person and a motor vehicle potentially involved in the alleged abduction. The car is a silver Ford Focus, possibly bearing unknown Minnesota license plate. In the car may be a white female with brown hair and brown eyes, approximately 5 foot 6 and 140 pounds. The child may be wearing a pink coat with a white hooded sweatshirt and jeans. Anyone who sees this vehicle or these people is urged to call 9 1 1 or the Massachusetts State Police at 508 820 2121.

This message was was sent by the Massachusetts Emergency Management Agency

421. East Providence Police 10 Codes

Yahoo group: Scan-RI
Date: 2010-02-27 00:33:49 UTC
From: jaytee607
Topic: 421 Message: 421

Hi,
Does anyone have the 10 code list that East Providence uses ?
I can't find their variation anywhere ! Example, they use a 10-14
as an illegally parked/disabled vehicle. Every other 10 code I've
seen for 10-14 is "Prowler Alert ". It would be much appreciated
if anyone has it to share ! Thanks in advance....

423. Heavy Rains, Flooding - a repost of info

Yahoo group: Scan-RI
Date: 2010-03-30 16:16:53 UTC
From: ecps92
Topic: 247 Message: 423

With the talk about the heavy rains and flooding anticipated for this weekend I started to do some research on the Army Corps Of Engineers who control numberous dams and locks throuout New England. http://www.nae.usace.army.mil/

I've found the following freqs., mostly through the Scanner Master pocket guide and the big book 6th edition and past Scan-Mass-East mailings.

F-1 168.3250 (110.9) Reservior Conrol, MT. Wachusetts repeater
F-2 168.1250 (110.9) Bourne Railroad Bridge, Mt. Kearsage, NH and Ivy Mountain, Ct
F-3 167.9250 (110.9) Okemo Mountain, VT and Meetinghouse Hill, Ct
F-? 163.4125 (173.8) Cape Cod Canal Operations
Link Freqs of 148.6, 148.75, 148.925, 149.825
Microwave links of 1720.0, 1765.0, 1795.0, 1840.0

Some of the Links, may actually be Local Repeaters in CT, RI, NH or VT that are linked to the 168 Rptrs. I would recommend searching the 162-174 , and 148-150.700 Range.
Nothing has been reported in the past for the 138-143 band, but if anyone wants to try.

Condition reports
Item 1 - Time of observation
Item 2 - Precipitation in the last 24 hours
Item 3 - Form of percipitaion
Item 4 - Present weather conditions
Item 5 - Pool stage depth
Item 6 - Tendency of water level (raising, falling or steady)
Item 7 - Flood gate openings
Item 8 - Tailwater guage
Item 9 - Water Overflow in cubic feet/second (CFS)

You will hear some of the Dams reporting in the AM on 168.325, with Reservior Control (Watham, MA) taking reports from a few different sites

Does the US-ACE control the Hurricane Barriers in New Bedford / Fall River or are those now local control. Stamford CT is still USACE Any Frequencies ??

Anything to add?

425. VHF Marine Automated Radio Check System

Yahoo group: Scan-RI
Date: 2010-04-05 19:12:35 UTC
From: Bill
Topic: 425 Message: 425

FYI, apparently Boston has gone on-line with VHF Ch.27

Anyone else in New England, take a listen to the old VHF Marine Operator channels and post back.

http://www.ecaptain.com/node/5201

North Kingston, R.I., Jan. 11, 2010 – Sea Tow Rhode Island is pleased to announce a first of its kind public service for the safety of boaters in Rhode Island. Boaters will be able to conduct 24/7 automated radio checks on VHF channel 24 by the end of January 2010. The service does not require the response of other boaters or watch-standers in order to work, nor does it require special equipment. This free service is available through Sea Tow's ongoing partnership with MariTEL.
To conduct an automated radio check, turn a VHF radio to channel 24, key the mike, and ask for a radio check; just as you would on channel 09. What's new is the system will respond with an automated reply and replay your original radio transmission, letting you know exactly how well your radio is working.

"Typically, radio checks should be conducted on VHF channel 09," said Capt. Kevin Scott, owner of Sea Tow Rhode Island. "Due to lack of response, however, many boaters do them on channel 16 – the hailing and distress channel – which leads to friendly reminders from the Coast Guard that the checks are improper use of the channel. By offering the automated radio check service, we hope to help reduce unnecessary traffic on VHF 16 and encourage safe boating in Rhode Island."

The antenna hosting this service is located at Sea Tow Rhode Island's main office along the mouth of Allen Harbor in Narragansett Bay, R.I. This service is fully functional as of this press release

426. Road Trip and Meet n' Greet

Yahoo group: Scan-RI
Date: 2010-04-23 11:50:09 UTC
From: Scan-RI-owner@yahoogroups.com
Topic: 426 Message: 426

Well, it's time to do some Scanning from nice High Locations and New England is a Great Place to beging.

I [and others are WELCOME !] plan on Scanning from Mt Equinox, VT on Saturday June 12th from ?? till Close.

Show up for a little, show up for a lot.

All are welcome to join and it should be a good time to put the faces to the Images [Ascii characters] and meet some of the Scanning World Characters we have interacted with over the years.

See what others use for Mobile / Portable equipment and learn some tricks etc.

Fires/Cookouts are not allowed, but bring Drinks and Subs/Sandwiches. It's been 10 yrs since I have been up Equinox, so I don't know what is up there for facilities/tables etc

PS, for those who wonder [Significant Others are welcome to attend]
My Girlfriend is my Note Taker, while driving, it helps !!

You will see this message posted other places as well, and if I forgot a list or board, pass it along and I look forward to seeing folks on the 12th.

434. ANSI APPROVES CHANNEL NAMING STANDARD

Yahoo group: Scan-RI
Date: 2010-06-17 22:24:01 UTC
From: Bill
Topic: 434 Message: 434
Attachments: 1 described; binary payloads are missing from this source WARC

National Public Safety Telecommunications Council

Press Release

June 17, 2010

ANSI APPROVES CHANNEL NAMING STANDARD

The Association of Public-Safety Communications Officials (APCO) International and the National Public Safety Telecommunications Council (NPSTC) today announced the approval of the American National Standard (ANS) to ensure national consistency of interoperability on related radio channels. APCO/NPSTC ANS 1.104.1-2010: Nomenclature for the Public Safety Interoperability Channels was approved by the American National Standards Institute (ANSI) on June 9 and provides a standardized naming format for each Federal Communications Commission (FCC) and National Telecommunications and Information and Administration (NTIA) designated Interoperability Channel in the Public Safety and Federal government Radio Services.

The standard can be downloaded at:
http://www.apcointl.com/new/commcenter911/documents/APCO-NPSTC-ANS1-104-1web.pdf

"The public safety community uses spectrum allocated by the FCC and NTIA in multiple bands that is replete with interoperability channels," APCO International Executive Director George Rice said. "It is necessary to develop and employ a common set of channel names so that all responders to an incident know which channel to tune their radios to, as well as the band and primary use for the channel."

NPSTC Chair Ralph A. Haller said that he was pleased to see such a positive step forward in interoperability saying, "Common interoperability channel names will help to assure that any organization responding to an emergency will be able to establish contact immediately when arriving on scene. Although the specific channel names were initially controversial, the new standard represents the collective efforts of public safety agencies across the country to reach consensus. NPSTC is pleased to have been instrumental in this process."

The issue of common channel naming has been on the forefront since the mid-1980s and was again highlighted during the terrorist attacks on September 11, 2001 and Hurricane Katrina. In 2006, NPSTC reviewed and updated the Standard Channel Nomenclature recommended in the 700 MHz National Coordination Committee's Final Report. This new protocol has been widely adopted across the country in the intervening period, and requests to the federal government resulted in finalizing standard names for similar channels in federal agency spectrum earlier this year.

APCO International is a recognized ANSI-accredited Standards Developer for public safety communications standards and was selected to facilitate the most recent version of the Standard Channel Nomenclature document through the ANSI standardization process, moving one step closer to completion of National Emergency Communications Plan milestone 3.1.33.

About APCO International
The Association of Public-Safety Communications Officials (APCO) International is the world's oldest and largest professional organization dedicated to the enhancement of public safety communications. APCO International serves the professional needs of its 15,000 members worldwide by creating a platform for setting professional standards, addressing professional issues and providing education, products and services for people who manage, operate, maintain and supply the communications systems used by police, fire and emergency medical dispatch agencies throughout the world. For more information, visit www.apcointl.org.

About NPSTC
NPSTC is a federation of organizations whose mission is to improve public safety communications and interoperability through collaborative leadership. To learn more about NPSTC, visit www.npstc.org

NPSTC is a federation of organizations whose mission is to improve public safety communications and interoperability through collaborative leadership.

From: Bill
Topic: 433 Message: 438

Could be, but I would venture not, maybe a RISCON Radio in Dispatch for Interop.

Time to get some more folks SEARCH'n the Federal Bands and figure out this Mystery.

138-144 / 148-150.775 / 406-420 and maybe even a TRS in the 380-400 Band ?

The HUNT is on.

Bill,
Now that I think of it they would have to supply the gate guards and the cruiers with the radios and that would be a lot. The other channel I had was 142.50. The last time I heard a transmission on 143 was Monday.

Technical difficulties have cropped up and comms are simplex only on the PD side of the house. The FD side is operating normally.

Not sure. I don't monitor them. I know they are using a P25 repeater. Don't have the frequencies though.

I would have to agree. In fact I just checked to see if I didn't accidentally lock them out of the scan list. But I didn't and have not heard them for awhile either, now that you mention it. The freq for the person asking is 143.125 with a 293 NAC.

Date: 2010-06-29 13:59:59 UTC
From: Scan-RI-owner@yahoogroups.com
Topic: 442 Message: 444

Maybe it's time to get some more RESEARCH on the Base Frequencies.

I had [missing info]

143.1250 R $293 as the base Security Police
never caught the input. [thoughts?]
142.5000 S ??? was reported as PD Tac/Talk-around

149.2875 R 156.7 as the base Fire/EMS
never caught the input. [thoughts?]
148.8125 S 151.4 was rumored to be the Fire - Fireground

Reports were the Ambulance/Hospital 138.6250 merged with the Fire

Usually a base has a Maint NET / Hospital Net aka Disaster NET / Commanders NET, none have been reported.

445. Re: Newport Naval Base

Yahoo group: Scan-RI
Date: 2010-07-01 23:32:01 UTC
From: wmgeorge5280
Topic: 442 Message: 445

PD are P25 on conventional frequency with the repeater DEAD! Dispatcher radio is the only radio that can hear everyone, the cars can't hear each other. Talk around only works from car to car when they can see each other.

The Fire frequencies listed below are correct with CH2 Fireground not going thru the repeater. The old Ambulance/Hospital freq is not used as the FD does all the EMS runs. The repeaters are located in NUWC and although new lines were run during the move to the new bldg by Gate 11, the radio system leaves a lot to be desired.

447. Civil Air Patrol Aircraft Flying

Yahoo group: Scan-RI
Date: 2010-07-20 00:32:21 UTC
From: ~Bill
Topic: 447 Message: 447
Attachments: 1 described; binary payloads are missing from this source WARC

There has been some [off line] requests for CAP info, from Scannists for Southeastern Mass and Rhode Island.

Reminder - post, this is your list, don't be shy about asking questions. If you thought of it, others have as well.
Lets Learn Together.

We have been quite fortunate here in New England with many dedicated Scannists who reported on the NEW
Civil Air Patrol radio network as it got created.

http://www.scannewengland.net/wiki/index.php/New_England_Civil_Air_Patrol

Folks can monitor CAP on the VHF Air channels, but also
New Narrowband Basic Channel Plan Frequency Tone Channel/Name Notes
141.5750 S 127.3 / NAC 4F9 CC 1 Command & Control 1
141.0000 S 131.8 / NAC 526 CC 2 Command & Control 2
149.2750 S 141.3 / NAC 585 Air 1 Air-Ground 1
150.5625 S 151.4 / NAC 5EA Air 2 Air Ops 2
150.2250 S 162.2 / NAC 656 CAPGUARD
Guard 1 Initial Contacts then switch to a working Channel
139.8750 S 173.8 / NAC 6CA Tac 1 Tactical 1

Cap Airplanes have been monitored working with the Military during intercept trainings and many of these occur on weekdays, not just the weekends where an FTX is usually held.

Please post what you hear, back to the list, to include Tail #'s or CapFlight info, if you hear anything over the next few months. Even the VHF Air channels :)

Summer time is a busy season, also the USCG Aux does some Homeland Patrols or the CG and can be heard on the VHF Air as well as the USCG VHF Channels.

Happy listening and remember, it's SUMMER, make sure your Antenna systems are Grounded !

How big is the base? They shouldn't have any trouble mobile to mobile especially on VHF.

Topic: 442 Message: 451

Low power VHF with a number of dead zones due to geography such as FT Adams in Newport, Melleville in Portsmouth and Green Lane in Middletown as well as man made obstacles to the radios from Bldgs and such. System infrastructure also hinders peak performance, such as CEB connected to repeater at remote location via twisted pair phone lines. Fiber was laid but is still dark. Since the change to the new system there is no longer any interoperability with local PDs which old system had. Navys answer was to give the OIC an RISCON capable portable.

Thankfully the Fire side of the bldg hasn't been affected by the changes. When new fire radios came on-line, interoperabilty was a must have due to MOUs with outside FDs as well as area coverage. Ch2 has some minor issues but main channel provides basewide coverage. FD Dispatcher even has frequency patch capabilities.

CEB as in Centracom CEB? That should have been local to the console, as in, in the same building, if there were only a few channels to control. Sounds like a poorly thought out and implemented system. Someone should be getting their butt kicked.

Well, this is a Hobbyist list, not an LMR Professional list, altho we have many out there [who are in the LMR world as well as Public Safety Professionals] who SHARE the knowledge. Our comments might be based on a LACK OF KNOWLEDGE, not Ignorance.

Information CAN and does get shared [back-door, behind the scenes] as has already been offered to you by others on the list [yes many of us talk-offline]

There is no need to come-off with the I KNOW but CAN'T/WON'T tell responses

Much of the information found on-line [Here, ScanNewEngland, RadioReference] as well as in Print [Scannermaster, and the former Police Call and Official Scanner Guides] was FOUND by Scannists who spent the time to SEARCH / RESEARCH and LEARN. Much of it is quite accurate, yet we always have someone who says different.

We now return to SCANNING and SEARCHING for new Frequencies / Tones / Users etc......

Hey folks start sharing [and if you can't, pass it along to the list-moderators, who can strip your ID and repost selectively] Nothing is that secretive [not even RISCON or Federal Agencies] If it transmits, it WILL be found.

OK we all got our feathers ruffled a bit (including myself). I agree that there should be no personal attacks. My last post verged on just that and I was wrong. I want to appologize to any and all whom I may have offended. Keep up the good work & Best Regards to all.

From: ecps92
Topic: 458 Message: 458

Anyone know who/what is using 162.1125 151.4 Hz in Rhode Island ??

Caught this on the way back from New London on Sunday, but not enough traffic to determine who the user is.

http://www.scannewengland.net/wiki/index.php/Movie_Productions

Just got word of some filming in the Cranston area, the above link can provide some previously found filming channels and/or give you an idea where to SEARCH for frequencies.

463. State Police Move into New Headquarters Facility

Yahoo group: Scan-RI
Date: 2010-08-25 19:05:27 UTC
From: ecps92
Topic: 463 Message: 463

On Tuesday, July 27, 2010, State Police personnel assigned to the Investigative Support Services Building (ISSB), located on the Headquarters Complex in North Scituate, will have completed their move out of the ISSB and into the new Headquarters Building located on the same complex. This move was necessary to allow for the razing of the ISSB and subsequent construction of the plaza area in front of the new Headquarters Complex.

The new Headquarters Building is fully functional and accessible to those who need to respond to the facility for business with the State Police. In order to make the transition complete, the Division shall move all telephone, computer, and police radio operating systems into the new facility, which may result in a temporary outage or service disruption to any or all of those systems for a brief period of time. If this occurs, the Division's contingency plan directs all Headquarters communications responsibilities to the Rhode Island State Police Lincoln Woods Barracks at (401) 444-1100, 444-1101 or 444-1102, should a temporary outage occur in one of the systems listed above.

The official Grand Opening of the new Headquarters complex in tentatively scheduled to be held on Friday, October 15, 2010. Additional information regarding the Grand Opening will be released as this date draws near.

Thank you for your understanding and cooperation during this transition as the Rhode Island State Police works towards its ultimate goal of improving its efficiency and quality of service to all Rhode Island citizens and visitors.

464. Hurricane Earl Coordination Message

Subject: U.S. Coast Guard Station Block Island to close for winter season

DATE: September 7, 2010 10:44:42 AM PDT
U.S. Coast Guard Station Block Island to close for winter season
BLOCK ISLAND, R.I. — U.S. Coast Guard Station Block Island will officially conduct the annual seasonal closure for the summer boating season on Tuesday, September 7th 2010.

During the winter, Block Island closes due to reduced marine traffic and transfers its response capabilities back to the parent command at Station Point Judith, Rhode Island. Point Judith is located 12 nautical miles north of Block Island and provides search and rescue assets to Rhode Island Sound, Block Island Sound and waters offshore up to 50 miles south of Rhode Island.

Mariners within Block Island Sound are reminded to report all marine emergencies to the Command Center at Coast Guard Sector Southeastern New England using VHF-FM radio channel 16 or by calling (508) 457-3211.

It will reopen on Memorial Day weekend 2011.

For more information on this release, please contact 1st District Coast Guard Public Affairs at (617) 223-8515.

scannermaster.com Uniden HomePatrol
A Revolution in
Scanner Technology!

The Amazing Uniden HomePatrol Now Available!
Hello William,

What's so amazing about HomePatrol? It's hard to know where to start. First we should note that Uniden doesn't even call this product a scanner. It's simply HomePatrol. One reason for this is that unlike so many scanners, particularly those of recent vintage, HomePatrol is so easy to operate that anyone can use it. You don't have to know a thing about scanners. All you need to do is enter your zip code (or a city name) and the device will auto load the APCO-25 digital and analog frequencies, trunking systems, alpha tags and sub-audible tones for that area.

HomePatrol includes the RadioReference.com U.S. and Canadian databases of radio systems. If you travel with HomePatrol, with a special GPS receiver (available from Scanner Master), the radio will automatically re-tune itself based on its location (so long as GPS coordinates for the various systems have been entered into the RadioReference databases which in very many cases they are.) This means no more programming!

What we particularly love about the radio is its ability to hierarchically tune. You can now tell the radio with a click or two: I want to monitor all the agencies in County X, or I want to monitor all the agencies in City Y in County X, or I just want to monitor fire in City Y. You can go further and scan say Police and EMS only within any group of counties. This allows tremendous monitoring flexibility and with the beautiful full color display it's a pleasure to use.

There are so many other highlights it's impossible to cover them all in an e-mail but a quick list:

a.. An absolutely astonishing receiver. Hear more with this radio than ever before!
b.. TrunkTracker IV with fantastic APCO-25 digital operation
c.. Rechargeable batteries included
d.. Mounting bracket included
e.. A true USB cable included
f.. Simple database and firmware upgrade capability
g.. Programming software included to customize what you scan
h.. Create Favorites Lists
i.. Record/Replay capability built-in
HomePatrol is really a fantastic choice when traveling when you don't have the time to

pre-program a scanner for your visit.

To read more about HomePatrol, see product videos and to order click here.

Scanner Master offers accessories for HomePatrol as well. See the ordering page for details.

Subject: Media invited as Coast Guard Cutter Juniper arrives in Newport after Deepwater Horizon Deployment

DATE: October 23, 2010 10:29:01 AM EDT
Media invited as Coast Guard Cutter Juniper arrives in Newport after Deepwater Horizon Deployment
BOSTON – Media is invited to Naval Station Newport, R.I. as Coast Guard Cutter Juniper returns to home port after a 143 day deployment to the Gulf Coast where the 225-foot sea going buoy tender conducted oil spill response and clean up operations.

Who: The crew of Coast Guard Cutter Juniper

When: Sunday, Oct. 24, 10 a.m.

Where: Navy Station Newport, R.I., Gate 1

Training Station Road

Newport, R.I. 02841

What: The cutter and crew is returning from a deployment that began June 2. The 45 member crew spent 1,064 hours operating off the Alabama and Florida coasts skimming oil from the Deepwater Horizon oil spill. The cutter recovered 145, 600 gallons of oil. Families of the crew will be waiting for the cutter at the dock and some members of the crew will be available for short interviews.

Media interested in attending must R.S.V.P. to 1-617-406-9011 by 4 p.m. Sat., Oct. 23 so arrangements can be made for them to access the pier.

I can confirm that yes they are on the state 800 system full time. But they still have the VHF system available if needed. They also have the ability to patch them together if needed.

RISP had their VHF equipment removed but I believe the infrastructure remains. They still have the old equipment so they can fire up portables, but should the system collapse, and it will, they have the only option and that is to go to ITAC. Keep those frequencies in your scanner. But remember, it was said this purchased with YOUR tax dollars for interoperability. It was take back control you thought you had.

scannermaster.com Black Friday through
Cyber Monday
Specials START NOW!

Great Specials Good Now Through Cyber Monday!
Hello ,

See below for great savings on scanners, accessories & software now through Monday, November 29th. It's a terrific time to buy something for yourself or as a gift. And, with Scanner Master's programming and gift wrapping services, you can order a scanner for a loved one ready to enjoy right out of the box for their hometown.

Scanner Accessories, Antennas & Software
Save 10% on most scanner accessories, antennas & software. Save even more on many antennas and accessories when you buy them as part of a package with a new scanner!
Uniden HomePatrol - Save $10.00
Save $10 off our regularly low price. Now only $485. Also save 25% off our setup and optimize option - Now only $29.95. $485.00

GRE PSR-500 - Save $35.00!
GRE's powerhouse portable scanner has an amazing digital voice decoding capability, great audio and loads of features and memory. Menu-driven operation. These radios include the USB programming cable and other accessories not found with other brands. $363.00

GRE PSR-600 - Save $35.00!
A super advanced base/mobile digital police scanner. Superior digital voice decoding quality. Huge memory and many unique features. $363.00

Uniden BCD396XT - Save $16.00!
Top of the line trunked digital scanner workhorse that's slim but powerful, packed with incredible features. Now with improved APCO-25 digital decoding, Close Call DND, Fire Tone out, GPS and more. Now only $479 through Cyber Monday! $479.00

Uniden BCD996XT - Save $16.00!
An ultimate trunking APCO-25 digital base/mobile police scanner. This scanner does it all including Close Call, GPS control and much more. $479.00

GRE PSR-400 - Save nearly 20% off
1000 channel analog trunking base/mobile police scanner packed with great features. Great for the home or car in non digital areas. These radios use standard bank/channel programming and are extremely easy to setup and operate. These won't last long! $145.00

Our most popular scanners are on sale now!
All other Uniden and GRE Scanners:
Take $10 Off Now through November 29th

Free Shipping in December

For the Month of December we have Free Ground Shipping to the Continental U.S.

Did You Know?

By Jonathan Higgins - The Scanner Expert

It's that time of the year again finding the right gift for that special loved one. How about a scanner? Here are 5 things you should keep in mind when buying a scanner.

1. What type of scanner is needed for the area in which the person lives? Please visit our sister website PoliceScanners.net to find the right scanner or give us a call at 1-800-SCANNER. You can also buy a HomePatrol (for digital and analog radio systems) or a GRE PSR-700 (for non-digital areas only). Both scanners are pre-programmed for the nation although we still recommend our Set-up and Optimize service. See these radios on our web site for details.

2. Deciding Base/mobile vs Hand held - Base/Mobile Scanners are normally kept in one location, either in the car or home. Desktop scanners are for home or office use only. Hand Held Scanners are great for someone that wants to use the scanner everywhere they go (out and about or from room to room in the home, etc.).

3. Scanner programming options - We strongly recommend our software or our HomeTown Programming option when you buy a scanner. (For the HomePatrol and PSR-700 it's called "Set-Up and Optimize"). With these services the scanner will be ready to use right out of the box! Programming typically takes 5 to 10 business days and possibly more as it gets closer to the holdays.

4. Accessories - Make sure they have everything they might need or want when they receive their new scanner! A carry case, computer cable, software, mobile antenna and so on. With each scanner on our website you can make your own pac kage and when you buy accessories with the scanner there are added discounts.

5. If you're close to Holliston, Massachusetts, please stop in to our offices to make your purchase!
Secure, Safe Ordering

Same Day Shipping!* --- Gift Wrapping Available.

Be sure to visit our sister sites:

ONLINE
scannermaster.com CATALOG
Catalog/Emails PHONE
1-800-Scanner IN STORE
Holliston, MA

We appreciate your acceptance of these periodic special announcements, however if you would like to halt the delivery of the contained scanner information please visit this page

* Same day shipping applies to business days only, before 3:00pm EST.
Programming is 5-10 business days additional ship time.

Larceny of police radio becomes part of Providence's corruption lore

01:00 AM EST on Saturday, November 20, 2010

By Gregory Smith

Journal Staff Writer

PROVIDENCE - A stolen police radio. An "accident chaser." A man who sells caskets.

Those were some of the glossary items in a bitter little tale of wrongdoing that saw its denouement at Superior Court Friday - a tale that moved an indignant judge to a brief exposition on the sad state of affairs in Rhode Island.

In the end, a building maintenance foreman for the City of Providence who purloined a police radio and sold it to an aging accident chaser who needed to cope with new technology is going to be allowed to stay out of prison.

Robin Evans, the foreman, was convicted of two felony charges - larceny over $500 and wrongful conversion of government property to personal use by a municipal employee - in a jury trial in mid-July. After hearing evidence over five days, the jury deliberated for about four hours.

At his sentencing Friday, Evans stopped short of a full expression of contrition, telling Judge Francis J. Darigan Jr. ". I'm sorry for being here ."

The police used cell phone records to show that Evans talked to the accident chaser, a man in his 70s with the alias Eddie Logan, on the day the radio was discovered missing at police headquarters.

Logan - his given name is Edwin L. Loignon, of 4 Fairmount Ave., Johnston - scouts motor vehicle accidents to solicit business from motorists for auto body shops that he represents.

Evans, 50, of 20 Applegate Lane, Providence, who had a sideline selling caskets, denied at his trial that he stole the radio. He swore that he talked with Logan about buying a casket, not the radio.

Darigan accepted a prosecutor's recommendation and imposed on Evans a four-year suspended prison term, with probation, plus 100 hours' community service. And then he topped the recommendation by adding a $5,000 fine.

Evans, a 10-year city employee who is suspended from duty without pay, had a political patronage post that put him in charge of custodial work at City Hall, the Public Safety Complex and a couple of other municipal buildings.

The judge decried what he called Rhode Island's "culture of corruption" and said some people are working hard to dispel it.

He likened Evans' crime to proved or alleged crimes by a Johnston state senator, North Providence town councilmen, and Providence policemen in Operation Deception. He said Evans, while a first-time offender, had a position of trust in the capital city that gave him easy access to confidential information and valuable equipment and that his punishment must be commensurate with his betrayal.

Defense lawyer David A. Cooper, who could not be reached for comment after the sentencing, argued that Evans has suffered enough with the pending loss of his job and possible loss of his city pension and that he should be sentenced to probation only.

The crime occurred on Aug. 22, 2008, when Evans entered the locked office of the Police Department Neighborhood Response Team and removed a portable radio and charger valued at a total of $2,589, according to trial evidence. He was one of a limited number of people who had a key.

The stolen item was one in a crop of ultramodern radios acquired by the city, called an Astro Digital XTS 2500i Handie-Talkie and manufactured by Motorola, to carry transmissions with a higher level of encryption. Each radio is linked to a central computer server and, as such, can be disabled remotely. When the loss was discovered, the radio was rendered inoperable.

The case developed when Loignon brought the radio to the city Department of Communications on Sept. 16 to ask for help in getting it to work. Radio engineer Tony Desmarais checked the serial number, realized it was the missing radio and told Loignon that he could not have it back. Loignon left right away, but he was identified on a recorded surveillance video.

His is a familiar face at headquarters, where he goes to pick up accident records, used to bring goodies to win over the clerks, and sometimes kibitzes with police officers. He had complained, according to the police, that the scanner he used to monitor their chatter was no longer any good because the police had installed new technology.

Special Assistant Attorney General James M. Callaghan, the prosecutor, described Loignon to the judge as irascible but funny, a colorful character out of a Damon Runyon novel. He said Loignon needed one of the new radios so he could hear when an accident occurred and get to the scene quickly.

It is, commented Callaghan, "Probably not the most noble profession ."

Loignon was not charged with a crime this time, but a past misdeed was brought out at the trial. He was convicted in 1993 of obtaining money under false pretenses - the sum exceeded $500, making it a felony - and was given a five-year suspended prison sentence with probation and ordered to make restitution.

As for Evans, Callaghan gibed in court Friday, "maybe he wasn't selling enough caskets" so he turned to thievery.

Loignon initially told the police that he acquired the radio from an unknown man on the street on Sept. 13, but then admitted in a subsequent interview that he bought it from Evans in late August, according to the police. In court he testified that he bought it for $200 from a bald-headed janitor named Rob and pointed out Evans as the seller.

Interesting article... It would seem to me if he doubled his cash and purchased a digital portable scanner it would have been well worth the money in avoiding all this. Being I'm not a RI scanning regular I'm just assuming you can still monitor the main dispatch T/G, but not the tac channels do to encryption, correct?

Larceny of police radio becomes part of Providence’s corruption lore

01:00 AM EST on Saturday, November 20, 2010
By Gregory Smith

Journal Staff Writer

PROVIDENCE — A stolen police radio. An “accident chaser.” A man who sells caskets.
Those were some of the glossary items in a bitter little tale of wrongdoing that saw its denouement at Superior Court Friday — a tale that moved an indignant judge to a brief exposition on the sad state of affairs in Rhode Island.
In the end, a building maintenance foreman for the City of Providence who purloined a police radio and sold it to an aging accident chaser who needed to cope with new technology is going to be allowed to stay out of prison.
Robin Evans, the foreman, was convicted of two felony charges — larceny over $500 and wrongful conversion of government property to personal use by a municipal employee — in a jury trial in mid-July. After hearing evidence over five days, the jury deliberated for about four hours.
At his sentencing Friday, Evans stopped short of a full expression of contrition, telling Judge Francis J. Darigan Jr. “… I’m sorry for being here …”
The police used cell phone records to show that Evans talked to the accident chaser, a man in his 70s with the alias Eddie Logan, on the day the radio was discovered missing at police headquarters.
Logan — his given name is Edwin L. Loignon, of 4 Fairmount Ave., Johnston — scouts motor vehicle accidents to solicit business from motorists for auto body shops that he represents.
Evans, 50, of 20 Applegate Lane, Providence, who had a sideline selling caskets, denied at his trial that he stole the radio. He swore that he talked with Logan about buying a casket, not the radio.
Darigan accepted a prosecutor’s recommendation and imposed on Evans a four-year suspended prison term, with probation, plus 100 hours’ community service. And then he topped the

recommendation by adding a $5,000 fine.
Evans, a 10-year city employee who is suspended from duty without pay, had a political patronage post that put him in charge of custodial work at City Hall, the Public Safety Complex and a couple of other municipal buildings.
The judge decried what he called Rhode Island's "culture of corruption" and said some people are working hard to dispel it.
He likened Evans' crime to proved or alleged crimes by a Johnston state senator, North Providence town councilmen, and Providence policemen in Operation Deception. He said Evans, while a first-time offender, had a position of trust in the capital city that gave him easy access to confidential information and valuable equipment and that his punishment must be commensurate with his betrayal.
Defense lawyer David A. Cooper, who could not be reached for comment after the sentencing, argued that Evans has suffered enough with the pending loss of his job and possible loss of his city pension and that he should be sentenced to probation only.
The crime occurred on Aug. 22, 2008, when Evans entered the locked office of the Police Department Neighborhood Response Team and removed a portable radio and charger valued at a total of $2,589, according to trial evidence. He was one of a limited number of people who had a key.
The stolen item was one in a crop of ultramodern radios acquired by the city, called an Astro Digital XTS 2500i Handie-Talkie and manufactured by Motorola, to carry transmissions with a higher level of encryption. Each radio is linked to a central computer server and, as such, can be disabled remotely. When the loss was discovered, the radio was rendered inoperable.
The case developed when Loignon brought the radio to the city Department of Communications on Sept. 16 to ask for help in getting it to work. Radio engineer Tony Desmarais checked the serial number, realized it was the missing radio and told Loignon that he could not have it back. Loignon left right away, but he was identified on a recorded surveillance video.
His is a familiar face at headquarters, where he goes to pick up accident records, used to bring goodies to win over the clerks, and sometimes kibitzes with police officers. He had complained, according to the police, that the scanner he used to monitor their chatter was no longer any good because the police had installed new technology.
Special Assistant Attorney General James M. Callaghan, the prosecutor, described Loignon to the judge as irascible but funny, a colorful character out of a Damon Runyon novel. He said Loignon needed one of the new radios so he could hear when an accident occurred and get to the scene quickly.
It is, commented Callaghan, "Probably not the most noble profession …"
Loignon was not charged with a crime this time, but a past misdeed was brought out at the trial. He was convicted in 1993 of obtaining money under false pretenses — the sum exceeded $500, making it a felony — and was given a five-year suspended prison sentence with probation and ordered to make restitution.
As for Evans, Callaghan gibed in court Friday, "maybe he wasn't selling enough caskets" so he turned to thievery.
Loignon initially told the police that he acquired the radio from an unknown man on the street on Sept. 13, but then admitted in a subsequent interview that he bought it from Evans in late August, according to the police. In court he testified that he bought it for $200 from a bald-headed janitor named Rob and pointed out Evans as the seller.

scannermaster.com Free Ground Shipping*
Specials & New Products

Our Money Saving December Offers
Hello ,

For the month of December we are offering Free Ground Shipping to the Continental United States.*

Just look for the little green truck!

GRE PSR-310 - All new trunking scanner
GRE has the newest scanner on the market
a.. The PSR-310 trunking portable for only $199.95
b.. Now with Object-oriented programming
c.. A display with more information than ever before
d.. A great non-digital trunking portable at a terrific price

GRE PSR-500 Scanner
GRE's top-of-the-line digital handheld scanner is on sale this December for only $358.00 a savings of $30.00 and now with free shipping for an unbeatable deal.
a.. The PSR-500 has outstanding P-25 digital decoding capability and great audio
b.. The radio also comes with the USB programming cable included
c.. Perfect for those many areas which have switched to digital systems

Gift Certificates make great gifts for the holidays

Buy a Gift Certificate so your loved one can choose the scanner or accessory he or she wants for the holidays. Perfect for the radio enthusiast in your life or even as a gift for yourself.

Looking for great gift ideas for yourself or a friend? Let us help.
ARC Patrol Software now available for HomePatrol users
Buy ARC PATROL Software for only $29.95 and expand the functionality of your HP-1:

a.. ARC-PATROL includes the most versatile and most feature rich editor available on the market
b.. Add a frequency or talkgroup that is not in the built-in database
c.. Change Alpha tags, add sub-audible tones
d.. Add pre-built Airband, CB, Marine, Railroad, and FRS frequencies
e.. Built-in zip code and latitude-longitude lookups
f.. Building new favorite systems and favorites lists was never this easy!
g.. Search a frequency range and much more!

Setup & Optimize now $10 off for PSR-700 and HomePatrol
Want your gift to be up to date and ready to work right out of the box? Sign up for our Setup and Optimize Service for the Uniden Home Patrol and the GRE PSR-700 pre-programmed

scanners we update the database of the radio, update the firmware and create a favorites list for your hometown and more. This month the price is $10 off, only $29.95 when you purchase one of these radios from Scanner Master.

scannermaster.com Terrific New Products
and Great Gift Ideas

Lapel Speaker with Audio Boost & Antenna Mount
Hello William,

The SpectrumForce Scanner Lapel Speaker with Audio Boost and Antenna Mount is one of the coolest products we've ever developed. With a look similar to the speaker-microphones used by law enforcement and the fire services, this speaker has multiple important functions: It brings your portable scanner audio up close to your ear (rather than down by your side on your belt), it provides a variable audio boost, and it puts the antenna up higher and away from your body in a much more efficient location for better signal reception range and clarity.

a.. Works with most portable scanners (select BNC or SMA)
b.. Audio Boost with volume control slider
c.. Swivel clip attaches to lapel or epaulet
d.. Single straight cord, 3' long, contains antenna coax and speaker wire
For 346T, 346XT, 330, 396T, 396XT scanners (SMA connection): For most other models (BNC connection - SMA adapter or antenna required).
Easier to Read (and more detailed) Uniden XT Scanner Manual
Painstakingly created by Marksscanners, this 100 page Easier to Read Scanner Manual takes you deep into the amazing feature set and instructions for the Uniden XT scanners (BC346XT, BCD396XT, BCT15X and BCD996XT). This is an extremely handy 5.5 X 8.5 perfect-bound book which you can use on your desk, in your car and on the go. The guide is in 4-color with charts, images and super detailed text. This one guide covers all four of these latest Bearcat® XT model scanners and takes you far beyond what you get with the radio (only a CD-ROM and without the detail of Mark's guide). Go step-by-step through each of the hundreds of features of these scanners and learn what the functions do and how they are enabled and disabled. Mark takes you through the process of planning systems, sites and groups and then programming your scanner with this information. The Uniden XT scanners are remarkable radios but to get the most out of them you really need this ultimate manual we are proud to offer. $29.95
Uniden Remote Head on Sale
For those with the Uniden 346, 396, 15 or 996 (first generation "T" and second generation "XT" models), the Uniden Remote Head is a great addition to any in-vehicle custom and professional installation (and some home/office/comm-center installations). The remote head is effectively the front two inches of the base/mobile (15/996) scann ers but it can be conveniently mounted in cars and trucks and other locations where space is at a premium. For those with the portable scanners this remote head provides larger controls, keys and a larger display than found on the portables themselves, making for an easier to operate interface in your car or at your home. The remote head has no radio itself internally, it's just the front panel controls (volume/squelch/menu/tuning/keypad, etc.) and display which

is connected to your scanner via a 10' thin cable which is included and which can be extended. On sale now through year end for $129.95, a $40 savings.
Gift Certificates make great gifts for the holidays
Buy a Gift Certificate so your loved one can choose the scanner or accessory he or she wants for the holidays. Perfect for the radio enthusiast in your life or even as a gift for yourself.

Looking for great gift ideas for yourself or a friend? Let us help out and then gift wrap it for you!

For those in Providence [more down-town] can you plug in the following and pass back what you get for PL/DPL Tones.

471.8875, 472.9625, 484.0375, 484.3625, 484.4625, 484.6375

Thanks in advance.

Good Info. A few of us suspected they were still in-use, even tho the Licenses were Expired.

Curious what Event??. Trying to match certain frequencies to different events.

Hi Bill.

The site has been down for weeks. The 2 repeaters(ch.1 462.400 pl 91.5 & ch.2 452.825 pl 167.9) they operate here in RI are still on the air. I have seen some of their members at recent fires in my city, so I assume they haven't disbanded.

I've been monitoring the Convention Center freqs from work and will post what I find this week.

Providence Citywide's website went down on January 1, 2011 due to an issue with PCFN and the web service provider. I guess the executive board is in the process of finding a new web hosting provider. The lease on the Abington (North) repeater was not renewed this year also. The club is still using the Main, Woonsocket Tac-3, and Ops.

The club is still active. There hasn't been any talks of disbanding.

I have the Westin Hotel in my notes on the same frequency with a PL of D-023. It's been a while since I have been down there though.

Hi group,
The NSPD switched to the 800 North Zone on February 1, 2011. My neighbor is the K9 officer. The talkgroup is reported to be encrypted and it is unknown which number it is at this time. I have my software on logging tonight and will try to capture it.

So far I have hits on: 1360, 1971, 1452 and they are all encrypted. I have 1968 confirmed from my work 800mhz portable for NSFD so the 1971 could be the PD.

Did they actually Switch Zones?
or
Are they now on more than one Zone ??
or
Did more towers come-on line this week ??

Just like when the MSP came on-line, there is still a lot to learn about RISCON

OK

So it should read, NSPD joined RISCON and are on the North Zone from their previous VHF Channels.

Subject: Coast Guard assists disabled ocean freighter

DATE: February 26, 2011 11:58:50 AM EST
Coast Guard assists disabled ocean freighter
BOSTON - The Coast Guard is assisting a disabled and adrift 432-foot ocean freighter with nine people on board 70 miles southeast of Cape Cod, Mass today, Feb. 26, 2011.

The motor vessel Dintelborg, enroute from the Netherlands to Willington, Va., lost propulsion when a small fire broke out on the bridge. The fire has been extinguished, and there are no reports of any injuries, but the ship is adrift without power in 16-foot seas and has no ship to shore communications. Winds are 20 knots.

An Air Station Cape Cod, Mass. MH-60 jayhawk helicopter launched and arrived on scene at 2:52 a.m. and established contact with the crew of the freighter, who are using a hand-held radio to communicate.

A Coast Guard HC-130 Hercules aircraft launched from Elizabeth City, N.C. has relieved the helicopter, and is serving as a communications platform to relay messages from the disabled ship to rescue coordinators on shore. An Air Station Cape Cod HU-25 falcon jet will relieve the Hercules later today.

The Tug Rown Mcallister from New Bedford, Mass. is enroute to the ship and plans to tow it to Providence, R.I.

Coast Guard Cutter Seneca, a Boston-based 270-foot medium endurance cutter diverted while on patrol and is expected to arrive on scene at about 2:30 p.m. today.

Watch standers in the First District Command Center in Boston first became aware of the problem when a signal from the freighter’s emergency position indicating radio beacon was detected at 1:13 a.m. Radio calls to the ship were unanswered and it wasn’t until the helicopter arrived on scene that contact was established.

The cause of the fire is unknown and the Coast Guard is investigating.

“We weren’t sure of the nature of distress until the helicopter arrived on scene,” said Lt. Adam Schmid from the First District Command Center in Boston. “The ship is seaworthy and the good news is none of the crew have been hurt. We are working now with the ship to arrange a tow and get the ship to port safely.”

515. Scraps of Russian sub burn on Providence River

Yahoo group: Scan-RI
Date: 2011-03-25 22:19:47 UTC
From: ~Bill
Topic: 515 Message: 515

Scraps of Russian sub burn on Providence River

- 31 mins ago
PROVIDENCE, R.I. - Some of the remains of a Russian submarine that was a floating museum before it sank in 2007 burned Friday as it was being disassembled for scrap metal.
Pieces of the 282-foot-long submarine, known as Juliett 484, caught fire shortly before 1:30 p.m. on a barge in the Providence River a few hundred feet offshore, said Joseph Klucznik, fire chief in neighboring East Providence. Three fire boats, from Providence, East Providence and Warwick, got the smoky blaze under control, he said.
There were no reports of injuries. Klucznik didn't know the cause.
The sub was used in the 1990s as a restaurant and vodka bar in Helsinki, Finland, and as a set for the 2002 Harrison Ford movie "K-19: The Widowmaker" before being acquired by the USS Saratoga Museum Foundation, a private, nonprofit group. It was docked in Providence and open to the public as a tourist attraction and museum, but sank during a nor'easter in 2007.
After determining it couldn't be salvaged, the foundation sold it for scrap in 2009 to Rhode Island Recycled Metals.
The company didn't immediately return a request for comment.
Frank Lennon, who heads the foundation, said there was no fuel on board, but there may have been residual oil in the sub's bilges.

517. Government Shutdown to Affect Amateur Radio License and Vanity Call Sign Renewal

Yahoo group: Scan-RI
Date: 2011-04-09 01:21:05 UTC
From: ~Bill
Topic: 517 Message: 517

Government Shutdown to Affect Amateur Radio License and Vanity Call Sign Renewals, New Licensees

04/08/2011
With the impending government shutdown scheduled for midnight on April 8, the ARRL contacted the FCC to find out what this means for Amateur Radio.
License Renewals
If your license is set to expire during the shutdown and you have already filed to have it renewed, you need do nothing. Since you timely filed your renewal, you will continue to enjoy on-air operating privileges. This applies to the renewal of your vanity call sign, as well.
If your license is set to expire during the shutdown and you have not filed to have it renewed, you will not be able to legally operate once your license expires. You can go ahead and apply for renewal, but the FCC will take no action on it until the government is back in business. This also applies to the renewal of your vanity call sign.
ARRL members can sign up to receive electronic notification as to when their Amateur Radio license will expire. To use this free service, please log in to the ARRL website, click on the "Edit Your Profile" link and then click "Edit E-mail Subscriptions."
Upgrades, Vanity Call Signs and New Technician Licenses
Volunteer Examiners (VEs) will continue to offer Amateur Radio exams throughout the shutdown and Volunteer Examiner Coordinators (VECs) -- including the ARRL VEC -- will continue to process the exam paperwork.
Upgrades: If you successfully upgrade your license during the shutdown, you will be given a Certificate of Successful Completion of Examination (CSCE) by your VE team that administered your exam. If you upgrade to General, please sign your call with /AG (for example, K1SFA/AG); if you upgrade to Amateur Extra, please sign with /AE (K1SFA/AE). You would normally do this -- even if the government was not in shutdown mode -- until your new license class appeared in the online ULS database.
Vanity Call Signs: While you may still apply online for a vanity call sign during the shutdown, the FCC will not act on your application and none will be issued until the government returns from shutdown.
New Licenses: We encourage anyone who is interested in becoming an Amateur Radio operator to go ahead and take the Technician class exam, shutdown or not. Even though the VECs will process the paperwork, the FCC will not grant any new call signs. Call signs will be granted to these new hams when the government returns from shutdown.
FCC Response to Shutdown
Speaking at a press conference on April 7, FCC Chairman Julius Genachowski said that "Overwhelmingly, the FCC is shut down" if the government does indeed close. An FCC spokesman later added that the Commission's focus would be on "public safety and the protection of property." The FCC has issued a

Plan for Orderly Shutdown Due to Lapse of Congressional Appropriations in case the government closes. The plan states that during a shutdown, "all FCC activities other than those immediately necessary for the protection of life or property will cease. Suspended activities include, among many others: Consumer complaint and inquiry phone lines cannot be answered; consumer protection and local competition enforcement must cease; licensing services, including broadcast, wireless, and wireline, must cease; management of radio spectrum and the creation of new opportunities for competitive technologies and services for the American public must be suspended; and equipment authorizations, including those bringing new electronic devices to American consumers, cannot be provided."

519. New England the new Sound Stage

Yahoo group: Scan-RI
Date: 2011-05-15 15:26:48 UTC
From: ~Bill
Topic: 519 Message: 519

Filmings continue in New England for various Movie/TV Productions.

http://www.scannewengland.net/wiki/index.php/Movie_Productions

. Ted, starring Mark Wahlberg, is filming at the 74 Warrenton Street (Blue Man Group Theater). We also heard that they were filming at a club on Columbus Ave. (Thanks Ed)

They were also scheduled to shoot at 65 Chandler Street today, but that may have changed. (Thanks Patrick)

FYI: They were suppose to be filming at Charlie's Sandwich Shoppe, but they shot there last week, and we heard at that point that would probably be the only day of filming there. If anyone can confirm any of these locations, please let us know, thanks!

Update: As of this morning it looks like they are filming on South St (see comments below for more info).

. <http://www.imdb.com/title/tt1324999/> Here Comes The Boom, starring Kevin James, is filming at the Latitude Sports Club in Peabody, MA.

Moonrise Kingdom is filming at Lincoln Woods State Park, state DEM property in Lincoln RI

Subject: Re: [Scan-Mass-East] New England the new Sound Stage

Saw a film crew set up at Berkeley/Columbus during the week. That was a staging area, not filming. A lot of the filming is done at night to reduce traffic/noise/gawker problems.

NEWPORT, R.I. - A new Navy radio system meant to open communications is having an unexpected jamming effect on an unusual target - Rhode Island garage doors.
The Newport Daily News reports Tuesday that the radio system recently brought on line at Newport's naval base operates on the same frequencies as some remote garage door openers. The interference leaves the openers ineffective.

Naval officials say the base started using the system May 5.

One garage-door manufacturer says 30 customers in the area have reported malfunctioning garage openers due to interference from the new radio system.

Wall-mounted openers, which don't rely on radio waves, are unaffected. Naval officials say they did not know that the system would interfere with garage door openers.
http://www.bostonherald.com/news/national/northeast/view/20110517navy_radio_system_jams_garage_door_openers_in_ri/srvc=home&position=recent

~~~~~~~~~~~~~~~~

Amazing the Last line of "Did not know". This has occurred ALL Over the Country as the system has been brought on-line, and their own Press Release comments that the
Garage Doors operate on a Non Protected Wireless System.

O well. So, for those in RI, time to search the 380-400 for a P25 Radio System.

Same thing happend at Navy Region Gulf Coast several years ago when the system was in testing down there. It didn't stop the navy from implementing it there.

524. Nat'l Guard: Fighter Jets No Cause For Alarm - Boston News Story - WCVB Boston

Yahoo group: Scan-RI
Date: 2011-06-01 01:04:46 UTC
From: ~Bill
Topic: 524 Message: 524

http://www.thebostonchannel.com/news/28083987/detail.html

BOSTON -- Residents may see fighter jets in the skies over eastern Massachusetts on Wednesday, but there is no cause for alarm, the National Guard said.

F-15 fighter jets from the 104th Fighter Wing, Massachusetts National Guard in Westfield, will take part in an Alert Force exercise on Wednesday from 10 a.m. to noon, officials said.

The exercises will take place in the skies over Provincetown, Nantucket, Hyannis and Martha's Vineyard.

F-15 fighter jets will be training with the Civil Air Patrol, which will be flying low-speed civilian propeller aircraft, the National Guard said.

The exercise, done in partnership with U.S. Northern Command and The North American Aerospace Defense Command, is designed to make sure the Massachusetts Air National Guard is ready to defend the Northeast airspace against any airborne threat.

Father's Day Sale
All this Month

Free UPS Ground shipping on Uniden and GRE Scanners*

Hello William,
<http://www.scannermaster.com/v/vspfiles/emails/2011-06-01/index_files/happy_fathers_day.jpg>
It's easy and affordable to find the right scanner for that special man in your life (or for yourself). If you order a Uniden-Bearcat <http://www.policescanners.net/mmccatalog/274-2541779-78712> or GRE Scanner <http://www.policescanners.net/mmccatalog/274-2541779-78713> you get free UPS Ground Shipping*. Plus, when you order accessories such as a case, car charger or custom programming, you'll receive additional savings. Scanners make for a great unique gift as they are the perfect way to stay in touch with what's happening in your town.

To get free UPS Ground Shipping* with your new <http://www.policescanners.net/mmccatalog/274-2541779-78712> Uniden-Bearcat or <http://www.policescanners.net/mmccatalog/274-2541779-78713> GRE Scanner just enter this Coupon Code: scan4dad

Save Even More on Select Uniden-Bearcat and GRE Scanners In addition to the free shipping offered through the end of June, the following scanners are available this month at special sale prices.

Click on any of the listed radios for more details and to order:
Bearcat BC72XLT <http://www.policescanners.net/mmccatalog/274-2541779-78702>
Bearcat BC355C <http://www.policescanners.net/mmccatalog/274-2541779-78703>
Bearcat BC346XT <http://www.policescanners.net/mmccatalog/274-2541779-78704>
GRE PSR-100 <http://www.policescanners.net/mmccatalog/274-2541779-78705>
GRE PSR-200u <http://www.policescanners.net/mmccatalog/274-2541779-78706>

Before you buy...
If you're not sure if you're in a conventional radio area or if you need a trunking or digital scanner for your area, please log on to www.policescanners.net <http://www.policescanners.net/mmccatalog/274-2541779/> or call 1-800-SCANNER for assistance.

The Father's Day Sale ends Thursday, June 30, 2011

Get Your Easier to Read Scanner Manuals - New GRE+RS Edition Available

Did You Know?

By Richard Barnett

Scanners make great weather alert radios... Actually they're far more functional than weather radios because you can also listen in to local police and fire as they respond to storm emergencies. You can also listen live as weather spotters report on possible tornado touchdowns in your area. You'll know what's going on with a scanner before just about anyone else in your community. Scanners are an extremely valuable and extremely informative (as well as exciting) tool for yourself or any family member and are particularly important for anyone who lives in an area where severe weather or wildfires may strike.

527. Newport Police now encrypted full time

Yahoo group: Scan-RI
Date: 2011-06-15 00:36:32 UTC
From: wmgeorge5280
Topic: 527 Message: 527

As of last week Newport Police began encrypted transmission on thier main dispatch Tgp 1300. According to an email from the department is is a permenant change due to operational needs. I believe however this was done not for operational needs since it had been available for monitoring for the last 3yrs. However a new Intrim Chief of Police was appointed last week, and with a new Chief comes new policies.

528. Moonrise Kingdom filmings

530. Going over some notes from the 4th of July weekend

Yahoo group: Scan-RI
Date: 2011-07-17 15:10:37 UTC
From: ~Bill
Topic: 530 Message: 530

and I am not finding a user for 453.6500 / 192.8 Hz

Talk was of Lifeguards, but alas my monitoring location in Hyannis provided good signals into much of New England as the Weather was great and the bands were open.

192.8 is/was a common tone in Maine and the only two licenses are Cornish Fire Dept and Maine Life Flight [Hey, we need tones for L/F]

IN Mass this is a Boston Fire [131.8] and Mass DOC [151.4]

RI the only license is the State for Highway Ops..

Anyone know who is on 192.8 or lets listen during the HOT Weathers for some Pool related activity.

Thanks in advance. Post responses back to the LIST[s] vs personally, share the info

weekend

This is indeed Park & Rec for the Town of Yarmouth. Recorded a boatload
of activity throughout the day today, positive ID's on numerous Yarmouth
beach and pond locations. Looks like a PL of 192.8.

In addition to the data posted here at Scan-Mass-East, the ScanNewEngland
site has lots of good information in the message boards and the WIKI visit
them at http://www.scannewengland.net

Information posted here at Scan-Mass-East is for Non-Commercial use by Scan-Mass-East members. Commercial use of this information, ESPECIALLY BY 1RRN and 1RWN will not be tolerated, unless specifically authorized and those found doing so will be terminated from the list.

Subject: Special Announcement: 5.9 on the Richter Scale Earthquake in Washington DC Area Felt in Parts of New England

Hello to all..

A 5.9 on the Richter Scale Earthquake occurred in the Washington DC/Mineral Virginia area. Several Amateur Radio SKYWARN Spotters reported feeling the effects into New England.

If you felt this earthquake in this region, please follow the instructions per this link:

http://www.bc.edu/research/westonobservatory/northeast/ifyoufelt.html

Emails per the web site link are likely preferred over voice phone calls.

Thanks for your cooperation!

Respectfully Submitted,

Robert Macedo (KD1CY)
ARES SKYWARN Coordinator
Eastern Massachusetts ARES Section Emergency Coordinator

535. Massachusetts to participate in 3-state disaster drill with Rhode Island, Connecticut in Providence - BostonHerald.com

Yahoo group: Scan-RI
Date: 2011-09-10 00:38:25 UTC
From: ~Bill
Topic: 535 Message: 535

http://www.bostonherald.com/news/regional/view.bg?articleid=1364623&srvc=rss

PROVIDENCE, R.I. - Emergency officials from Rhode Island, Massachusetts and Connecticut are teaming up to practice their response to a disaster involving a derailed train carrying hazardous chemicals.

The exercise is set for Saturday at the port of Providence. It's expected to include firefighters and emergency crews from all three states.

The drill will feature the simulated derailment of a train carrying ethanol. Six train cars provided by a local rail company will be used to make the exercise as realistic as possible

536. FCC License Grants for Sept 2011

Hi Bill

My name is Ray Allard and I have a copy of "THE OFFICIAL RHODE
ISLAND SCANNER GUIDE" I am unable to to find what Edition my copy is.
The cover shows a scanner with a freq. of 162.400. I belive it has to be
at least 10 to 15 years old. Page 8 starts off with STATE OF RHODE
ISLAND DEPARTMENT OF TRANSPORTATION. Locations listed are EXETER,NORTH
SCITUATE,PORTSMOUTH and PROVIDENCE. Listed by each location are the
frequences.
If I have the information that you are looking for I would happly
forward it to you. My location is Portsmouth R.I.

542. First nationwide test of the Emergency Alert System (EAS), scheduled for November 9, 2011, at 2:00 p.m., EST

Yahoo group: Scan-RI
Date: 2011-10-27 21:50:46 UTC
From: ~Bill
Topic: 542 Message: 542

FYI

Hello all Stations:

The Emergency Alert System (EAS) is a national public warning system that requires broadcasters, cable television systems, wireless cable systems, wireline video providers, satellite digital audio radio service providers and direct broadcast satellite service providers to make their communications facilities available to the President during a national emergency. The system also may be used by state and local authorities to deliver important emergency information such as AMBER (child abduction) alerts and severe weather warnings targeted to specific geographical regions or areas. The following transmitted message may be used:

****

"This is a nationwide test of the Emergency Alert System. This test will last for approximately three minutes.

During this test, most television and radio providers will remain on the air to participate in the test.

This is (station name). We will be discontinuing programming for the duration of the test.

Our programming will resume at the end of the test, in approximately three minutes."

****

I am requesting the widest possible dissemination on all Yahoo Groups lists, the SKYWARN List, and the EMA and WMA websites.

Many thanks in advance.

Regards and 73,

Michael P. Neilsen, W1MPN
State RACES Officer (Acting)

Chairperson, Amateur Radio Working Group

Member of the MA State Interoperability Executive Committee (SIEC), and Policies and Programs subcommittee
Office Answering Service/FAX 978.389.0558

Topic: 539 Message: 543

RIDOT is currently in the process of transitioning from their old analog trunking system to the new statewide 800 digital trunking system (RISCON). Their old frequencies will be useless pretty soon, although I believe that the frequencies be eventually be incorporated into RISCON.

RIPTA will also be transitioning to RISCON eventually also, although that has not yet begun.

Correct, however I will venture the old Radio ID's and Calls [not FCC Call Signs] will transition over, which was my reason for asking.

Seems some FCC changes of License ownership has also occured in the past few months.

546. Black Friday - Scanning Opportunities

Yahoo group: Scan-RI
Date: 2011-11-19 14:57:00 UTC
From: ~Bill
Topic: 546 Message: 546

With Black Friday approaching, it's time to scan the malls. There should be plenty of activity from late Thursday evening into and thru Friday mid-day [depending on your States Laws]

Over at ScanNewEngland we have been working on a wonderful Mall List, but it does need much Help as things are always changing.

Common [Regional and National] Department/Box Stores

http://scan-ne.net/wiki/index.php?title=Common_Standard_Department_Store_Channels

Connecticut Malls

http://scan-ne.net/wiki/index.php?title=Connecticut_Malls_and_Shopping_Centers

Maine Malls

http://scan-ne.net/wiki/index.php?title=Maine_Malls_and_Shopping_Centers

Massachusetts Malls

http://scan-ne.net/wiki/index.php?title=Mall_and_Shopping_Center_Frequencies_A-H

http://scan-ne.net/wiki/index.php?title=Mall_and_Shopping_Center_Frequencies_I-Z

New Hampshire Malls

http://scan-ne.net/wiki/index.php?title=New_Hampshire_Malls_and_Shopping_Centers

Rhode Island Malls

Uniden Remote Head on Sale

<http://www.policescanners.net/mmccatalog/274-j32-26992-78749/>
<http://www.policescanners.net/mmccatalog/274-j32-26992-78749/> Uniden Bearcat BC-RH96 Remote Head <http://www.policescanners.net/mmccatalog/274-j32-26992-78749/> For those with the Uniden 346, 396, 15 or 996 (first generation "T" and second generation "XT" models), the Uniden Remote Head is a great addition to any in-vehicle custom and professional installation (and some home/office/comm-center installations). The remote head is effectively the front two inches of the base/mobile (15/996) scanners but it can be conveniently mounted in cars and trucks and other locations where space is at a premium. For those with the portable scanners this remote head provides larger controls, keys and a larger display than found on the portables themselves, making for an easier to operate interface in your car or at your home. The remote head has no radio itself internally, it's just the front panel controls (volume/squelch/menu/tuning/keypad, etc.) and display which is connected to your scanner via a 10' thin cable which is included and which can be extended.

Uniden Bearcat BC-RH96 Remote Head
<http://www.policescanners.net/mmccatalog/274-j32-26992-78749/> is on sale now for $139.95, a $30 savings.

Sale ends Wednesday, December 14, 2011 at Midnight

GRE Digital Scanner Holiday Packages

Holiday shopping made simple with these digital scanner holiday packages:

553. Re: [Scan-RI] FCC License Grants for December 2011

Yahoo group: Scan-RI
Date: 2012-01-04 17:44:04 UTC
From: Brian J. Glancy
Topic: 552 Message: 553

Site / Frequency / Market Search ResultsIt was interesting to see Hopkins Transpotation, which does School Buses in Scituate and Glocester, got a new license on 42.960.
I have not been able to find them previsously.

Used to see the school buses floating around teh State Police complex in Scituate, when I worked there.

I'll monitor it.

554. Three Carriers to be Scrapped

Yahoo group: Scan-RI
Date: 2012-01-28 14:57:33 UTC
From: ~Bill
Topic: 554 Message: 554

Got this from Dave yesterday.

The first ship to be awarded is ex-FORRESTAL (AVT/CV 59), located in Philadelphia, PA.

http://en.wikipedia.org/wiki/USS_Forrestal_(CV-59)

It's been awhile, Since I visited Newport, and I am sure the Question has been asked before, but what is left to remove ?

I thought there were 3 [might have only been two <http://en.wikipedia.org/wiki/File:Saratoga.jpg>] down there back in the late 80's early 90's I assume it's still the Saratoga CV60

Bill Dunn N1KUG

Subject: Special Announcement: FCC Seeks Public Comments on Emergency Communications by Amateur Radio and Impediments to Amateur Radio Communications

Hello to all..

Please see the following notice in regards to Amateur Radio and Emergency Communications and a study that is being executed. Time is short with a 45-day comment period as proposed by the FCC and the ARRL is looking for comments over the next 3 weeks to collate a common report. Please don't delay and provide comments. Thanks to all for their support. The text of the memo from ARRL HQ with full details is listed via the link below:

http://ares.ema.arrl.org/node/610

Respectfully Submitted,

Robert Macedo (KD1CY)

559. Coast Guard suspends search for overboard tug master

Yahoo group: Scan-RI
Date: 2012-04-26 20:32:15 UTC
From: ~Bill
Topic: 559 Message: 559

DATE: April 26, 2012 3:29:34 PM EDT

Coast Guard suspends search for overboard tug master

BOSTON — The Coast Guard <http://uscg.mil/> has suspended its search pending further developments for a 48-year-old man who was reported to have fallen overboard from a Boston-bound tugboat approximately nine miles south of Newport, R.I., Thursday at 1:36 p.m.

Coast Guard crews covered more than 775 square miles searching for the master of the New York-based 91-foot tug Steven-Scott.

The crew of the Steven-Scott contacted the Coast Guard Sector Southeastern New England <http://www.uscg.mil/d1/sectsene/> Command Center at 2:40 p.m., Wednesday, reporting that the man was last seen at approximately 1:30 p.m. and that he may have gone overboard.

“The Coast Guard conducted a thorough search with multiple assets through the night, but unfortunately they did not yield new information,” said Petty Officer 1st Class Joaquin Alayola, a search and rescue controller at the 1st Coast Guard District <http://www.uscg.mil/d1/> in Boston.

Searching were crews from:

* A Coast Guard Station Point Judith 47-foot Motor Life Boat <http://www.uscg.mil/datasheet/47mlb.asp>
* A Coast Guard Station Castle Hill 45-foot Response Boat-Medium
* A Coast Guard Air Station Cape Cod <http://www.uscg.mil/d1/airstacapecod/> MH-60 Jayhawk helicopter <http://www.uscg.mil/acquisition/mrr/>
* The Coast Guard Cutter Tiger Shark <http://www.uscg.mil/d1/cgctigershark/> , an 87-foot Patrol Boat from Newport, R.I.
* The Coast Guard Cutter Sanibel, a 110-foot Patrol Boat <http://www.uscg.mil/datasheet/110wpb.asp> from Woods Hole, Mass.

In the Northeast, the Coast Guard has responded to three boat-related drownings since April 1 of this year. Boaters and beach-goers are encouraged to remain cautious as the weather warms, follow safe boating practices <http://www.uscgboating.org/> , and always wear a lifejacket.

Subject: [Cruise_Ships] Newport expecting far fewer cruise line passengers

Newport expecting far fewer cruise line passengers

Boston.com
April 27, 2012

NEWPORT, R.I.–Local officials in Newport say far fewer passengers are expected to cruise into the seaside city this year.

The Newport Daily News reports that 82,000 cruise ship passengers are expected to dock at Perrotti Park. That's about 14 percent fewer passengers than the 96,000 who came in 2011 and 25 percent fewer than the 109,000 who arrived in 2010.

The newspaper quotes Evan Smith, president and CEO of Discover Newport, the region's visitors bureau, as saying cruise line passengers are seeking to visit more exotic destinations, including overseas. He says most Northeast ports of call have seen passenger declines of about 15 to 20 percent.

The cruise ship season opens next week with the arrival of the Holland America Line's Maasdam.

Information from: The Newport Daily News.

563. Air Show Spectators Are In Good Hands

Yahoo group: Scan-RI
Date: 2012-06-16 13:37:39 UTC
From: ~Bill
Topic: 563 Message: 563

I'm surprised there has been no traffic here on the list asking or reporting the Freqs found for the show.

http://coventry.patch.com/articles/air-show-spectators-are-in-good-hands

The 2012 Rhode Island Air National Guard Air Show <http://patch.com/A-vm5R> is June 15-17 at Quonset Point, and the Rhode Island Medical Reserve Corps and Rhode Island Disaster Medical Assistance Team (RI MRC/RI DMAT) units will be dedicating their expansive medical cache of equipment, volunteer time and medical support for the 21st consecutive year to ensure that Air Show spectators receive the best in quality care if needed.

564. During the Air Show

Yahoo group: Scan-RI
Date: 2012-06-17 22:37:34 UTC
From: ~Bill
Topic: 564 Message: 564

Two Canadian War Ships enjoyed the show then moved over to Naval Station Newport.

Canadian Warships 700 and 711, both observed on AIS and heard on VHF Marine

Subject: Special Annoucement: 13th Annual Southern New England Weather Conference - Saturday October 27th, 2012

Hello to all..

The following is an announcement from KB1GHX-Glenn Field, NWS Taunton Warning Coordination Meteorologist (WCM), regarding the 13th Annual Southern New England Weather Conference on Saturday October 27th, 2012. The announcement is listed below:

Earlybird registration is now available through Sept. 9 for this year's 13th Annual Southern New England Weather Conference. The conference will be held on Saturday, October 27th at Meditech Corp. in Canton, MA (at base of Blue Hill), same place as last year.

The conference is sponsored by the not-for-profit Blue Hill Observatory Science Center. We have a fantastic program lined up for this year. Unlike previous conferences, which covered a wide range of meteorological topics, this year we are going to explore in-depth three major events that all happened in 2011:

1) the June 1 Springfield/Monson/Brimfield Tornado
2) Tropical Storm Irene
3) "Snowtober" -- the late October 2011 snowstorm.

We plan to cover each event from several interesting angles. For example, for the tornado, we will discuss meteorological factors; have tv meteorologists show media storm coverage; give a talk on the disaster surveying process and its challenges; and we will hear personal accounts from survivors and even a reverend who will discuss how he handled the spiritual healing for the bereaved and other townsfolk. For Irene, we will have presentations from the CT Dept. of Emergency Services and Public Protection, by the East Haven Fire Chief (Cosey Beach had tremendous coastal flooding), by the U.S. Geological Survey, by NWS-Burlington and the Executive Director of the Blue Hill Observatory (who lives in Vermont), etc. And for Snowtober, we will address some issues that may not first come to mind, such as air quality issues that resulted from use of wood-burning stoves... and Jet Blue Airlines will be there to discuss an operational airline perspective and the impacts of the storm!
(remember the stranded passengers at Bradley International Airport?).
National Grid will give a presentation on the wild weather of 2011 and its

impact on the delivery of electricity (tornadoes, hurricanes, snowstorms each require different types of restoration planning).

Assuming there is no major outbreak of severe weather the last week of October, our keynote speaker in the afternoon will be Dr. Greg Forbes, the Severe Weather Expert from The Weather Channel in Atlanta, GA to discuss the very severe 2011 that struck the entire nation. Also, before the conference, we will be having a "Breakfast with Matt" with some tidbits about various weather websites.

The cost of the earlybird registration (collected by Blue Hill Observatory Science Center) is $89; after Sept. 10, it increases to $99...and registration onsite will be $109. This includes a continental breakfast and a delicious hot lunch buffet provided by Rita's Catering of Boston.

Conference website: http://www.sneweatherconf.org Conference agenda/abstracts/biographies:
http://www.sneweatherconf.org/2012Agenda.shtml
Conference registration: http://www.sneweatherconf.org/confregform.cfm

Please share this with all of your colleagues/friends... or anyone else... it is open to the entire general public and is presented at a very understandable level -- it's not a conference just for meteorologists! Thanks and hope to see you there.

-- Glenn Field -WCM; NWS Taunton

570. Improve your 700 and 800Mhz Reception on P25 Simulcast Sites

Yahoo group: Scan-RI
Date: 2012-10-12 03:51:28 UTC
From: ~Bill
Topic: 570 Message: 570

In most cases you will see a significant improvement on 700 and 800 MHz digital and analog systems with this base station beam antenna. The antenna is especially useful for improving reception when monitoring simulcast or multicast systems where strong signals from two or more sites are causing interference with one another. By aiming this antenna at one site you can often negate the effects other simulcast sites.

<http://www.policescanners.net/mmccatalog/274-j55-43768-78932/>
<http://www.policescanners.net/mmccatalog/274-j55-43768-78932/>

Antenna Specs
Frequency Coverage:
Gain (dBi):
Size:
Connector:

824-960MHz
13
50.4" Long
N-Style Jack (Female)

The TerraWave directional Yagi antenna operates in the 824 - 960 MHz frequency range. This Yagi Includes an articulating mount and has a 12 inch pigtail with N-style Jack.

New Product: Indoor 700/800 MHz Yagi Directional Antenna with Desk Stand

<http://www.policescanners.net/mmccatalog/274-j55-43768-78933/>
<http://www.policescanners.net/mmccatalog/274-j55-43768-78933/> Indoor 700/800 MHz Yagi Directional Antenna with Desk Stand
Reg. $89.95 - Sale $69.95

For those who are able to mount the antenna outdoors that's usually the best way to go; however, if you are in an apartment or condo or just can't mount an outdoor antenna on your home, with the included simple stand system that we have created you can easily place the antenna on a desk or shelf and aim the antenna in different directions until the signal improves and interference decreases. The stand is made of wood and PVC and will not affect or deflect the signals in any way.

With 15 elements and 13db of gain this antenna most importantly has a 30 degree beam width making it perfect for aiming at one transmitter while helping to negate the affects of a transmitter located out of the beam. This TerraWave antenna is designed for transmitting between 824 and 960 MHz but for receive purposes it works well done to 740 MHz. The antenna weighs only 3 lbs. and includes a 12 inch pigtail with an N-connector. Included in the special stand package is an N to BNC adapter and a 6' jumper cable for extra length to bring the signal to your scanner.

571. GRE Shut Down

Yahoo group: Scan-RI
Date: 2012-10-18 04:44:15 UTC
From: ~Bill
Topic: 571 Message: 571

FYI

From: MONIX@yahoogroups.com [mailto:MONIX@yahoogroups.com] On Behalf Of rshokler
Sent: Wednesday, October 17, 2012 6:35 PM
To: MONIX@yahoogroups.com
Subject: [MONIX] GRE Shut Down

GRE US Personnel Attempt Restart of GRE Business. Same Customer Service, Warranty and Repair Remains

By Wayne Wilson, former Executive VP GRE

Tuesday, Oct. 16, 2012

FORT WORTH, Texas, Oct. 16, 2012 - In early October, all US GRE Sales and Development team were advised by GRE-Japan that scanner manufacturing was shut down; nearly all GRE personnel in Asia and USA were dismissed. Since that time, the US Team has been working to rebuild the company and get back into production.

Personnel remain at the US office in Belmont, CA, 650-591-1400, charged with the responsibility to sell off all remaining scanner inventory and continue scanner customer service and repair, including warranty repair. It is intended that this office will remain open even once scanner inventory is depleted; this office also distributes the Alinco Amateur Radio product line.

Wayne Wilson, former VP, said, "We know the rumors are out there about GRE and the recent release of a free P25-Phase II (TDMA) firmware update for our PSR-800 last Friday, Oct 12th caused more confusion as scanner advocates asked themselves if GRE was still here or really gone? We were told gone, but we have launched a heroic effort to obtain rights to continue the same products as well as develop new scanners - essentially pick up where it was dropped."

GRE thanks our loyal customers and dealers for past business, and probably under a new brand name, the US team will re-introduce this fine line of scanners sometime soon.

572. Strong Winds, Rain and Sandy

Yahoo group: Scan-RI
Date: 2012-10-28 13:39:17 UTC
From: ~Bill
Topic: 572 Message: 572

With the approach of Sandy for Mon-Tue of this week, just a reminder of the volume of frequencies available out there.

Much of the information in these wikis is the labor of other scannists, who have taken the time to ferret out the Tones and usages.

There is always the need to validate the information as current and still in use.

http://scan-ne.net/wiki/index.php?title=Rhode_Island_Portal

Your Local DPW's if known are under each County, in the Municipal Sections

http://scan-ne.net/wiki/index.php?title=Rhode_Island_Emergency_Managment

http://scan-ne.net/wiki/index.php?title=Rhode_Island_Commercial_Utilities

The Commercial Utilities needs some real decent confirmations of activity.

Any information monitored during the "Sandy" event, Pass back thru the lists and share with your fellow scannists.

Remember to post where you are, as it is still a wide-area and not everything can be hear corner to corner in Rhode Island.

574. North Kingstown fire

Yahoo group: Scan-RI
Date: 2012-11-05 02:52:32 UTC
From: Mark Lewin
Topic: 574 Message: 574

Although I'm an old hand with scanners, I'm new to this area.
I use a BC246T as a scanner and I am familiar with Radio Reference.

I hadn't used my scanner in a while and when I turned it on last week during the storm, I was able to pick up North Kingstown Fire and the analog talk groups for the State Police. However, I picked up nothing for North Kingstown PD. Upon further investigation, I discovered that NKPD had switched over to RISCON. I see that NKFD also has talkgroups assigned on RISCON but clearly are still using their old analog channels.

Does anyone know whether NKFD has definite plans to move to RISCON or are they broadcasting there already and still simulcasting on VHF? Or are there talkgroups pre-assigned but no definite plans to move? I don't have a digital scanner right now but if NKFD switches over, it may force my hand to replace the BC246T.

Mark

575. Weekly FCC grants

Yahoo group: Scan-RI
Date: 2012-11-16 15:13:41 UTC
From: gmitch86
Topic: 575 Message: 575

Hello, group. I put together a weekly list of new and modified FCC licenses:
<http://gmitch86.home.comcast.net/~gmitch86/quick.htm>
and I am adding this state to the site. If it is OK with the owner and the group I will post a note once a week when the new batch is ready. I usually have it ready on Sunday mornings.

576. Weekly FCC grants November 11-17

Yahoo group: Scan-RI
Date: 2012-11-18 09:25:12 UTC
From: Glenn Mitchell
Topic: 576 Message: 576

Something for our newly added groups to know is that most of the modified licenses are entities doing narrowbanding. Narowbanding is supposed to be done January 13th.

The weekly FCC license grants are ready:

Uniden BC125AT for $125.00 Package

The BC125AT is a conventional (non-trunked, and non-digital) 500 channel scanner in 10 banks with 50 channels per-bank. The BC125AT is keyboard or PC programmable and includes full VHF and UHF coverage, including Air and Military Air channels (no 800MHz), as well as full alpha tagging for all channels and PL/DPL subaudible tone control. The scanner is simple to quickly program up for events such as air shows, auto racing, boat racing, and more. The radio is especially perfect for use at the track, at civilian and military air shows and airports, and for rail-fanning. The scanner also includes Close Call which is a great and fun feature for all events, malls and more. We LOVE this scanner. Get both AC and DC USB adapters in this package and save!

588. Narrowbanding - waivers NYC, Philadelphia and Chicago

Yahoo group: Scan-RI
Date: 2012-12-29 14:50:12 UTC
From: ~Bill
Topic: 588 Message: 588

With Narrowbanding upon us [Midnight 12.31.2012] it now appears the FCC is waiving the white flag and allowing Waivers/Delays for various agencies.

Announced earlier this year, was the removal of 470-512 from NB, however many agencies continued to NB due to $$ already allocated as well as grant money being used

and the need to touch the Portable/Mobiles anyway due to 450-470 frequencies being in the radios.

Recently announced are:

One Big one for listeners in New England will be FDNY VHF

The FCC has granted the city a rather significant last minute waiver for numerous VHF and UHF frequencies used by FDNY, NYPD, DOC and DEP.

FDNY
- The VHF frequencies in the 153/154 MHz range were granted a two year waiver, with a new narrowbanding deadline of December 31, 2014.

- The UHF Subway frequencies (460.575 and 460.625) were granted an indefinite waiver, to run co-extensive with the general T-Band wavier the FCC issued in April 2012.

- All UHF MED channels were granted a two year wavier, with a December 31, 2014 narrowbanding deadline.

NYPD
- All non-T-Band UHF frequencies were granted an indefinite waiver, to run co-extensive with the general T-Band wavier the FCC issued in April 2012. These include all of the Tactical frequencies in the 460/465 MHz range, as well as three Parking Enforcement frequencies in the 453 MHz range.

DOC
- All VHF and non-T-Band UHF frequencies were granted a two year waiver, with a December 31, 2014 narrowbanding deadline.

DEC
- All non-T-Band UHF frequencies in the 451/453 MHz range were granted a four month wavier, with a May 1, 2013 narrowbanding deadline.

The full text of the waiver can be found here, in PDF format:

http://hraunfoss.fcc.gov/edocs_publi...-12-2078A1.pdf
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-12-2078A1.pdf>

Philadelphia Granted a 13 Month Narrowbanding Wavier by FCC

The city applied for an 18 month extension to the narrowbanding deadline in September, and was granted 13 months. The waiver affects numerous VHF and UHF frequencies throughout the city. They now have until February 1, 2014 to narrowband the affected frequencies. The full text of the waiver, including the specific frequencies covered by it, can be found here in PDF format:

http://hraunfoss.fcc.gov/edocs_publi...-12-2087A1.pdf
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-12-2087A1.pdf>

Chicago Granted a 2 Year Narrowbanding Wavier by FCC

The city applied for an 2 year narrowbanding waiver in May, which was granted by the FCC. The waiver affects numerous VHF and UHF frequencies throughout the city used by Medical response teams, Street and Sanitation, and VHF conventional stand-alone systems. They now have until January 1, 2015 to narrowband the affected frequencies. The full text of the waiver, including the specific frequencies covered by it, can be found here in PDF format:

http://hraunfoss.fcc.gov/edocs_publi...-12-2079A1.pdf

FCC General Menu Reports 3.1.14 October 7, 2010

591. Weekly FCC grants December 30-January 05

Yahoo group: Scan-RI
Date: 2013-01-07 16:07:54 UTC
From: gmitch86
Topic: 591 Message: 591

Yahoo seems to be having some issues. Sorry if there are double posts.

The weekly FCC grants and applications are ready:
http://home.comcast.net/~gmitch86/quick.htm

--
Glenn Mitchell

592. Weekly FCC grants January 06-12

Yahoo group: Scan-RI
Date: 2013-01-13 22:45:47 UTC
From: Glenn Mitchell
Topic: 592 Message: 592

There are a lot of narrowbanding grants still working their way through
the system:
http://home.comcast.net/~gmitch86/quick.htm

--
Glenn Mitchell

593. Weekly FCC grants January 13-19

Yahoo group: Scan-RI
Date: 2013-01-20 20:04:41 UTC
From: Glenn Mitchell
Topic: 593 Message: 593

The FCC grants and new applications are ready:

http://home.comcast.net/~gmitch86/quick.htm

--
Glenn Mitchell

594. Weekly FCC grants January 20-26

Yahoo group: Scan-RI
Date: 2013-01-27 08:07:48 UTC
From: Glenn Mitchell
Topic: 594 Message: 594

Grants and new applications are ready:
http://home.comcast.net/~gmitch86/quick.htm

--
Glenn Mitchell

595. FCC License Grants for January 2013

Yahoo group: Scan-RI
Date: 2013-02-02 14:59:27 UTC
From: ~Bill
Topic: 595 Message: 595

FCC General Menu Reports 3.1.14 October 7, 2010

596. Weekly FCC grants January 27-February 02

Yahoo group: Scan-RI
Date: 2013-02-03 08:35:59 UTC
From: Glenn Mitchell
Topic: 596 Message: 596

Ready to go:
http://home.comcast.net/~gmitch86/quick.htm

--
Glenn Mitchell

597. Weekly FCC grants February 03-09

Yahoo group: Scan-RI
Date: 2013-02-10 08:18:25 UTC
From: Glenn Mitchell
Topic: 597 Message: 597

New applications and grants:
http://home.comcast.net/~gmitch86/quick.htm

--
Glenn Mitchell

598. Weekly FCC grants February 10-16

Yahoo group: Scan-RI
Date: 2013-02-18 00:30:05 UTC
From: Glenn Mitchell
Topic: 598 Message: 598

Sorry if you had problems getting the link to work last week. Comcast
was fixing or breaking things all weekend:

http://home.comcast.net/~gmitch86/quick.htm

610. NWS Taunton Severe Weather Preparedness Week - Public Information Statements and Links from Monday 4/29/13-Friday 5/3/13

Yahoo group: Scan-RI
Date: 2013-05-04 14:37:49 UTC
From: ~Bill
Topic: 610 Message: 610

Hello to all..

The week of April 29th to May 3rd, 2013 was declared Severe Weather Preapredness Week by NWS Taunton. Below is a link to the NWS Taunton web page for Severe Weather Preparedness Week and a listing of Public Information Statements that were issued for Severe Weather Preparedness Week:

NWS Taunton Severe Weather Preparedness Week Web Site link:

PUBLIC INFORMATION STATEMENT
NATIONAL WEATHER SERVICE TAUNTON MA
855 AM EDT MON APRIL 29 2013

...SEVERE WEATHER PREPAREDNESS WEEK - DEFINITION OF A SEVERE THUNDERSTORM...

THE NATIONAL WEATHER SERVICE IN TAUNTON HAS DECLARED THE WEEK OF APRIL 29 - MAY 3 AS SEVERE WEATHER PREPAREDNESS WEEK IN SOUTHERN NEW ENGLAND. THE FOLLOWING IS THE FIRST IN A SERIES OF FIVE PUBLIC INFORMATION STATEMENTS THAT WILL BE ISSUED THIS WEEK.

A `SEVERE THUNDERSTORM` IS DEFINED AS A THUNDERSTORM THAT PRODUCES WIND GUSTS OF AT LEAST 58 MPH AND/OR HAIL 1.00 INCHES IN DIAMETER OR LARGER...THE SIZE OF A QUARTER. SEVERE THUNDERSTORMS CAN AND OCCASIONALLY DO SPAWN TORNADOES.

A SEVERE THUNDERSTORM WATCH IS ISSUED BY THE STORM PREDICTION CENTER IN NORMAN OKLAHOMA FOR LARGE PORTIONS OF THE REGION WHEN THE POTENTIAL EXISTS FOR SEVERE THUNDERSTORMS. A SEVERE THUNDERSTORM WARNING IS ISSUED BY THE LOCAL NATIONAL WEATHER SERVICE FORECAST OFFICE...SUCH AS IN TAUNTON...WHEN SEVERE THUNDERSTORMS ARE IMMINENT BASED ON RADAR OR ALREADY OCCURRING BASED ON SPOTTER OBSERVATIONS.

NOTE THAT TORRENTIAL DOWNPOURS OF RAIN THAT CAUSE FLOODING ARE NOT PART OF THE DEFINITION OF `SEVERE.` THEY WOULD PROMPT THE ISSUANCE OF FLOOD OR FLASH FLOOD WARNINGS...BUT NOT SEVERE THUNDERSTORM WARNINGS. IT IS IMPORTANT TO NOTE THAT FREQUENT LIGHTNING ALSO IS NOT A CRITERIA FOR WHAT IS TERMED `SEVERE.` OF COURSE LIGHTNING CAN BE EXTREMELY DANGEROUS...BUT EVERY THUNDERSTORM HAS LIGHTNING -- THAT IS WHAT CAUSES THE THUNDER. IT IS NOT PRACTICAL TO ISSUE A WARNING FOR EVERY THUNDERSTORM...THUS WE ISSUE SEVERE THUNDERSTORM WARNINGS FOR THOSE STORMS THAT COULD PRODUCE LARGE HAIL AND DAMAGING WINDS.

NOAA WEATHER RADIOS...WITH WARNING ALARM TONES...WILL ALERT YOU WHEN A SEVERE THUNDERSTORM WARNING IS ISSUED. HOWEVER...THEY WILL NOT SOUND AN ALARM FOR NON-SEVERE THUNDERSTORMS...WHICH STILL CAN PRODUCE DEADLY LIGHTNING. WE RECOMMEND THAT LIFEGUARDS AT

BEACHES AND POOLS HAVE HAND-HELD LIGHTNING DETECTORS. THE SAME IS TRUE FOR ATHLETIC COACHES...CAMP DIRECTORS...AND PARKS AND RECREATION WORKERS. EVEN WITHOUT EQUIPMENT...YOU CAN PROTECT YOURSELF BY MOVING INDOORS TO A PLACE OF SAFETY AT THE FIRST RUMBLE OF THUNDER. IF YOU CAN HEAR THE THUNDER...THE STORM IS USUALLY CLOSE ENOUGH FOR YOU TO HAVE THE POTENTIAL TO BE STRUCK BY LIGHTNING.

PUBLIC INFORMATION STATEMENT
NATIONAL WEATHER SERVICE TAUNTON MA
742 AM EDT TUE APR 30 2013

...SEVERE WEATHER PREPAREDNESS WEEK - THUNDERSTORMS AND LIGHTNING...

THE NATIONAL WEATHER SERVICE HAS DECLARED THE WEEK OF APRIL 29 TO MAY 3 AS SEVERE WEATHER PREPAREDNESS WEEK IN SOUTHERN NEW ENGLAND. THIS IS THE SECOND IN A SERIES OF FIVE PUBLIC INFORMATION STATEMENTS ON VARIOUS TOPICS RELATED TO SEVERE WEATHER AWARENESS.

SUMMERTIME IS A GOOD TIME FOR OUTDOOR RECREATIONAL ACTIVITIES IN NEW ENGLAND. IT IS ALSO THE TIME OF THE YEAR WHEN THUNDERSTORMS ARE MOST LIKELY. THUNDERSTORMS CAN BE BEAUTIFUL...BUT THEY ALSO CAN BE DEADLY. WHILE MANY PEOPLE THINK THEY ARE AWARE OF THE DANGERS OF THUNDERSTORMS AND LIGHTNING...THE VAST MAJORITY ARE NOT.

THERE ARE THREE BASIC INGREDIENTS NEEDED FOR THE FORMATION OF A THUNDERSTORM. THEY INCLUDE LOW-LEVEL MOISTURE...AN UNSTABLE ATMOSPHERE...AND A TRIGGER /A SOURCE OF LIFT/.

LOW-LEVEL MOISTURE -
THIS MOISTURE IS NEEDED FOR CLOUD FORMATION...GROWTH...AND
THE DEVELOPMENT OF PRECIPITATION WITHIN THE CLOUD.

UNSTABLE ATMOSPHERE -
AN UNSTABLE ATMOSPHERE ALLOWS WARM...MOIST AIR NEAR THE
GROUND TO RISE RAPIDLY TO HIGHER LEVELS IN THE ATMOSPHERE
WHERE TEMPERATURES ARE BELOW FREEZING. AN UNSTABLE
ATMOSPHERE ALSO ALLOWS AIR AT HIGHER LEVELS IN THE
ATMOSPHERE TO SINK TO THE GROUND LEVEL RAPIDLY...BRINGING
STRONGER WINDS FROM THE HIGHER LEVELS TO THE GROUND.

A TRIGGER -
SOMETHING TO SET THE ATMOSPHERE IN MOTION.

ALL THREE INGREDIENTS CONTRIBUTE TO THE FORMATION OF A THUNDERSTORM. IN FACT...AS THE MAGNITUDES OF THESE INGREDIENTS INCREASE...SO DO THE CHANCES THAT A THUNDERSTORM COULD BECOME SEVERE.

IN THE SUMMERTIME...LISTEN TO THE LATEST FORECAST AND LEARN TO RECOGNIZE THE SIGNS WHICH OFTEN PRECEDE THUNDERSTORM DEVELOPMENT.
WARM MUGGY AIR IS A SIGN THAT AMPLE LOW-LEVEL MOISTURE IS AVAILABLE FOR THUNDERSTORM

DEVELOPMENT. TOWERING CUMULUS CLOUDS INDICATE AN ATMOSPHERE THAT IS...OR IS BECOMING...UNSTABLE. THE TRIGGER COULD BE CONTINUED HEATING FROM THE SUN...AN APPROACHING FRONT OR SEA BREEZE FRONT...OR A COOLING OF THE UPPER ATMOSPHERE.

ALL THUNDERSTORMS GO THROUGH VARIOUS STAGES OF GROWTH AND DEVELOPMENT. AS A THUNDERSTORM CLOUD CONTINUES TO GROW...SNOW AND ICE BEGIN TO FORM IN THE HIGHER LEVELS OF THE CLOUD WHERE TEMPERATURES ARE BELOW FREEZING...AND ELECTRICAL CHARGES START TO BUILD UP WITHIN THE CLOUD. NEGATIVE ELECTRICAL CHARGES NEAR THE MIDDLE AND BASE OF THE CLOUD CAUSE A POSITIVE CHARGE TO BUILD UP ON THE GROUND UNDER AND NEAR THE THUNDERSTORM. FINALLY...WHEN THE DIFFERENCE BETWEEN THESE CHARGES BECOMES TOO GREAT...A GIANT ATMOSPHERIC SPARK THAT WE CALL LIGHTNING OCCURS.

LIGHTNING IS AN UNDERRATED KILLER...USUALLY CLAIMING ITS VICTIMS ONE AT A TIME. LIGHTNING ALSO LEAVES MANY VICTIMS WITH LIFE-LONG SERIOUS INJURIES. LIGHTNING CAN STRIKE AS FAR AS 10 MILES FROM THE SIDE OF THE THUNDERSTORM CLOUD. IN FACT...MANY LIGHTNING VICTIMS ARE STRUCK BEFORE THE RAIN ARRIVES OR AFTER THE RAIN HAS ENDED AND THE STORM IS MOVING AWAY. MOST VICTIMS ALSO REPORT THAT AT LEAST A PORTION OF THE SKY WAS BLUE WHEN THEY WERE STRUCK.

WHILE INSIDE A HOME OR BUILDING
1. AVOID ANY CONTACT WITH CORDED PHONES.
2. AVOID ANY CONTACT WITH ELECTRICAL OR ELECTRONIC EQUIPMENT OR CORDS THAT ARE PLUGGED INTO THE ELECTRICAL SYSTEM.
3. AVOID ANY CONTACT WITH THE PLUMBING SYSTEM. DO NOT WASH YOUR HANDS...DO NOT WASH THE DISHES...DO NOT TAKE A SHOWER... AND DO NOT DO LAUNDRY.
4. DO NOT STAND NEXT TO A CONCRETE WALL AND DO NOT LIE ON A CONCRETE FLOOR.
5. STAY AWAY FROM WINDOWS...OUTSIDE DOORWAYS...AND PORCHES.

WHILE OUTDOORS
1. PLAN OUTSIDE ACTIVITIES SO THAT YOU MINIMIZE THE RISK OF BEING CAUGHT OUTSIDE IN A THUNDERSTORM.
2. IF YOU HEAR THUNDER...MOVE INSIDE A SAFE SHELTER IMMEDIATELY. GENERALLY...IF YOU CAN HEAR THE THUNDER...YOU ARE WITHIN STRIKING DISTANCE OF THE STORM.
3. IF THE SKY LOOKS THREATENING...MOVE INSIDE IMMEDIATELY. DO NOT WAIT FOR THE FIRST STROKE OF LIGHTNING. IT COULD OCCUR ANYWHERE UNDER OR NEAR THE STORM.
4. STAY INSIDE A SAFE SHELTER FOR AT LEAST 30 MINUTES AFTER THE LAST RUMBLE OF THUNDER WAS HEARD. MANY LIGHTNING VICTIMS ARE STRUCK AFTER THE WORST PART OF THE STORM HAS PASSED.
5. IF YOU ARE CAUGHT OUTSIDE IN A THUNDERSTORM AND CANNOT REACH A SAFE SHELTER...YOU CAN ONLY MINIMIZE YOUR RISK OF BEING STRUCK BY LIGHTNING. IF LIGHTNING STRIKES NEAR YOU...IT WILL MOST LIKELY STRIKE THE TALLEST OBJECT IN YOUR IMMEDIATE VICINITY. FIRST...DO NOT BE THE TALLEST OBJECT IN THE IMMEDIATE VICINITY AND DO NOT BE NEAR THE TALLEST OBJECT. SECOND...GET AS LOW AS POSSIBLE TO THE GROUND...BUT MINIMIZE YOUR CONTACT WITH THE GROUND. DO NOT FULLY LIE ON THE GROUND.

REMEMBER...WHEN IT COMES TO THUNDERSTORM SAFETY...IT IS YOUR OWN ACTIONS THAT WILL DETERMINE YOUR PERSONAL RISK OF BEING KILLED OR SERIOUSLY INJURED BY THE HAZARDS OF A

THUNDERSTORM.

PUBLIC INFORMATION STATEMENT
NATIONAL WEATHER SERVICE TAUNTON MA
840 AM EDT WED MAY 1 2013

...SEVERE WEATHER PREPAREDNESS WEEK - TORNADO SAFETY IN SCHOOLS...

THE NATIONAL WEATHER SERVICE HAS DECLARED THE WEEK OF APRIL 29 TO MAY 3 2013 AS SEVERE WEATHER PREPAREDNESS WEEK. THE FOLLOWING IS THE THIRD IN A SERIES OF FIVE INFORMATIONAL STATEMENTS.

EVERY SCHOOL SHOULD HAVE A TORNADO SAFETY PLAN. THIS PLAN SHOULD ENSURE THAT EVERYONE WILL TAKE COVER WITHIN 60 SECONDS. FREQUENT TORNADO DRILLS SHOULD BE CONDUCTED. THERE SHOULD BE PROVISIONS FOR ALL AFTER-HOURS SCHOOL-RELATED ACTIVITIES.

EVERY SCHOOL SHOULD BE INSPECTED AND TORNADO SHELTER AREAS DESIGNATED BY A REGISTERED ENGINEER OR ARCHITECT. ROOMS WITH EXTERIOR WALLS SHOULD NEVER BE USED AS TORNADO SHELTERS. BASEMENTS OFFER THE BEST PROTECTION. SCHOOLS WITHOUT BASEMENTS SHOULD USE INTERIOR ROOMS AND HALLWAYS ON THE LOWEST FLOOR AWAY FROM WINDOWS.

SCHOOLS SHOULD DELAY ASSEMBLIES OR LUNCH IN LARGE ROOMS WITH WIDE ROOF SPANS...SUCH AS GYMNASIUMS...AUDITORIUMS...AND CAFETERIAS.
THESE ROOMS OFFER LITTLE OR NO PROTECTION FOR TORNADO-STRENGTH WINDS AND THE WIDE SPAN ROOFS CAN COLLAPSE.

STUDENTS AND STAFF SHOULD KNOW THE PROTECTIVE POSITION...SITTING AND FACING AN INTERIOR WALL...ELBOWS TO KNEES...AND WITH HANDS OVER THE BACK OF THEIR HEADS.

EACH SCHOOL SHOULD HAVE A NOAA WEATHER RADIO WITH BATTERY BACKUP.
REMEMBER THE NATIONAL WEATHER SERVICE ISSUES A TORNADO WATCH WHEN CONDITIONS ARE FAVORABLE FOR TORNADO DEVELOPMENT AND A TORNADO WARNING WHEN A TORNADO HAS BEEN SPOTTED OR INDICATED BY RADAR.

IF THE ALARM SYSTEM OF A SCHOOL RELIES ON ELECTRICITY...THERE SHOULD BE AN ALTERNATIVE METHOD TO NOTIFY TEACHERS AND STUDENTS IN CASE OF POWER FAILURE.

PLEASE REMEMBER TO MAKE SPECIAL PROVISIONS FOR FACULTY AND STUDENTS WITH DISABILITIES...THOSE WITH PORTABLE CLASSROOMS...
AND THOSE OUTDOORS.

KEEP CHILDREN AT SCHOOL BEYOND REGULAR HOURS DURING A TORNADO WARNING. ANOTHER GOOD PRACTICE IS TO DELAY DEPARTURE OF SCHOOL BUSES WITH SEVERE THUNDERSTORM WARNINGS TOO... SINCE THEY CAN PRODUCE LARGE HAIL AND DAMAGING WINDS WITHOUT A TORNADO.

WHEN PLANNING ADDITIONS OR NEW SCHOOL BUILDINGS...BE SURE TO INCLUDE PROPERLY DESIGNED TORNADO SHELTERS.

PUBLIC INFORMATION STATEMENT
NATIONAL WEATHER SERVICE TAUNTON MA
1015 AM EDT THU MAY 2 2013

...SEVERE WEATHER PREPAREDNESS WEEK CONTINUES -- DOWNBURST WINDS FROM SEVERE THUNDERSTORMS CAN BE POWERFUL...

THE NATIONAL WEATHER SERVICE HAS DECLARED THE WEEK OF APRIL 29 TO MAY 3 AS SEVERE WEATHER PREPAREDNESS WEEK FOR SOUTHERN NEW ENGLAND.
THE FOLLOWING IS THE FOURTH IN A SERIES OF FIVE INFORMATIONAL STATEMENTS ABOUT SEVERE WEATHER.

WHILE NOT AS NOTORIOUS...OR PERHAPS AS SPECTACULAR TO WITNESS AS A TORNADO...STRAIGHT-LINE WINDS ARE RESPONSIBLE FOR MOST THUNDERSTORM WIND DAMAGE...ESPECIALLY ACROSS SOUTHERN NEW ENGLAND.

A DOWNBURST IS A STRONG AND RELATIVELY SMALL AREA OF RAPIDLY DESCENDING AIR BENEATH A THUNDERSTORM. IT CAN RESULT FROM STRONGER JET STREAM WINDS BEING TRANSPORTED DOWNWARD TO THE SURFACE... OR IT CAN RESULT AS AIR WITHIN THE DOWNBURST IS COOLED SIGNIFICANTLY AS RAIN EVAPORATES INTO INITIALLY DRIER AIR. THIS COOL...THUS DENSE...AIR SINKS RAPIDLY TO THE SURFACE. A DOWNBURST IS DIFFERENTIATED FROM A COMMON THUNDERSTORM DOWNDRAFT BECAUSE THE WINDS IT PRODUCES HAVE THE POTENTIAL TO CAUSE DAMAGE ON OR NEAR THE GROUND. SURFACE DAMAGE PATTERNS HAVE SHOWN THAT WHETHER THE WINDS ARE STRAIGHT OR A LITTLE BIT CURVED...THEY TEND TO SPREAD OUT...OR DIVERGE...CONSIDERABLY AS THEY REACH THE SURFACE. CONVERSELY...DAMAGE PATTERNS RESULTING FROM A TORNADO GENERALLY CONVERGE TOWARD A NARROW CENTRAL TRACK.

INTENSE DOWNBURSTS CAN BE PHENOMENAL. SPEEDS HAVE BEEN CLOCKED AS HIGH AS 175 MPH NEAR MOREHEAD CITY NORTH CAROLINA AND AT 158 MPH AT ANDREWS AIR FORCE BASE IN MARYLAND. CLOSER TO HOME...104 MPH DOWNBURST WINDS WERE MEASURED AT BOTH WORCESTER MASSACHUSETTS ON MAY 31 1998 AND WHITMAN MASSACHUSETTS ON MAY 21 1996. STRONG DOWNBURSTS WILL DEFINITELY CAUSE ROARING SOUNDS AND PEOPLE MAY OFTEN REFER TO A SOUND LIKE A FREIGHT TRAIN...TERMS TYPICALLY ASSOCIATED WITH TORNADOES. ALTHOUGH DOWNBURSTS ARE NOT TORNADOES...THEY CAN CAUSE DAMAGE EQUIVALENT TO THAT OF A SMALL TO MEDIUM TORNADO. AFTER ALL...
WIND IS WIND.

DOWNBURSTS ARE CLASSIFIED AS EITHER MACROBURSTS OR MICROBURSTS...
DEPENDING ON THE AREAL EXTENT OF THE DAMAGING WIND SWATH.
A MACROBURST/S DAMAGE EXTENDS HORIZONTALLY FOR MORE THAN 2.5 MILES.
A MICROBURST IS A SMALL DOWNBURST WITH ITS DAMAGING WINDS EXTENDING
2.5 MILES OR LESS. THE SMALL HORIZONTAL SCALE AND SHORT TIME SPAN OF A MICROBURST MAKES IT PARTICULARLY HAZARDOUS TO AVIATION.

THE NATIONAL WEATHER SERVICE ISSUES SEVERE THUNDERSTORM WARNINGS FOR THUNDERSTORMS THAT ARE EXPECTED TO PRODUCE DAMAGING WIND GUSTS OF
58 MPH OR GREATER...OR HAIL THAT IS ONE INCH OR GREATER IN DIAMETER.

PUBLIC INFORMATION STATEMENT
NATIONAL WEATHER SERVICE TAUNTON MA
1134 AM EDT FRI MAY 3 2013

...SEVERE WEATHER PREPAREDNESS WEEK CONTINUES - LOW-TOPPED THUNDERSTORMS...

THE NATIONAL WEATHER SERVICE IN TAUNTON HAS DECLARED THE WEEK OF APRIL 29 TO MAY 3 AS SEVERE WEATHER PREPAREDNESS WEEK IN SOUTHERN NEW ENGLAND. THE FOLLOWING IS THE FIFTH IN A SERIES OF FIVE INFORMATIONAL STATEMENTS.

WHICH WOULD PRODUCE MORE SEVERE WEATHER...A THUNDERSTORM WITH A TOP OF 30,000 FEET OR ONE WITH A TOP OF 50,000 FEET? THE ANSWER IS THAT IT DEPENDS ON HOW HIGH THE TROPOPAUSE LEVEL IS FOR THAT DAY.

MOST WEATHER OCCURS IN THE TROPOSPHERE...THE LOWEST LAYER OF THE ATMOSPHERE. WHEN A THUNDERSTORM DEVELOPS...IT GROWS TALLER AND EVENTUALLY REACHES THE TROPOPAUSE...THE INTERFACE BETWEEN THE TROPOSPHERE AND THE VERY STABLE STRATOSPHERE. BECAUSE THE

STRATOSPHERE IS STABLE...IT CAUSES THE TOP OF THE THUNDERSTORM TO FLATTEN OUT INTO WHAT IS TERMED AN ANVIL...WHICH IS ROUGHLY AT THE TROPOPAUSE LEVEL.

IN THE HEART OF SUMMER...THE WARMER CONDITIONS LEAD TO A HIGHER TROPOPAUSE LEVEL. IN THE SPRING...THE TROPOPAUSE CAN BE MUCH LOWER. IF THE TROPOPAUSE LEVEL IS 30,000 FEET ON A PARTICULAR DAY...IT MAY ONLY TAKE A 33,000 FOOT STORM TO BECOME SEVERE. ON A DAY WHEN THE TROPOPAUSE IS 50,000 FEET...A 52,000 FOOT STORM COULD BECOME SEVERE.

THUS...WHAT DETERMINES THE SEVERITY OF A STORM IS HOW HIGH ITS CLOUD TOP IS...RELATIVE TO THE TROPOPAUSE LEVEL FOR THAT DAY. A
30,000 FOOT LOW-TOPPED THUNDERSTORM IN NEW ENGLAND CAN PACK JUST AS MUCH PUNCH AS A 50,000 FOOT STORM...IF THE TROPOPAUSE LEVEL IS LOW.

WEATHER BALLOONS ARE LAUNCHED AT 93 SITES ACROSS NORTH AMERICA...
TWICE PER DAY. THESE BALLOONS REPORT BACK TO THE WEATHER OFFICE WHAT THE TROPOPAUSE LEVEL IS. A SIMPLE VISUAL CLUE AS TO WHETHER A STORM MAY BE SEVERE IS TO LOOK FOR A CLOUD TOP THAT MUSHROOMS UP ABOVE THE REST OF THE ANVIL LEVEL...ACTUALLY OVERSHOOTING INTO THE STRATOSPHERE FOR SEVERAL MINUTES. THIS OVERSHOOTING TOP IS INDICATIVE OF A VERY STRONG UPDRAFT AND IT IS YOUR VISUAL CLUE THAT A STORM MAY BE SEVERE...PRODUCING LARGE HAIL AND DAMAGING WINDS.

Portsmouth seeks new ferry operator
Current Prudence Island ferry service ends Dec. 1

Providence Eyewitness News
Updated: Wednesday, 15 May 2013, 11:30 AM EDT
Published : Wednesday, 15 May 2013, 11:30 AM EDT

PORTSMOUTH, R.I. (AP) -- Residents of Prudence Island are looking for a new ferry operator, after the company that currently runs ferries said service would stop on Dec. 1.

The Newport Daily News reports that the Portsmouth Town Council is trying to help by voting Monday to issue a "request for information" from those interested in operating ferry service to the island.

A few dozen people live on the island in the middle of Narragansett Bay.

Bristol Ferry says it will stop running the service, which currently runs several times a day between the island and Bristol.

Portsmouth Town Administrator John Klimm tells the newspaper the ferry is a lifeline to island residents, and that there is no other issue of greater importance to them than finding someone to run ferry service.

627. Martin Scorsese-produced movie 'Bleed for This' headed to Rhode Island

Yahoo group: Scan-RI
Date: 2013-07-14 15:50:32 UTC
From: ~Bill
Topic: 627 Message: 627

http://www.onlocationvacations.com/2013/07/13/martin-scorsese-produced-movie-bleed-for-this-headed-to-rhode-island/?utm_source=feedburner&utm_medium=email&utm_campaign=Feed%3A+olv+%28On+Location+Vacations%29

Back in May Martin Scorsese signed on as an executive producer of a new movie revolving around the life of Rhode Island boxing legend Vinny Paz, now it seems as if the project will be headed to Rhode Island for principal shooting.

The movie which is tentatively titled Bleed for This ☐tells the story of how Paz recovered from a near-fatal car crash, then went on to win three world boxing titles☐ and is expected to start filming in fall this year.

The project is run by East Greenwich native Chad Verdi, who purchased the rights to the Vinny Paz story back in in 2009. Verdi said that so far five different writers have worked on the project, in addition to Scorsese he had previously signed on scriptwriter and director Ben Younger.

Readers might know that Scorsese also directed ☐Raging Bull☐ which went on to win two Academy Awards.

The movie is scheduled for release in 2016.

638. New England Spectrum Management 2m Band Plan Proposal

Yahoo group: Scan-RI
Date: 2013-09-08 14:05:19 UTC
From: ~Bill
Topic: 638 Message: 638

From: mass_races_ares_skywarn_general@yahoogroups.com
[mailto:mass_races_ares_skywarn_general@yahoogroups.com] On Behalf Of Terry M. Stader - KA8SCP
Sent: Sunday, September 08, 2013 9:50 AM
To: MRAS Leaders List; MRAS General List
Subject: [mras_general] Fwd: New England Spectrum Management 2m Band Plan Proposal

I encourage all EmComm users please provide input on any all local 2 meter simplex you may use and report the same as indicated below.

thanks,

Terry

Begin forwarded message:

From: "Bob, K1IW" <k1iw@...>
Date: September 8, 2013 9:26:00 AM EDT

Sorry if this post is slightly off-topic. We are trying to reach simplex operators located in New England.

At its annual meeting on August 24, New England Spectrum Management, the amateur radio repeater coordinator for Massachusetts, New Hampshire, Rhode Island, and Maine, announced a proposal to modify the 2m band plan to include new repeater channels with outputs from 146.41 to 146.49 and inputs 147.41 to 147.49. Also included was a test pair at 147.505 with a 146.505 input. In the near future, there will be a vote by the NESMC membership on this band plan. There is no doubt that some existing simplex users may be affected by this change.

In order to gauge the impact of this change, NESMC has attempted to find as many simplex users as it can. We are also seeking additional input from the amateur community. If this interests you, you may find additional information about the change at http://www.nesmc.org/2013-2m.pdf. You may be interested in joining a discussion group set up for this purpose http://groups.yahoo.com/group/nesmc.

* Please feel free to redistribute this notice to other group or individuals - we are trying to reach as many people as possible.

* In our attempts to reach as many people as possible, we are posting this to several mailing lists. Please accept my apologies if you receive this more than once.

73,

Bob DeMattia, K1IW

NESMC 2m Coordinator

642. Providence Cyclocross Festival, Prov (Fri, 10/4 - Sun, 10/6)

Yahoo group: Scan-RI
Date: 2013-09-30 14:11:45 UTC
From: <cmpsa1@...>
Topic: 642 Message: 642

Greetings:

For those of you interested in scanner listening this coming weekend (Fri-Sun, Oct 4-6), the "Providence Cyclo-cross Festival (http://providencecrossfest.com)" will be in Roger Williams Park. Cyclo-cross is bicycle racing, but using mountain bikes on a closed course, similiar to an obstacle course. In addition, there is an expo as well with mountain bike clinics, kids event, etc.

Anyhow a special temporary authority (STA) has been applied for for some frequencies, but the rest is explained in the attachment.

http://wireless2.fcc.gov/UlsApp/ApplicationSearch/applServiceSpecific.jsp?applID=7861804

attachment:

https://wireless2.fcc.gov/UlsEntry/attachments/attachmentViewRD.jsp?applType=search&fileKey=557442993&attachmentKey=19225427&attachmentInd=applAttach

Happy scannering, as it will be busy with ~5,000 spectators from all over.

646. Weekly grants October 13-19

Yahoo group: Scan-RI
Date: 2013-10-20 06:42:12 UTC
From: Glenn Mitchell
Topic: 646 Message: 646

It's a light week but it's better than nothing. Although it looks like new land mobile licenses were not granted during the shutdown, there were about 167 new licenses (WQSJ742 to WQSK213) issued on the cutoff week. Also, around 730 non-new land mobile licenses had grants during the shutdown. A lot of this is automated. Most likely a few hundred of those were license modifications. I'm going to look into pulling the "lost" grants from the full database but it may be too much of a pain to do. I'll let you know.

659. questions about RISCON

Yahoo group: Scan-RI
Date: 2013-11-23 17:42:48 UTC
From: Mark Lewin
Topic: 659 Message: 659

I'm a long time scanner listener but relatively new to RI.

My current scanner is an analog model and I'm reluctant to shell out the money for a digital scanner until it becomes "necessary".

I'm in North Kingstown and, recently, NKPD went digital. Although the FD is still broadcasting on VHF-High, I've been told that they are simulcasting on RISCON (TG 1280 and 1281). The rumor is that they will switch over to digital only, at some (undisclosed) time in the not too distant future.

My questions are this:

Can someone with digital capability check TG 1280 and 1281 and verify that NKFD is really simulcasting?

Do the RISCON towers act as repeaters? What I mean is, if I have good reception from the south tower, will I be able to clearly receive all RISCON transmissions regardless of where in the state they originate? Despite the small size of RI, I was surprised to find that I cannot receive signals from Pawtucket, East Providence and the Bristol and Barrington areas.

By the way, I seem to recall reading somewhere (can't remember where), that there are actually three main RISCON towers, one north, one south and a third in the city of Providence. Sorry I can't be more specific but I remember reading that a few years back.

661. questions about RISCON

Yahoo group: Scan-RI
Date: 2013-11-24 16:19:49 UTC
From: ~Bill
Topic: 659 Message: 661

I don't monitor RISCON, too far away, however..and I can see the confusion for users going from conventional to a trunked system (not Analog to P25)

There are 3 Zones, each Zone has multiple towers all simulcasting the signal. Some folks have used a beam aimed at the repeater site vs using an omni antenna

Scanners sometimes cannot handle the multipath that occurs, compare to a Commercially sold Two-way radio

I'll leave the VHF to 800 TG to the locals. However sometimes it has been the Dispatch side only (keying up the two channels via the console) or a Patch (where you also hear the mobiles/portables)

Scan New England might provide some more info too.

Yes the North,South and Providence towers are repeaters what comes in goes out. I have had problems reciving some TG's but am able to receive Woonsocket TG's in Portsmouth.

Subject: Storm Coordination Message #1

Hello to all..

..A Winter Storm is poised to affect much of Southern New England with Heavy Snow and a potential for a wintry mix of precipitation..
..A Winter Storm Watch Is Now In Effect from Saturday Afternoon to Sunday Morning for Southern New Hampshire, Northern Connecticut, Providence and Western Kent Counties of Northern Rhode Island and in Massachusetts from Northern Bristol and Northern Plymouth Counties north and west to the state line. The potential exists for 6-12 inches of snow followed by a trace to a tenth inch of ice. Advisory level snow and ice (2-6" along with a trace of ice) are possible from just south of the Winter Storm Watch area to the Cape Cod Canal before a changeover to rain with 1-2" of snow/ice on Cape Cod and the Islands before a change over to rain. Uncertainty still exists on exact snowfall and icing amounts which will depend on any changeover in precipitation..
..SKYWARN Activation with Ops at NWS Taunton are possible to likely during Saturday Afternoon/Night and Sunday Morning..

A Winter Storm that has been modeled for several days is likely for Southern New England. There has been some question as far as the intensity of the storm system and precipitation type but heavy amounts of precipitation are likely. A Winter Storm Watch is in effect for Southern New Hampshire, all of interior Massachusetts including the Metro Boston area and Northeast Coastal Massachusetts, Northern Connecticut, and Providence and Western Kent Counties of Rhode Island. The initial preliminary totals is for 6-12" of snow over the Winter Storm Watch area followed by a changeover to sleet and freezing rain producing a trace to a tenth inch of ice accumulation. Areas south and east of the Winter Storm Watch area are likely to see a period of snow and ice with 2-6" of snow accumulation and a trace of ice before a changeover to rain from just south and east of the Winter Storm Watch area to the Cape Cod Canal with 1-2" of snow across Cape Cod and the Islands before a changeover to rain. There remains uncertainty as far as exact snow and ice totals across the region. Models had trended colder with this storm for a time but are now implying more mixed precipitation particularly in Southeastern New England though this could extend further

north and west. Future model runs should better delineate the rain/snow/ice line across the region.

SKYWARN Activation with Ops at NWS Taunton are possible to likely during Saturday Afternoon/Night and Sunday Morning. Another coordination message will be issued by 11 PM this evening. Below is the NWS Taunton Winter Storm Watch Statement, Hazardous Weather Outlook and NWS Taunton Snowfall Map (the map breaks down the snowfall ranges more specifically):

NWS Taunton Winter Storm Watch Statement:
http://kamala.cod.edu/ma/latest.wwus41.KBOX.html

NWS Taunton Hazardous Weather Outlook:
http://kamala.cod.edu/ma/latest.flus41.KBOX.html

NWS Taunton Snowfall Map:

http://www.turnto10.com/story/24407322/air-show-returns-for-2014

The Rhode Island National Guard said Thursday that the 2014 Open House and Air Show will be held the weekend of May 17-18.

Last year's air show was canceled as a result of federal budget cuts called sequestration

681. USS Forrestal (CV-59) - headed for the Scrap Yard

Yahoo group: Scan-RI
Date: 2014-02-05 22:48:07 UTC
From: ~Bill
Topic: 681 Message: 681

http://en.wikipedia.org/wiki/USS_Forrestal_(CV-59)

PHILADELPHIA, Feb. 5 (UPI) -- The USS Forrestal, the world's most advanced aircraft carrier when it was launched in 1955, began its last voyage to the scrapyard Tuesday.

The huge vessel left the Philadelphia Navy Yard before dawn, escorted by tugboats, Defense News reported. It is to be towed to Brownsville, Texas

683. National Grid is prepared for winter storm "Pax"

Yahoo group: Scan-RI
Date: 2014-02-15 16:26:45 UTC
From: ~Bill
Topic: 683 Message: 683

ng-logo-yellow-tag <https://cdn.questline.com/file/b66e49bf-7235-4e8f-9843-2078c4ee4f85>

National grid is prepared for winter storm "Pax"

National Grid crews are prepared for yet another nor'easter that has begun in New England. As always, we urge customers to watch out for their own wellbeing and the safety of utility crews working during the storm.

Forecasts are calling for heavy, wet snowfall throughout our region. We expect significant accumulations inland and high winds with mixed precipitation in coastal areas, all of which could cause tree damage and the potential for power outages.

Should you lose power, outages can be reported on 1-800-465-1212. You can also report or check the status of your outages, view outage maps and important safety information on the National Grid mobile app available in iTunes and GooglePlay stores.

For your safety please remember:

· People who depend on electric-powered life support equipment, such as a respirator, should let National Grid know. To register as a life support customer, call the company’s Customer Service Center at 1-800-322-3223.

· Never touch downed power lines, and always assume that any fallen lines are live electric wires. If you see one, report it immediately to National Grid at 1-800-465-1212 or your local emergency response organization.

· If you use a generator to supply power during an outage, be sure to operate it outdoors. Before operating generators, disconnect from National Grid's system by shutting off the main breaker located in the electric service panel. Failure to do this could jeopardize the safety of line crews and the public.

· NEVER burn wood or coal in an indoor area without proper venting. Be sure space heaters and wood stoves are in good condition, have adequate ventilation and are used in strict compliance with the manufacturer's instructions. Portable gas and charcoal grills intended for outside use should never be used indoors, or even inside an open garage.

· NEVER use your gas range to heat your apartment or house. Your range's oven and top burners are designed to cook your food, NOT to heat your home. Prolonged use can reduce oxygen levels in the home and contribute to unusually excessive levels of carbon monoxide.

· If you suspect carbon monoxide is present in your home, go outside immediately and call 911. After calling 911, call the appropriate National Grid emergency contact number: 1-800-233-5325 in Massachusetts and 1-800-640-1595 in Rhode Island.

· Natural gas customers should closely inspect areas around and over gas meters, service hook-ups and vents for ice and snow that could damage equipment or build up to prevent carbon monoxide from properly venting.

Stay Connected: Before, during and after the storm

In addition to our mobile app and website, National Grid provides a number of ways for you to stay informed during the storm. For major storms, National Grid sends a text message out to customers that opt in for emergency messages. To sign up, text the word STORM to NGRID (64743). You can opt out at any time by texting the word STOP to 64743. We do not charge for this service, however standard charges may apply based on your service provider.

Many of our customers have also opted to stay in touch with us on Facebook or <http://email.ENGAGEMSG.COM/wf/click?upn=UaI3GDzua9JOkEwmRuZ0y9QcmLfnjKQqcHaThvAcP2bY1f-2B7yljeutBKbKzKfTwF_hfIqhjxrH5PXl2rHT1sLDTuZKfn7UDOZSpeZ2bs72vl8-2FHbvsuSdKA9jn9IBjMIq-2FhOp18FiZbpZ09lrHri0Rosbj0WKq5z9ZC9Fayd2tECPzox4TPj0gF27Rvqb65OWxu7JnNa-2FqONr46W0nbxG9pAExQHZXuItyh-2B4fL1-2BzGQCeEkUVT2Un4S3n-2BTLaKBQa41Y6sahUxp4lvy-2FEgmXh68s0SFyR7bVIlYkr6P-2BSItr89kDPBSmwfvRhaQ5-2BVetyNA0N1NWuOlXV7kKP9PR-2F0ad2X5z1W47tiIGc-2BqdmWUHaRedQUJrpj2ymvhmYtcTYYy8KAsRm3MDpaoPUb1OfMGOtKPU8gBymJ6qCa96VEc-3D> Twitter where we often provide safety tips, storm updates, images from the field.

FCC General Menu Reports 3.1.14 October 7, 2010

688. Weekly FCC grants March 02-08

Yahoo group: Scan-RI
Date: 2014-03-09 10:22:17 UTC
From: Glenn Mitchell
Topic: 602 Message: 688

I added the antenna data from the license. It still needs to be cleaned
up a little. HTT is height to tip and HAAT is height above average terrain.

The weekly FCC grants and new applications are ready:

697. Weekly FCC grants April 27-May 03

Yahoo group: Scan-RI
Date: 2014-05-04 10:20:38 UTC
From: Glenn Mitchell
Topic: 697 Message: 697

On some there is now a link that will take you to the transaction log
for modified licenses. This will tell you what was actually modified.
I found a couple of links that were wrong but I should get it fixed by
next week.

CNN
May 9, 2014 -- Updated 1313 GMT (2113 HKT)

(CNN) -- For the second time in two years, the U.S. Navy is parting with one of its aircraft carriers for a penny.

The Navy announced Thursday it's paying ESCO Marine of Brownsville, Texas, one cent to take the former USS Saratoga off its hands for dismantling and recycling.

The warship was decommissioned in 1994. It is now at Naval Station Newport in Rhode Island and is expected to be towed to Texas in the summer, the Navy said.

The 56,000-ton Saratoga was commissioned in 1956 and saw action off North Vietnam in 1972 and 1973.

In 1985, fighters from the Saratoga helped capture terrorists who hijacked the cruise ship Achille Lauro in the Mediterranean, forcing a jetliner carrying them to land at an air base in Sicily.

The carrier was also part of Operation Desert Storm in 1991 and air operations over the Balkans in 1992, 1993 and 1994, according to Navy records.

The Saratoga will follow the former USS Forrestal to dismantling in Texas. That ship was towed to All Star Metals of Brownsville earlier this year, with the Navy paying a penny to the ship recycler under a contract awarded last October.

The recyclers make money from selling the metal they salvage from the warships.

A third carrier, the former USS Constellation, is expected to meet a similar fate soon, according to a Navy statement.

Subject: Re: [Scan-Mass-East] Whistler scanners are now available

Essentially another repeat story about Whistler and their not yet available scanners. On RR there is a post about their appearance at Dayton. Allegedly they will produce units for RS first, then their revamped GRE products later this year. Also they are supposed to have DMR capable scanners in 2016. We'll see what they actually come out with. Of course Uniden isn't going to stand still either.

715. Untitled Woody Allen Project looking for extras in Rhode Island

Yahoo group: Scan-RI
Date: 2014-07-22 21:26:33 UTC
From: ~Bill
Topic: 715 Message: 715

http://www.onlocationvacations.com/2014/07/21/untitled-woody-allen-project-looking-for-extras-in-rhode-island/?utm_source=feedburner&utm_medium=email&utm_campaign=Feed%3A+olv+%28On+Location+Vacations%29

Woody Allen□s latest movie, starring Emma Stone, has started filming in
Rhode Island and now they are looking for extras.

Casting agency LDI Unlimited has put out a casting call for extras in the
Newport, RI area.

Background actors will be hired through the summer but they are especially
in need of extras on Aug. 11 and 12.

If you□re interested, send your pictures and resumes to office@...
with □CLASSROOM□ in the subject line.

Potential Frequencies can be found at
http://scan-ne.net/wiki/index.php?title=Movie_Productions

721. Ex-USS Saratoga Departs Rhode Island on Final Voyage

Yahoo group: Scan-RI
Date: 2014-08-23 22:16:53 UTC
From: ~Bill
Topic: 721 Message: 721

Departed on Thursday

Thursday, August 21, 2014

Hi All,

I know this is off topic but significant news as the ex-USS Saratoga departed Rhode Island today to join her sister, the ex-USS Forrestal, at Brownsville, Texas for dismantling.

New Scanners from Whistler Group

Great scanners at affordable prices

Hello William,

We are happy to announce that many of the popular GRE scanners are back but the design and technology is now manufactured and sold by the Whistler Group. Whistler is well known for making some of the best radar detectors on the market for over 40 years. Check out their current product line below. Each Whistler radio can also be programmed for your home area with Scanner Master’s HomeTown Programming Services.

<http://scannermaster.us4.list-manage.com/track/click?u=ad28a2fa3d173d345458ba188&id=89dc3a86f6&e=ce1ace32a5>

737. Movie Filming in RI

Yahoo group: Scan-RI
Date: 2014-11-08 16:15:53 UTC
From: ~Bill
Topic: 737 Message: 737

>
http://www.onlocationvacations.com/2014/11/05/extras-needed-in-rhode-island-for-bleed-for-this-starring-katey-sagal-miles-teller-all-are-welcome-to-register/?utm_source=feedburner
<http://www.onlocationvacations.com/2014/11/05/extras-needed-in-rhode-island-for-bleed-for-this-starring-katey-sagal-miles-teller-all-are-welcome-to-register/?utm_source=feedburner&utm_medium=email&utm_campaign=Feed%3A+olv+%28On+Location+Vacations%29>
&utm_medium=email&utm_campaign=Feed%3A+olv+%28On+Location+Vacations%29 <

Next week a new movie starring Miles Teller, Aaron Eckhart, Katey Sagal, and Ciaran Hinds will be filming in Rhode Island and they are looking for fans to fill in the crowd for a boxing scene.

This isn't a paid gig but all are welcome to register and be a part of movie history!

Bleed For This, which follows the rise of world champion boxer Vinny Pazienza, is being directed by Ben Younger and executive produced by Martin Scorsese. Paz famously recovered from a near-fatal car crash before winning three world boxing titles.

Extras are needed for a shoot taking place at Twin River Casino in Lincoln, RI on Tuesday, Nov. 11 and Wednesday, Nov. 12.

Two shifts are currently available for extras, from 6 a.m. to 12 p.m. and from 1 p.m. to 7 p.m. on Wednesday. The only requirements are that participants must be 18 years of age, have a valid driver's license, and they must wear 1980s attire with no logos. There will also be giveaways for TVs, premiere tickets, and memorbilia throughout the day.

Frequencies found for prior movies filmed here in New England can be found at

http://scan-ne.net/wiki/index.php?title=Movie_Productions

Altho probably best to Search 450-470 Mhz

Also for those interested here are the Casino Ops

http://scan-ne.net/wiki/index.php?title=Twin_River_(AKA_Lincoln_Park)

761. Weekly FCC grants March 08-14

Yahoo group: Scan-RI
Date: 2015-03-15 18:05:29 UTC
From: Glenn Mitchell
Topic: 761 Message: 761

Common digital emission codes are now in bold. Emission codes associated with P25 Phase II now say "(P25 Phase II)". This is only data off of the license, it does not mean that a license will be Phase II next week. There are several sources of emission codes on the web including this one from our friends at Radio Reference:
http://wiki.radioreference.com/index.php/Emission_Designator

Have a good weekend!

764. FW: (CARMA) Spring antenna maintenance

Yahoo group: Scan-RI
Date: 2015-04-02 00:51:11 UTC
From: ~Bill
Topic: 764 Message: 764

From our friends out in Chicago, with the warm weather approaching

Bill - N1KUG

Boston, Mass

Cruise Ship Frequencies

http://scanmaritime.com/

From: carmachicago@yahoogroups.com [mailto:carmachicago@yahoogroups.com]
Sent: Wednesday, April 01, 2015 10:35 AM
To: CARMA List
Subject: (CARMA) Spring antenna maintenance

It is that time of year again! Time to maintain the antenna farm. If you have outside antennas then you need to remember these tips to keep them working at peak efficiency.

First: Don't forget to rotate your coax! This is probably the task most scanner listeners forget to do. This should be done regularly, once a year is best. This is most important for monitoring antennas since these are used in only a single direction. Just like car tires, antenna coax gets worn unevenly over the years, a regular rotation keeps the wear even and extends the life. Two-way radio antennas do not suffer from this as much since there is RF flowing in both directions and that tends to even out the wear.

Second: make sure your antennas are clean! Dirty antennas do not work as well as clean antennas. Dirt, bird poop, and other detritus block signals from reaching your antenna and then your radio. A quick rinse from the garden hose will loosen most of the crud but a good annual wax will make this a moot point. Be sure to use a good, high-quality wax specifically formulated for receiving antennas. Automobile wax will work but since it is formulated for painted surfaces it will not adhere as well as antenna wax.

Last: Remember that when working on the roof or the tower to rotate your coax and clean and wax your antennas to be careful. Falling off the roof is not fun but these accidents do help keep firefighters, EMT's and doctors in business. Being more careful doing these tasks will help keep your insurance rates low and your body intact.

Just remember me at Christmas time :) , guys/gals :)

Glad to pass along the Sale info and some of you got to spend your Birthday and Tax Refunds

Guess it is worth going to the web site from time-time to see what is going on-sale

Bill - N1KUG

Subject: [NewHampshireScanner] Re: [Scan-Mass-East] Radio Shack Clearence Sale[s]

Thanks Bill for the info, You need to call your nearest Radio Shack because the information on the RS web site may not be accurate. I did call and they had two of the pro-668 left so they put one asside for me and within a few hours it was mine...great little scanner for $250. I'm not sure why Radio Shack is trying to get out of the radio business, some of the cell phone companies are pulling out of Radio Shack. It was interesting to see people walk in the RS store and order some small electronic component that you can't get anywhere else. It was also nice to walk in a fully stocked store....like a kid in a candy store! Thanks again. Ed Caron ka1rsy

Topic: 772 Message: 772

VOLVO OCEAN RACERS ARRIVING NEWPORT, RI

The only North American stopover of the Volvo Ocean Race will be in Newport, Rhode Island, May 5-17. The twelve-day Stopover will be a public celebration and will include entertainment, a marine Exploration Zone, kid’s activities, a food court, team compounds, sponsor pavilions, a theater, up-close viewing of the race boats, and an In-Port Race. The start of the next leg of the race Newport to Lisbon, Portugal will take place within yards of the shoreline at Fort Adams State Park. For more information visit:

Volvo Ocean Race Newport Rhode Island http://www.VolvoOceanRaceNewport.com.

Subject: [SKYWARN_Announce] Special Announcement: 2.3 Magnitude Earthquake 1 Mile/2 Kilometers Southeast of Provdience RI

Hello to all..

A small earthquake/earth tremor, magnitude 2.3 on the Richter Scale occurred at 343 AM local time 1 mile/2 Kilometers Southeast of Providence RI. Details including maps can be seen via the following link from the United States Geological Survey:

http://earthquake.usgs.gov/earthquakes/dyfi/events/ld/60096961/us/index.html

If you felt this earthquake, the USGS has a questionnaire that can be filled out. The link provided has an embedded link that says "Did you feel it - tell us!" and has questions that can be answered and a comment field for other comments that you'd like to make if you felt this earthquake. This information can be used in future research on earth tremors and earthquakes in Southern New England. No damage or injuries have been reported.

Respectfully Submitted,

Robert Macedo (KD1CY)

788. Weekly FCC grants July 19-25

Yahoo group: Scan-RI
Date: 2015-07-26 11:20:16 UTC
From: Glenn Mitchell
Topic: 788 Message: 788

Hello, everyone. Comcast is discontinuing personal web pages and all files will be deleted on October 8th. If you want any files from the archives, download them soon:
http://home.comcast.net/~gmitch86/archive/archive.htm

I put up another site here:
http://fccgrants.x10host.com/quick.htm
Since this is a free web hosting site, I will probably only put up a few weeks of past grants. I am also going to put a backup site here:
http://fccgrants.neocities.org/quick.htm

If you have a website with Comcast, you are going to have to figure out what to do with it.

The weekly FCC grants and new applications are ready:
http://home.comcast.net/~gmitch86/quick.htm

Past weeks are here:
http://home.comcast.net/~gmitch86/archive/archive.htm

Or Google "Quick Scanner Links"

797. Special Announcement: FEMA Advisory - FEMA to Conduct Test of the Emergency Alert System (EAS) in New England - Wednesday 9/16/15 at 220 PM EDT

Yahoo group: Scan-RI
Date: 2015-09-16 09:59:54 UTC
From: Dunn-CHS, William (CHS)
Topic: 797 Message: 797

Hello to all..

The following is a complete announcement from FEMA regarding a test of the Emergency Alert System as part of National Preparedness Month:

FEMA ADVISORY
FEMA To Conduct Test of the Emergency Alert System (EAS) in Maine, New Hampshire, Vermont, Massachusetts, Connecticut, and Rhode Island September 14, 2015

As part of the Federal Emergency Management Agency's (FEMA's) mission to strengthen preparedness and resiliency during National Preparedness Month, FEMA, state and tribal emergency managers, and state broadcasters associations will conduct a test of the Emergency Alert System (EAS). The EAS will be tested in Maine, New Hampshire, Vermont, Connecticut, Massachusetts, and Rhode Island on Wednesday, September 16, 2015, at 2:20 P.M. Eastern Daylight Time, and will last approximately one minute.

The test will be seen and heard by the public over radio, television and cable TV systems, with only minor disruptions in programming. It's designed to occur during the state's regular monthly EAS test conducted by local broadcasters in Maine, New Hampshire, Vermont, Connecticut, Massachusetts and Rhode Island. (It's also possible the EAS test could be heard or seen in upper New York, as some stations in New England can be received across the New York border.)

The message will be the same as typical EAS test messages, with the word "national" added to the message: "This is a national test of the Emergency Alert System. This is only a test..." The test is designed to have limited impact on the public, with only minor disruptions in radio and TV programs.

The test requires that participating radio and television stations make a minor configuration change to their station EAS equipment to receive a National Periodic Test (NPT) code message. EAS stations will receive and broadcast a national test message from FEMA's system known to broadcasters and state alerting officials as the Integrated Public Alert and Warning System or IPAWS. Participation in the test on September 16th is completely voluntary for radio and TV stations and cable operators in Maine, New Hampshire, Vermont, Connecticut, Massachusetts and Rhode Island. There is no Federal Communications Commission regulatory liability for stations that choose not to participate. Comprehensive testing and analyzing of alerting technologies will ensure that an effective and reliable system will exist to alert members of tribes, and residents in all six states if an emergency occurs.

The FEMA Integrated Public Alert and Warning System also supports capabilities for state and local alerting authorities to distribute emergency alerts to cellular phones as Wireless Emergency Alerts (WEA), to broadcast non-weather emergency information to NOAA All-Hazards Weather Radios, and to publish emergency information and alerts to the Internet

connected to unique alerting systems that monitor and redistribute alerts through various Internet applications, services, or websites. Internet redistributors of emergency information can include Facebook, Twitter, websites, digital signs and specialized applications (APPS). Devices that serve people with disabilities and others with access and functional needs can also pick up the redistributed alert messages through the FEMA All-Hazards Information Feed partners. While IPAWS supports all of these other capabilities, the test on September 16 will only include the Emergency Alert System through radio, television, and cable TV systems.

In 2007, FEMA began modernizing the nation's public alert and warning system by integrating new technologies into the existing alert systems. The new system, known as the Integrated Public Alert and Warning System (IPAWS) became operational in 2011 and today supports over 700 local, state, and federal users and uses a standardized message format to enable public safety alerting authorities to send the same alert and warning message over multiple communication pathways at the same time to citizens in harm's way, helping to save lives.

Public safety officials need to be sure that in times of an emergency or disaster, they have methods and systems that will deliver urgent alerts and warnings to the public when needed. Periodic testing of public alert and warning systems is a way to analyze and determine what improvements in technologies need to be made.

September is also National Preparedness Month, and FEMA reminds the residents of Maine, Vermont, New Hampshire, Connecticut, Massachusetts and Rhode Island to be informed about emergencies that could happen in their community. FEMA's theme this year: Don't Wait. Communicate. Make Your Emergency Plan Today. FEMA is encouraging the public to take action now and to make a plan with your community, your family, and for your pets. Plan how to stay safe and communicate during the disasters that can affect your community. Get involved. Build an emergency supply kit. Go to www.READY.gov<http://www.READY.gov> for more information.

For more information on FEMA's Integrated Public Alert and Warning System, go to: www.fema.gov/ipaws<http://www.fema.gov/ipaws>. For more preparedness information, go to www.ready.gov<http://www.ready.gov>.

FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.

809. Movie Filming

Yahoo group: Scan-RI
Date: 2015-11-01 12:50:46 UTC
From: ~Bill
Topic: 208 Message: 809

FYI - Warwick you have a SET, somewhere for a Movie being filmed

Likely it's http://www.imdb.com/title/tt2670882/?ref_=fn_al_tt_1

Bill - N1KUG

FCC General Menu Reports 3.1.14 October 7, 2010

811. Weekly FCC grants November 01-07

Yahoo group: Scan-RI
Date: 2015-11-08 19:33:20 UTC
From: Glenn Mitchell
Topic: 811 Message: 811

I'm not going to do the frequency data for the mega-licenses such as Costco, Concentra and American Time & Signal. They just take too long to process.

The weekly FCC grants and applications are ready:
http://fccgrants.x10host.com/quick.htm

The backup site is here:
http://fccgrants.neocities.org/quick.htm

And past weeks are here:

Subject: [SKYWARN_Announce] Special Announcement: El Nino and Its Impacts on Southern New England Weather Presentation Tonight - 1/25/16 at 7 PM at North Providence Public Library

Hello to all.. There will be a presentation regarding El Nino and Its Impacts on Southern New England Weather Presentation, today, Monday January 25th, 2016 at 7 PM at the North Providence Public Library in North Providence Rhode Island. The presentation will be given by David Vallee Hydrologist-In-Charge of the Northeast River Forecast Center. All are welcome to attend. We apologize for the late notice on publicity understanding this notice is going out the same day as the presentation. We were notified of the presentation this weekend due to Dave's travel schedule this month and with volunteer operations for the blizzard, this was the earliest to get a notification out. If people have a free night they are looking to fill, this will be an interesting and informative presentation on El Nino and how it affects Southern New England weather. Respectfully Submitted, Robert Macedo (KD1CY) ARES SKYWARN Coordinator Eastern Massachusetts ARES Assistant Section Emergency Coordinator Home Phone #: (508) 994-1875 (After 6 PM) Home/Data #: (508) 997-4503 (After 6 PM) Work Phone #: 508-346-2929 (8 AM-5 PM) Email Address: rmacedo@rcn.com http://ares.ema.arrl.org http://www.wx1box.org Like us on Facebook - http://www.facebook.com/wx1box Follow us on Twitter - http://twitter.com/wx1box _____ SKYWARN_Announce mailing list SKYWARN_Announce@oak.w1mv.org http://oak.w1mv.org/mailman/listinfo/skywarn_announce

Topic: 833 Message: 833

R.I. Fast Ferry seeks OK for Block Island service
By Linda Borg
Journal Staff Writer

The Providence Journal
Posted Mar. 4, 2016 at 11:15 PM

PROVIDENCE – The owner of the Rhode Island Fast Ferry has applied for state permission to operate a seasonal fast ferry from Quonset Point to Old Harbor, Block Island.

Owner Charles A. Donadio testified this week before the Division of Public Utilities and Carriers, the state agency that licenses all carriers, from taxis to ferries. Donadio already operates a fast ferry between Quonset Point and Martha's Vineyard and runs sightseeing cruises on Narragansett Bay. The next hearing is scheduled for March 15.

Donadio's ferry would run two to three trips a day during the summer season. A round-trip ticket would cost between $40 and $50 and the trip would take 50 minutes. He said the service calls for a capital investment ranging from $6 million to $10 million. The vessel would hold between 150 and 350 passengers.

Rhode Island Fast Ferry has to prove to the state that there is a public need for this service and that it's convenient for the public.

The application is opposed by Interstate Navigation Co., owner of the Block Island Ferry, which operates both regular and fast ferry service from Galilee to Block Island, among other routes.

"His goal is to divert our customers who normally drive to Galilee on Route 95 and Route 4," said Michael McElroy, Interstate's lawyer.

Although the ferry trip from Galilee to Block Island is faster, the car ride to Galilee from the highway is 30 to 40 minutes longer than it is to Quonset, McElroy said.

He said diverting customers from the Block Island Ferry would drive up rates for Interstate's "lifeline" ferry service, which provides daily runs to Block Island during the off-season, bringing food and other essential supplies. Competition could also result in service reductions by Interstate to make up for lost summer revenues, according to McElvoy.

The state has insisted that Interstate use 100 percent of its fast-ferry profits to support the lifeline service to Block Island during the off-season, McElroy said.

Rhode Island Fast Ferry, he testified, is not offering to do "any of the heavy lifting required during the other eight months of the year, when there is no profit to be made. Instead, he said Rhode Island Fast Ferry will "pour 100 percent of those ... profits into the pockets of RIFF's owner, Mr. Donadio."

837. RE: RISCON questions

Yahoo group: Scan-RI
Date: 2016-03-16 22:36:50 UTC
From: ~Bill
Topic: 837 Message: 837

Welcome

No, not every agency uses all three Zones , it would tie up all the frequencies.

Browse over to

http://scan-ne.net/wiki/index.php?title=Rhode_Island_Digital_System

and you will get an idea of what towns are on each Zone.

Unless you are in a GREAT site, it's best to select One Zone

Bill - N1KUG

From: Mark Lewin [mailto:lewinm@...]
Sent: Wednesday, March 16, 2016 12:38 AM
To: Scan-RI@yahoogroups.com
Subject: RISCON questions

Just moved from Uniden BC246 to Home Patrol2 and am struggling to come to grips with RISCON.

I'm familiar with the idea of South, North and Providence Towers, all 3 on different frequencies but I'm not quite sure how to deal with it. I live in North Kingstown, the South Tower being closest to me.

Do all agencies broadcast off all 3 towers? It seems to me if I program frequencies for all 3 towers, I run the risk of the scanner getting a weak signal off the North Tower and fail to allow me to get a stronger signal from the South Tower. On the other hand, if I only program the South Tower and agencies don't simulcast off all three towers, I'll miss a lot of transmissions.

Or maybe I don't have a choice and must program all three towers. Can anyone give me some advice?

840. 2016 SKYWARN Training Class Schedule

Yahoo group: Scan-RI
Date: 2016-03-20 14:04:00 UTC
From: ~Bill
Topic: 840 Message: 840

Hello to all...

We have a full slate of SKYWARN Training classes scheduled for 2016. There may be one or two more classes scheduled for the Spring of this year and then the focus will shift to Fall SKYWARN Training class scheduling. The complete SKYWARN Training Class Schedule can be seen via the following links:

NWS Taunton Web Site SKYWARN Class List:
http://www.weather.gov/box/skywarn#fragment-2

WX1BOX SKYWARN Training Class Schedule:
http://www.wx1box.org/node/36

The complete listing is also provided below for convenience:

Wednesday March 23rd, 2016: 700-930 PM:
Worcester Polytechnic Institute - WPI
Higgins Lab - Room 116
Worcester, MA
Taught by: NWS Taunton Forecaster
Registration: Required and can be done via the following link:
http://www.wect.org/e107_plugins/survey/survey.php?14
Campus Map: http://www.wpi.edu/Images/CMS/WPI/walkingmap.pdf

Saturday April 2nd, 2016: 1000 AM-1230 PM:
Westerly Police Headquarters
60 Airport Road
Westerly, RI
Taught by: Amateur Radio Coordinator
Registration: Pre-registration required. Site seats 50 people. RSVP via Rob Macedo-KD1CY via email at rmacedo@... or Jim Creamer-KB1MAO at divingdog@...

Saturday April 23rd, 2016: 1000 AM-1230 PM:
Needham Fire/Police Station
88 Chestnut Street
Needham Center, MA
Taught by: Amateur Radio Coordinator
Registration: Required - RSVP via email: needham-skywarn@...

Tuesday April 26th, 2016: 700 PM-930 PM:
Blandford Town Hall
1 Russell Stage Road
Blandford, MA
Taught by: NWS Taunton Forecaster
Registration: None Required

Thursday April 28th, 2016 - 700-930 PM:
2nd Floor Community Room
Cumberland Public Library
1464 Diamond Hill Road
Cumberland, RI
Registration: None
Taught by: NWS Taunton Forecaster

Saturday April 30th, 2016: 1000 AM-1230 PM:
Bridgewater Public Library
15 South Street
Bridgewater, MA
Taught by: Amateur Radio Coordinator
Registration: None Required.

Monday May 2nd, 2016 - 630-900 PM:
Bloomfield Senior Center
330 Park Ave
Bloomfield, CT 06002
Taught by: NWS Taunton Forecaster
Registration: None Required

Thursday May 5th, 2016 - 700-930 PM:
Fitchburg Fire Department Headquarters - Community Room
33 North Street
Fitchburg, MA
Taught by: NWS Taunton Forecaster
Registration: Required - RSVP via email to Rob Macedo-KD1CY at
rmacedo@...

Tuesday May 10th, 2016 - 700-930 PM:
Canterbury Town Hall - Community Room
1 Municipal Drive
Canterbury, CT 06331
Taught by: NWS Taunton Forecaster
Registration: None Required

Monday May 16th, 2016 - 630-900 PM:
Orange Fire Station 2
50 Millyard Road
Orange, MA 01364
Taught by: NWS Taunton Forecaster
Registration: Pre-registration is required. Please RSVP to Rob Macedo-KD1CY
via email at rmacedo@...

Wednesday May 25th, 2016: 700-930 PM:
Braintree Police Department Training Center
282 Union Street
Braintree, MA
Taught by: NWS Taunton Forecaster
Registration: Pre-registration is required. Please RSVP to Rob Macedo-KD1CY
via email at rmacedo@...

Wednesday June 1st, 2016 - 700-930 PM:
Kent State Hospital - Doctor's Auditorium
455 Toll Gate Road
Warwick, RI
Taught by: NWS Taunton Forecaster
Registration: None Required

Saturday June 4th, 2016 - 1000 AM-1230 PM:
Falmouth Public Library - Hermann Meeting Room
300 Main Street
Falmouth, MA
Registration: None Required
Taught by: Amateur Radio Coordinator
Sponsored by: Falmouth Amateur Radio Association (FARA -
http://www.falara.org/)

Monday June 6th, 2016 - 700-930 PM:
Freetown-Lakeville Middle School Cafeteria
96 Howland Road
Lakeville, MA 02347
Registration: None Required
Taught by: Amateur Radio Coordinator
Sponsored by: Freetown Fire Department

Monday June 6th, 2016 - 700-930 PM:
Harvey Wheeler Senior Center - Concord Council on Aging
1276 Main Street
Concord, MA
Registration: Required - Email: Steve Telsey-N1BDA at
steve.n1bda@... or Rob Macedo-KD1CY at rmacedo@... Taught by:
NWS Taunton Forecaster

Tuesday June 7th, 2016 - 700-930 PM:
West Newbury Public Safety Complex - Training Room
401 Main Street
West Newbury, MA
Registration: Required - Email: Rob Macedo-KD1CY at rmacedo@... Taught
by: NWS Taunton Forecaster

From: ~Bill
Topic: 841 Message: 841

<http://coastguardnews.com/coast-guard-welcomes-yellow-painted-throwback-rescue-helicopter-to-northeast-skies/2016/03/25/> Coast Guard welcomes yellow-painted “throwback” rescue helicopter to Northeast skies
// <http://coastguardnews.com/coast-guard-welcomes-yellow-painted-throwback-rescue-helicopter-to-northeast-skies/2016/03/25/> Coast Guard News

Coast Guard Air Station Cape Cod unveils its yellow-painted MH-60 Jayhawk helicopter Friday, March 25, 2016 in the air station’s hangar. U.S. Coast Guard photo by Petty Officer 2nd Class Cynthia Oldham

BOSTON — Coast Guard Air Station Cape Cod unveiled its yellow-painted MH-60 Jayhawk helicopter Friday during a ceremony at the air station.

The Jayhawk helicopter arrived in Cape Cod Wednesday and will operate out of Air Station Cape Cod for the next four years. The Jayhawk was delivered from Coast Guard Aviation Logistics Center in Elizabeth City, North Carolina, and is one of six specially painted Coast Guard MH-60s donning the chrome yellow paint scheme that Coast Guard and Navy helicopters used in the late 1940s and early 1950s.

Altogether, three different Coast Guard aircraft types, 16 in total, including the Jayhawk and Dolphin helicopters as well as the HC-144 Ocean Sentry airplane, are receiving historic paint schemes representing various eras of Coast Guard aviation.

Coast Guard aviation officially began April 1, 1916 when 3rd Lt. Elmer Stone reported to flight training in Pensacola, Florida. The Coast Guard is celebrating the centennial of Coast Guard aviation throughout 2016, with a variety of activities honoring the accomplishments and sacrifices of the men and women throughout the past 100 years.

Air Station Cape Cod is the only Coast Guard Aviation facility in the Northeast and is responsible for the waters from New Jersey to the Canadian border.

844. Weekly FCC grants March 27-April 02

Yahoo group: Scan-RI
Date: 2016-04-03 15:15:11 UTC
From: Glenn Mitchell
Topic: 844 Message: 844

There is a bug with the emission designators "bold" logic. I'll fix it soon.

The weekly FCC grants and applications are ready:
http://fccgrants.x10host.com/quick.htm

The backup site is here:
http://fccgrants.neocities.org/quick.htm

And past weeks are here:
http://fccgrants.x10host.com/archive/archive.htm

From: ~Bill
Topic: 847 Message: 847

RIDOT looks to revive Providence-Newport ferry service
The Associated Press

WPRI 12 Eyewitness News
Published: April 20, 2016, 11:19 am
Updated: April 20, 2016, 8:16 pm

PROVIDENCE, R.I. (AP/WPRI) – Rhode Island Department of Transportation officials are interested in bringing back a daily ferry service that would link Providence to Newport, Eyewitness News has confirmed.

Transportation officials are searching for a company to run the proposed seven-day-a-week ferries that would run from a site on India Point to Newport's Perotti Park beginning July 1.

The proposed ferry would be the first to run from Providence to Newport since 2009, when the Rhode Island Public Transit Agency canceled its seasonal route due to the lack of federal funding.

DOT spokesman Charles St. Martin says the new ferry service would cater to both casual summer visitors and commuters. He released the following statement to Eyewitness News on Wednesday.

"While RIDOT has received positive feedback on the proposed ferry service, the ultimate arbiter of the financial viability of the service will be determined by the proposals received from private ferry operators. Much of this depends on the availability of boats for the upcoming summer. Owners position their boats for service where they can be most successful and their deployment can change from year to year. Given the historic parking issues in Newport during the busy summer tourism season, and the quick rail connection to Boston in Providence, RIDOT believes that a Providence to Newport ferry could be both viable and generate significant economic activity in both cities."

The DOT's request for proposals stipulates that the ferry would have to run between 10 a.m. and midnight at a minimum.

Has Your Scanner Gone Silent?

We Have the solution

Hello,

The East Bridgewater Police have upgraded their radio system to APCO-25 digital. A new and <http://scannermaster.us4.list-manage.com/track/click?u=ad28a2fa3d173d345458ba188&id=2554c10a53&e=ce1ace32a5> advanced digital scanner is now required to monitor this department. Other communities in the state are expected to go digital at anytime.

We can help you select the right scanner for your area -- and we offer programming to insure that the radio is ready to use right out of the box. Whether it's for your home, your business or for a friend, choose Scanner Master. - <http://scannermaster.us4.list-manage.com/track/click?u=ad28a2fa3d173d345458ba188&id=19aa580e5a&e=ce1ace32a5> Contact us today or see below for the two lowest cost digital scanner options.

Recommend digital scanners for your area

Don't miss a beat with a new Uniden Digital Scanner

Looking to hear East Bridgewater again? Check out two great digital scanners below:

854. Uniden DMR Scanners

Yahoo group: Scan-RI
Date: 2016-05-16 21:55:19 UTC
From: ~Bill
Topic: 854 Message: 854

Today Uniden announced there will soon be a paid upgrade for the BCD436HP and the BCD536HP.

The upgrade will be for conventional and trunked DMR. It looks like it is already in BETA testing and will be shown at the Dayton Hamfest.

Quonset Air Show: Avoid the traffic jams, take a free train instead
The state will provide free commuter trains from Providence and Warwick to next month's show, which will feature the Air Force Thunderbirds demonstration team

What do commuter trains and fighter jets have in common?
They'll both be part of the annual Rhode Island National Guard Open House Air Show, known informally as the Quonset Air Show.

To help alleviate what can be legendary traffic jams at the air show, the state will provide
free commuter trains from Providence and Warwick to next month's show, which will feature the Air Force Thunderbirds demonstration team.

"I can't tell you how many times I've been to the air show and got stuck in traffic," Peter Alviti Jr.,
director of the state Department of Transportation, told The Providence Journal Thursday. So, when National Guard organizers of the air show called him about the possibility of trains to
Quonset State Airport, Alviti was an easy sell. "Right off the bat, you knew it was a good idea."
Steven J. King, managing director of the state-owned Quonset Business Park, which controls most of the land around the airport, agreed. "This will help alleviate some of the traffic congestion we've been experiencing because the show is so popular," he told The Journal. For last year's show, traffic was backed up on the six-mile access road into Quonset all the way to Route 4, and local traffic using Route 1 faced an hour wait to get to the show.

Some years more than 100,000 people have attended the two-day event, which is June 11 and 12 this year. King and Alviti also hope it will be a showcase that will make more Rhode Islanders aware of rail travel. It will also let people without cars, especially in Providence, to get to the show, Alviti said.
"It's just an opportunity for more families to get to this venue easier and without sitting in traffic,"
he said. "It's about giving more people more choices getting to a venue like this."

Details are still being worked out for the service, which will be provided on Massachusetts Bay
Transportation Authority trains paid for from Rhode Island DOT's commuter rail budget, according to Alviti. Planners had considered including three boarding points: the

Providence Amtrak station and the commuter rail stations at T.F. Green Airport and Wickford Junction. Plans are now being made for Providence and Green only.

Alviti said that no advance registration is required. Air show patrons can just show up and get on the train. The schedule, number of trains and total capacity have not been finalized with the MBTA. Alviti said officials are balancing keeping costs down while not having to turn people away.

Parking will be free at the airport's 650-space commuter rail station garage and at a yet-to-be-determined location near the train station in Providence. The airport garage can be reached by taking the Jefferson Boulevard exit from the Airport Connector, which runs between Route 95 and the airport.

Riders will be let off just outside the security fence at the end of the secondary runway at Quonset State Airport, where they will pass through the fence and walk a few minutes to the air show.
The business park does not have a passenger rail station, but King said the park would do landscaping to make the rail-side detraining site easy to navigate.

Besides the Thunderbirds, the air show performers will include a jet truck, special operations parachute team, World War II vintage aircraft, a C-130J Hercules cargo plane and Black Hawk helicopter.

863. No Thunderbirds

Yahoo group: Scan-RI
Date: 2016-06-07 21:01:41 UTC
From: Dunn-CHS, William (CHS)
Topic: 863 Message: 863

USAF Thunderbirds in RI
https://twitter.com/AFThunderbirds/statuses/740222991938793473

_____
The Thunderbirds announced earlier today that they will not be performing at this weekend's air show in RI.
Their investigation into last week's crash in Colorado is still on going.

871. Boxboro! Less than 2 months away!

Yahoo group: Scan-RI
Date: 2016-07-18 11:07:04 UTC
From: Dunn-CHS, William (CHS)
Topic: 871 Message: 871

Hello,
Boxboro! is less than two months away, so our event planning is in full swing.
We are close to publishing our forum schedule - look for another announcement in a few weeks.

In the meantime, take a look at our Friday and Saturday evening programs.
At our Friday DXCC/Contesting dinner, David Collingham, K3LP, will brief
us on the recently completed VP8S DXepdition. On Saturday, noted
radio historian Donna Halper will treat us to "Heroes of Amateur Radio:
Past, Present, and Future".

Visit our website for more info. While you are there, you can sign up a friend for a license class or VE Exam. You can also reserve yourself an operating slot at our W1A special event station.

We still have opportunities for those that would like to volunteer a few hours of them time at the convention. Volunteers will receive a voucher for a free lunch.

Finally, we've published a "Guide to Quick Entry" on our website to learn how to avoid those entry lines.

Visit our website today to find more more and purchase tickets!
http://www.boxboro.org

73,
Bob DeMattia
Chairman, Boxboro Convention 2016 Committee

P.S. Even if you've already ordered tickets, please be sure to check our website for program updates.

Clyde N1BHH - Silent Key

Very sorry to report the news of Clyde N1BHH's passing Friday.
Clyde had been diagnosed just weeks ago with pancreatic cancer.

He will be missed. http://s.radioreference.com/forums/images/smilies/sad.gif

Rest in Peace our Friend and watch over our Monitorings.

Posted Sep. 8, 2016 at 2:10 PM

NEWPORT, R.I. -- A first-of-its-kind Navy ship -- which owes its stunning looks to its sleek, high-tech design -- is pulling into port in Newport on Thursday for a four-day visit.

The guided-missile "stealth" destroyer Zumwalt is on its way to Baltimore for a commissioning ceremony before making its way to its home port in San Diego. It's due to arrive at Naval Station Newport at 4 p.m.

At 610-feet and with an eye-catching angular shape and composite construction intended to avoid radar detection and a sharp-edged hull designed to pierce waves, Zumwalt is the largest and most expensive destroyer ever built for the Navy. Despite its size, its crew of 147 is the smallest for any U.S. destroyer since the 1930s.

Fittingly, the futuristic vessel is under the command of Capt. James Kirk (the same name and rank as the original Star Trek commander).

The real Kirk, named after his grandfather, told the Associated Press he is used to the Starfleet jokes.

"Certainly I have been ribbed every now and then with someone saying, 'Yes, you're going where no man has gone before, on this class of ship,'" Kirk said, referring to the line from the TV series.

The ship left the Bath Iron Works into the remnants of Tropical Storm Hermine on Wednesday.

Zumwalt has what is described as the first naval integrated power system, providing power to the ship's main engines and electrical and combat systems.

Raytheon, in Middletown, contributed to Zumwalt's construction. The company said that about 1,500 workers in Rhode Island worked on Zumwalt's systems and 56 local companies served as suppliers or subcontractors on the project.

U.S. Sen. Jack Reed (D-Rhode Island), the ranking member of the Armed Services Committee and a senior member of the Appropriations Subcommittee on Defense, will join Raytheon workers and executives in viewing Zumwalt on Friday.

The ship is named after Adm. Elmo Zumwalt, a veteran of the Vietnam and Korean wars.

With reports from the Associated Press

From: ~Bill
Topic: 886 Message: 886

Are you a Yahoo user? Here's what you should do
Elizabeth Weise,

USATODAY
7:04 p.m. EDT September 22, 2016

SAN FRANCISCO – Yahoo said Thursday an investigation had confirmed information associated with at least 500 million user accounts was stolen from the company in late 2014.

Yahoo users and others should immediately take steps to protect themselves, and stay vigilant for attempted add-on attacks in the coming days and weeks.

Yahoo also owns the photos sharing site Flickr and the blogging platform Tumblr. No Tumblr accounts were affected. However, some Flickr accounts might have been, as in some cases user’s Flickr and Yahoo IDs are linked. Yahoo is reaching out to those users.

Yahoo has 1 billion people globally who engage with one of Yahoo's properties each month.

“I've actually changed my password since this breach in 2014, but regardless I'm never happy to hear about something like this,” said Mike Rhode of Arlington, Va., a user of Flickr and Yahoo Groups. “However, as a long term employee of the Federal Government, I've had my data compromised twice, and have largely resigned myself to this type of issue being an ongoing problem in today's world.”
Change passwords, security questions

Yahoo said it was notifying potentially affected users and taking steps to secure their accounts. That included invalidating unencrypted security questions and answers so that they could not be used to access an account. Yahoo will also ask potentially affected users to change their passwords.

Yahoo users who haven't changed their passwords since 2014 especially should immediately change not only their passwords but also their security questions, the company said.

Users should also consider enabling two-step authentication on their Yahoo accounts, to provide an extra and very strong level of security. This form of verification sends a text message or call to the user's phone with a code as a second verification step. The code which must be typed in before the account can be opened.

Instructions on how to enable two-step authentication in Yahoo are on its website.

Review non-Yahoo accounts

In addition, users need to think about passwords and security questions from other accounts on which they gave the same or similar information used for their Yahoo account and possibly change them as well.

Once hackers have access to ID and password information for one system, they routinely try the same combination against multiple other platforms to see which ones work, an easily automated process.

Users should avoid clicking on links or downloading attachments from suspicious emails that claim to be updates from Yahoo or others about the breach.

Hackers often use news of big breaches to conduct "phishing" campaigns, sending official-looking emails that make it seem as if Yahoo or other legitimate services are asking them to supply information or click through to a link to repair any damage – something legitimate services will not do.

When in doubt, call or email the company that appears to be sending the message separately, don't go through the email you've been sent.

Yahoo users should be cautious of all unsolicited communications that ask for personal information, the company said.

Finally, all users should review their online accounts for suspicious activity. That includes banks, credit card companies and hotel and airline loyalty programs.

888. Warwick FD on RISCON

Yahoo group: Scan-RI
Date: 2016-09-26 21:32:25 UTC
From: Mark Lewin
Topic: 888 Message: 888

I noticed that Warwick FD has been assigned a talkgroup (TG1162) on RISCON as of August 31 and it is listed as simulcast.

Is this just for future planning or are they now simulcasting? I added this TG to my HomePatrol but have not picked up any traffic at all. I'm in North Kingstown and can pick up the South zone but not North or Providence. Is Warwick coming off the North tower only?

902. Yahoo sets hack record at 1 billion accounts

Yahoo group: Scan-RI
Date: 2016-12-15 12:38:13 UTC
From: Dunn-CHS, William (CHS)
Topic: 902 Message: 902

Based on this new (Story) account, I would urge all to make changes to your various Yahoo Passwords (Flickr, Groups, Yahoo etc)

I change mine at a minimum Annually, based on habit.

Bill

Yahoo sets hack record at 1 billion accounts A new breach revealed by the troubled internet pioneer compromises twice as many user accounts as the record hack it disclosed in September.
by Laura Hautala
by Richard Nieva

CNET
December 14, 2016 2:41 PM PST

It seems Yahoo has outdone itself.

The company said Wednesday that it was hit by yet another hacking attack, this time affecting more than 1 billion user accounts. That's double the number affected by a hack revealed in September.

The hack occurred in August 2013. Stolen data included users' names, email addresses, telephone numbers, dates of birth, and encrypted passwords. Those passwords are scrambled up with an encryption tool called MD5, which experts say is possible to crack with some patience.
The data also included some security questions and answers, some of which weren't encrypted.

"Yahoo is notifying potentially affected users and has taken steps to secure their accounts, including requiring users to change their passwords," the company said in a statement. "Yahoo has also invalidated unencrypted security questions and answers so that they cannot be used to access an account."

The breach is another black eye for Chief Executive Marissa Mayer, who joined Yahoo in 2012 amid great fanfare. The former Google executive was charged with turning Yahoo around and tried to bring the lumbering company into the smartphone era. She made big bets on mobile, refreshing all of the company's mobile apps, but Yahoo hasn't been able to make much money off her projects.

The announcement caps off a rough few months for the troubled tech giant and leaves another blemish on a company seeking to sell itself to Verizon. When Yahoo announced a separate data breach in September, in which hackers in 2014 swiped user information from half a billion accounts, it was said to be the biggest cybersecurity breach ever.

Two weeks later, the company again came under fire after a report said Yahoo built tools to surveil customers' emails for US intelligence officials.

All the while, Yahoo has been awaiting its fate with Verizon, which agreed to buy the company for $4.8 billion in July. The deal is set to close in the first quarter of next year, but Yahoo's disclosure of the previous hack had given Verizon executives pause about the deal.

"We are confident in Yahoo's value and we continue to work toward integration with Verizon," a Yahoo spokeswoman said Wednesday.

Verizon issued a statement that didn't say whether the news of the hack would have an impact on the acquisition. "As we've said all along, we will evaluate the situation as Yahoo continues its investigation," Verizon's statement read. "We will review the impact of this new development before reaching any final conclusions."

Sumit Argawal, co-founder and vice president of product at cybersecurity company Shape Security, said the increasingly damaging hacks that Yahoo has announced fit a clear pattern in companies that don't have their security locked down. Often, he said, companies and organizations start by describing their cybersecurity woes in small terms but keep adding new casualties to the list.

"When entities have mediocre security hygiene, they inevitably end up having lost the keys to a much larger kingdom than we originally thought," Argawal said.

The personal information hackers stole could be used in combination with other hacked data, he added. If a criminal already has a credit card number, he might be able to use the stolen Yahoo data to find the answers to security questions that go along with it, for example.

Yahoo said in its statement that it believes the hacking may be related to the same state-sponsored hacking group it suspects is responsible for the 2014 hack. To Dmitri Sirota, CEO of data protection company BigID, that's a sign that high profile individuals with Yahoo accounts might have been the real target of the hack.

"The reality is within that billion users, there's probably a couple politicians, a few celebrities, a few people in key industries,"
Sirota said.

From: ~Bill
Topic: 917 Message: 919

SO I hit a couple of RS's today and spent time chatting with one of the managers.

The plan is still up in the Air. Some stores have been identified to Close [100%]
Some others, Sprint is looking to take over, unknown if with the current Sprint-RS model or just Sprint.

Quincy is only 10-30 % Off No Scanners Seen
Brockton - Belmont St 30-60% off [Store Closing] One Scanner left [Hand held] and No Antennas, but lots of parts/accessories still - Sadly the Parts Bins (not the contents) had already been sold
Brockton - Crescent St 20-50% off
One P25 Scanner left [Hand Held], One Analog Desk top left. Couple of 800 Antennas

None had Cables for programming.

Bought some needed accessories $120 for $51
Best Savings was a Blue tooth transmitter

920. FIRE SAFETY: Change your clock, check your alarms

Yahoo group: Scan-RI
Date: 2017-03-08 23:25:40 UTC
From: ~Bill
Topic: 920 Message: 920

This weekend as you change your clocks, check your alarms," said Mass State Fire Marshal Peter Ostroskey.

"Prevent that annoying chirp of a dying smoke alarm battery by replacing the alkaline batteries in your smoke and carbon monoxide alarms now, unless you have newer alarms with 10-year sealed batteries," said Mass State Fire Marshal Ostroskey.

He added, "Check the age of your alarms. Smoke alarms need to be replaced after ten years usually, and carbon monoxide alarms after 5-7."

Quincy only 20-50% - Still had a Scanner or two left. [Digital handheld]
Mattapan is 30-60% and is WELL Stocked with accessories/parts. The Manager even indicated she had stuff out back she had not even begun to go thru.
Lots of TV accessories, Cables, Outside antenna mounts/brackets/guys

Brockton - Belmont St - dismantlement of Sprint Display already occurred and some good finds in you hunt thru for them.
Brockton - Crescent St - slowly depleting stock

Appears some folks [likely Flea Market types] have been picking up some of the Speakers etc

The end is Near and likely best to visit early/often

What are the Reports from the other areas ??

928. AT&T Selected by FirstNet Dedicated to First Responders

Yahoo group: Scan-RI
Date: 2017-04-01 11:05:15 UTC
From: ~Bill
Topic: 928 Message: 928

http://about.att.com/story/firstnet_selects_att_to_build_network_supporting_first_responders.html

AT&T Selected by FirstNet to Build and Manage America's First Nationwide Public Safety Broadband Network Dedicated to First Responders

Public-Private Infrastructure Investment Helps Police, Firefighters & Other First Responders Keep America Safe

FirstNet Investments Expected to Create 10,000 Jobs

AT&T* has been selected by the First Responder Network Authority (FirstNet) to build and manage the first broadband network dedicated to America's police, firefighters and emergency medical services (EMS). The FirstNet network will cover all 50 states, 5 U.S. territories and the District of Columbia, including rural communities and tribal lands in those states and territories.

This is a much needed investment in America's communications infrastructure to support millions of first responders and public safety personnel nationwide who protect and serve more than 320 million people across the U.S. This significant public-private infrastructure investment is expected to create 10,000 U.S. jobs over the next two years from AT&T's work for FirstNet. The network buildout will begin later this year.

Randall Stephenson, AT&T chairman and CEO, said, "We are honored to work with FirstNet to build a network for America's police, firefighters and EMS that is second to none. This is an unprecedented public-private investment in infrastructure that makes America a leader and public safety a national priority."

"Today is a landmark day for public safety across the Nation and shows the incredible progress we can make through public-private partnerships," said U.S. Department of Commerce Secretary Wilbur Ross. "FirstNet is a critical infrastructure project that will give our first responders the communications tools they need to keep America safe and secure. This public-private partnership will also spur innovation and create over ten thousand new jobs in this cutting-edge sector."

Today, first responders use commercial networks – the same ones used by consumers and businesses – for mobile data and applications. That can be an issue when a significant public safety crisis happens and commercial networks quickly become congested. It makes it difficult for first responders to communicate, coordinate and do their jobs.

Plus, first responders use more than 10,000 networks for voice communications. These networks often do not interoperate, which severely limits their ability to communicate with each other when responding to a situation.

FirstNet's mission is to fix this. Through this new public-private partnership with FirstNet, AT&T will deliver a dedicated, interoperable network and ecosystem that will give first responders the technology they need to better communicate and collaborate across

agencies and jurisdictions – local, state and national.

“There’s no connection more important than one that can save a life,” said Kay Kapoor, president, AT&T Global Public Sector. “FirstNet is unprecedented in its vision, scope and importance to our nation and the future of public safety communications. We’re honored to be selected for this historic and critical initiative.”

“This partnership brings together FirstNet as the voice of public safety and a global technology team with a proven track record and commitment to public safety,” said FirstNet CEO Mike Poth. “Together, FirstNet and AT&T will move with precision and urgency to deliver this much-needed infrastructure to those who need it the most: the first responders we rely on in disasters and emergencies.”

In addition to creating a nationwide seamless, IP-based, high-speed mobile communications network that will give first responders priority access, the network will help:

Improve rescue and recovery operations to help keep first responders out of harm’s way
Better connect first responders to the critical information they need in an emergency
Further the development of public safety focused IoT and Smart City solutions such as providing near real-time information on traffic conditions to determine the fastest route to an emergency
Enable advanced capabilities, like wearable sensors and cameras for police and firefighters, and camera-equipped drones and robots that can deliver near real-time images of events, such as fires, floods or crimes

FirstNet and AT&T will innovate and evolve the network to keep the public safety community at the forefront of technology advances. For example, as 5G network capabilities develop in the coming years, FirstNet and AT&T will work together to provide the exponential increases in the speed with which video and data travel across the FirstNet network.

To help FirstNet achieve its public safety mission, AT&T has assembled a team that includes Motorola Solutions, General Dynamics, Sapient Consulting and Inmarsat Government.

The broad terms of this 25-year agreement between FirstNet and AT&T are:

FirstNet will provide 20 MHz of high-value, telecommunications spectrum and success-based payments of $6.5 billion over the next five years to support the network buildout; FirstNet’s funding was raised from previous FCC spectrum auctions.
AT&T will spend about $40 billion over the life of the contract to build, deploy, operate and maintain the network, with a focus on ensuring robust coverage for public safety users. Additionally, AT&T will connect FirstNet users to the company’s telecommunications network assets, valued at more than $180 billion.

The strong participation of states in the FirstNet network will help make this significant investment in America’s communications infrastructure a reality. As states join FirstNet, investment in infrastructure and job creation will follow.

For more information on AT&T’s selection, please visit att.com/FirstResponderNews. For more information about FirstNet, please visit FirstNet.gov/mediakit.

*AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand and not by AT&T Inc.

941. RI Air Show

Yahoo group: Scan-RI
Date: 2017-05-16 07:07:50 UTC
From: Dunn-CHS, William (CHS)
Topic: 209 Message: 941

http://wpri.com/2017/05/15/snowbirds-cancel-ri-air-show-performance/

EAST PROVIDENCE, R.I. (WPRI) - The Royal Canadian Snowbirds will not perform in the upcoming Rhode Island National Guard Open House and Air Show<https://www.rhodeislandairshow.com/>, Rhode Island National Guard Senior Master Sgt. Janeen Miller announced Monday.

Miller said the cancellation was due to an "internal safety stand down."

The Snowbirds were slated to headline this year's event, which will be held May 20 and 21 at Quonset Air National Guard Base. In a statement Monday, Miller outlined some of the acts still slated to perform.

The Rhode Island National Guard Open House and Air Show will feature many outstanding performers including the much anticipated newcomer, Randy Ball flying a Soviet Era MiG-17. Adding to the dynamic combined arms display, this year the audience will be awed by the nation's premier attack helicopter, the AH-64 Apache and the venerable CH-47 Chinook helicopter as it transports a Rhode Island National Guard 155 millimeter howitzer to show center.

We are also excited to welcome back award winning performers Sean D. Tucker, Mike Goulian, Rob Holland, the Geico Skytypers, the Jack Link's Screamin' Sasquatch and the Shockwave Jet Truck. Our military demonstrations include the USAF F-16 Viper Demo, the USN F/A-18 Super Hornet, and the USMC AV/8B Harrier.

To cut down on traffic, the state Department of Transportation will be offering free train rides in and out of Quonset<http://wpri.com/2017/04/24/ridot-doubling-free-trains-to-this-years-ri-air-show/> from Providence, T.F. Green Airport, and Wickford Junction.

Last year, the U.S. Air Force Thunderbirds canceled their appearance<http://wpri.com/2016/06/07/thunderbirds-cancel-ri-appearance-following-crash/> after one of their jets crashed in Colorado.

Whistler to Offer Upgrade to Legacy Radio Scanners

Posted by Bryan Hawkins on May 19, 2017
Bentonville, AR- (May 19th , 2017) Beginning June 1st , 2017, The Whistler Group, Inc., a leading industry supplier of radio scanners and mobile electronics, will offer a feature upgrade program for the Pro-18, Pro-668 and PSR-800 scanners. For the cost of $59.99, customers will be able to send in their scanner to Whistler where the unit will be upgraded to receive DMR and MotoTRBOT. The cost of shipping the unit to Whistler will be covered by the customer and Whistler will cover the cost of shipping the unit back to the customer when the upgrade is complete. Upgrades are expected to take up to 2 weeks and all units must be in working condition with no visible damage to be eligible for this upgrade program.
By upgrading their scanner, customers will now receive DMR making them capable of monitoring the following unencrypted channels/systems which were previously not available for legacy scanners:
. Conventional DMR (Entered as a DMR trunked system)
. Hytera XPT
. MotoTRBOT Capacity Plus
. MotoTRBOT Connect Plus
. MotoTRBOT Linked Cap Plus systems

Providence-to-Newport ferry out of service following crash

The Providence Journal
Posted at 7:36 AM

PROVIDENCE, R.I. (AP) — The company hired by the Rhode Island Department of Transportation to run the Providence-to-Newport ferry says it will be out of service for several days after a crash.

SeaStreak says in an announcement on its website that the ferry will be out of service for Monday and Tuesday.

The company says the ferry was damaged during a trip from Narragansett to Providence Saturday night. The ferry hit a buoy while trying to avoid another boat.

A company spokesman says none of the 18 people aboard the ferry at the time were injured.

He says the ferry will head to New York, where it will be repaired before returning to Providence.

Launching last year, the ferry service grew to be so popular that officials extended its service and added trips.

954. RISCON logistics

Yahoo group: Scan-RI
Date: 2017-07-09 18:28:51 UTC
From: Mark Lewin
Topic: 954 Message: 954

wondering if anyone can answer questions about RISCON logistics as I am clearly missing some key elements.

I bought an HP-2 a year or two ago, naively expecting I would be able to pick up every Agency that broadcast on RISCON. I quickly discovered that there are 3 towers and, with a few exceptions, most Agencies broadcast off only one tower.

I discovered that from my home in North Kingston and using an indoor antenna, I could consistently receive South Tower transmissions only. In my area of the state, Newport and Narragansett FD operate on RISCON only, while North Kingstown, Warwick and Coventry FD operate on both RISCON and simulcast on VHF/UHF frequencies.

I found reference to the location of the RISCON South Tower in South Kingstown which is about 12 miles from me. I thought (naively again) that I should be able to pick up all the above named Agencies equally since they all operate from the South Tower. That is not the case. While I routinely get a very strong consistent signal from North Kingstown and Coventry (as well as Little Compton), I get a widely variable signal from Newport, Narragansett and Warwick. On some days, I can't get Warwick at all unless I also scan their VHF signal.

So, clearly, my assumption is incorrect. So where are the receiving/transmitting antennas and how do these Agencies work. One clue I have is that I often hear NKFD respond and the first due company upon arrival establishes Command and "turns the repeater on".

I've tried to find some state official to call and ask these questions but can't find any reference to who controls this. I would assume that calling a state official would be a waste of time anyway as they would regard this information as a security issue.

Can anyone help? And, if this isn't the proper forum, can someone direct me to a better place to pose these questions?

I am in Warwick, granted I am in the hills of Warwick, I have both a Pro2096 and a BC325D

I have both the north and south zones programed in, and I can routinely pick up Woonsocket, Burriville and Charlestown

Newport and Little Compton, East Providence and Providence all on a indoor rubber duckie antenna.

Make sure all three zones are programed. I know there is a transmitter at CCRI on East Avenue in warwick.

The repeater the you are referring to is the truck board repeater, and both Warwick and North Kingstown use the VHF bands for that.

I have three different systems in my favorites list: RISCON north,RISCON south and RISCON providence. All three have all track groups listed (Fire dept only) . Only difference between them is that each has only the frequencies for the appropriate tower. That's how I can tell which tower I'm receiving.

I'm down on the Bay in NK. When I go a bit north on post Rd I can usually pick up the north tower and when I get to the southern end of warwick, pick up providence.

What is a truck Board repeater? I've never heard that term used before

When the engine arrives on the scene the activate the mobile repeater installed in the truck and operate on the fireground channel. In warwick it is now 160.545, looks like NK may use 156.045

Warwick mobile repeater uses 160.545 to access their 154.310 repeater. NK uses a 700Mhz mobile repeater frequency to access their RISCON talkgroup.

959. Re: RISCON logistics

Yahoo group: Scan-RI
Date: 2017-07-11 12:21:55 UTC
From: ecps92@...
Topic: 954 Message: 959

With Trunked systems there is much confusion.

First there are 3 Zones for RISCON as noted North, South and Providence
http://scan-ne.net/wiki/index.php?title=Rhode_Island_Digital_System
http://scan-ne.net/wiki/index.php?title=Rhode_Island_Digital_System

There are, however, Multiple Towers simulcasting the same transmission on the same frequency
on that Zone.

Some TG's may/maynot [up to the GODS who program the System] appear on 1, 2 or all 3 Zones all the time, others might only appear if someone has affiliated [turned on their radio] when outside the primary zone [again up to the programming GODS]

The Enabling of the On-Scene or Mobile Repeater varies by Agency and those frequencies could be VHF, 700 or even 800 Mhz [generally Low Power, so you need to be right near-by]

Ask away, it is the only way to learn.
Bill

RISCON logistics
Expand Messages

Mark Lewin
Jul 9 2:28 PM

wondering if anyone can answer questions about RISCON logistics as I am clearly missing some key elements.

I bought an HP-2 a year or two ago, naively expecting I would be able to pick up every Agency that broadcast on RISCON. I quickly discovered that there are 3 towers and, with a few exceptions, most Agencies broadcast off only one tower.

I discovered that from my home in North Kingston and using an indoor antenna, I could consistently receive South Tower transmissions only. In my area of the state, Newport and Narragansett FD operate on RISCON only, while North Kingstown, Warwick and Coventry FD operate on both RISCON and simulcast on VHF/UHF frequencies.

I found reference to the location of the RISCON South Tower in South Kingstown which is about 12 miles from me. I thought (naively again) that I should be able to pick up all the above named Agencies equally since they all operate from the South Tower. That is not the case. While I routinely get a very strong consistent signal from North Kingstown and Coventry (as well as Little Compton), I get a widely variable signal from Newport, Narragansett and Warwick. On some days, I can't get Warwick at all unless I also scan their VHF signal.

So, clearly, my assumption is incorrect. So where are the receiving/transmitting antennas and how do these Agencies work. One clue I have is that I often hear NKFD respond and the

first due company upon arrival establishes Command and "turns the repeater on".

I've tried to find some state official to call and ask these questions but can't find any reference to who controls this. I would assume that calling a state official would be a waste of time anyway as they would regard this information as a security issue.

Can anyone help? And, if this isn't the proper forum, can someone direct me to a better place to pose these questions?

Truck Board Repeater
sometimes referenced as On-Board Repeater, Mobile Repeater, Pac/RT, SOA Repeaters, On-Scene Repeater
and I am sure many other terms across our great country.

Basically a Repeater built into one of the Vehicles [many times the On-Scene Commander - Chief] to enable better coverage from the Event Scene.

Re: [Scan-RI] RISCON logistics
Expand Messages

Mark
Jul 9 11:43 PM

I have three different systems in my favorites list: RISCON north,RISCON south and RISCON providence. All three have all track groups listed (Fire dept only) . Only difference between them is that each has only the frequencies for the appropriate tower. That's how I can tell which tower I'm receiving.

I'm down on the Bay in NK. When I go a bit north on post Rd I can usually pick up the north tower and when I get to the southern end of warwick, pick up providence.

What is a truck Board repeater? I've never heard that term used before

Topic: 954 Message: 962

I think I overextended by talking about RISCON and repeaters in a single post last week. Now, I've become confused as to whether the discussion of repeaters has anything to do with RISCON vs VHF/UHF. I would like to step back a minute and just talk about RISCON.

Back in my fire dept days in upstate NY, the radio system was VHF/Low. Each radio broadcast on VHF/Low, the signal was picked up by the transmitter/receiver antenna on the highest mountain in the county and was transmitted via land line to the county dispatcher at the county seat.

In RI, there are 3 different variations: Digital RISCON only, VHF or UHF only or a simulcast VHF/RISCON setup. I'm unconcerned with the VHF/UHF only; I assume they work just as they did in the "old days".

For digital RISCON only (such as Newport and Narragansett FD), are all their radios digital? Do they communicate with their dispatcher via a local digital tower? Where does the RISCON tower (in this case, the South Tower) come into play. As I mentioned in my earlier post, my reception of RISCON Agencies differs depending on the Agency location so I'm clearly not getting my signal from the South Tower directly.

For mixed mode Agencies, such as North Kingstown, Warwick and Coventry, are their radios digital RISCON, later converted to analog and simulcast via the older VHF/UHF transmitting antennas? Or, do they still use their older analog radios and with the signal later digitized and broadcast via RISCON? And as before, where should I be aiming a directional antenna: toward the RISCON tower or does each Agency have their own RISCON transmitting antenna?

Thanks for any assistance as I try to drag myself, kicking and screaming, into the 21st century

963. RE: [Scan-RI] RISCON logistics

From: Dunn-CHS, William (CHS)
Topic: 954 Message: 963

Yes, you seem to be mixing and matching, yet that is still correct.

Many RI Dept's maintain

a. A VHF or UHF set of Repeater[s] or Simplex Channels

b. Simulcast Dispatch on both the VHF/UHF and RISCON

c. Patch VHF/UHF into RISCON

d. Have an On-Scene [On-Board a Vehicle] Repeater to enhance coverage into either the VHF/UHF or RISCON, these could be [Depending on the Dept] VHF, UHF, 700 or 800 Mhz

For RISCON , Yes – the entire Trunked System is Digital aka P25

Now we get complicated –[maybe a local who works for a Dept will chime in with corrections]
Yes

1. a Dept/Dispatch might have a mobile set up as a Base Station and would talk, just like a Portable or Apparatus into the Digital Netork
Or

2. a Dept/Dispatch maybe connected right into the Trunked systems Core and be running Dispatch back thru the entire Zone [Set of Towers] itself.

Back to RISCON – there are 3 Zones [South, North and Providence]
Each Zone has Multiple Towers that Transmit at the same time across that Zone.
And No, each Agency does not have its own Tower for RISCON, they are part of the entire Network and All towers within a Zone key up at the same time [Simulcasting]

http://scan-ne.net/wiki/index.php?title=RIDS_SouthZone
http://scan-ne.net/wiki/index.php?title=RIDS_NorthZone
http://scan-ne.net/wiki/index.php?title=RIDS_Providence

Keep in mind that the Spring/Summer will impact your consumer radio for reception [Leaves on the Trees]
as will the Simulcasting, your radio is receiving the signal from all the Zone towers at the same time [think of being in a crowd and everyone is saying the exact same sentence at the identical same time, maybe microseconds apart]

For Agencies who are Patched from Analog VHF/UHF/700/800 into RISCON, Yes they are Analog going into a P25 System and then the Reverse if someone was on RISCON going backward into the Analog systems.

AIMing your Antenna at the Nearest tower for the Zone you are monitoring is a Good First Step, but might not be the total answer as other factors impact your consumer grade radio Such as any other Near-by Strong Transmitters [NWS, Cellular, Radio/TV Towers etc]

The above links will show you roughly where the various Towers in the Zone are, but experiment, experiment, experiment as Only YOU will determine the best Set-up for YOU
And that might end up going with just a Paperclip as your Antenna ☺

991. Track Santa via Norad

Yahoo group: Scan-RI
Date: 2017-12-24 14:29:29 UTC
From: ~Bill
Topic: 991 Message: 991

http://www.wcvb.com/article/norad-to-track-santa-s-movements-on-christmas-ev
e/14493074

CNN) -
The US military command that is charged with protecting the airspace for North America is on alert this Christmas weekend for a man with a white beard and a red suit.
The North American Aerospace Defense Command (NORAD) is preparing to track a sleigh and eight tiny reindeer around the world as it heads for US airspace Sunday night.
NORAD said in a statement that starting at 2:01 a.m. ET on December 24, the public can access its official Santa Tracker to watch Santa Claus prepare for his voyage. Once Santa takes flight, the public can track his whereabouts and access NORAD's "Santa Cams" as he journeys around the world to bring joy to good boys and girls.
Starting at 6 a.m. ET on Christmas Eve, the public can also call 1-877-HI-NORAD (1-877-446-6723) and speak live with NORAD trackers. People stuck in the car on the way to Grandmother's house, and with an OnStar subscription, can access the tracker by hitting their OnStar button.
Marine Col. Bob Brodie of the 601st Air Operations Center said fighter jets will "fly along (Santa's) wing" in a "close escort," and that the center will "monitor him with our satellites and even have infrared trackers to follow Rudolph."
The Santa Tracker program began in 1955 because of a mistake in a Colorado Springs newspaper advertisement from Sears Roebuck & Co. The Sears ad misprinted the telephone number for children to call Santa. The phone number published was actually for the commander in chief's operations hotline at the Continental Air Defense Command (CONAD), which was NORAD's predecessor.
On December 24, 1955, Air Force Col. Harry Shoup was on duty, and instead of hanging up on countless children that night, Shoup checked the radar and updated the eager children on jolly old Saint Nick's location. That 1955 misprint and Shoup's actions started a 62-year tradition that is made possible today by volunteers and corporate sponsors who bear the expense.
